## Processing Information

This finding aid is in progress. Contact [rinzlerarchives@si.edu](mailto:rinzlerarchives@si.edu) with questions.

## Processing Information

Records for the 1967 through 1974 festivals were processed to a minimal level and a finding aid prepared by Anna Rimel in 2017, with funding provided by the Smithsonian's Collections Care and Preservation Fund. Minimal processing included arrangement to the series, subseries, and folder levels. Generally, items within folders were simply verified with folder titles, but not arranged further. The collection was re-housed in archival containers and folders, but not all staples and clips were removed.

## Preferred Citation

## Physical Characteristics and Technical Requirements note

The Rinzler Archives is continually engaged in digitization of archival materials to facilitate preservation and ready access by users. However, given the diversity of legacy formats of the originals, some older materials may not be available. Notably, certain older audio recordings cannot be played because of deterioration of the tape stock, and the Archives has no playback equipment for EIAJ-1 videoreels (1/2 inch) or multi-track audio recordings. Where listening or viewing copies are available, this is generally indicated for each item. Users are encouraged to contact Archives staff to verify that the materials of interest to them are already accessible, or to determine if they can be digitized as needed.

## Participant Files 2013-present, 1967-2017

This series consists of the administrative files associated with participants from each year of the Smithsonian Folklife Festival (formerly the Festival of American Folklife). Over the years, participant files were organized in two different ways. The first arrangement schema was alphabetical order by the participant's last name, regardless of the the year or the program. The second arrangement schema is in chronological order by Festival year, followed by program, document type, and then the participant's last name. Because of the breadth of these files, it is currently not feasible to reconcile the first arrangement type (alphabetical order) with the more hierarchically arranged second schema.
