Collection Overview

**Repository:** National Anthropological Archives

**Title:** Donald J. Ortner Papers

**Identifier:** NAA.2014-07

**Date:** 1963-2013

**Extent:** 44.37 Linear Feet (96 boxes, 3 map-folders)

**Creator:** Ortner, Donald J.

**Language:** English

Collection is primarily in English. Some materials are in French and German.

**Summary:** The Donald J. Ortner Papers, dated 1963 to 2013, document his research and professional activities while working in the Division of Physical Anthropology in the Department of Anthropology at the Smithsonian Institution National Museum of Natural History. They primarily deal with his contributions to the field of paleopathology and his work with specimens from Bab edh-Dhra, Jordan and Chichester, England. The bulk of this collection consists of correspondence, files related to Ortner's publications, specimen observations and analysis, and photographs.

Administrative Information

**Acquisition Information**

These papers were transferred to the NAA from the Department of Anthropology in 2014.

**Related Materials**

The following photo lots depicting Donald J. Ortner can be found at the NAA:

Photo Lot 7D: Photograph of attendees after American Anthropological Association annual meeting, 1965

Photo Lot 7A: Portraits made at the annual meeting of the American Association of Physical Anthropologists, 1970

Photo Lot 77-45: Photograph of Smithsonian Institution physical anthropologists, circa 1977

Photo Lot 4822: Division of Physical Anthropology collection of photographs of physical anthropologists, undated

Sound recordings of Donald J. Ortner at the NAA:

Other collections at the NAA in which Donald J. Ortner is a correspondent or creator of material:

Records of the Department of Anthropology, 1877-1980

Department of Anthropology Annual Reports, 1920-1983

John Lawrence Angel Papers, 1930s-1980s

Three films that document Ortner’s work in Bab edh-Dhra are located in the Human Studies Film Archives (HSFA):

Film number 2000.9.1, The Bones of Bab edh-Dhra, ca. 1970s

Film number 2000.9.3, Bab edh-Dhra Film Project, 1970-1980

Film number 2014.3, City of the Dead, 1978

The Smithsonian Institution Archives holds the original City of the Dead in Accession 05-282, Office of Telecommunications, Productions.

Processing Information

Overall, Ortner’s original organization has been maintained. Some series and subseries were created to call out Ortner’s larger projects and to make the collection easier to navigate. Materials within folders retain Ortner’s original order, but folder titles have been changed where the original title was abbreviated or not fully descriptive of the contents. The processing archivist rehoused the materials; removed and copied sticky notes; separated oversize and restricted materials; and rehoused negatives, slides, and some photographs.

Processed and encoded by Alice Griffin, 2016.

Preferred Citation

Donald J. Ortner Papers, National Anthropological Archives, Smithsonian Institution.

Restrictions

The Donald J. Ortner Papers are open for research.

Access to the Donald J. Ortner Papers requires an appointment.

Requests to view forensic files are subject to review by the NAA. Forensic files can only be viewed in the National Anthropological Archives reading room. No copies are permitted unless permission is granted by the agency the report was written for.

Electronic records are unavailable for research. Please contact the reference archivist for additional information.

Use of audiovisual recordings with no duplicate access copy requires advance notice.
Biographical Note

Donald J. Ortner was a biological anthropologist in the Department of Anthropology at the Smithsonian National Museum of Natural History (NMNH). By the time of his death, Ortner had served in many positions at the Museum, including Acting Director (1994-1996). His areas of expertise included human paleopathology, human health in medieval England, bioarcheology of the ancient Near East, and the history and evolution of human infectious diseases. Ortner was a founding member of the Paleopathology Association.

Ortner was born in 1938 in Stoneham, Massachusetts and arrived at the NMNH in 1963, working primarily with J. Lawrence Angel who had recently started as Curator in the Division of Physical Anthropology. While working at the Museum, Ortner completed his Master's in Anthropology in 1967 and received his Ph.D. from the University of Kansas in 1970. His doctoral dissertation was on *The Effects of Aging and Disease on the Micromorphology of Human Compact Bone*.

In 1977, Ortner joined the Expedition to the Dead Sea Plain directed by archaeologists Walter E. Rast and R. Thomas Schaub, focusing on the site of Bab edh-Dhra. Ortner studied the tombs and skeletons for data indicating cultural and biological changes, especially urbanization and connection to the development of other "Western civilizations." Ortner participated in two more field seasons in Bab edh-Dhra in 1979 and 1981. From his research at Bab-edh-Dhra, Ortner published many scholarly articles and recreated two tombs for the Hall of Western Civilization at NMNH.

In 1988, Ortner began his collaboration with the University of Bradford in Bradford, England, teaching short-courses on paleopathology. While a Visiting Professor at the University, he also participated in a project on human health and disease in Medieval England. The project focused on leprosy and syphilis in skeletons from St. James Hospital's *leprosarium* cemetery in Chichester, Wharram Perry, and Magistrates' Court in Kingston-upon-Hull. He received an Honorary Doctorate of Science from the University in 1995.

Donald J. Ortner died on April 29th, 2012 in Maryland.

**Chronology**

1938 Born on August 23 in Stoneham, Massachusetts.
1960  Received B.A. in Zoology from Columbia Union College in Takoma Park, Maryland.
1963  Began working at the Smithsonian Institution.
1967  Received M.A. in Anthropology from Syracuse University.
1969  Promoted to Assistant Curator.
1970  Received Ph.D. from the University of Kansas.
1971  Promoted to Associate Curator.
1971-1975  Taught part-time at the University of Maryland.
1974  Spent summer with Dr. Walter G. J. Putschar studying pathological specimens in Europe.
1976  Promoted to Curator in the Anthropology Department, National Museum of Natural History.
1977  First field season at Bab edh-Dhra cemetery site in Jordan.
1979  Second field season at Bab edh-Dhra cemetery site in Jordan.
1981  Third field season at Bab edh-Dhra cemetery site in Jordan.
1994-1996  Acting Director of the National Museum of Natural History.
1995  Awarded an Honorary Doctorate of Science degree from the University of Bradford.
1999-2001  President of the Paleopathology Association.
2005  Received Eve Cockburn Award from the Paleopathology Association in recognition of his contributions in the field of paleopathology.
2012  Died on April 29 in Maryland.

Scope and Contents

The Donald J. Ortner Papers primarily document his projects, research, and correspondence working as a biological anthropologist in the Division of Physical Anthropology of the Department of Anthropology from 1963 until his death in 2012. The bulk of the projects represented relate to his work in paleopathology, such as the Near Eastern skeletal biology program in Jordan and the medieval skeletal disease project in England. The collection consists of notes, research materials, correspondence, data and data analysis, transcripts of specimen observations, maps, blueprints, artwork, negatives, slides, photographs, CD-Roms, floppy discs, and sound cassettes.

University of Bradford

Geographic Names:
England
Jordan
Peru
Virginia
Series 1: Correspondence, 1966-2012

This series, dated 1966 to 2012, consists of correspondence, sent and received, relating to Ortner's publications; involvement in the Paleopathology Association; work as Vice-Chairman of the Bioarchaeology Panel of the Wellcome Trust; forensic work for outside agencies; his position as advisor and reference for students; his position as Acting Chair of NMNH; involvement in the Bab edh-Dhra site excavation; work as Visiting Professor at the University of Bradford; and family life and other activities.

Ortner's classification of daily correspondence, professional correspondence, and personal correspondence was retained. Therefore, there is significant overlap in subjects and types of correspondence between these subseries. Overall, daily correspondence tends to be from colleagues within the museum, publishers, or other people with whom Ortner often communicated. Professional correspondence tends to be more formal, such as letters from students, people organizing conferences, and people who had never met Ortner in person, but worked his field. Correspondents in Ortner's personal correspondence include Ortner's parents, Ortner's children, and the pastor at the church Ortner attended. Some letters in personal correspondence are more professional in nature.

The original order of these files was maintained.

This series is arranged in 3 subseries: 1.1 Daily correspondence, 1995-2012; 1.2 Professional correspondence, 1987-2012; 1.3 Personal correspondence, 1966-2012

Series 1.1: Daily correspondence, 1995-2012

Series 2: Subject files, 1965-2013, undated

This series, dated 1965 to 2013 and undated, reflects parts of Ortner’s whole career. It includes his work at the University of Bradford, as Acting Director of the NMNH, at the site of Bab edh-Dhra in Jordan, as Vice-Chairman of the Bioarchaeology Panel of the Wellcome Trust, and for the Paleopathology Association. It also documents his daily activities in the Department of Anthropology. Of particular interest are materials for the publication project for the archaeological site of Tell Jemmeh with Gus Van Beek and David Ben-Shlomo, which Ortner worked on from 2008 up until his death.

Most of the materials are sent and received correspondence or memos grouped by an individual or organizational correspondent. An individual's file may also hold correspondence that refers to them, such as an academic or job reccommendation from Ortner. Other materials include programs from conferences, scholarly articles, photographs, slides, CD-Roms, and floppy discs.

Cross-referencing information from this series with other series may be required to understand it in context.

This series is arranged alphabetically. The series maintains Ortner's original arrangement with some changes for clarity.

Requests to view forensic files are subject to review by the NAA. Forensic files can only be viewed in the National Anthropological Archives reading room. No copies are permitted unless permission is granted by the agency the report was written for.

Return to Table of Contents

This series consists of fieldwork materials, data analysis, and publications related to Ortner's work with specimens from Jordan, Egypt, Yemen, and Bahrain, dated 1977 to 2010 and undated. The bulk of this series relates to Ortner's participation in fieldwork at a cemetery complex in Bab edh-Dhra, Jordan, a part of the Expedition to the Dead Sea Plain with Walter Rast and R. Thomas Schaub.

Subseries 3.1, Publications, dated 1977 to 2008 and undated, includes drafts, data, data analysis, research materials, notes, correspondence, photographs, a blueprint, and a map related to Ortner's publications on his work in Bab edh-Dhra. The computer disks in this series are digital copies of the paper manuscripts they are included with. Several folders in this subseries contain planning material related to the series of books: Reports of the Expedition to the Dead Sea Plain. Bruno Frohlich and Ortner's 2008 book The Early Bronze Age I Tombs and Burials of Bab edh-Dhra, Jordan, also represented in this series, was volume 3 of the Reports.

Subseries 3.2, Bab edh-Dhra field seasons 1977 and 1979, dated 1977 to 2005, includes travel and finance documents, data analyses, correspondence, photographs, negatives, and maps. Of note are the sound recordings and transcripts of Ortner's audio journals in 1977 and 1979; as well as an interview, interpreted by Muhammed Darwish, conducted by between Ortner and Mahmoud Mustafa about burial practices of people living in El Mazra. Recordings are on 9 sound cassettes.

Subseries 3.3, Bab edh-Dhra field season 1981, dated 1980 to 1990, includes mostly financial and planning materials because Ortner did not travel to the site for this field season.

Subseries 3.4 Other projects and events, 1980 to 1983 and undated, includes files from other projects Ortner was involved with in Jordan, Egypt, Yemen, and Bahrain unrelated to the Expedition to the Dead Sea Plain. This includes a proposal for a Near Eastern Skeletal Biology Program with Smithsonian archaeologist Bruno Frohlich in collaboration with Yarmouk University in Bahrain. There is not much information on the Early Islamic Project in Egypt, the Yemen mummy project, or the Abydos study.

The series maintains Ortner's original arrangement with some changes for clarity.

The CD-Roms and floppy disks are unavailable for research due to preservation concerns.

Series 4: Medieval Skeletal Disease Project, 1988-2006, undated

This series, dated 1988 to 2006 and undated, consists of notes, data, publications, grant applications, maps, photographs, and negatives related to Ortner's Medieval Skeletal Disease Project in collaboration with Brian Connell. Most of the data and observations are from specimens from the Leprosarium cemetery in Chichester, England, held in the Biological Anthropology Research Centre of the University of Bradford.

Ortner also collected notes and data on skeletons from Wharram Percy, Hull Magistrates Court, and Blackfriars in Gloucester. Grant applications submitted by Ortner to the Smithsonian Scholarly Studies program, 1993-1994, and to the National Institutes of Health (NIH), 1997-1998, are also included.

The CD-Roms and floppy disks are not available for research due to preservation concerns.

Box 67

Includes hard copy of the chapter with digital surrogates on floppy disc and CD-Rom.
Chapter in Lepers Outside the Gate, 2008, edited by J. Magilton, F. Lee, and A. Boylston.

The floppy disk and CD-Rom are restricted for preservation reasons.

       Includes 9 slides (photographs) of the excavation at Hull Magistrates’ Court and Calvin Wells Lab.
Series 5: Other publications, projects, and research, 1963-2011, undated

This series, dated 1963 to 2011 and undated, consists of drafts, data, transcriptions of observations, correspondence, contracts, research materials, photographs, slides, and negatives that were a part of publications, projects, or research not immediately related to the Ancient Near Eastern Biology Program or the Medieval Skeletal Disease Project. Ortner visited many museums and universities in Europe, the United States, and Australia to study specimens and those observations are represented in this series. This includes materials from Ortner's trip to Europe during the summer of 1974 with Dr. Walter G. J. Putschar.

Also of note are materials for the publication of the 2nd edition of *Identification of Pathological Conditions in Human Skeletal Remains*. Ortner published the first edition of this book with Dr. Walter G. J. Putschar.

The series maintains Ortner's original arrangement with some changes for clarity.

The CD-Roms and floppy disks are not available for research due to preservation concerns.

"The effect of temperature on protein decay in bone: its significance in nitrogen dating of archaeological specimens":

Identification of Pathological Conditions in Human Skeletal Remains revised edition:

Box 73  Permission agreements, 1999-2003

Box 73  Writing schedule, 1999

Box 73  Correspondence regarding first edition, 1978-1980

Box 73  Contracts and administrative correspondence, 2000-2002

Box 74  Publication information, 1999-2001

Box 74  Reviews of first edition, 2003, undated

Box 74  Revision ideas, 1992

Box 74  Introduction, undated

Box 74  Pathology vs. pseudopathology, 1991

Box 74  Table of Contents, 1999

Box 74  Pathology specimens, undated

Box 74  Chapter 1: Introduction, 1998, undated

Box 74  Chapter 3: Background data in paleopathology, 1999

Box 74  Chapter 4: Methods, 1992, undated

Box 74  Chapter 5: Chemical analysis, 1999

Box 74  Chapter 8: Trauma, undated

Box 74  Chapter 10: Infectious diseases, tuberculosis and leprosy, 1994, undated

Box 75  Infectious diseases research, 1992-1994, undated

Box 75  Reticuloendothelial and hemopoietic research, 1991, undated
2 folders

Box 75  
Metabolic diseases research, undated

2 folders

Box 75  
Joint diseases research, 2000, undated
Includes hard copy of a case study of specimen #374619 with digital surrogate on floppy disc.
The floppy disk is restricted for preservation reasons.

Box 75  
Skeletal malformations research, undated

Box 75  
Tumors research, undated

Box 76  
Tables, undated

Box 76  
Paleopathology McGraw-Hill chapter, 2010

Box 76  

Box 76  
"Differential Diagnosis and Issues in Disease Classification," edited by Anne Grauer, 2010-2011
Includes hard copy of chapter with digital surrogate on CD-Rom and 6 photographic prints of figures to be used in publication.
The CD-Rom is restricted for preservation reasons.

Box 76  
"Putschar: Pathologist, Paleopathologist, Teacher", 2008-2011
Includes a hard copy of the article, figures, and images with digital surrogates on 5 CD-Roms; and 1 copy print of a photograph of Pustchar.
The CD-Roms are restricted for preservation reasons.

Box 76  
"The Skeletal Manifestations of Subadult Scurvy", 2004-2005
Includes 18 slides (photographs) of skeletal evidence of scurvy from the site of the Roman Imperial City of Sirmium in Serbia.

Box 76  
"What Skeletons Tell Us: The Story of Human Paleopathology", 2010-2011

Box 76  
"Evidence of Childhood Scurvy in Byzantine Crete, Greece", 2011

Box 77  
"Skeletal Manifestations of Skin Ulcer in the Lower Leg", 2006

Box 77  
"Differential Diagnosis of Skeletal Lesions in Infectious Disease", 2006
Includes hard copies of chapter with digital surrogates on 1 floppy disc and 2 CD-Roms.
The floppy disk and CD-Roms are restricted for preservation reasons.

Box 77  
"Infectious Disease and Human Evolution", 2005
Includes hard copy of article with digital surrogate on floppy disc.
The floppy disk is restricted for preservation reasons.

Box 77  
"Ecology, Culture, and Disease in Past Human Populations", 2005-2008
Includes hard copy of chapter with digital surrogate on floppy disc.
The floppy disk is restricted for preservation reasons.

Box 77
"Ales Hrdlicka and the Founding of the AJPA", 2005-2009
2 folders
Includes a hard copy of the article with digital surrogate on floppy disc; and 4 photographic prints of images for publication.
The floppy disk is restricted for preservation reasons.

Box 77
"Evidence of Acute infectious Disease in Human Skeletal Paleopathology", 2002

Box 77
"Case Reports on Paleopathology: Hellenistic Crete", 1997

Box 77
"Pathological Evidence of Malnutrition", 1994
Includes hard copy of article with digital surrogate on CD-Rom.
The floppy disk is restricted for preservation reasons.

Box 77
"Hip Fracture and Osteoporosis in a XIIth Dynasty Female Skeleton from Lisht, Upper Egypt", 1996-1997
Includes 2 x-rays and 7 photographic prints to be used as figures in publication; and 1 floppy disc labeled "Dequeker, Sept. '96."
The floppy disk is restricted for preservation reasons.

Box 77
Foreword for Ethne Barnes book, 1993
Includes hard copy of the foreword with digital surrogate on floppy disc.
The floppy disk is restricted for preservation reasons.

Box 78
"Syphilis" comment on Livingstone's Hypothesis, probably 1992

Box 78
"Bone Growth and Paleopathology", 1990

Box 78
Paleopathological goals, 1993
Includes hard copy of manuscript with digital surrogate on floppy disc.
The floppy disk is restricted for preservation reasons.

Box 78
"New Approaches to the Study of Disease in Archaeological New World Populations", 1991

Box 78
"History of Human Diseases During Prehistory and Antiquity in the Old World", 1989

Box 78
Health, disease, and population adaptation, undated
Contains 3 floppy discs of unidentified contents.
The floppy discs are restricted for preservation reasons.

Box 78
"Descriptive Methodology in Paleopathology", 1989-1990
Includes hard copy of article with digital surrogates on 2 floppy discs.
The floppy discs are restricted for preservation reasons.

Box 78
Includes hard copy of manuscript with digital surrogate on floppy disc. The floppy disc is restricted for preservation reasons.

Box 78

Introduction to "Regional Atlas of Bone Disease" by Mann and Murphy, 1988, undated
Includes hard copy of introduction with digital surrogate on floppy disc. The floppy disc is restricted for preservation reasons.

Box 78

"Human Health and Disease in the Mesolithic and Neolithic Ages", 1987-1989
Includes hard copies of original and revised versions of manuscript with digital surrogates on 5 floppy discs. The floppy discs are restricted for preservation reasons.

Box 78

"Human Health and Disease in the Mesolithic and Neolithic Ages", 1987-1989
Includes hard copies of original and revised versions of manuscript with digital surrogates on 5 floppy discs. The floppy discs are restricted for preservation reasons.

Box 78

"Metabolic and Endocrine Disorders in Human Paleopathology", 1986, undated
Includes hard copy of paper with digital surrogate on floppy disc. The floppy disc is restricted for preservation reasons.

Box 78

"Skeletal Evidence of Pre-Columbian Treponomal Disease in North America", 1986

Box 78

Radiology in paleopathology, 1986

Box 78, Map-folder 1

Polyarticular arthritis in the National Museum of Natural History 374619, 1981
Five oversize skeletal diagrams moved to map-folder 1.

Box 78

Walter G. J. Putschar observations, 1983-1985
4 folders
Transcriptions of observations by Dr. Walter G. J. Putschar of paleopathology cases at NMNH.

Box 78

"Report on the Human Skeletal Remains from the Fisher Site (44-LD4), Loudoun County, VA", undated

Box 79

Dictations and photographs of specimens studied at the Royal College of Surgeons of Edinburgh, 1988
Includes photographic prints and 74 negatives (photographic). In this folder, not all negatives have associated prints, and some prints do not have associated negatives; therefore both the prints and the negatives may need to be consulted to view all of the images. Also includes 1 floppy disc labeled "NW69". The floppy disc is restricted for preservation reasons.

Box 79

"Bone Changes in the Human Skull Probably Resulting from Scurvy in Infancy and Childhood", 1997
Includes hard copy of the article with digital surrogates on 3 floppy discs; 1 floppy disc containing correspondence from January 1-May 31, 1996; and 1 floppy disc containing a manuscript titled "Eosinophilic Granuloma in a 13th Century Greek Medieval Subadult Skeleton." The floppy discs are restricted for preservation reasons.

Box 79

"Scurvy in Archeological Human Remains from the American Southwest", 2000, undated
Box 79  Hawaii/Australia pathology specimens at Bishop Museum photographs, 1988
   September-October
   2 folders
   Includes 309 negatives (photographic) with all associated photographic prints in
   the same folder.

Observations on pathological cases:

Box 79  Bishop Museum, 1988
Box 79  Shellshear Museum, Sydney, Australia, probably 1988
Box 79  Australian Museum, probably 1988
Box 79  South Australian Museum, Adelaide, Australia, 1988
Box 80  University of Zurich, Institute of Pathology specimen photographs, 1988
   Includes 87 negatives (photographic) with all associated photographic prints in
   the same folder.
Box 80  "J. Lawrence Angel: Contributions to Anthropology" AAA presentation slides, 1987
   Includes 13 slides (photographs).
Box 80  "Bone Lesions in a Probable Case of Scurvy from Metlatauk, Alaska", 1984
Box 80  University of Geneva pathological specimens photographs, 1983
   Includes 37 photographic prints.
Box 80  FABC [First African Baptist Church?] photographs and slides, undated
   Includes 12 slides (photographs) and 56 photographic prints of specimens.
Box 80  Peru scurvy project, 1996-1999
   4 folders
   Includes 6 photographic contact sheets of specimens in NMNH and 2 floppy
discs, one unlabeled and the other contains the Kimmerle files.
   These floppy discs are restricted for preservation reasons.
Box 80-81 North American scurvy project, 2001
   2 folders
Box 81  "Disease Ecology", 2000-2001
   Includes hard copy of chapter with digital surrogate on floppy disc.
   The floppy disc is restricted for preservation reasons.
Box 81  "Male/Female Immune Reactivity", 1997-1999
   Includes hard copies of chapter and figures with digital surrogates on 3 floppy
discs.
   The floppy discs are restricted for preservation reasons.
Box 81  "Paleopathology Implications for the History and Evolution of Tuberculosis", 1998-1999
Includes hard copy of manuscript with digital surrogate on floppy disc.
The floppy disc is restricted for preservation reasons.

Box 81  Meningioma paper, 2002-2003
Includes hard copy of article with digital surrogates on 3 CD-Roms.
The CD-Roms are restricted for preservation reasons.

Box 81-82  Hyperthyroidism, Ortner and Hotz, 2003, undated
2 folders
Includes hard copies of article and figures with digital surrogates on 2 CD-Roms
and a floppy disc; and 1 floppy disc labeled "cretin research 1988."
The floppy discs and CD-Rom are restricted for preservation reasons.

Box 82  Handbook of North American Indians, Vol. III, 2002-2005
2 folders

Box 82  Research notes in Norway, 1992

Summer 1974 research:

Box 82  Transcriptions of observations, 1974
3 folders

Box 82, Map-folder 2  Travel plans, 1974
Map of Switzerland marked where specimens were found moved to Map-folder 2.

Box 83  CT scans of skeletons of the Americas, 1993

Return to Table of Contents
Series 6: Professional activities, 1971-2007, undated

This series, dated 1971-2007 and undated, consists of materials relating to Ortner's professional activities. These include notes, correspondence, drafts, newsclippings, photographs, and computer disks.

Subseries 6.1, Lectures, conferences, symposia, 1975-1986 and undated, includes Ortner's notes and research materials for these lectures or talks at conferences. Ortner's lecture addressing science and culture in modern society was for the Smithsonian Resident Associate Program in 1984. The research materials that accompany Ortner's notes for his lecture on science and religion follow the controversy and lawsuit over the National Museum of Natural History's exhibit on evolution, which opened in 1979. The materials from the Smithsonian's Seventh International Symposium, How Humans Adapt: A Biocultural Odyssey include files from Ortner's participation in the 1981 symposium. Drafts, book reviews, and public relations materials for the book that accompanied the symposium, which Ortner edited, are also included.

Subseries 6.2, Forensic work, 2002, 2007, includes correspondence, notes, photographs, CD-Roms, and floppy discs relating to forensic cases from outside agencies on which Ortner was asked to collaborate. In these cases Ortner used remains to determine cause of death, verify identity, or provide other information for the case.

Subseries 6.3 Other professional activities, 1971-2005, includes NMNH Research Associate Rebecca Ferrell's NIH grant proposal for a project titled "The Biology of Striae of Retzius in Human Tooth Enamel" that Ortner supervised in 2005; case reports Ortner organized and edited for the Paleopathology Newsletter; workshops he organized for the annual meetings of the Paleopathology Association from 1997-2002; and Ortner's short-courses in paleopathology. The material from the short-courses in paleopathology includes planning and correspondence from when they were offered as a lecture series at the Smithsonian Institution with Walter G. J. Putschar during the years 1971-1974 and 1985. The file also includes short-courses at the University of Bradford during the years 1988, 1994, 1998, 2001, 2003, 2005.

Subseries 6.4 Photographs, 1960s-2000s, includes slides, negatives, and prints depicting professional events, such as conferences and awards ceremonies; Ortner at work in his office or lab with colleagues and interns; and a few prints of unidentified specimens. Notable people included in these images are Thomas Dale Stewart and John Lawrence Angel. Also included are negatives of photographic portraits of children, probably Ortner's.

The floppy discs and CD-Roms are restricted for preservation reasons.

Requests to view forensic files are subject to review by the NAA. Forensic files can only be viewed in the National Anthropological Archives reading room. No copies are permitted unless permission is granted by the agency the report was written for.

6.1: Lectures, conferences, symposia, 1975-1986, undated

Box 83 Science and religion, 1975,1980, 1984, undated

How Humans Adapt: A Biocultural Odyssey, Smithsonian Institution's Seventh International Symposium:

Box 83 How Humans Adapt book reviews, 1983-1984
Box 83, Map-folder 1  Symposium planning, 1981
Oversize blueprint of layout for How Humans Adapt symposium moved to map-folder 1.

Box 83  Symposium organization format, 1981

Box 83  Guidelines for essayists, undated

Box 83  Symposium commentators, 1980-1981
2 folders

Box 83  Essayists, 1980-1981, undated

Box 83  Participants, 1981

Box 83  Grant applications, 1978-1980

Box 83  Objectives of the symposium, 1979, undated

Box 84  Biosocial dynamics in human populations, 1977-1980
Proposed topic for the 1981 symposium.

Box 84  Symposium planning conferences, 1978-1979
6 folders

Box 85  Correspondence, 1980-1984

Box 85  Observers, 1981

Box 85  Ortner essay, 1981, undated

Box 85  Summary report, 1981, undated

Box 85  Photographs of the symposium, probably 1981
Includes photographic prints and contact sheets.

Box 85  Essays prepared in advance for participants in symposium, 1981-1982

Box 85  Pair bonding, undated

Box 85  How Humans Adapt public relations, 1982-1984

Box 85  SI Conference on Skeletal Manifestations of Inflammatory Arthropathies in Archeological Specimens, 1986

Requests to view forensic files are subject to review by the NAA. Forensic files can only be viewed in the National Anthropological Archives reading room. No copies are permitted unless permission is granted by the agency the report was written for.

Box 93  State of Iowa vs. Boss, 2002
2 folders
Includes 2 floppy discs and 10 CD-Roms.
The floppy discs and CD-Roms are restricted for preservation reasons.

Box 93
Forensic case, Owsley, 2007
Contains 1 CD-Rom and 1 photographic print.
The CD-Rom is restricted for preservation reasons.

6.3: Other professional activities, 1971-2005

Box 85
NIH grant application with Rebecca Ferrell, 2005

Box 86
Paleopathology Newsletter case reports, 1983-1984

Box 86
Paleopathology Association workshops, 1997-2002

Box 86
Smithsonian Institution-University of Bradford short courses in paleopathology, 1971-2005, undated
4 folders
Includes 2 photographic prints of 1985 short-course class at the Smithsonian and 7 photographic prints of short-course classes probably at University of Bradford in 1988.

Box 86
George Washington University professorship, 1970

6.4: Photographs, 1960s-2000s

Box 86
Photographs, 1960s-2000s
2 folders
Includes photographic prints, 25 negatives (photographic), and 7 slides (photographs). In this folder, not all negatives have associated prints, and some prints do not have associated negatives; therefore both the prints and the negatives may need to be consulted to view all of the images.

7: Biographical and office files, 1963-2011, undated

This series, dated 1963 to 2011 and undated, includes biographical material related to Ortner's education and career as a biological anthropologist at the Smithsonian. It contains resumes, diplomas (including the Honorary Doctorate of Science from the University of Bradford), administrative office files, retirement plans, travel documents, and a calendar of appointments.

Of note are several folders containing Ortner's reviews for the Professional Accomplishments Evaluation Committee (PAEC), which advised the director of the NMNH on matters related to the competency and progress of staff members. The PAEC complemented the annual performance plans and reviews, also present in this series, by focusing on a longer term level of performance. PAEC reviews include what Ortner was doing professionally in research, publications, public functions, field work, exhibits, honors and awards received, professional memberships, grants and contracts, teaching, and job-related training.

The floppy discs and CD-Roms are restricted due to preservation concerns.

Box 87
Newsclippings and articles about Dr. Ortner's work, 1986-1988
Box 87  Job applications and letters, 1982-1994
Box 87  Graduate study, 1963-1970
Box 87  PhD program, 1967-1970
Box 87  Government employment forms, 1963
Box 87  Retirement plans, 2003-2007
Box 87  Calendar of appointments, 1994-2004
   2 folders
Box 87  University of Bradford Honorary Doctorate, 1995
   Includes hard copy of acceptance speech with digital surrogate on floppy disc.
   The floppy disc is restricted for preservation reasons.
Box 87  Joyce Ortner volunteer forms, 1994-1998
Box 87  Curricula vitae, 1977-1995
Box 88-89, 93  Professional Accomplishments Evaluation Committee (PAEC) reviews,
   1966-2011
   8 folders
   Includes a hard copy for the 1989 review with digital surrogates on 3 floppy discs; a hard copy for the 2004 review with digital surrogates on 1 CD-Rom and 2 floppy discs; and 1 floppy disc containing Intergraph files for the PAEC.
   Folder 8 includes performance reviews of other staff members. This folder was moved to box 93 and is restricted until 2075.
   The floppy discs and CD-Roms are restricted for preservation reasons.
Box 89  Information related to career appointment, 1975-2011
   2 folders
Box 89  Financial reports, 1983-2010
   Includes 1 floppy disc containing SI-1085 form: Confidential Statement of Employment and Financial Interests.
   The floppy disc is restricted for preservation reasons.
Box 89-90  Performance plans and reviews, 1993-2007
   9 folders
   The floppy discs are restricted for preservation reasons.
Box 90  Awards, 1967-2003
Box 90-91  Travel, 2000-2012
12 folders

Box 91  Ortner family history, undated

Box 91  Who's Who in America biographical data form, 1995
Series 8: Artwork, 1978, undated

This series, dated 1978 and undated, reflects Ortner's work at Bab edh-Dhra in Jordan. It includes three drawings: two maps of Jordan marked with the site of Bab edh-Dhra and a depiction of a burial shaft at the site.

Box 96
Hand-drawn map of Jordan showing rivers and Bab edh-Dhra, undated

Box 96
Hand-drawn map of Jordan showing surrounding countries, undated

Map-folder 3
Drawing of Bab edh-Dhra burial shaft by Jacqui Schulz [?], 1978
Published in "Cultural Change in Bronze Age" in Smithsonian Magazine, a copy of which is in this collection: Series 3. Near Eastern Skeletal Biology Program, Subseries 3.1. Publications, Folder "Cultural Change in Bronze Age."
