Biographical / Historical

The Baltimore and Ohio Railroad (B&O) was the nation's first extensive steam powered railroad. It was founded by Baltimore merchants in 1827 as a means of promoting trade and making Baltimore competitive with other east coast ports. The original intent of the founders was to provide direct and fast access to the Ohio River, and the markets that the river reached. The railroad, however, went beyond the Ohio River and its lines went as far west as St. Louis and Chicago. The B&O was also known for its use of an electric locomotive in the mid 1890s. It also had a completely air conditioned train, and it was a forerunner in the use of diesel-electric locomotives. Company activities paralleled those of other American railroads and over the course of its life included expansion, near bankruptcy, innovations, regulations, and finally buy out. In February 1963, the Chesapeake and Ohio (C&O) completed its purchase of the B&O. Today, B&O is part of the CSX Transportation (CSX) network.

John Work Garrett president of the Baltimore and Ohio Railroad 1858-1884, was born in Baltimore, Maryland July 31, 1820. He was the second son of Elizabeth Stouffer and Robert Garrett. He married Rachel Ann Harrison, the daughter of Thomas Harrison, a Baltimore merchant. They had one daughter, Mary and two sons Robert and Thomas Harrison Garrett.

After attending Lafayette College (Pennsylvania) for two years John W. Garrett left in 1836 to become associated with his father's commission business in Baltimore. The commission house which dealt in wholesale groceries, produce, forwarding and a commission business expanded to establish direct connections with Latin America, seek outlets in Europe and develop its own banking operations. In time its financial operations overshadowed the commission and shipping business.

When John W. Garrett began to invest heavily in Baltimore and Ohio Railroad stock, the road was in competition with the Chesapeake and Ohio Canal and the stock was not popular. Its value rose steadily over the years. Mr. Garrett was elected a director of the railroad in 1855. His report as chairman of a subcommittee on the need for additional funds to complete the line to the Ohio River led to his election to the presidency of the road on November 17, 1858, a position he held for 26 years. New policies with emphasis on economy, personal supervision and gradual expansion were inaugurated and consistently maintained, in spite of a general financial crisis, Mr. Garrett's first year in office showed a net gain in earnings.
Sympathetic to his southern friends during the Civil War, Mr. Garrett nevertheless supported the Union. He recognized the inevitability of Confederate defeat by superior northern resources. Confederate leaders blamed him for their inability to seize Washington and he received warm appreciation for his services to the Union cause from President Lincoln. The railroad stretched along the theater of war and twice crossed Confederate territory. It was, therefore, a main objective for southern attack. Branches were frequently damaged by Confederate raids, but the main line to Washington became important for the transport of troops and supplies. The Baltimore and Ohio carried out the first military rail transport in history and the transfer of 20,000 men from the Potomac to Chattanooga in 1863 was a major triumph for its president.

With the advent of peace Mr. Garrett turned to rebuilding and strengthening the railroad. He replaced equipment and track damaged by the war, then extended the system by securing direct routes to Pittsburgh and Chicago and arranging an independent line into New York. Wharves were built at Locust Point for ocean liners and a system of elevators erected. The B&O. built its own sleeping and dining cars, established hotels in the mountains and created its own express company. By 1880, after battles over rates with other trunk lines, a costly rivalry with the Pennsylvania Railroad over the eastern route and charges of discrimination against local shippers Mr. Garrett was at the height of his success. He cooperated in establishing the B. and O. Employees Relief Association for accident and life insurance, a hospital system, saving and building funds, and arrangements for improving sanitation in the workplace. He was on friendly terms with Johns Hopkins, a trustee of John Hopkins Hospital, and with George Peabody, founder of the Peabody institute of which he was also a trustee. Garrett County, Maryland was named in his honor.

John W. Garrett died on September 26, 1884 within a year of his wife's death in a carriage accident. During his connection with the railroad the stock increased from $57 to $200; at the outbreak of the Civil War the railroad was operating 514 miles of rail, gross earnings were $4,000,097 and net per mile was $4246.¹ By 1864 gross earnings were $10,138,876 and net per mile, $7113.² By the end of his presidency mileage had increased to 1711 miles and net earnings were $4535 per mile.³

Series 3: President's Office, 1826-1880

Series 3, President's Office, 1826-1880, consists primarily of correspondence created in the President's Office of the B&O Railroad. The documentation was originally tri-folded and arranged by serial and subject numbers. A stamp bearing the B&O Railroad Company, the serial number and the subject number can be found on each document. For example, materials bearing the subject 6499 all relate to a B&O Railroad property in Harpers Ferry, West Virginia. Also included is the correspondence of Benjamin Henry Latrobe, II (1806-1878) an American civil engineer, best known for his railway bridges and as assistant engineer for the Baltimore and Ohio Railroad, and John Work Garrett (1820–1884) president of the B&O railroad. The materials are arranged by the subject number.

Series 8: Photographs and Copy Prints, 1872-1980s

Series 8, Photographs and Copy Prints, 1872-1980s (not inclusive), is divided into three subseries: Subseries 8.1, Photographs, 1872-1980s and Subseries 8.2, Copy prints, 1901-1931, undated; and Subseries 8.3: Indices and Lists. This series consists of black-and-white photographs and black-and-white copy prints and negatives (both transparencies and glass plate) documenting a wide range of activities associated with the B&O Railroad. Some activities include: the building of locomotives, general factory scenes, office scenes, raw materials, equipment, machinery, employees (both men and women) working in the factory and operating equipment, and railroad cars.

Also included is documentation about stations and buildings, 1884-1982, which contains photographs, negatives, sketches, field notes, maps, postcards, articles, and newspaper clippings about specific Baltimore and Ohio Railroad train stations, buildings, and other structures affiliated with the railroad. Some of the materials appear to have been assembled for a book or for nominating certain structures to the National Register for Historic Places. Many of the negatives contained within this series were created by H.H. Harwood.

Some copy prints (Boxes 71-74) are unidentified and are of an unknown origin. Some of the prints have unique numbers that presumably correspond to negatives numbers assigned by the B&O Railroad Company. Other prints were clearly made from negatives by the Smithsonian Institution's Office of Photographic Services and bear unique numbers such as 12 C 8.

Series 9: Negatives, 1850-1983 (bulk 1920-1939)

**Series 9, Negatives, 1850-1983 (bulk 1920s-1930s)**, is divided into five subseries: Subseries 1, Glass plate negatives (numbered and unidentified), undated; Subseries 2, Glass plate negatives (numbered), 1850-1957 (bulk 1920s-1930s); Subseries 3, Negatives by number, undated; Subseries 4, Negatives by location, 1870; 1978-1983; Subseries 5, Negatives by subject, 1922-1930s, and undated.

The series includes negatives (both glass plate and transparencies) documenting a wide range of activities associated with the B&O Railroad. Many of the negatives, while associated with a number, are undated and have no identifying documentation. Many of the negatives arranged by location were created during the late 1970s by Smithsonian staff.

**Subseries 9.1: Glass plate negatives (numbered), undated**
