## Collection Overview

<b>Repository:</b>	Archives Center, National Museum of American History
<b>Title:</b>	Gerber Scientific Instrument Company Records
<b>Identifier:</b>	NMAH.AC.0929
<b>Date:</b>	1911 - 1999
<b>Extent:</b>	75 Cubic feet (182 boxes)
<b>Creator:</b>	Gerber, H. Joseph Gerber Scientific Instrument Company (Hartford, Conn.).
<b>Language:</b>	English  Some materials in French, Italian, and Japanese.
<b>Summary:</b>	Records document the Gerber Scientific Instrument Company, Hartford, Connecticut, and its four subsidiaries: Gerber Garment Technology, Inc., Gerber Scientific Products, Inc., Gerber Systems Corp., and Gerber Optical, Inc. Gerber Scientific designs, develops, manufactures, markets and services computer aided design and computer aided CAD/CAM systems. The records include correspondence, memoranda, product literature, trade literature, patent records, instruction manuals, proposals, engineering records, photographs, technical reports, drawings, press releases, and newspaper clippings.

## Administrative Information

### Acquisition Information

The collection was donated by David Gerber, son of H. Joseph Gerber, on December 23, 2006.

### Related Materials

#### **Materials in the Archives Center**

Gerber Fabric Cutter Video Documentation, February 1996 (AC0609)

This videohistory documents the inventor, engineers, assembly workers, operators and other technicians who worked with the computer-controlled fabric cutter.

Heinz Joseph Gerber Papers (AC1336)

This collection documents Joseph Gerber's personal life including his highschool and college years, correspondence with family and friends, and speeches given by Gerber throughout his life.

## Processing Information

Processed by Bob Ageton (volunteer), Jennifer Dannenberg (intern), Adrienne Cain (intern) and Frank Robinson (archives technician), finding aid written by Alison L. Oswald, archivist, March 2007.

Twenty-four (24) cubic feet of archival material was donated by David Gerber in 2014. The addendum was separated into two collections--the Gerber Scientific Instrument Collection (AC0929) and the Heinz Joseph Gerber Papers (AC01336). The 2014 addenda was processed by Tyler Stump (intern), 2015.

## Preferred Citation

Gerber Scientific Instrument Company Records, Archives Center, National Museum of American History, Smithsonian Institution.

## Restrictions

The collection is open for research use.

## Conditions Governing Use

Collection items available for reproduction, but the Archives Center makes no guarantees concerning intellectual property rights. Archives Center cost-recovery and use fees may apply when requesting reproductions.

## Accruals

Twenty-four (24) cubic feet of archival material was donated by David Gerber in 2014. The addendum was separated into two collections--the Gerber Scientific Instrument Company Records (AC0929) and the Heinz Joseph Gerber Papers (AC01336).

User's guides for the Model 78, Model 544, and Model 3200 were donated by Carlex, a subsidiary of Central Glass Company, through Michael McNulty in 2016.

## Biographical / Historical

Heinz Joseph "Joe" Gerber was born in Vienna, Austria, on April 17, 1924. In 1940, Gerber escaped the Nazis and immigrated to New York City and then to Hartford, Connecticut, with his mother Bertha Gerber, a dressmaker. Gerber's father, Jacob, is presumed to have died in a concentration camp. Gerber attended Weaver High School and graduated in two years (1943). He attended Rensselaer Polytechnic Institute (RPI) in Troy, New York, on a scholarship and earned a bachelor's degree in aeronautical engineering in 1947. As a junior at RPI, Gerber developed the Gerber Variable Scale, his first invention. The earliest version of the variable scale was fashioned from an elastic band removed from a pair of pajamas. Gerber created a rubber rule and scale that could flow with a curve, expand, contract, and turn a corner. The scale allows for direct reading of curves, graphs, and graphical representations, giving direct numerical readings of proportions, spacing and interpolation. The Variable Scale became the building block of what would become Gerber Scientific Instrument Inc.

With financial assistance from Abraham Koppleman, a newspaper and magazine distributor in Hartford, Gerber and Koppleman formed a partnership and incorporated Gerber Scientific Instrument Company in 1948. Gerber served as president, Koppleman as treasurer, and Stanley Levin as secretary. The manufacture of Variable Scale was jobbed out and the distribution was conducted from Hartford. Gerber

also worked as a design analytical engineer for Hamilton Standard Propellers of United Aircraft and for Wright Patterson Air Force Base in Dayton, Ohio. Shares of Gerber Scientific Instrument Company were eventually sold to the public in 1961, and in 1978, the company changed its name to Gerber Scientific, Inc. In the 1960s and 1970s, Gerber developed the first series of precision, computer-driven cutting systems for the apparel industry called the Gerber Cutter. The cutters introduced automation to the garment industry. In 1967, Gerber realized that the U.S. garment industry, due to a lack of automation, was faced with increasing overseas competition. Gerber's solution was to engineer the GERBERcutter S-70, a machine that cuts apparel quickly and effectively while using less cloth.

Gerber holds more than 600 United States and foreign patents. Many of his patents relate to the United States apparel industry. In 1994, Gerber was awarded the National Medal of Technology by President Clinton for helping to revolutionize the optical, garment, automotive, and other industries. His pioneering achievements include:

- a generation of data readers (electromechanical devices that converted graphical data directly into computer readable format);
- projection systems that interactively converted information from aerial photographs for use in computers;
- devices that plotted digital output data from computer cards or tape;
- digital numerically-controlled drafting machines which verify the accuracy of the cutting path of numerical machine tools;
- a photoplotter (drafting machine configured with a unique light source to directly draw high accuracy layouts of printed circuit board masters on photographic film or glass with light beams); and
- systems with laser technology to draw at high speeds.<sup>1</sup>

Subsequent subsidiaries of Gerber Scientific, Inc., were: Gerber Garment Technology, Inc. (GGT); Gerber Scientific Products, Inc. (GSP); Gerber Systems Corp. (GSC), and Gerber Optical, Inc., (GO). GGT makes computer-controlled cutting and design equipment for apparel, automotive, aerospace and other industries. GSP produces systems for sign-making and graphic arts industries. GSC makes production systems for printing, industrial machinery and other industries. GO makes equipment for the optical-lens manufacturing industry.<sup>2</sup>

In 1954, Gerber married Sonia Kanciper. They had a daughter, Melisa Tina Gerber, and a son, David Jacques Gerber. H. Joseph Gerber died on August 9, 1996, at the age of 72.

## Scope and Contents

The Gerber Scientific Instrument Company Records document the company's designs, development, manufacture, and marketing of computer-aided design and computer-aided CAD/CAM systems. The records are arranged into twelve series and consist of Personal, Corporate Records, Engineering Department Records, Product Literature, Instruction Manuals/User Guides, Proposals, Photographs,

Trade Literature, Press Releases and Newspaper Clippings, Patent Records, Lectra Systèmes Litigation Materials, and Audio Visual Materials.

**Series 1, David R. Pearl, 1968-1984**, contains three volumes of diaries kept by David R. Pearl, President of Gerber Garment Technology. The diaries were maintained by Pearl from July 21, 1968 to June 6, 1977, to document Pearl's and H. Joseph Gerber's activities concerning the development of the technology and the establishment of a business to market computer-controlled fabric cutting devices. One notebook contains some materials later than 1977. There are diary entries for September 12, 1979, February 1, 1980, and October 29, 1984.

**Series 2, Corporate Records, 1968-1999**, includes administrative records, an Industrial Projects Eligibility Review, annual reports, shareholders reports, newsletters, New York Stock Exchange (NYSE) materials, Securities and Exchange Commission (SEC) materials, Gerber Museum documents, and empty Gerber Scientific Instrument Company binders. The administrative documents consist of a corporate history, mission statement, organizational chart, company map, time line and biographies of key corporate personnel. There are two organizational charts: one for the Engineering Organization (software, mechanical and electrical divisions) from 1987 and one for the subsidiary Gerber Garment Technology, Inc. (Gerber Garment Technology (GGT)), dated 1985. Additional organizational charts can be found with the 1968 annual report. The Industrial Projects Eligibility Review was submitted to the Connecticut Development Authority by Gerber Scientific Instrument (GSI) to facilitate financing for future expansion of the company. A copy of the company's articles of incorporation are here. The newsletters included in this series are in-house publications for employees only. The newsletter Communiqué, 1960, is in Series 4, Product Literature. The NYSE materials include press releases, photographs, the listing application to the NYSE and printed material about Gerber Scientific, Inc. joining the NYSE in October 1980. Gerber Scientific is traded on the Stock Exchange as GRB. The Securities and Exchange Commission files contain Form S-3, a registration statement and the Annual Report, and Form 10-K for Gerber Scientific, Inc. The Gerber Museum file includes photographs of artifacts and a 1996 memo and fax discussing the establishment of a museum to honor H. Joseph Gerber.

**Series 3, Engineering Department Records, 1966-1990**, is the largest series and is arranged alphabetically by the engineer's last name and then alphabetically by subject/topic. The records include the files of: Ed LaGraize, David Logan, Bud Rich, Ron Webster, and Ken Wood. The majority of engineering files belong to David Logan. Logan joined Gerber Scientific Instrument in 1957 as a project engineer. From 1959 to 1961, he was chief engineer and then became Vice President of Engineering from 1961 to 1963. From 1963 to 1980, Logan served as Senior Vice President of Engineering. He holds several patents, primarily in the field of plotting devices and control systems. The engineering files contain technical memoranda, correspondence, drawings, product literature, trade literature, notes, and drawings.

**Series 4, Product Literature, 1953-1996**, contains informational sheets for a variety of products available from Gerber Scientific, Inc. and its subsidiary companies. Gerber Scientific Instrument (GSI) creates designs, manufactures and promotes data reduction equipment of many types. Data reduction equipment allows complex mathematical problems to be solved quickly and accurately. Both analogue and digital systems are offered. The bulk of the product literature falls into the following categories: instruments, data reader systems, recorders, special scanning tables, oscillogram amplitude tabulators, standard system scanners, and plotters. The series is arranged alphabetically by name of product with a few exceptions.

**Series 5, Instruction Manuals/User Guides, 1953-1980, undated**, is divided into two subseries, Gerber Scientific Instrument Company manuals and other companies' manuals. This series contains instruction manuals, maintenance manuals, and users' guides for a variety of Gerber Scientific, Inc. products. The Gerber System Model 1434, Ultra Precise Artwork Generator which provides precision photo-plotting on photo-sensitive material is well represented among the manuals. The other companies represented include Bendix Industrial Controls and the KOH-I-NOOR Rapidograph, Inc.

**Series 6, Proposals, 1961-1980**, consists of bound certified and signed technical and bid proposals completed by Gerber Scientific Instrument Company detailing available and actual estimated costs and

pricing data for Gerber products. The proposals were assembled for specific companies such as North American Aviation.

**Series 7, Photographs, 1948-1974, undated**, is further divided into three subseries: Product and Client Files, 1966-1974, undated; Gerber Scientific Instrument (Gerber Scientific Instrument (GSI) Corporate, 1948-1970, undated; and Numerical, 1966-1974, undated photographs. The majority of photographs are 8" x 10" black-and-white prints. The product and client file photographs are arranged alphabetically. The Gerber Scientific Instrument (GSI) corporate photographs include photographs of GSI buildings both interior and exterior shots, employees, employee functions such as banquets, annual meetings, tours, stockholder meetings, and trade shows. The numerical photographs are arranged numerically according to the number assigned on the reverse of the photograph. Some of the numerical photographs are identified by product name, but others are labeled unidentified.

**Series 8, Trade Literature, 1947-1992**, is arranged alphabetically by company name. The trade literature in this series is from competitors or from companies that used Gerber products.

**Series 9, Press Releases and Newspaper Clippings, 1943-1996**, is divided into two subseries, Press Releases, 1972-1982 and Newspaper Clippings, 1943-1996. The press releases are arranged chronologically. This series contains information on H. Joseph Gerber, his company and its subsidiaries, and the garment and apparel industry. The newspaper clippings are arranged chronologically and include a wide variety of local Connecticut and United States newspapers and industry specific magazines such as Bobbin and Apparel Industry.

**Series 10, Patent Records, 1911-1985**, contains copies of patents, correspondence with patent attorneys and the United States Patent and Trademark Office, patent search results, and other legal filings associated with the patenting process. The materials are arranged chronologically with the name of the equipment or instruments being patented noted.

**Series 11, Lectra Systèmes Litigation Materials, 1968-1990**, contains documents that mainly deal with Lectra (France), but there are documents about patent infringement for Lectra (Japan) and Lectra (United Kingdom). The materials consist of depositions by David Pearl, then president of Gerber Garment Technology, and David Siegelman, then Vice President and General Manager for Lectra Systèmes, Inc., in the United States. Confidential progress reports, memoranda, correspondence, competition reports, drawings and sketches, notes, and other documents summarize events in the litigation history.

Lectra Systèmes was formed on November 12, 1973 at Bordeaux-Cestas (France) by two visionary engineers, Jean and Bernard Etcheparre. They developed a computer system, the LECTeur-TRAcEUR 200, which automatically calculated and plotted all sizes of an item of apparel. The Lectra Systèmes litigation materials document Gerber Garment Technology's claim that Lectra infringed upon Gerber's line of cutting machines. The specific patents being infringed are United States patents: 3,955,458; 4,205,835; and 3,765,289. In September 1986, Lectra introduced a new line of cutting machines that cost roughly half as much as Gerber's top-of-the-line competing system. Gerber Garment Technology filed suit in the United States and France as Gerber Garment Technology, Inc. v. Lectra Systems, Inc. Civil Action No. 1:86-cv-2054CAM. In 1992, Lectra Systems, Inc., appealed the judgment of the United States District Court for the Northern District infringement of Gerber's U.S. Patent No. 3,955,458 ('458 patent) and denied Lectra's claim that Gerber's U.S. Patent No., 4,205,835 ('835 patent) is unenforceable.

**Series 12, Audio Visual Materials, 1986-1998**, includes 3/4" U-matic, 1/2" VHS, audio cassettes, BetaCam SP, and one Super 8mm color, silent camera original reversal film. The majority of audio visual materials cover interviews with H. Joseph Gerber, the National Technology of Medal ceremony, and sales and marketing footage for various Gerber products.

## Arrangement

The collection is organized into twelve series.

### **Series 1: David R. Pearl Materials, 1968-1984**

### **Series 2: Corporate Records, 1968-2002**

Subseries 2.1: Administrative, circa 1977-1995

Subseries 2.2: Industrial Projects Eligibility Review, undated (contains articles of incorporation for Gerber Scientific)

Subseries 2.3: Annual Reports, 1968-1999

Subseries 2.4: Shareholders Reports, 1990-1995, 1997, 1998

Subseries 2.5: Newsletters, 1969-1996

Subseries 2.6: New York Stock Exchange, 1980 October

Subseries 2.7: Securities and Exchange Commission (SEC), 1983-1992

Subseries 2.8: Gerber Museum, 1996

Subseries 2.9: Gerber Scientific Instrument Company binders (empty), undated

Subseries 2.10: Stock and Financial Information, 1949-2002

### **Series 3: Engineering Department Records, 1966-1990**

Subseries 3.1: Ed LaGraize's Files, 1978-1990

Subseries 3.2: Dave Logan's Engineering Files, 1966-1990

Subseries 3.3: Dave Logan's Competitors Files, 1966-1982

Subseries 3.4: Bud Rich's Files, 1967-1980

Subseries 3.5, Ron Webster's Files, 1963-1992

Subseries 3.6: Ken Wood's Files, 1976-1980

Subseries 3.7: Ken Wood's Case Study of Model 1434, 1966-1989

Subseries 3.8: General Engineering Files, 1970-1980

### **Series 4: Product Literature, 1953-1996**

### **Series 5: Instruction Manuals/User Guides, 1953-1980, undated**

Subseries 5.1: Gerber Scientific Instrument Company, 1953-1979

Subseries 5.2: Other Companies, 1962, 1980

### **Series 6: Proposals, 1961-1980**

**Series 7: Photographs, 1948-1974, undated**

Subseries 7.1, Product and Client Files, 1966-1974, undated

Subseries 7.2, Gerber Scientific Instrument Corporate, 1948-1970, undated

Subseries 7.3, Numerical, 1966-1974, undated

**Series 8: Trade Literature, 1947-1992**

**Series 9: Press Releases and Newspaper Clippings, 1943-1998**

Subseries 9.1: Press Releases, 1972-1998

Subseries 9.2: Newspaper clippings, 1943-1996

Subseries 9.3: Articles, 1969-1991

**Series 10: Patent Records, 1911-1985**

**Series 11: Lectra Systèmes Litigation Materials, 1968-1990**

**Series 12: Audio Visual Materials, 1986-1998**
