Collection Overview

Repository:	National Anthropological Archives
Title:	Thomas Dale Stewart Papers
Date:	1875-1991, bulk 1931-1991 (bulk 1927-1991)
Identifier:	NAA.1988-33
Creator:	Stewart, T. D. (Thomas Dale), 1901-1997
Extent:	65 Linear feet
Language:	English .
Summary:	Thomas Dale Stewart was a physical and forensic anthropologist and worked at the Smithsonian National Museum of Natural History from 1931 until his death in 1997. He worked under Ales Hrdlicka until 1943, became the head curator in 1960, director of the museum in 1962, and retired in 1971. Stewart's research interests included physical and forensic anthropology and archaeology, mostly in North and South America. He also worked with the F.B.I. frequently to aid in homicide investigations, and worked extensively with the U.S. Army to identify skeletal remains from the Korean War in Operation Glory. The Thomas Dale Stewart Papers primarily deal with his life and career at the Smithsonian, particularly his research projects and publications between 1931 and 1991. Materials consist mainly of correspondence, photographic material, dossiers based on writings and research projects, and administrative files.

Administrative Information

Acquisition Information

Materials were transferred from T. Dale Stewart to the National Anthropological Archives in multiple accretions between 1975 and 2000 under accessions 1981-52, 1981-59, 1986-04, 1988-15, 1988-33, 1995-04, 1998-61, and 2000-46. The bulk of materials in this collection were transferred to the NAA from the Department of Anthropology in 1994 (1995-04).

Related Materials

The following manuscripts related to Stewart and his work can be found at the NAA:

NAA MS 1615- Excavations in Mancos Canyon, Colorado September 1943.

NAA MS 4669- The Townsend Site Near Lewes, Delaware 1962 by Henri Omwake.

NAA MS 4843- Report by T. Dale Stewart on Human Skeletal Material Excavated by W.M. Walker at Cedar Grove Cave, Arkansas and Natchitoches, Louisiana.

NAA MS 7025- A Tentative Closing Report on the Willin Site, Eldorado, Maryland September 1, 1952.

NAA MS 7121- "Memories from Half a Century at the Smithsonian January 11, 1978" recording.

NAA MS 7223- The Townsend Site January 1950.

NAA MS 7264- Documents Concerning Preserved Paleolithic Human Remains Found in the Vicinity of Cueva, Spain 1969-1972.

NAA MS 7357- Material Relating to Dermatoglyphics of Mayan Groups ca. 1947-1949.

NAA MS 7358- Personal Identification in Mass Disasters December 9-11 1968.

NAA MS 7359- T. Dale Stewart on the Identification of Human Remains April 6, 1970.

NAA MS 7474- Sketches of Burials at Ossuary 2, Juhle Site ca. 1971-1972.

Additional material T. Dale Stewart created while assisting Ales Hrdlicka is located at the National Anthropological Archives, *The Papers of Ales Hrdlicka, ca. 1887-1943*.

Many objects and artifact materials collected by T. Dale Stewart throughout his career are also held by the Smithsonian Department of Anthropology. These include skeletal remains and other materials from the Shanidar Cave in Iraq, forensic anthropological material including bone casts from Operation Glory, archaeological materials from excavations in Maryland and Virginia including the Nanjemoy and Potomac Creek sites, and skeletal remains and other related materials from Stewart's 1927 expedition to Alaska with Henry Collins. Contact Anthropological Collections for more information.

Other Finding Aids

See also: Department of Anthropology Records, Series 1: Correspondence, T. Dale Stewart Papers, 1961-1962.

Processing Information

Stewart materials were transferred to the National Anthropological Archives in multiple accessions. Some photographic and research materials were separated from this collection when they arrived at the NAA and were cataloged as NAA Photo Lot 81-59, NAA Photo Lot 86-4, and T. Dale Stewart Materials in the Papers of Ales Hrdlicka. These materials were reintegrated into this collection in 2016. Other Stewart materials were permanently separated from this collection and are listed in the Related Archival Materials note.

In the early 2000s, archives staff processed the Correspondence, Writings and Research, and Operation Glory series. The collection was processed and encoded in its entirety by Tyler Stump in 2016. Where present, original folder titles have been retained. All other were supplied by archives staff.

In 2010, 3,589 negatives from Stewart's work on the "Operation Glory" project were destroyed due to extreme deterioration.

The folder titles of this collection were written by the creator of the collection, T. Dale Stewart. Some of these folder titles include offensive or outdated language. The original titles have been retained to preserve the historical integrity of the archival record. Use of this language does not reflect the views of the National Anthropological Archives or the Smithsonian Institution.

Preferred Citation

Thomas Dale Stewart Papers, National Anthropological Archives, Smithsonian Institution.

Restrictions

The Thomas Dale Stewart papers are open for research.

Biographical

Thomas Dale Stewart was a curator of physical anthropology at the Smithsonian specializing in anthropometry, early man, and forensic anthropology. He worked in the Department of Anthropology for over seventy years. Born in Delta, Pennsylvania in 1901, Stewart moved to Washington, D.C. to pursue a degree at George Washington University. While attending school, he also began working at the Smithsonian in 1924 as a temporary substitute for John Baer, a family friend from Delta. After Baer died during conducting research in Panama, Stewart was invited to stay on as assistant to Ales Hrdlicka, curator of physical anthropology. Hrdlicka was impressed by Stewart's abilities and quickly took him on as a student. Promised that he would succeed Hrdlicka one day if he obtained an M.D., Stewart enrolled at The Johns Hopkins University and graduated in 1931. After graduating, Stewart was rehired by the Smithsonian as an assistant curator.

Stewart rose through the ranks of the Department of Anthropology quickly, being promoted to associate curator in 1939 and curator in 1943 after the death of his mentor Hrdlicka. Stewart was appointed head curator of the department in 1960 and director of the Natural History Museum in 1962. He continued to work at the Smithsonian well after he retired in 1971, conducting research and producing a stream of publications well into his 90s. He died in 1997 at the age of 96. Many of Stewart's early research interests matched those of his mentor: a focus on dental caries, separate neural arch and spondylolisthesis, ossuary excavation, cranial deformations, and other examinations of archaeological remains throughout North America. While Hrdlicka was alive, Stewart provided support for many of his research projects and publications. After Hrdlicka died, Stewart expanded his interests to include forensic topics and analysis of other archaeological remains.

Anthropometry was prominent in a great deal of his work. He was the first to describe Tepexpan Man from Mexico and Midland Man from Texas. He also studied the remains of Neanderthal specimens that Ralph S. Solecki, of the Bureau of American Ethnology, had uncovered at Shanidar Cave in Iraq. In forensic work, as Hrdlicka's heir, Stewart assumed work for the Federal Bureau of Investigation and other law enforcement officials. Moreover, Stewart devised new methods and published books and articles concerning forensic analysis, including his *Essentials of Forensic Anthropology*. In closely related work during 1954-1955, the United States Army engaged Stewart to go to Japan to examine skeletal remains repatriated after the Korean War in a project called "Operation Glory."

In terms of his areal specialization, Stewart was essentially an Americanist. In North America, he worked in Alaska with Henry B. Collins in 1927, and in subsequent years he excavated several ossuaries and other sites in the Washington, D.C., vicinity. These included a site on Potomac Creek in Virginia, Piscataway sites in Maryland, and the Townsend site in Delaware. He also carried out laboratory studies and prepared reports on skeletal remains uncovered by Smithsonian colleagues. In the 1940s and 1950s, Stewart conducted field work at archaeological sites in Mexico, Guatemala, and Peru.

He was awarded the Viking Medal in Physical Anthropology in 1953, the Joseph Henry Medal of the Smithsonian Institution in 1967, and an award from the physical anthropology section of the American Academy of Forensic Sciences in 1981.

Chronology

1901	Born in Delta, Pennsylvania.
1922-1927	Moved to Washington, D.C. and attended George Washington University.
1924	Began working at the Smithsonian Institution.
1927	Sent by Ales Hrdlicka to Alaska to collect skeletal remains with Henry Collins.

1931	Graduated from The Johns Hopkins University with an M.D.
1931	Appointed assistant curator at the Smithsonian under Hrdlicka.
1939	Promoted to associate curator.
1939	Field work in Mexico.
1941	Field work in Peru.
1943	Taught at the Washington University School of Medicine in St. Louis.
1943	Promoted to curator after Hrdlicka dies.
1943	Began working on forensic cases for the F.B.I.
1945	Field work in Mexico.
1949	Field work in Peru.
1947, 1949	Field work in Guatemala.
1954-1955	Traveled to Japan to assist in the identification of skeletal remains from the Korean War (Operation Glory).
1957-1967	Taught at the George Washington University School of Medicine.
1960-1962	Served as head curator of the Department of Anthropology.
1962-1965	Served as the director of the National Museum of Natural History.
1964	Assisted in the production of Smithsonian exhibits on physical anthropology.
1966	Retired from administrative duties and appointed senior scientist.
1971	Retired from the Smithsonian.
1997	Died in Bethesda, Maryland.

Scope and Contents

The Thomas Dale Stewart Papers document his research and professional activities from 1931 to 1991 and primarily deal with his anthropological and archaeological research in North and South America. There is also significant material related to ancient human skeletal remains found in Egypt and the Middle East, Stewart's work identifying skeletal remains for the U.S. Army (Operation Glory), and the history of physical and forensic anthropology. Material documenting Stewart's work with Ales Hrdlicka and other colleagues are also represented in this collection. The collection consists of correspondence, writings and research files, project data, skeletal data punch cards, photographic and illustration materials, and administrative and financial papers.

Please note that the contents of the collection and the language and terminology used reflect the context and culture of the time of its creation. As an historical document, its contents may be at odds with contemporary views and terminology and considered offensive today. The information within this collection does not reflect the views of the Smithsonian Institution or National Anthropological Archives, but is available in its original form to facilitate research.

Arrangement

This collection is arranged in 9 series: Series 1. Biographical and Background, 1937-1983; Series 2. Correspondence, 1931-1990; Series 3. Writings and Research, 1875, 1902-1990; Series 4. Operation Glory, 1954-1957; Series 5. Professional Organizations, 1930-1990; Series 6. Trip Files, 1945-1985; Series

7. Teaching and Lectures, 1950-1970; Series 8. Exhibit Material, 1961-1969; Series 9. Photographs, 1928-1979.

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

- Aging
- Americans
- Anthropology -- Exhibits
- Anthropology -- History
- Archaeology
- Early man -- Neanderthal
- Forensic anthropology
- Fossil hominids
- George Washington University
- Operation Glory
- Physical anthropology
- Physical anthropology -- American Indian
- Physical anthropology -- Early man
- Physical anthropology -- Eskimo
- Primates
- anthropometry

Types of Materials:

- Photographs

Names:

Container Listing

Series 1: Biographical, 1927-1983

Arrangement: The series retains what appears to be Stewart's original arrangement with some changes for clarity. Materials within folders retain Stewart's original order.

Scope and Contents: This series contains biographical material related to T. Dale Stewart and his career as a physical anthropologist at the Smithsonian Institution. It contains diplomas, certificates, membership information, biographical sketches, award materials, interviews with Stewart, and newspaper clippings that span from the beginning of his professional career in the late 1920s to the last years of his life in the 1990s. Some materials also document other aspects of Stewart's career, such as his involvement with the Civil Service during the Second World War and some of his administrative work at the Smithsonian. Many of the interviews, clippings, and awards materials contain celebratory descriptions of Stewart's career and research projects.

Box 1	Biography and bibliography, undated
Box 114	Diplomas and certificates, 1927-1975
Box 1	Membership cards, 1927-1951
Box 1	Civil service commission, 1942-1947
Box 1	Washington University, 1943
Box 1	PA newsletter, 1945
Box 1	Professional societies, 1945-1946
Box 1	Civil defense, 1952
Box 1	New York committee, 1953
Box 1	AAPA Medalist in Physical Anthropology award, 1954
Box 1	Biographical sketch, circa 1962
Box 1	Modern man of science, 1966-1978
Box 1	S.I. oral history interview materials, 1977
Box 1	Gradwohl Medal, 1979
Box 1	Stewart interview with American Anthropological Association, 1979
	Clippings:

Box 1	Forensic Anthropologists Reveal Secrets of the Skeleton, August 1983
Box 1	Egyptian skeleton- neanderthal, 1983 2 Folders
Box 1	Memos and other office notes, circa 1935-1975
Box 1	Business cards, undated
Box 1	Miscellaneous notes, undated
Box 114	Japanese print (rolled), undated

Series 2: Correspondence, 1931-1991

Arrangement: This series was originally organized into three groups organized by date, and have been combined into a single series arranged alphabetically by recipient name or correspondence subject. Materials within folders retain Stewart's original order.

Scope and Contents: This series contains letters and other correspondence written to and from T. Dale Stewart from his appointment as assistant curator at the Smithsonian in 1931 to the end of his professional activities in 1991. Stewart's correspondence was with other anthropologists, doctors, fellow staff and colleagues at the Smithsonian, professional organizations, museums, the Federal Bureau of Investigation and other government agencies, and universities. Most of the letters in this series discuss research, anthropological collections, publications, and field expeditions. There is also a small amount of correspondence related to Stewart's personal life.

[Return to Table of Contents](#)

Series 3: Writings and Research, 1875, 1902-1990

Arrangement: This series is arranged alphabetically by publication/project name. Materials related to the Chaco Canyon, "Essentials of Forensic Anthropology," "The People of the Americas," Potomac Creek, Primate Studies, and Wadi Kubainya projects are arranged in what appears to be Stewart's original order. Materials within folders retain Stewart's original order.

Scope and Contents: This series contains materials related to publications and research projects that Stewart was involved in. Generally, as a minimum, there is a copy of a paper/article or research project description in each file. Also included may be such materials as notes, copies of documents, tables, adding machine tapes, photographs, and illustrations. In some cases where presentation of a paper required travel, travel and accounts documents are included as are programs, correspondence concerning meetings, and other such materials. In some instances there are also letters and other materials concerning publications.

Series 4: Operation Glory, 1954-1957

Arrangement: This series is divided into three subseries. Subseries 4.1: Known Individuals contains photographs and punch cards for soldiers that Stewart and his team were able to identify. Subseries 4.2: Unknown Individuals contains photographs and punch cards for the smaller group of Operation Glory individuals who were not identified (although some of them have since been successfully identified by the Central Identification Laboratory of the Joint POW/MIA Accounting Command in Pearl Harbor, Hawaii). For each individual, two punch cards of skeletal information are followed by a set of 8x10 inch photos of specific age indicators in that individual. Notes on the cards include a list of the photographs taken of each, as well as a list of the casts made of pubic symphyses and other skeletal elements. Subseries 4.3: Research Materials is made up of additional materials from Stewart's trip to Japan, including photographs of laboratories, research notes, travel information, and other related material. Materials in the Known and Unknown Individuals subseries are arranged numerically by individual skeletal record number. Materials in the Research Materials subseries retains Stewart's original arrangement with some minor changes for clarity.

Scope and Contents: This series contains punch cards, photographs, notes, travel and administrative information, and other related materials to Stewart's work on the "Operation Glory" project with the United States Army. At the end of the Korean War, Stewart was hired by the army to help identify the skeletal remains of about 450 American soldiers who had been hastily buried in war graves captured by North Korean troops. After the war, the remains were repatriated to the United States and Stewart and transported to Kokura, Japan where Stewart and other physical anthropologists worked to identify them. By the time Stewart had finished his work in 1955, all but 73 skeletons were identified.

Related Materials: Casts that Stewart made of pubic symphyses and other skeletal elements from "Operation Glory" soldiers are housed at the Department of Anthropology at the National Museum of Natural History. Contact repository for more information.

4.1: Known Individuals, 1954-1955

Series 5: Professional Organizations, 1930-1990

Arrangement: This series is arranged alphabetically by organization name. Materials within folders retain Stewart's original order.

Scope and Contents: This series consists of newsletters, bulletins, meeting records, reports, and other non-correspondence material related to professional organizations and societies that T. Dale Stewart was involved in. Materials span the length of Stewart's professional career. The bulk of the series contains material from the American Association of Physical Anthropologists, the National Academy of Sciences, and the National Geographic Society (Stewart held advisory/leadership roles in all of these). Materials of note include research reports from a number of expeditions and projects sponsored by National Geographic and materials from the early years of the American Association of Physical Anthropologists.

Box 93	American Academy of Forensic Sciences, 1977-1983 3 Folders
Box 93	American Anthropological Association, 1947-1961
Box 93	American Association of Physical Anthropologists, 1940-1965
Box 93	American Association of Physical Anthropologists- Proposed Officers, 1959
Box 93	American Association of Physical Anthropologists- Charter Members, 1930-1980
Box 93-94	American Association of Physical Anthropologists- Annual Meeting Programs, 1930-1971 2 Folders
Box 94	American Genetic Association, 1951
Box 94	American Geographical Society, 1949

Series 6: Trip Files, 1945-1985

Arrangement: This series is arranged alphabetically by event name. Materials within folders retain Stewart's original order.

Scope and Contents: This series contains materials related to trips that Stewart took to academic conferences, celebrations, and other events in Europe and North and South America. It appears that Stewart did not present any research or publications at most of these activities. Materials are from events that Stewart attended during his career at the Smithsonian and in the first few years after his retirement and include event schedules, correspondence, receipts and other travel materials, and copies of presentations given by others and notes.

Box 100	Armed Forces Institute of Pathology (Conference), circa 1983
Box 100	Cuzco Conference, 1948-1949
Box 100	Data on Taung Diamond Jubilee International Symposium, 1985 2 Folders
Box 100	Escuela de Nacional de Antropologia (Mexico), 1944-1945
Box 100	Guatemala, 1948-1949

Box 100a	Trip to Japan (Congress of Anthropological and Ethnological Study), 1968
Box 100a	University of North Carolina, Chapel Hill inauguration ceremonies (Gordon Gray), 1950

[Return to Table of Contents](#)

Series 7: Teaching and Lectures, 1950-1970

Arrangement: This series is arranged alphabetically by lecture title or university name. Materials within folders retain Stewart's original order.

Scope and Contents: This series contains materials from lectures that Stewart gave and classes/seminars he taught about physical and forensic anthropology to undergraduate and graduate students, colleagues, military and rescue personnel, and the general public. Lecture and class topics include the origins of man, early human migrations, and skeletal identification. Materials in this series include lecture notes and other classroom materials, correspondence, illustrations, travel vouchers, and schedules. There is a large group of materials related to Stewart's 1968 seminar: "Personal Identification in Mass Disaster" which was presented to military personnel at the Natural Museum of Natural History.

Box 101	Cold Spring Harbor Symposium, 1950
Box 101	George Washington University teaching material, circa 1960-1967 3 Folders
Box 101	Man in N.E. Asia (C.I.A. Lecture), circa 1953
Box 101	"Man, the Unique Cultural Animal-" American Orthopaedic Association, 1963
Box 101	Perspectives on the Peopling of the New World, 1963
	Seminar on Personal Identification in Mass Disasters:

Series 8: Exhibit Material, 1961-1969

Arrangement: This series is arranged in what appears to be Stewart's original order, with some changes for clarity. Materials within folders retain Stewart's original order as well.

Scope and Contents: This series consists of exhibit script drafts, correspondence, memos, notes, photographs and illustrations, exhibit mockups, and background research for an exhibit on physical anthropology in the National Museum of Natural History that was on display in the 1960s. Stewart, in his capacity as head curator and director of the museum, played a leading role in the development and production of the exhibit. The bulk of these materials were created before the exhibit opened to the public, such as drafts of exhibit scripts and different ideas for a large mural depicting human body mutilation practices from around the world.

Box 103	Physical anthropology exhibit script and other materials, 1965-1969 3 Folders
Box 103	Physical anthropology exhibit plans, 1961-1962
Box 103	Mural- body mutilations, 1966
Box 103	Body mutilation mural- images used, circa 1966
Box 103	Body mutilation mural- images not used, circa 1966

Series 9: Photographs, 1928-1979

Arrangement: This series is divided into 8 subseries. Subseries 9.1: People and Events contains photographs of colleagues, fellow Smithsonian staff, and friends of T. Dale Stewart and were mostly taken between the 1950s and 1970s. Subseries 9.2: Travel and Expeditions contains photographs created by Stewart during some of his trips to Peru and other South American locations, and others that seem to have collected by Stewart for research purposes. Subseries 9.3: Skeletal Remains consists of photographs and negatives of complete skeletons and individual bones. Some photographs were taken at archaeological sites in the field, but most appear to have been taken in museums or laboratories. Subseries 9.4: Lectures and Presentations contains charts, title slides, and images of skeletal remains that Stewart created as he prepared lectures and other presentations. Subseries 9.5: Publications consist of photographs and plates that were created by Stewart for inclusion in bulletins, handbooks, articles, and other publications that Stewart was involved with. Subseries 9.6: Glass Lantern Slides consists of seven trays of approximately 500 glass lantern slides that Stewart created between about 1942 and 1959. Subseries 9.7: Townsend Site, Delaware contains 133 silver gelatin prints and one black and white slide, which depict burials and pits uncovered at the Townsend Site excavation. Subseries 9.8: Mexico, Guatemala, and Peru Trips contains 40 silver gelatin prints and 40 matching negatives, most of which depict structures at Uxmal and Chichen Itza. Most sub-series in this collection are arranged in what appears to be Stewart's original order, though there have been some changes made for clarity.

Scope and Contents: This series is made up of photographs, prints, negatives, and a few illustrations of various sizes created and gathered by Stewart throughout his professional career. Many images were created during archaeological expeditions in North and South America or at the Museum of Natural History to aid in his research or were created for publication. There are a significant number of images from exhibit opening galas, celebrations, award presentations, and other events at the Smithsonian and elsewhere that Stewart attended from the 1950s through the 1970s. There is also a large group of photographs of skeletal remains, many of which are unidentified. Some of the images in this series were previously separated from the Thomas Dale Stewart papers as individual photo lot collections, and have since been re-integrated into this collection.

9.1: People and Events, 1940-1979

Arrangement: Materials are arranged alphabetically by name or event. Materials within folders are arranged in Stewart's original order with some changes.

Scope and Contents: This subseries contains photographs of colleagues, fellow Smithsonian staff, and friends of T. Dale Stewart and were mostly taken between the 1950s and 1970s. Many of these photographs were taken at exhibit openings, parties, award presentations, and other events, though some appear to be publicity photos of colleagues at work in the field or in research facilities. Notable materials in this subseries include a 1959 scrapbook of a trip Stewart took to Prague and the celebration of Ales Hrdlicka's birthday, and photographs from a number of exhibit and hall openings from the National Museum of Natural History.

Box 105	Wetmore, Wedel, Mrs. Pelham, and Stewart, 1970

9.2: Travel and Expeditions, 1928-1961

Arrangement: Materials within folders are arranged in Stewart's original order with changes for clarity.

Scope and Contents: The photographs from this subseries are made up of those created by Stewart during some of his trips to Peru and other South American locations, and others that seem to have collected by Stewart for research purposes. There are a significant number of photographs from archaeological expeditions and trips around South America that are unidentified and may possibly be from Stewart's trips to Peru and Guatemala in the late 1940s and early 1950s. Materials are arranged alphabetically by trip name.

Box 105	H.B Collins Jr. (possibly Alaska expedition), circa 1928
Box 105	"Old Funi" drawing by Edwin Cassedy, undated
Box 105	Peru, 1941 7 Folders
Box 105	Photographs of man and child and cave paintings from Dr. Prokopec, circa 1960
Box 105	Selena-Triail Expedition, undated
Box 105	Unidentified South American trip photos (possibly Machu Pichu), undated
Box 105	Unidentified stone archaeological remains, undated
Box 105	Unidentified trip photos, undated

9.3: Skeletal Remains, 1936-1979

Arrangement: Materials are arranged alphabetically by photograph subject or folder title when Stewart created one. Materials within folders are arranged in Stewart's original order with some changes.

Scope and Contents: The Skeletal Remains subseries consists of photographs and negatives of skeletons and bones. Some photographs were taken at archaeological sites in the field, but most appear to have been taken in museums or laboratories. Many photographs are of skeletal remains that were not a part of Stewart's or the Smithsonian Institution's collections and were sent to Stewart from colleagues at other institutions for research and publication purposes. Although most of the photographs in this series were labeled in some sort of way by Stewart (either with a folder label, caption, or accompanying note), there are a significant number of unidentified skeletal remains and bone fragments in one folder.

Box 106	Zinjanthropus restoration for NGS (Shapiro), 1964

9.4: Lectures and Presentations, 1945-1977

Scope and Contents: This subseries consists of images that Stewart created as he prepared lectures and other presentations. Most images are of charts, title slides, and skeletal remains. Some folders also contain paper records related to Stewart's presentations, but most folders only have a few images without any captions or labels. Materials are arranged alphabetically by lecture/presentation title when known.

Box 106	Anthropological Society of Washington, undated
Box 106	Man in the New World and Anthropometry slides, undated
Box 106	Mexico City paper, 1974
Box 106	Peopling of America slides, undated
Box 106	San Diego, 1977

Box 106 Unidentified glass slides- unlabeled chard, 1945

Box 106 Unlabeled slide negatives, undated

9.5: Publications, 1939-1971

Arrangement: Materials are arranged alphabetically by publication name when known. Materials within folders are arranged in Stewart's original order with some changes for clarity.

Scope and Contents: The images in this subseries were created by Stewart for inclusion in bulletins, handbooks, articles, and other publications that Stewart was involved with. The subjects of these photographs and plates are mostly of skeletal remains, archaeological sites, and charts of skeletal characteristics, and were used in works published by the Smithsonian Institution. Many images are accompanied by instructions for resizing for publication and other special directions for photo services staff. Most photographs in this subseries are labeled and associated with a particular publication, although there is a small group of unidentified drawings and plates.

9.6: Glass Lantern Slides, 1942-1959

Arrangement: Materials appear to be arranged in the original order that Stewart used within each slide box.

Scope and Contents: This series consists of seven trays of approximately 500 glass lantern slides that Stewart created between about 1942 and 1959. Images depict skeletal remains at archaeological sites and in laboratories; slides and charts on skeletal growth and comparisons; North and South American archaeological sites including Cinco Cerros, Peru, Alaska, Patawomeke, the Pickwick and Gunterville Basin, and the Townsend Site, Delaware; anthropometrical tools from the 18th century; and skeletal materials from the Witte Museum in Texas. The majority of slides are unlabeled, but photocopies of original slides boxes and enclosures are included in this subseries. There are about 400 unlabeled slides located throughout this subseries that are likely related to surrounding slides.

9.7: Townsend Site, Delaware, 1948-1949

Scope and Contents:	This subseries was previously Photo Lot 86-4: Thomas Dale Stewart Photographs of Townsend Site, Delaware, circa 1948-1949. Stewart provided general supervision and advice for the Townsend Site excavations (1948-1949) which were conducted by the Sussex Society of Archaeology and History (Delaware). The subseries contains 133 silver gelatin prints and one black and white slide, which depict burials and pits uncovered at the Townsend Site excavation. The photographs were probably made by Stewart, but possibly were made by Henri Geiger Omwake, one of the local archaeologists heading the project. Some images are of subjects that may be culturally sensitive, such as human remains.
Related Materials:	Reports on the Townsend Site excavation can be found in the National Anthropological Archives in MS 4669 and 7223. The National Anthropological Archives holds the Henri Geiger Omwake papers as well. Artifacts and specimens from the Townsend Site can be found in the Department of Anthropology in accessions 187165, 185305, 188932, 191188, and 385319.

9.8: Mexico, Guatemala, and Peru Trips, 1947-1949

Scope and Contents: This subseries was previously Photo Lot 81-59: Thomas Dale Stewart Photographs of Mexico, Guatemala, and Peru, circa 1945-1949. In 1946, the Stewart began a program of cooperation with anthropologists of the Carnegie Institution of Washington and scientists from Guatemala. In part, the project was designed to promote relations between scientists of the Americans and was sponsored by the U.S. Department of States. Stewart's activities involved a study of the highland and lowland Mayans and the study of remains at highland archaeological sites. The subseries contains 40 silver gelatin prints and 40 matching negatives, most of which depict structures at Uxmal and Chichen Itza. Also included are photographs of Stewart and his family, excavations, and modern buildings. There are also lists of captions for a 1949 trip to Peru, though the photographs are not included in the collections.

Related Materials: Notes for Stewart's work in Mexico, Guatemala, and Peru can be found in the National Anthropological Archives in MS 7357. The Department of Anthropology holds artifacts and specimens donated by Stewart as part of this project.

Box 107	Descriptions of photographs, 1947
Box 107	Original enclosures, circa 1947
