## Collection Overview

<b>Repository:</b>	National Anthropological Archives
<b>Title:</b>	Aleš Hrdlička papers
<b>Date:</b>	1875-1966 (bulk 1903-1943)
<b>Identifier:</b>	NAA.1974-31
<b>Creator:</b>	Hrdlička, Aleš, 1869-1943 (Creator)
<b>Extent:</b>	206.71 Linear feet (294 boxes, 138 folders, 9 rolled items, and 4 folios)
<b>Language:</b>	The collection is primarily in English. Some documents are in Czech, French, German, or Spanish.
<b>Summary:</b>	The papers of Aleš Hrdlička, curator in the Division of Physical Anthropology, Department of Anthropology, United States National Museum of the Smithsonian Institution, offer considerable insight into the development of physical anthropology in the first half of this century. The papers include honors bestowed on Hrdlička, autobiographical notes, correspondence with many of the leading anthropologists of the day, anthropometric and osteometric measurements and observations (forming most of the collection), extensive photographs of Hrdlička's field work, manuscripts, research materials, and "My Journeys" (essentially a diary Hrdlička kept of his field work). In addition, there is material of a personal nature. The papers date from 1875 to 1966, but the bulk of the materials date from 1903 to 1943, the time of Hrdlička's career at the USNM.

## Administrative Information

### Acquisition Information

Hrdlička bequeathed his papers to the Smithsonian Institution. The Division of Physical Anthropology maintained them until they were deposited in the National Anthropological Archives in the 1960s. Some papers have come into the collection since then, most recently in 2018. These new accretions came to the collection through Donald Ortner, David Hunt, T. Dale Stewart, the Department of Anthropology, and the University of Alaska.

### Related Materials

Additional material in the National Anthropological Archives relating to Aleš Hrdlička can be found in the papers of William Louis Abbott, Henry Bascom Collins, Herbert William Krieger, and Frank Spencer; records of the American Anthropological Association, Bureau of American Ethnology, Department of Anthropology of the United States National Museum (National Museum of Natural History), Science Service, Anthropological Society of Washington, and the United States Army Medical Museum

(anatomical section, records relating to specimens transferred to the Smithsonian Institution); and glass negatives of Indians collected by the Bureau of American Ethnology, Smithsonian Institution illustrations.

Additional related photographs can be found in Photo Lot 8, Division of Physical Anthropology collection; Photo Lot 9, Photographs of Indians for the Panama-California Exposition, San Diego; Photo Lot 24, Bureau of American Ethnology, United States National Museum photographs of American Indians; Photo Lot 70, Department of Anthropology portrait file; Photo Lot 78, Miscellaneous negatives; Photo Lot 97, Division of Ethnology collection ("USNM" Collection); Photo Lot 73-26B, Aleš Hrdlička photographs relating to the Panama-California Exhibition; Photo Lot 73-26G, Miscellany; Photo Lot 77-48, Group portraits of International Congress; Photo Lot 79-38, Division of World Archeology collection; Photo Lot 83-41, Division of Physical Anthropology collection of photographs of human bones; and Photo Lot 92-46, Anthropology lantern slides.

Related films can be found in the Human Studies Film Archive under the accession numbers HSFA 1982.2.1, 1982.2.2, 1986.12.1, and 2015.13.1.

Hrdlička's extensive collection of reprints is maintained in the Division of Physical Anthropology.

Frank Spencer's doctoral dissertation "Aleš Hrdlička, M.D., 1869-1943: A Chronicle of the Life and Work of an American Physical Anthropologist" (1979) is the only book length biography of Hrdlička. The Frank Spencer papers, 1836-1999, are available at the NAA and contain original correspondence between Hrdlička and his first wife, Marie Strickler; his childhood report card from 1869; copies of family photos obtained from Lucy Miller, Hrdlička's niece; and an audio recording of Hrdlička speaking at Wistar Institute.

Further material may be found in the Smithsonian Institution Archives.

The University of Alaska Anchorage holds diaries relating to Hrdlička's Expeditions to Alaska in 1936, 1937, and 1938 in the Alan G. May papers. The finding aid for this collection is available online at <https://archives.consortiumlibrary.org/collections/specialcollections/hmc-0690/> and a transcription of May's diaries from the expeditions is available online at <https://scholarworks.alaska.edu/handle/11122/11850>

## Processing Information

Some of Hrdlička's papers had been previously organized by several archival processors. They and the present processor have generally attempted to preserve the organization that Hrdlička gave the papers. Admittedly, there have been problems with that, and some series were merged and new ones added. In researching these papers, it should be kept in mind that many series are a mixture of subject matter.

Titles in square brackets have been supplied by the archivist. However, please note that in some cases the processor has instead chosen to identify Hrdlička's titles with quotation marks. In series where this is the case, there is a series level note to indicate it.

The folder titles of this collection were written by the creator of the collection, Aleš Hrdlička. Some of these folder titles include offensive or outdated language. The original titles have been retained to preserve the historical integrity of the archival record. Use of this language does not reflect the views of the National Anthropological Archives or the Smithsonian Institution.

The three most recent accretions (accessions NAA.2018-07, which includes two card file boxes; NAA.2012-01, which includes a watercolor painting given to Hrdlička by W.H. Holmes; and NAA.2011-30, which includes correspondence with his wife and others, certificates and awards, rolled photographs, and a photograph album) have not yet been processed, but can be viewed. The collection extent does not include these materials.

Finding aid written by Robert Lynn Montgomery, 1996.

Revised by Jennifer Chien, August 2006, and Katherine Christensen, February 2020.

Encoded by Kate Madison, 2017, and Katherine Christensen, February 2020.

## Biographical Note

Aleš Hrdlička was born in Bohemia in 1869 and came to America when he was thirteen. As a young man, he was trained in medicine at New York's Eclectic Medical College and the New York Homeopathic Medical College, receiving degrees from each. His first professional work was as a private practitioner, but he gave that up in 1894 when he joined the staff of the New York State Hospital for the Insane at Middletown. There, in addition to other duties, he began studies of the physical characteristics of inmates. This set in motion developments that would eventually lead him to become one of the world's most prominent anthropologists who has sometimes been referred to as "the founder of physical anthropology in America."

In 1896, in preparation for a research appointment with the Department of Anthropology in the Pathological Institute of the New York State Hospitals, Hrdlička went to Paris and studied with Leon Manouvrier. After his return to America, he worked for a short period with the Pathological Institute and came into contact with G.S. Huntington of the College of Physicians and Surgeons in New York. Hrdlička arranged and studied Huntington's large collection of skeletal material, thus gaining knowledge of a well-documented collection representing largely normal persons of European ancestry. He came to the attention of Frederic Ward Putnam, of the American Museum of Natural History, who arranged for his first anthropological field studies.

It was thus that Hrdlička became a member of the Hyde Expeditions to the American Southwest and northern Mexico. In 1898, he traveled to Mexico with Carl Lumholtz to study the Tarahumaras, Huichols, and neighboring tribes. In subsequent years, he returned to Mexico and the Southwest alone and studied physical characteristics and medical conditions of several American Indian tribes. With this experience and examinations of the Trenton and Lansing skeletal material for Putnam, Hrdlička came fully into the world of anthropology. In 1903, he was appointed head of the newly formed Division of Physical Anthropology in the United States National Museum.

While in his position at the Smithsonian, Hrdlička returned to the Southwest for studies of Pima and Apache children in 1905 and, in the following year, traveled to Florida to examine allegedly ancient remains of man. In 1908, he worked among a number of Indian tribes, including the Menominee, Oglala Dakota, Quinault, Hupa, and Mohave, in a study of tuberculosis among them. In 1909, he traveled to Egypt with an expedition of the Metropolitan Museum of Art in New York in order to study living Egyptians and to examine remains of Egypt's past population. The following year took him to Argentina, Peru, and Mexico. In the first of these, he again examined allegedly ancient remains of man. In Peru, he made a large collection of skeletal material near Trujillo, at Pachamac, and in the Chicama Valley.

From 1912-1914, Hrdlička undertook a physical anthropological exhibit for the Panama-California Exposition in San Diego and, for this, traveled to eastern Siberia, Mongolia, Peru, and Florida. He also examined fossil remains of man in Europe and directed field work of other anthropologists in South and East Africa, St. Lawrence Island in Alaska, the Philippines, eastern Siberia, and the Ukraine. In 1915, for the Department of Justice, he assessed the racial makeup of Chippewas on the Leech Lake and White Earth reservations in Minnesota and also studied Dakota Indians. In 1917, his field work was directed toward white American families with longtime residence in the United States. In 1918, he carried out a survey of ancient sites in eastern Florida for the Bureau of American Ethnology. In 1920, he traveled to Hawaii, Japan, Korea, and Manchuria in connection with an appointment to lecture at the Peking Union Medical College. As director of the American School for Prehistoric Studies in France, he again studied fossil remains of man in Europe in 1922 and 1923. In 1925, he carried out work in India, Ceylon, Java, Australia,

South Africa, and Europe. In 1927, he was again in Europe to deliver the Huxley Memorial Lecture before the Royal Anthropological Society in Great Britain. Between 1929 and 1938, he traveled frequently to Alaska to carry on an anthropological survey. In 1939, he traveled to Russia and Siberia.

Beginning with much of the skeletal collection of the Army Medical Museum, which had been transferred to the Smithsonian in 1898 before he was appointed there, Hrdlička amassed a bone collection that included, among many other specimens, the Huntington collection, casts of fossil remains of man, and a large and diverse North American collection. He also gathered a large collection of human brains. Over three hundred publications resulted from his study of this material, his field work, and his study of specimens in other museums. In addition, he was involved in many other activities. For United States government agencies, he provided services ranging from examinations of human remains for law enforcement officials to providing information and opinions concerning national origins and traits that were needed to interpret laws and form foreign policy. During World War II, he also advised government officials on policies to be pursued with certain national groups following the war.

In 1918, Hrdlička founded the *American Journal of Physical Anthropology* and remained its editor until 1942. In 1928, he was the major force behind the organization of the American Association of Physical Anthropologists and served as its president from 1928 to 1932. He was also president of the Anthropological Society of Washington in 1907, the American Anthropological Association from 1925 to 1927, and the Washington Academy of Sciences from 1928 to 1929. He was chairman of Section H of the American Association for the Advancement of Science in 1918 and secretary of the Committee on Anthropology of the National Research Council in 1917. From the 1920s to the 1940s Hrdlička was a member of the American Eugenics Society and prepared exhibits for various eugenics congresses. In addition, Hrdlička was a member of the American Philosophical Society and the National Academy of Sciences. He represented the Smithsonian at several international gatherings of scholars, including meetings of the International Congress of Americanists.

1869 March 29	Alois Ferdinand Hrdlička (Aleš Hrdlička) born in Humpolec, Bohemia
1882 September	Emigrated to New York City
1888	While stricken with typhoid, met M. Rosenbleuth, a physician who arranged for Hrdlička to enroll at the Eclectic Medical College of New York City
1892	Enrolled in the New York Homeopathic Medical College and Hospital Published first article, "Scheme of Examination (Medical)," <i>Publications of the Eclectic Medical College</i> Graduated first in his class from the Eclectic Medical College
1894	Graduated first from his class from the Homeopathic Medical College Became research intern at the State Homeopathic Hospital for the Insane in Middletown, New York, where he began his studies in physical anthropology Passed state board examination (allopathic)
1895	Joined staff of the Pathological Institute of the New York State Hospitals as associate in anthropology
1896	Studied anthropology under Leon Manouvrier in Paris
1896 August 6	Married Marie Stickler (Dieudonnée)
1898 March-July(?)	Accompanied Carl Lumholtz on his expedition to northern Mexico, sponsored by the American Museum of Natural History (AMNH), and visited the Tarahumara, Huichol, and Tepecan Indians

- 1899 Spring* Resigned from the Pathological Institute to take charge of physical and medical anthropological research on the Hyde Expeditions of the AMNH to the southwestern United States
- 1899 August* Hyde expedition for the AMNH to Chaco Canyon, New Mexico, to excavate the site of Pueblo Bonito and to conduct somatological surveys among the Indians; visited Grand Gulch caves in southern Utah; included visits to the Navahos and southern Utes
- 1900* Hyde expedition for the AMNH to New Mexico, Arizona, and southern Colorado to conduct somatological surveys among the Indians; included visits to the Apaches, Yumas, and Pueblo Indians
- 1902 January-September* Hyde expeditions for AMNH to southwestern Arizona, New Mexico, and northern Mexico to conduct somatological surveys; included visits to the Tepecanos, Papagos, Opatas, Pimas, Yaquis, Mayos, Huichols, Otomis, Tepehuanes, Maricopas, Yumas, Yavapais, Paiutes, Walapais, and Havasupais
- 1902 October-December* Hyde expedition for the AMNH to Mexico for Hrdlička to complete his somatological investigations; included visits to the Tepehuanes, Coras, Huichols, "Nahuas," "Aztecs," and Tarascans
- 1903 May 1* Became assistant curator in charge of the new Division of Physical Anthropology, Department of Anthropology, at the United States National Museum, Smithsonian Institution
- 1905* Expedition under the auspices of the Bureau of American Ethnology to Arizona and New Mexico to complete the observations on the tribes of this region; Hrdlička especially studied Apache and Pima Indian children
- 1906 February* Expedition to western Florida to investigate remains of alleged ancient man
- 1907* President of the Anthropological Society of Washington
- 1908* Expedition to Indian schools and reservations in Wisconsin, Washington, California, Arizona, and South Dakota to study tuberculosis for a report to the International Congress of Tuberculosis
- 1908 December - 1909 May* Traveled to Egypt, Greece, Turkey, Hungary, Bohemia, Russia, Poland, and Germany to examine human skeletal remains from an excavation in Egypt by the Metropolitan Museum of Art and to study peoples of the Near East
- 1910 March 28* Promoted to curator in the Division of Physical Anthropology
- 1910 April-September* Attended the 17th International Congress of Americanists in Buenos Aires and Mexico City
- Traveled to Argentina, Brazil, Peru, Mexico, and Panama
- 1912* Planned and directed seven expeditions for the physical anthropology exhibit at the Panama-California Exposition held at San Diego in 1915; expeditions included Hrdlička to Siberia and Mongolia and later to Peru; Riley D. Moore to St. Lawrence Island, Alaska; Philip Newton to the Philippine Islands; Vojtech Suk to Africa; Stanislaw Poniatowski to eastern Siberia; Kazimir Stolyhwo to the Birusa caves in Siberia and to the Ukraine; and Jindřich Matiegka to Bohemia

1912 May-Summer	Traveled to London to attend 18th International Congress of Americanists Traveled to Siberia and Mongolia for the Panama-California Exposition
1912 September	Traveled to Geneva for the 14th International Congress of Prehistoric Anthropology and Archaeology
1913 January-April	Expedition to Peru as part the effort for the Panama-California Exposition
1914 November 18 - 1915 January 18	Attended Panama-California Exposition
1915 May	Research for the Department of Justice at the White Earth and Leech Lake reservations in Minnesota to determine non-Indian mixture among Chippewas
1915 December	Served as General Secretary for the 19th International Congress of Americanists held in Washington
1916 Fall	Traveled to Florida to examine remains of supposed ancient man
1917 March-July	Served as Secretary on the Committee on Anthropology of the National Research Council
1917 Summer	"Old American" research at Yale University, Harvard University, and the University of Virginia and in Tennessee
1917 August	Sponsored by the American Association for the Advancement of Science, traveled to Oklahoma to visit the Shawnee Agency in eastern Oklahoma and the Kickapoo Indians in McCloud to search for adequate samples of pure blood Indians
1918	Elected to the American Philosophical Society Served as Chairman of Section H of the American Association for the Advancement of Science Founded the <i>American Journal of Physical Anthropology</i> and became its long-time editor Surveyed prehistoric sites on the southwest coast of Florida
1918 October 8	Death of his wife Marie
1920	<i>Anthropometry</i> published by the Wistar Institute Elected an honorary fellow of the Royal Anthropological Society of Great Britain
1920 Summer	Married Mina (Vilemina) Mansfield
1920 January-May	Visited Japan, Korea, Manchuria, northern China, Mongolia, and Hawaii Lectured at Peking Union Medical College in China
1920 Fall	Visited Minnesota Chippewa (at the White Earth Reservation?) to help the Department of Justice setter the question of mixed and pure bloods among the Chippewa
1921	Elected to the National Academy of Sciences
1922	Visited Spain, France, Germany, Moravia, and England Awarded honorary Sc.D. degree from the University of Prague

- Chairman of the American delegation to the 20th International Congress of Americanists in Rio de Janeiro
- 1923 Served three and one-half months as Director of the American School in France for Prehistoric Studies
- Visited England, Holland, Belgium, France, Germany, Bohemia, Austria, Croatia, and Italy
- 1925 *The Old Americans* published by Williams and Wilkins Co.
- 1925 March-October Traveled to Australia, Java, India, South Africa, and Europe on a trip sponsored by the Buffalo [New York] Society of Natural Science to obtain cranial measurements of Australian aborigines and Tasmanians, to investigate the Rhodesian Man site in South Africa, to survey the field of early man, and to collect data to support his hypothesis about the peopling of the Earth
- 1925-1926 President of the American Anthropological Association
- 1926 Awarded honorary Sc.D. degree from University of Brno and D.Nat.Sc. degree from Brunn University
- 1926 May-September First fieldwork in Alaska: reconnaissance down the Yukon River to its mouth, around the Bering Sea and through the Bering Strait along the Alaskan coast to Point Barrow
- 1927 Received Huxley Memorial Medal and gave Huxley Lecture on "the Neanderthal Phase of Man" before the Royal Anthropological Society of Great Britain
- 1928 Helped found the American Association of Physical Anthropologists (AAPA)
- 1928-1929 President of the Washington Academy of Sciences
- 1928-1932 Served as first president of the AAPA
- 1929 Fieldwork in Alaska: surveyed the Yukon River from Tanana to its mouth, to St. Lawrence and the Diomed Islands, to Cape Prince of Wales, up to Point Barrow and back to Unalaska
- Awarded honorary Sc.D. degree from Charles University, Prague
- 1930 Published *The Skeletal Remains of Early Man*, Vol. 83 *Smithsonian Miscellaneous collections*
- Published "Anthropological Survey in Alaska," *Forty-sixth Annual Report of the Bureau of American Ethnology*, pp. 21-374
- 1930 Summer Fieldwork in Alaska: surveyed the Kuskokwim River from Bethel down river to Apogak and up river to Stony River
- 1931 *Children Who Run on All Fours* published by McGraw-Hill Book Co.
- 1931 Summer Fieldwork in Alaska: excavated at Our (Jones) point site, trial excavations at Chief's Point and other sites, and a survey of Kodiak Island
- 1932 Kober Foundation lecturer of Georgetown University
- 1932 Summer Fieldwork in Alaska: excavated at Our (Jones) Point site, trial excavations at Chief's Point and other sites, and a survey of Kodiak Island

- 1934 Summer Fieldwork in Alaska: excavated at Our (Jones) Point site and surveyed Cooks Inlet sites and the mainland opposite the Our Point site
- 1935 Summer Fieldwork in Alaska: excavated at Our (Jones) Point site
- 1936 Summer Fieldwork in Alaska: excavated at Our (Jones) Point site and surveyed the Dutch Harbor caves, some of the Aleutian Islands, and the mummy cave on Kagamil Island

## Scope and Contents

This collection is comprised of both professional and personal materials. The professional material includes honors bestowed on Hrdlička, autobiographical notes, correspondence with many of the leading anthropologists of the day, anthropometric and osteometric measurements and observations (forming most of the collection), extensive photographs of Hrdlička's field work, manuscripts, research materials, and "My Journeys" (essentially a diary Hrdlička kept of his field work). The personal material primarily consists of correspondence with his first wife (Marie Dieudonnée Strickler) and other family members, but there are also financial records. The papers date from 1875 to 1966, but the bulk of the materials date from 1903 to 1943, the time of Hrdlička's career at the United States National Museum of the Smithsonian Institution. Hrdlička investigated all major questions confronting physical anthropologists of his day (the fossil record of early humans, the arrival of humans in the Americas, human variation, evolution, and eugenics) and made valuable contributions in all these areas. Hrdlička's interests in the establishment of physical anthropology as a distinct and important field, the welfare of the Czech people, early hominids, and variation within the human species are all documented in the collection as are the services he performed for various United States government agencies. He pursued field studies in many different parts of the world, but there are relatively few field notes as such among his papers. There is instead the edited journal "My Journeys," photographs, and physical anthropological forms. There is also relatively little material on his administrative involvement in the USNM. There is no material from Hrdlička's time at the Pathological Institution of the New York State Hospitals; after he resigned, fire destroyed the anthropological records Hrdlička collected as a member of the staff. There are materials in the collection which contradict, or at least complicate, many long-held criticisms of Hrdlička, particularly claims that he was racist and opposed feminist ideas. The collection contains materials of interest to genetic research, including anthropometric measurements, hair clippings and fingerprints.

There are a few items in the collection which are dated earlier than the collection's date span. These are publication dates, and the folders containing the items have been dated accordingly, but they have not affected the dates of the series or collection. There are also a few items which are dated after Hrdlička's death. These dates reflect the fact that the collection was added to by the Department of Physical Anthropology after Hrdlička's death and have been taken into account when formulating dates for the series and collection.

Please note that the contents of the collection and the language and terminology used reflect the context and culture of the time of its creation. As an historical document, its contents may be at odds with contemporary views and terminology and considered offensive today. The information within this collection does not reflect the views of the Smithsonian Institution or National Anthropological Archives, but is available in its original form to facilitate research.

## Series 2: Early Personal Correspondence, 1883-1919

### 1.04 Linear feet

Language: Some letters are in French.  
 Scope and Contents: This series consists primarily of correspondence between Aleš Hrdlička and his first wife, Marie Strickler (sometimes given the last name Dieudonné). Their courtship began in 1892, and they were married in 1896. Strickler died in 1918, perhaps of complications of diabetes. There is also correspondence between Hrdlička and his sister, Sadie, and his brother, Joseph. There are no letters between Hrdlička and Mina Mansfield, his second wife, in this collection.

For additional correspondence with his family, see Series 3: Correspondence. See also Series 25: From My Journeys for letters exchanged between Hrdlička and Strickler from 1915-1916.

Box 3;	Outgoing letters, 1892-1917, undated
Box 4	13 Folders
	Notes: To Strickler from Hrdlička. The letters of 1892-1893 mention Hrdlička's medical studies and practice. In 1894-1895, Hrdlička describes fellow physicians and hospitals.
Box 4;	Incoming letters, 1891-1902, undated
Box 5	Notes: To Hrdlička from Strickler. Letters from 1892 and 1893 delineate the beginning of their courtship. Behind the letter of January 13, 1895, is a portrait of Strickler.
Box 5	Miscellaneous, 1883-1919, undated
	Notes: Correspondents include members of Hrdlička's family and patients.

## Series 3: Correspondence, 1885-1953

### 26.5 Linear feet

**Scope and Contents:** This series includes responses to inquiries, business of the Smithsonian Department of Anthropology and various organizations, discussions of scientific findings, responses to questions of heredity, letters on behalf of the Czech people, and correspondence with family members. Other materials include manuscripts of Hrdlička's articles, lectures, and radio talks; reports; information Hrdlička collected on particular subjects; anthropometric and osteometric data; articles by other researchers; and photographs. Of special interest are letters concerning Hrdlička's appointment to the United States National Museum, the founding of the American Association of Physical Anthropologists and the *American Journal of Physical Anthropology*, Hrdlička's assistance to law enforcement agencies, his interest in the welfare of Czechoslovakia, and his advice to political leaders of the United States and foreign countries. Some letters are from important anthropologists, and some correspondence with particular individuals is extensive. T. Dale Stewart and other Department of Anthropology staff members answered some letters after Hrdlička's death. This series does not include any of Hrdlička's correspondence with either of his wives. There is also correspondence in many other series.

**Arrangement:** Arranged alphabetically. At the beginning of each letter of the alphabet are folders labeled as miscellaneous correspondence. Researchers should be aware that the date range listed on the folder of an individual's correspondence is usually not inclusive, and they should be alert for inconsistencies in filing. For example, there are papers filed "Department of Justice" and "Justice, Department of." It may be necessary to search all of the correspondence to find all relevant documents on a given subject.

## Series 4: News Clippings and Printed Matter, 1893-1953

### 2.08 Linear feet

Scope and Contents: This series includes greetings cards and clippings from newspapers and magazines. The clippings consist of articles written by Hrdlička, articles on his opinions, announcements of lectures, *Science Service* articles, and reviews of Hrdlička's publications. Subjects include Hrdlička's beliefs regarding the nature of women, views on early man in the Americas and human evolution, studies of Old American types and quadrapedalism in children, and Hrdlička's field work in Alaska. Most of the greeting cards are either for Christmas or birthdays.

See Series 3: Correspondence, "Hrdlička, Ales" for additional news clippings and greetings cards.

Box 70	Scrapbook, 1926 Notes: Partially filled. Includes clippings of two newspaper articles written by Hrdlička in the <i>New York Times</i> .

## Series 6: Journeys to the Southwestern United States and Mexican Indians, 1898-1919

### 6.1 Linear feet

**Scope and Contents:** This series includes notes on the various Indian tribes Hrdlička visited on his trips to the southwestern United States and Mexico between 1898 and 1903. Most of these are ethnographic in nature (for example, origin stories, responses from consultants, and notes on medicines), but they also include anthropometric data, adding machine tapes, and some correspondence. The physical anthropology tables are primarily anthropometric measurements and many participants are identified. The photographs are mostly portraits or show skeletal remains. Most were taken by Hrdlička, although there are prints of Ute Indians taken by Charles Goodman. The journals are personal remembrances with little material of anthropological significance. The materials titled "The Pueblos" were used in the publication "The Pueblos, with Comparative Data on the Bulk of the Tribes of the Southwest and Northern Mexico," *American Journal of Physical Anthropology*, 20, no. 3 (1935): 235-460. The drawings are of skeletal specimens, mostly at the AMNH, and are annotated to indicate sex, age, and museum number. Most of the notes on museum specimens are on crania in the AMNH, although some are on bones in the National Museum of Mexico and in private collections. The statistical work sheets apparently were prepared for E.A. Hooton at his statistical laboratory at Harvard in the late 1930s from data supplied by Hrdlička. The data was analyzed on the basis of age range, cephalic measurements, and stature to calculate the mean of various physical anthropological measurements. Most, if not all, the data were compiled from male specimens.

Series 15: Anthropometric Measurements of Indians Taken at the United States National Museum has additional materials that may be related to these trips.

**Processing Information:** Descriptions in quotation marks are Hrdlička's own.

## Series 7: Journeys to the Dakota, Chippewa, Kickapoo, and Shawnee, 1916-1917

### 2.29 Linear feet

**Scope and Contents:** This series includes photographs, anthropometric measurements, and correspondence associated with trips taken by Hrdlička in 1916 and 1917. The first, in 1916, was to the Cheyenne River Reservation in South Dakota to study the Dakota (Sioux) Indians and then to White Earth and Leech Lake, Minnesota, to examine Chippewa. This work was done at the behest of the Department of Justice, which needed to know the degree of blood mixture with whites among the Chippewa. Hrdlička studied the Dakota, who had comparatively little mixture, as a control population. The second, in the summer of 1917, was to the Shawnee at the Shawnee Agency and the Kickapoo in McCloud, both in Oklahoma, to find pure blood samples and ascertain the physical type. Hrdlička examined more Chippewa on a trip in the fall of 1920 to settle the blood-mixture question. No information from that trip is in this series.

More information regarding this work can be found in Series 3: Correspondence, "Department of Justice", "Justice, Department of", and "Powell, Ransom J.".

## Series 8: Florida Survey, 1918, 1918-1927

### 0.21 Linear feet

**Scope and Contents:** This series includes notes, measurements, manuscripts, and illustrations related to Hrdlička's trip to Florida in November, 1918, after his wife's death. Having worked there in 1906 and 1916, Hrdlička rounded out a survey by exploring the Ten Thousand Islands region on the southwest coast. Then, in 1922, he produced an article, "The Anthropology of Florida." Some materials for that article are included in this series.

See also Series 37: Photographs, "Miscellaneous" for images probably by Hrdlička and Series 19: Early Man Studies, "Pseudo-ancient man in the Americas" for photographs taken in Osprey, Florida, possibly by Hrdlička on his 1906 trip.

Box 92	Expedition notes, 1918-1919, undated Notes: A red notebook includes lists of expenses, addresses, and field notes. There are also typed pages of entries in the notebook and field notes glued to yellow legal size sheets.
Box 92	Cranial measurements, circa 1918
Box 92	"The anthropology of Florida", 1922 Notes: Includes plates and figures used in this publication.
Box 92	Articles on Florida, 1924-1927, undated Notes: Reprints of articles by F.W. Loomis, with a review of Loomis' work, possibly by Hrdlička; W.H. Holmes on Loomis' work in Florida; E.S. Balch "My interpretation" with notes by Hrdlička; and an edited manuscript titled "Indians of southern Florida" by Safford(?).

## Series 9: Alaska Archeological Expeditions, 1912-1938 (bulk 1926-1938)

### 4.75 Linear feet

Scope and Contents: This series includes diaries, correspondence, notes, maps, anthropometric and osteometric measurements, reprints, manuscripts, and printed material related to fieldwork done in Alaska by Hrdlička and others. Of special interest is the material collected by Riley Moore on his 1912 trip to St. Lawrence Island for the Panama-California Exposition. Hrdlička made ten trips to Alaska between 1926 and 1938. On the first trip, sponsored by the Bureau of American Ethnology, he was to conduct an anthropological and archeological survey of Alaska. Other commitments kept Hrdlička from returning until 1929 when he again was sponsored by the B.A.E.; Hrdlička's purpose on this trip, as it would be on future trips, was to learn as much as possible about the Indians and Eskimos (including anthropometric measurements), to trace old settlements and migration paths, and to collect important skeletal and archeological material. In the summer of 1930, Hrdlička made two trips along the Kuskokwim River and in 1931, his work extended to the Nushagak River, the Molchatna River, the Wood River, Bristol Bay, the Kvichak River, parts of the Iliamna Lake region, and Uyak Bay of Kodiak Island. It was at this later stop that Hrdlička discovered the Jones Point (also referred to as Our Point) site in Uyak Bay. Hrdlička was aided on this trip by B.R. Hart and Gordon Jones of the Alaska Packers Association; A.W. Shiels, F. Daly, A.D. Daly, and A.S. Foster of the Pacific American Fisheries; and Laura Jones, Gordon's wife. Hrdlička returned to the Jones Point site in 1932, 1934, 1935, and for most of 1936. Besides excavating there in 1932, Hrdlička performed trial excavations at Chief's Point and other sites, and an archeological survey of Kodiak Island. He was aided again by B.R. Hart and Gordon and Laura Jones. Hrdlička returned in 1934 with a volunteer student crew, receiving in addition the help of Hart and the Joneses. That year Hrdlička added a brief Survey of the Cooks Inlet region and the mainland opposite Kodiak Island at Jones Point. The 1935 work was done exclusively at Jones Point. Hrdlička was helped again by Gordon Jones and a crew of volunteer professors and students. Four volunteers, in addition to the Joneses, accompanied Hrdlička in 1936. Excavations were carried out at Jones Point until late June. The remainder of 1936 was spent excavating at Dutch Harbor and Unalaska Island; on Atka, Kiska, Attu, Little Kiska, and Large Kiska islands; and in a mummy cave of Kagamil Island in the Four Mountain Group. Hrdlička concentrated on the Aleutian Islands and the Commander Islands for his Alaska expeditions in 1937 and 1938. In 1937 with six volunteer students, Hrdlička explored Unalaska Island and the Four Mountain Group, Attu Island, the Commander Islands, Agatu Island, Tanaga Island, Ilak Island, Adak Island, Umnak Island, and Shiprock Island. For the 1938 trip, Hrdlička purposed to collect data on pre-Aleut people, to determine if the Commander Islands served as a second land bridge, and to re-examine the burial caves and search for other such caves. He took several student volunteers. Exploration was carried out on Shiprock Island, Sviechnikov Harbor on Amlia Island, Ilak Island, Amchitka Island, Umnak Island (Nikolski village), the Commander Islands (Saranja Bay and Korabelni Bay), the Four Mountain Group, Bogoslav Island, and Amoknak Island.

See Series 37: Photographs, "Alaska Field Views" for additional materials, including illustrations used in Hrdlička's publications on Alaska. See Series 3: Correspondence, "Alaskan Reports", "Botsford, James W.", "Cary, Francis", "Cowper, Harold W., Jr.", "Erskine, John", "Erstein, Richard", "Hart, B.R.", "Jones, Gordon and Laura", "Parkes, George A." (Governor of Alaska), and "WI-WIL" for Edwin W. Wicht for letters about the Alaska expeditions. See Series 3: Correspondence, "Barton, Joe", "Bell, Earl H.", "Connor, Sydney", "Corner, George", "Gebhardt, Paul", "Guggenheim, Paul", "Heizer, Robert F.", "Laughlin, William S.", "MacRae, Thurman", "May, Alan G.", "McKee, Charles Bradford", "Osborne, Matthew F. Maury", "Seashore, Stanley E.", "Seib, George A.", "Weber, Tom", "Wineman, Walter", "Zarbell, Ivar H.", and "Zickefoose, Harold E." for correspondence with Hrdlička's volunteer professors and students. ## Series 10: Panama-California Exposition Expeditions, 1912-1914

### 2.08 Linear feet

**Scope and Contents:** This series includes photographs (many portraits), correspondence, anthropometric measurements, notes, and adding machine tapes associated with the physical anthropology exhibit at the 1915 Panama-California Exposition at San Diego, California, which Hrdlička was asked to prepare in 1912. Hrdlička envisioned a three-pronged approach: a comparative study of the native child; photographs, casts, and measurements of the races of man; and skeletal remains of man. With a \$30,000 grant, he hired two sculptors to make busts and arranged for expeditions to obtain desired information and materials. Hrdlička went on two: to Siberia and Mongolia in 1912 and to Peru in 1913 to study American Indian pathology. Other trips were made by Riley D. Moore to St. Lawrence Island, Alaska, to study the Eskimo; Philip Newton to the Philippine Islands to study the Negrito; Vojtech Suk (also known as A. Schüick) to Africa; Jindřich Matiegka to Bohemia to search for Neolithic crania; Kazimir Stolyhwo to the Birusa caves in Siberia and to the Ukraine to search for early man; and Stanislaw Poniatowski to eastern Siberia. Suk worked in South Africa and then moved to East Africa (Kenya). Before he completed his work there, the British interned him as an enemy alien. This series contains materials from both of Hrdlička's expeditions, Newton's expedition, and Suk's expedition, but contains no materials from Moore's, Matiegka's, Stolyhwo's, or Poniatowski's expeditions.

Additional papers on this series can be found in Series 3: Correspondence, "Panama-California Exposition, San Diego" (including details of Hrdlička's plans for the exhibits), and under the names of the people who did research for the exposition. There are also letters from one of the sculptors in "Mička, Frank". The materials from Riley D. Moore's expedition to Alaska can be found in Series 9: Alaska Archeological Expeditions.

Box 104	Letter concerning Suk's trip to Africa in 1913, 1913

## Series 11: Journey to Egypt, Europe, and Russia, 1908-1909

### 0.21 Linear feet

**Scope and Contents:** This series includes expenses, notes, and correspondence related to Hrdlička's 1909 trip to Egypt and Europe. Hrdlička visited a newly discovered cemetery in Egypt at the request of the Metropolitan Museum of Art to investigate the physical type of the human remains there. While in Egypt, Hrdlička obtained a large skeletal collection, primarily XIIth dynasty, for the United States National Museum. He also took anthropometric measurements on people at Kharga Oasis. Before he returned, Hrdlička took the opportunity to examine other peoples in the Near East and to travel to Greece, Turkey, Hungary, Bohemia, Russia, Poland, and Germany.

See Series 36: Physical Anthropology Folios, "Hrdlička, Aleš: Physical Anthropology, the Natives of Kharga Oasis, Egypt" for photographs and anthropometric data and Series 37: Photographs, "Egypt, Europe, and Russia" and "Miscellaneous: Henri F. Pittier glass negatives: Lot 17: Kharga, Egypt natives" for photographs of natives of Kharga Oasis.

Box 107

Notes, 1908-1909

Notes:

Includes expenses, notes on the various places and museums visited, Hrdlička's "service des antiquities" identification, and a letter from Arthur Mace.

## Series 12: Journey to South America, 1910, 1910-1912

### 0.33 Linear feet

Scope and Contents: This series includes correspondence, notes, and photographs associated with Hrdlička's trip to South America. This trip was prompted by Florentino Ameghino's claim to have found evidence of early hominids in Argentina in the early 1900s. Hrdlička was eager to investigate these claims and, since he was attending the XVIIth International Congress of Americanists held that year in Argentina and Mexico, he took the opportunity to investigate the subject of early man in all of South America. Hrdlička examined the Argentine remains and, assisted by Bailey Willis of the U.S. Geological Survey, conducted a survey of several Argentine sites. Hrdlička had visited Brazil before going to Argentina, and upon finishing his work in Argentina visited Peru (where he collected almost 3400 crania). He then went to Mexico for that section of the Congress.

Box 107	Correspondence, 1910-1911 Notes: Mainly letters to William Henry Holmes and other Smithsonian officials reporting on the course of the journey.
Box 107	Notebooks, circa 1910-1911 Notes: Includes four notebooks titled "Diprothomo"; "Tetraprothomo, Necochea"; "Necochea, Ciasgo"; and "Ovejero."
Box 107	Notes, various sites, circa 1910-1911 Notes: Includes notes, some by Bailey Willis, on the sites or specimens from Ovejero, Miramar, the Tierra Cocida, Necochea, Arroy Ciasgo, Playa de Peralta, Punta Porvenir, Monte Hermosa, Sotelo, Rio Negro, Chorcori, and Playa Laguna Malacara.
Box 107	Diprothomo, notes, circa 1910-1911 Notes: Includes Willis' notes and measurements taken on specimens at the National Museum (Argentina).
Box 107	Tetraprothomo, notes, circa 1910-1911
Box 107	Manuscript, "Early man in South America," Bureau of American Ethnology Bulletin 52, 1912 Notes: Includes notes by Willis and his manuscript "General geologic notes."
Box 107	Photographs of skeletal material and sites, circa 1910-1911
Box 107	Miscellany, circa 1910-1911 Notes: Includes descriptions of two rolls of film, notes on the journey to Patagonia, and notes on the skull of Arrecifes.

## Series 13: Journey to the Far East, 1920, 1900-1930

6.38 *Linear feet*

Scope and Contents: This series includes correspondence, anthropometric measurements, notes, photographs, maps, and hair samples associated with Hrdlička's trip to China and the Far East in 1920. Additional materials in the collection, not collected by Hrdlička, include anthropometric data collected by William Louis Abbott in West Borneo and photographs, hair samples, and anthropometric data collected by David Crockett Graham in China between 1928 and 1930. Hrdlička made a long-hoped-for trip to the Far East beginning in January of 1920 to deliver a lecture before the Peking Union Medical College. A stop was first made in Honolulu, where Hrdlička examined the cranial collections in the Bernice P. Bishop Museum. Hrdlička then proceeded to Japan and China. Before he returned, he also visited Korea and obtained more measurements in Japan and Hawaii.

Box 108 Correspondence, 1915-1920  
Notes: (Includes Elizabeth Kendall, T. Kawamura, and Langdon Warner.)

Notes:

Box 108 Japan, China, and Korea, undated  
Notes: Includes expenses.

Box 108 Hawaii, undated  
Notes: Includes anthropometric measurements.

Box 108 Chinese visiting cards, announcements, etc., undated  
Notes: Includes notices of Hrdlička's lectures.

Box 108 Letters of introduction, 1915-1920  
Language: Some letters in Spanish.  
Notes: Includes a letter to Charles J. McCarthy, Governor of Hawaii. Letters in Spanish were left unopened.

## Series 14: Journey to Australia, Java, India, South Africa, and Europe, 1924-1925

### 0.83 Linear feet

**Scope and Contents:** This series includes correspondence, notes, measurements, and photographs related to Hrdlička's trip to Australia, southern Asia, and South Africa for the Buffalo (New York) Society of Natural Sciences. Hrdlička first went to India and toured the Siwalik Hills, an important site for fossil remains of early apes. Unfortunately, some of his field notes and measurements were lost. From India, Hrdlička traveled to Ceylon, Java, Australia, South Africa (where he met Raymond Dart, who identified and described the first *Australopithecus* remains), and back to the United States by way of England.

**Processing Information:** Descriptions in quotations marks are Hrdlička's own.

## Series 15: Anthropometric Measurements of Indians Taken At the United States National Museum, 1904-1905, most undated

### 0.17 Linear feet

Scope and Contents: This series contains anthropometric measurements for Cahuilla, Catawba, Cherokee, Creek, Crow, Dakota, Kickapoo, Menominee, Navaho, Nez Perce, Omaha, Oneida, Osage, Picuris, Ponca, Potawatomi, Pima, San Felipe, Santa Clara, Sac and Fox, Salish, Seneca, Taos, Yakima, and Wenatchi. There are only a few individuals from most tribes. Three sets of American Museum of Natural History Hyde Expedition forms were completed for each subject: "measures" (head and body measurements), "inspection" (hair, features, limbs, and body surface), and "physiological" (temperature, pulse, health, and senses). Plaster busts were cast of the subjects and the six-digit division of physical anthropology catalog numbers are included among the data. The Chippewa volume includes measurements for a supposed full-blood named Noodin. It is not certain when or where his measurements were made.

## Series 16: Bone Studies, 1893-1929, most undated

## 5.6 Linear feet

**Scope and Contents:** This series consists of osteometric measurements on various human bones. It includes original measurements, calculations, derived comparative tables, drawings, adding machine tapes, manuscripts, and photographs. Sometimes the measurements are organized by bone; sometimes by race, tribe, or ethnic group; and sometimes by geographic area. Related materials may be dispersed through several folders. For some material, several versions or copies are included. Most specimens examined are in the collections of the National Museum of Natural History. The specimens of whites were usually from the George S. Huntington collection, originally in the College of Physicians and Surgeons in New York and later in the Smithsonian. The Egyptian material came from excavations of XII Dynasty rock pits at the pyramid of Lisht. The Peruvian material came from burials at Pachacamac and the Valley of the Chicama that Hrdlička attributed to the Yungas. Many American Indian specimens came from excavations widely distributed over the United States and Alaska, some dug by Hrdlička himself. Hrdlička also collected specimens while on world travels and others through correspondence.

**Processing Information:** Descriptions in quotations marks are Hrdlička's own.

## Series 17: Old Americans, 1914-1930

## 2.08 Linear feet

Scope and Contents: This series includes anthropometric data, personal histories of participants, correspondence, manuscripts, and photographs related to Hrdlička's book *The Old Americans*. His work at the Pathological Institute had awakened Hrdlička to the lack of anthropological records for "normal" Americans needed for comparative studies. As a remedy, Hrdlička wanted to collect measurements to determine what the "typical" American looked like, specifically to see if there was such a thing as an American subtype of white people. He came to the decision that he would have to find whites whose ancestors had been born in America for four generations back. These were so-called "Old Americans." In addition to producing comparative standards for anthropological work, Hrdlička wanted to determine the physical characteristics of these Old Americans and to find what developmental changes had occurred through mixture. He made several trips to secure data, including to Yale University, the University of Virginia (where Robert Bennett Bean assisted him), Harvard University, and the Tennessee mountains. Hrdlička often divided the information into "Old Americans" and "Not Old Americans." He published the results of his study as *The Old Americans* in 1925.

See Series 37: Photographs, "Old Americans" for glass negatives of Old Americans at the University of Virginia.

Box 127	Frequency distributions for various anthropometric measurements, undated Notes: Includes two sets of tables of various measurements, one set may be for Old Americans and the other for Not Old Americans.
	National Academy of Sciences: Notes: Includes frequency distributions of various measurements arranged in the same order as the tables in <i>The Old Americans</i> , although these tables are not the ones used in the publication.  See also Series 3: Correspondence, "National Academy of Sciences".

## Series 18: Children Who Run on All Fours, 1928-1936

## 1.25 Linear feet

Scope and Contents: This series includes drafts of Hrdlička's book, *Children Who Run on All Fours*, and illustrations, data, correspondence, news clippings, and photographs associated with the book. Hrdlička had begun noting the phenomenon of quadrupedal locomotion in the human child during his first trip to Mexico. Hrdlička assumed this was atavistic behavior harking back to times when our prehuman ancestors used this type of progression. Hrdlička published the results of his studies as *Children Who Run on All Fours* in 1931.

Box 132	Children Who Run on All Fours, undated 2 Folders Notes: Includes paste-ups for plates and figures used in the book, notes, and early drafts of the publication.
Box 132	Original data sheets, undated
Box 132	Miscellany, 1930-1935, undated Notes: Includes a letter with a photograph and talk given by Mary Shirley, an anthropometric data sheet on A. Nagle, a review of the book, and a list of names and addresses of people who sent in information.
Box 132	News clippings, 1928-1935  Correspondence, new cases: Notes: Most dated 1930-1931.

## Series 19: Early Man Studies, 1906-1930

## 0.83 Linear feet

Scope and Contents: This series includes notes, correspondence, photographs, and illustrations related to Hrdlička's study of early hominids. Hrdlička traveled widely and often to examine and measure remains attributed to ancient man and to the sites where the fossils were found. He also met and corresponded with many leading researchers into the origins of man, including Raymond Dart, Davidson Black, Eugene Dubois, Sir Arthur Keith, and Sir Arthur Smith-Woodward.

See Series 3: Correspondence, "Dart, Raymond"; "Black, Davidson"; "Dubois, Eugene"; "Keith, Arthur *Sir*"; and "Smith Woodward, Arthur *Sir*" for additional materials. There is also information on Hrdlička's studies of early man in many other series.

## Series 20: European Ethnic History, 1908-1938

## 0.63 Linear feet

Scope and Contents: The series includes notes, bibliographic references, newspaper clippings, and articles about European ethnic variation. One of Hrdlička's lifelong interests was human variability, both between and within races. He spent much of his professional life accumulating anthropometric and osteometric data in his attempt to answer questions regarding variation in humans. It is not known how Hrdlička used these notes. They may have been an outgrowth of the information search on human variation—the accumulated data on the history of the peoples he was studying. Some notes appear related to a series of lectures Hrdlička gave on European ethnic history.

Box 137 Notes, "Man's Differentiation into Races and Nationalities", 1908-1912, 1926-1938, undated  
Notes: This may be Hrdlička's own title for this material. Includes notes on various races or nationalities, mostly on Eastern European peoples. Includes galley proofs of two Hrdlička articles: "Physical anthropology and its aims," 1908, and *Effects of Immigration on the American Type: Population Problems in the United States and Canada*, 1926.

Box 139	Cannibalism, undated Notes: Includes notes on cannibalism as practiced by North American Indians.
Box 139	Chile, undated Notes: Includes thumb-nail sketches of anthropologists. These may have been prepared for the U.S. government during World War II.
Box 139	Choco Indians, undated Notes: Includes anthropometric measurements.
Box 140	Congress of Hygiene and Demography, XV, 1911-1912 Notes: Includes correspondence regarding an Hrdlička exhibit, training an Ellis Island medical officer in anthropometric measurements, and Francis La Flesche's work among the Osage Indians. Correspondents include Hrdlička, Charles D. Walcott, William H. Holmes, and Frederick W. Hodge.
Box 140	Cuna Indians, 1925-1926, undated Notes: Includes anthropometric measurements, articles on the Cuna, photographs, hair samples, bibliographic references, notes, correspondence (some with R.O. Marsh), article concerning the R.O. Marsh expedition, and a copy of the 1925-1926 resolution by the American Association for the Advancement of Science urging the Panamanian government to establish a reservation for the Tule people.

Box 140	Fetuses and children, 1901-1904, 1921, undated Notes: Includes anthropometric notes concerning measurements to take; tables of measurements made on 100 fetuses, newborn, and young infants at the National Museum; correspondence; and measurements obtained by Hrdlička in 1901 at the New York Infant Asylum.
Box 140; Box 293	Hirsuteness, 1930, undated Notes: Includes correspondence, photographs (some purported to be copies of photographs made by Sir Richard Owen in New Zealand in 1868), and drawings of hair growth patterns in men. The drawings are in an oversized box.
Box 140	Kourgan, undated Notes: Includes pages 6 through 11 of notes of an unidentified archeological expedition.
Box 140	Miscellany, undated Notes: Includes a photograph showing how to measure the head of the femur.
Box 140	Current problems and projects, 1916-1928, undated Notes: Includes notes, correspondence, news clippings and an article on children who walk on all fours, photographs, and papers concerning the teaching of physical anthropology in the United States and Canada. Correspondents include A.L. Kroeber, A.E. Jenks, E.A. Hooton, and Robert M. Yerkes.
Box 140	Negro and white children, undated Notes: Includes anthropometric measurements and photographs.
Box 140	Primate and mammal studies, undated Notes: Includes a reprint of Hrdlička's "Brain weight in vertebrates," notes on brain sizes in different animals, news clippings, notes on William L. Abbott's primate specimens, correspondence (some with Jindřich Matiegka), notes on specimens from the Army Medical Museum, and measurements obtained from various mammals and primates.
Box 140	Races, 1928, undated Notes: Includes correspondence.
Box 140	Soviet Union, undated Notes: Includes Soviet newspapers, outlines for "Intensive study of contemporary Russian civilization" courses, and the report "Public Health in the U.S.S.R., No. 4".
Box 141	Soviet Science, undated Notes: Includes articles extolling the Soviet system and handwritten pages on the "Academy of Science SSR" by Hrdlička.

Box 141	Short articles and items, undated
Box 141	Tails, 1920-1928, undated Notes: Includes articles, photographs, correspondence, and news clippings concerning humans with tails.
Box 141	World War I, 1917-1919, undated Notes: Includes correspondence; information supplied by Hrdlička to General Edwin F. Glenn for Woodrow Wilson, titled "The Slavs of Austria-Hungary" and "Races of Russia"; three letters by Hrdlička in December 1919 concerning his response to Franz Boas' accusation about anthropologists being used as spies; maps; news clippings; American Association for the Advancement of Science and National Research Council bulletins and information; and a manuscript of "Macedonia" by Hrdlička.

## Series 22: Manuscripts of Writings, 1901-1944, most undated

### 6.25 Linear feet

**Scope and Contents:** This series consists of typescripts and handwritten drafts, often both for a single manuscript. Hrdlička was a prolific writer, with over 400 publications, including 20 books. Unfortunately, relatively few of his publications are represented in this series. In addition to those listed, manuscripts of Hrdlička's writings are found scattered throughout the collection and are noted in the contents list. Of special interest are some autobiographical pages placed under Hrdlička's name.

**Arrangement:** Arranged by date of publication. Undated materials are placed before dated papers and are arranged alphabetically by title or subject. The materials were originally arranged by file numbers that bore no relation to the year of publication or subject matter.

**Processing Information:** Descriptions in quotations marks are Hrdlička's own.

## Series 25: "From My Journeys", 1898-1938

### 4.4 Linear feet

**Scope and Contents:** This series is essentially a personal diary of Hrdlička's field studies from 1898 to 1938. The manuscripts consist mainly of Hrdlička's daily experiences in fieldwork and contain more information on customs than on physical anthropology. There is more data on Hrdlička's Alaska expeditions than any of his other work. Of special interest are notes on obtaining collections. Hrdlička intended to publish "From My Journeys." The only portion published, however, appeared in 1943 as *Alaska Diary*. A considerable number of photographs are in the series. The exception is the material on Alaska, where few photographs are found, probably because they were removed for use in *Alaska Diary*. The materials cover Hrdlička's trips to Latin America, the American Southwest, Tennessee, Quebec, Egypt, Europe, the Far East, India, Australia, South Africa, and Alaska. The only correspondence in the papers is in folder "MJ 10.63," which contains letters exchanged by Hrdlička and his wife, Marie Strickler, from 1915 to 1916. Folder "MJ 10.69" contains a manuscript which Hrdlička titled "Anthropological and Archeological Work on Kodiak Island." Hrdlička edited the journal. In 1980, Vincent J. McNally organized the materials into folders numbered "MJ 1.1" through "MJ 11.73B". McNally's folder descriptions are more detailed than those included here and contain descriptions of the photographs. A copy of his descriptions is maintained with the papers. Some fragments and early drafts of these papers are in the series of manuscripts of writings.

**Arrangement:** Arranged in order of the numbers assigned by Vincent J. McNally.

Box 161	MJ 1.1, undated Notes: Includes the preface in which Hrdlička tells of his early life, education, career decisions regarding medicine and anthropology, and reason for writing these papers. There is also a table of contents and list of illustrations.
Box 161	MJ 1.2, trips from 1898-1910; begins Mexico 1898, 1898-1910

## Series 26: American Journal of Physical Anthropology, 1917-1942

### 0.63 Linear feet

Scope and Contents: This series includes correspondence, manuscripts, illustrations, reviews, printing blocks and engraving plates, and financial papers related to the *American Journal of Physical Anthropology* (AJPA). Hrdlička was the central and driving force behind the creation of the AJPA in 1918. The journal served to establish the identity of the discipline, allowed Hrdlička to define physical anthropology in broad modern terms, and gave him a platform to campaign for recognition of the profession. He served as the first editor of the AJPA from 1918 to 1942, a period during which twenty three volumes were published. He also contributed considerable personal funds to the journal. In 1927, having previously declined, the Wistar Institute agreed to take over management of the journal from Hrdlička. The AJPA was recognized as the official organ of the fledgling American Association of Physical Anthropologists in 1930.

There is a considerable amount of material regarding the AJPA in Series 3: Correspondence "American Journal of Physical Anthropology". Series 3: Correspondence, "American Anthropological Association" includes letters exchanged with Robert Lowie regarding an agreement for him to refer submissions on physical anthropology to the AJPA. There are book reviews for the journal in Series 22: Manuscripts of Writings, "Undated: Brief book reviews for the *American Journal of Physical Anthropology*".

Box 172	Correspondence, 1929-1931 6 Folders Notes: Includes letters concerning publication of articles and manuscripts. The letter to Lawton, dated March 22, 1930, includes a manuscript of Hrdlička's "Mental fossae."
Box 172	First issue of the AJPA, 1918
Box 173	Manuscripts for the AJPA, unknown authors, undated
Box 173	Illustrations from A.W. Meyer, "The cervical fossae of Allen," AJPA, volume 7, 1924 Notes: Includes photographs.
Box 173	Reviews of articles, arranged alphabetically by author, undated Notes: Includes reviews of articles and books by Hrdlička and a review of <i>Children who run on all fours</i> .
Box 173	Printing blocks for De Garis, AJPA, VII, charts, undated
Box 173	Engraving plate for Hrdlička, AJPA, VII, undated
Box 173	Miscellaneous, undated Notes: Includes financial papers and abstracts of papers.

## Series 27: American Association of Physical Anthropologists, 1924-1931

### 0.21 Linear feet

**Scope and Contents:** This series includes the American Association of Physical Anthropologists (AAPA) constitution and bylaws, correspondence, and membership documents. Hrdlička persuaded other participants at the Section H (Anthropology) meeting of the American Association for the Advancement of Science in December, 1928, to found an organization for physical anthropologists. An organizing committee was formed with Hrdlička elected chairman and Dudley Morton secretary. In 1930, at its first meeting in Charlottesville, Virginia, a constitution and bylaws for the AAPA were adopted. Hrdlička served as chairman until 1932.

Box 173                      Constitution and bylaws, undated

Box 173                      Correspondence A-Z, 1924-1930  
**Notes:**                      Includes correspondence with R. Bennett Bean, Franz Boas, Earnest A. Hooton, George Grant MacCurdy, Adolph Schultz, R.J. Terry, T. Wingate Todd, and Alfred M. Tozzer. Under the letter A is a galley proof of an announcement in *Science* of the creation of the AAPA.

Box 173                      Dudley Morton, Secretary-Treasurer of the AAPA, 1929-1931  
**Notes:**                      Arranged chronologically.

Box 173                      Miscellany, undated  
**Notes:**                      Includes letterhead, announcement for the establishment of the organization, application for membership, and membership lists.

## Series 28: International Congress of Americanists, 1900-1928

## 0.83 Linear feet

Scope and Contents: Most materials in this series concern the XIX International Congress of Americanists (ICA) meeting in Washington, D.C., December, 1915. Hrdlička arranged for the meeting to be held in Washington and served as secretary of the organizing committee and general secretary of the session. Materials of William H. Holmes, chairman of the organizing committee, and Frederick W. Hodge, chairman of the committee on printing and publication, are included. There is also material from Section I of the Second Pan-American Scientific Congress, which met in affiliation with the XIX ICA. There are a few materials for the XX Congress for which Hrdlička served as chairman of the American delegation.

See also Series 3: Correspondence, "International Congress of Americanists," and Series 37: Photographs, "International Congress of Americanists," which includes prints of the XVII congress participants and participants at an unidentified congress in London (probably the XVIII in 1912).

## Series 29: Institute of Population, 1942

### 0.21 Linear feet

**Scope and Contents:** This series includes correspondence, notes, maps, and manuscripts associated with the Institute of Population, which began with the idea of determining areas of the world suited to the mass immigration that was expected to occur when World War II ended. Hrdlička recommended the establishment of the institute to study this situation and got the backing of the President of the United States.

Box 176	Correspondence, 1942 Notes: Primary correspondent is John Franklin Carter.
Box 176	Letter to the President, 1942 December 23
Box 176	Notes on Latin America, 1942 Notes: Includes correspondence.
Box 176	British East Africa, 1942 Notes: Includes Hrdlička's memoranda on this area and his notes.
Box 176	Colombia, 1942 Notes: Includes a McKinley desk map of the world, like those in Series 20: European Ethnic History, that may indicate Hrdlička's ideas of how people spread out across the world.
Manuscripts by Hrdlička	
Box 176	"The problem of racial mixtures", undated
Box 176	"Northern South America and future immigration", undated

## Series 30: Department of Anthropology, 1914-1943

## 0.63 Linear feet

Scope and Contents: This series includes notes, memoranda, building plans, resolutions, correspondence, and invoices from Hrdlička's 38 years as an employee of the United States National Museum. Despite this length of service, there are relatively few materials concerning his involvement in the daily affairs of the department.

Box 177 Smithsonian air raid defense organization, 1941-1942  
Notes: These materials seem to have been directed to T. Dale Stewart.

Box 177 Notes on Civil Works Administration skeletal material and new accessions, 1935-1943  
2 Folders  
Notes: Includes correspondence, a list of "exchange material" from the National Museum, and lists of skeletal remains recovered from excavation (most with assigned catalog numbers, including Peruvian remains obtained by Stewart in 1941, and Alaskan remains collected by Hrdlička from 1935 to 1938).

## Series 31: Lecture Notes, 1920-1932

### 0.63 Linear feet

Scope and Contents: Most of the materials in this series are from a series of lectures Hrdlička delivered in 1924 on the various research fields of physical anthropology. The series includes notes that Hrdlička may have used when he gave the lectures, addresses given at organization meetings, and announcements of lectures.

See also Series 3: Correspondence, "Lectures", and Series 22: Manuscripts of Writings, "Lectures delivered at American University".

## Series 33: Miscellany, 1895-1954

## 0.5 Linear feet

Scope and Contents: This series includes groups of materials too small to merit a series of their own. Some of the materials are dated after Hrdlička's death and do not seem to have belonged to him.

Box 181	Institute of Social Anthropology, correspondence, 1946-1951
Box 181	Anthropology data recording sheets, undated
Box 181	Tubercular study of American Indians, 1908 Notes: In 1908, the Bureau of Interior invited Hrdlička to undertake an extension of his previous work on tuberculosis among American Indians and to present his findings at the Sixth International Congress on Tuberculosis, September 21 to October 12. Since he did not have much time to prepare, Hrdlička was not able to collect many anthropometric measurements. Examined where the Menominee, Quinaeilt, Hupa, Mohave, and Oglala Dakota
Box 181	Address books, 1922 Notes: Includes the information from Hrdlička's 1922 trip to Europe following the International Congress of Americanists held in Rio de Janeiro and when he was Director of the American School in France for Prehistoric Studies.
Box 181	Notes and general, 1895, undated Notes: Includes notes from 1895, Washington Matthew's chart of the Greek alphabet, and two catalog cards describing Lipan Indian skulls acquired as gifts from the Army Medical Museum.

## Series 34: Index Cards, 1899-1948

## 8 Linear feet

Scope and Contents: These index cards are primarily bibliographic entries and most entries are from before 1930. Some cards are dated after Hrdlička's death, having probably been added by staff of the Division of Physical Anthropology.

Processing Information: Titles in quotes are Hrdlička's own.

Box 183 "Papers submitted to the journal: History," American Journal of Physical Anthropology, 1927-1948  
Notes: The cards in the front of the box date from 1945-1948. The bulk of the cards are alphabetical listings of authors who published in the *AJPA* between 1927 and 1941.

Box 184 "Specimens on exhibit", 1929-1942  
Notes: Cards are arranged by catalog numbers and include a short description of the artifact or the location of the exhibit.

Box 184 Unnumbered, 3015-269,219, undated

Box 185 270,000-379,293, unnumbered casts, undated

Box 186 Bibliographic index cards, before 1909  
Notes: The most recent date for an entry is 1908.  
Arranged according to subject dividers, Abdomen-Australians.

"Skull":  
Notes: Cards with bibliographic entries arranged according to subject dividers. Most list publications prior to 1929. The most recent date is 1939.

Box 187 Cranium (Anatomy-Facial), before 1940

Box 188 Cranium (Fontanel bones-Upper jaw), before 1940

"Journal bibliography":

Box 189 "Not published", 1917-1918  
Notes: Includes dividers with no cards. Some cards for publications dating 1917-1918 are behind the dividers.

Box 189 "Published", 1917-1918  
Notes: These cards are not for articles published in the *AJPA*. The cards are arranged by subject dividers. The publication entries are from 1917-1918.

"Indian photo, by tribe":

Notes: Arranged by tribe. Cards are arranged haphazardly within the tribal name dividers—sometimes by tribe, sometimes by photographer, and sometimes by negative number. The cards may have been written after Hrdlička's death. The photographs by Hrdlička apparently were taken between 1899 and 1920. Some photographs were not taken on any of Hrdlička's expeditions, and probably some photographs are copies of prints in the Bureau of American Ethnology collection. Some Dakota are filled with the Chippewa.

## Series 36: Physical Anthropology Folios, undated

*8 Linear feet*

Scope and Contents: This series is comprised of four large green folios, with the title and author's name in gold lettering on the cover. They include charts and tables. It is not known why these materials were bound as they were, but they may have been used to illustrate a talk.

Processing Information: The title in quotes is the title on the front of the folio.

Hrdlička, Aleš:

Box 224	"Physical Anthropology, Grouping, Classifications and Family Trees of Human Races", undated
Box 225	"Physical Anthropology, the Natives of Kharga Oasis, Egypt", undated Notes: Includes photographs of the area and natives and anthropometric data presumably obtained on Hrdlička's trip to Egypt in 1909.
Box 226	"Physical Anthropology, Indians of Southwestern United States and Northern Mexico", undated Notes: Includes anthropometric data presumably obtained on Hrdlička's trips to the area from 1898-1902.
	Schück, A.: Notes: Also known as Vojtech Suk.
Box 227	"Physical Anthropology, the Natives of Natal and Zululand, South Africa", undated Notes: Includes anthropometric data and anatomical and physiological information. This information was collected for the Panama-California Exposition of 1915.

## Series 37: Photographs, 1887-1944

## 29.23 Linear feet

Scope and Contents: This series includes prints, glass plate negatives, lantern slides, nitrate negatives, postcards, and correspondence. Considering their subject matter, the lantern slides for the southwestern United States and northern Mexico were probably taken on expeditions. Among the prints for the 1920 Far East expedition are photographs of Chinese women and of Korea that were probably taken on that trip. Material under "early man" includes photographs and postcards. The prints were originally housed in envelopes bearing Hrdlička's annotations. Some were used in publications. The photographs placed under manuscripts of writings include paste-ups for plates and figures used in some of Hrdlička's publications on Alaska, including "Anthropological Survey in Alaska," *Alaska Diary*, and *Anthropology of Kodiak Island*. How some photographs entered the collection is unknown. With certainty, they could not be placed with expeditions, trips, meetings, or research interests. These prints were placed in the series of miscellany.

## Southwestern United States and northern Mexico:

Box 228                      Lantern slides, undated  
Notes:                      Dividers are titled "Indians by-the-way", "Indian women", and "Indian women at work". Included are Otomi, Huichol, Quichi, Navaho, Mohave, Marahua, Tepehuane, Maricopa, Papago, Apache, Havasupai, Hopi, and Pima. Copies of etchings show cannibalism.

Box 291                      1902 trip to Mexico, 1902  
Notes:                      Includes prints of Huichols, Nicolas Leon and family, and Mrs. Vincenti and child.

Box 229                      Alaska, photographs taken by Riley Moore, 1912

Box 229                      Vojtech Suk photographs from southeast Africa taken in 1913-1914, 1913-1914  
Notes:                      From Suk's expedition for the Panama-California Exposition.

Box 291	#161-#184, circa 1909
Box 243	Original negative jackets, Lots 1-20, undated
	Alaska Field Views: Notes: Most of these photographs are from expeditions of the 1930s. They are uninventoried. Concerning the Uyak Bay prints, researchers should know that Hrdlička referred to a single location as Our Site, Our Point, and Jones Point, the latter being used in publications. Some photographs of Alaska expeditions have been assigned inventory numbers and these prints are organized by that number. These prints are mostly from the earlier expeditions. Most, if not all, are listed on the on-line cataloging system used by the National Anthropological Archives at collections.si.edu. They are arranged alphabetically by subject, although most prints from Uyak Bay were placed behind the other prints.
Box 244	Miscellaneous, circa 1926-1938 Notes: Includes mounts with no prints and a list of some photographs with descriptions.
Box 244	Views taken in the field. 070000.00-070019.00, circa 1926-1938 Notes: Includes views of Kiska Islands, Agatu house site, Amaknak Island, Kagamil Island mummy cave, and a portrait of Hrdlička. Some prints were used in publications.

Box 286	Large book of Anatomical Photographs, undated Notes: Consists of a volume of "Anatomical Photographic Series" prints with descriptions on the verso for most of the photographs; the photographs and descriptions were originally the property of the

Army Medical Museum. The photographs are of skulls, mostly American Indian, some European.

Box 293

Series of Anatomical Photographs, A.M.M., 31 to 40, undated

Notes: Consists of a folio from the "Anatomical Photographs" series of the Army Medical Museum. Despite the title, the photographs are of numbers 1-3, three views of each: front, side, and rear. The skulls were all collected on Lt. Wheeler's expedition, and on the verso it is written that these were presented by Dr. Yarrow to General Crane on April 20, 1874. The skulls are all of Navajo Indians.

Box 293

Print of an articulated skeleton, undated

Notes: The skull has the catalog number 1901 (or 4901 or 901) on the frontal bone. This is not definitely associated with the Army Medical Museum.
