Collection Overview

Repository:	National Anthropological Archives
Title:	Patty Jo Watson papers
Date:	1948-2010
Identifier:	NAA.2004-26
Creator:	Watson, Patty Jo, 1932-
Extent:	20.83 Linear feet (31 document boxes, 3 shoeboxes, 1 oversize box, 3 map folders, 1 map roll, and 1 restricted box) 1 Videocassettes (VHS)
Language:	Collection is primarily in English. Some materials are in Arabic, Chinese, Farsi, French, Greek, Kurdish, Persian, and Russian.
Summary:	Patty Jo Watson is an American archaeologist and professor emerita of archaeology at Washington University in St. Louis, Missouri. Though her early career focused on the archaeological study of the ancient Near East, Watson is most well-known for her work on Pre-Columbian Native Americans, particularly in Kentucky's Mammoth Cave area. This collection consists of her professional papers, including articles, correspondence, fieldnotes, illustrations, grant applications, and manuscripts. The materials document Watson's ethnographic research in Iran and her archaeological excavations in Iraq, Turkey, and Mammoth Cave National Park in Kentucky. Also included are her graduate student notes and papers from the University of Chicago and her teaching materials from Washington University in St. Louis.

Processing Information

Watson's papers were rehoused in acid free folders and boxes. Reprints and photocopies of printed materials were removed unless they were annotated by Watson. Post-it notes were photocopied onto acid free paper and then removed. Paper clips and staples were removed; if the relationship between the newly separated papers was not clear, they were grouped together within a folded sheet of acid free paper. Loose papers were grouped into folders by the archivist based on content. Titles in square brackets were supplied by the archivist; the contents of these folders may have been loose in a box or may have been in unlabeled folders. Abbreviations in titled folders have been expanded for clarity.

Biographical Note

Patty Jo Watson is a world-renowned archaeologist and professor emerita at Washington University who worked in both the Old and New World, focusing on the origins of agricultural cultivation. She has made major contributions in archaeological method, practice, and theory, developing a new technique in flotation which is both more efficient and more effective than other systems (Neuman, 15) and advocating for the use of ethnoarchaeology and the scientific method, in support of which she wrote *Explanation in Archeology: An Explicitly Scientific Approach* with Steven LeBlanc and Charles Redman. She is known for interdisciplinary methods, working with paleoethnobotanists, geologists, zoologists, biological anthropologists, and agricultural experts. Her work in Mammoth Cave National Park helped to redefine our understanding of plant cultivation in the New World and turned her into a world-renowned expert in cave archaeology. She was also a pioneer in the study of plant remains, obtaining results in the 1960s in a field that was not popularized until the 1980s (B.).

Watson was born Patty Jo Andersen in Superior, Nebraska, in 1932 and grew up in Sheffield, Iowa. She developed an interest in archaeology after reading Agatha Christie's *Come Tell Me How You Live* (1946) but did not immediately pursue it. She attended Iowa State College as a premed student majoring in zoology (1950-1952). In her second year, she decided that she did not want to practice medicine and chose instead to attend a premaster's program in Anthropology at the University of Chicago. As a result, she never received a Bachelor's degree but was awarded Master's and Doctoral degrees (in 1956 and 1959 respectively). She married her high school sweetheart, Richard "Red" Watson, in 1955. He gave her caving gear as a wedding present, which led to her career in cave archaeology.

While at the University of Chicago, Watson studied under Robert Braidwood. Her first fieldwork (other than her field school at Point of Pines) was on his Iraq-Jarmo project, where Braidwood put her in charge of the soundings at Banahilk, accompanied by some experienced local workers who helped her to gain her footing (Zagros Flanks, 545). The Iraq-Jarmo project focused on the origins of food production, both the cultivation of plants and domestication of animals. In addition to inspiring her lifelong interest in the development of plant cultivation, Braidwood's methods taught Watson the value of interdisciplinary teams, ethnological work in the archaeological discipline, and a scientific

approach (Constantin, 16-17). Her second trip to the Near East (1959-1960) was to Iran, where she undertook an ethnoarchaeological study. Watson continued her association with the Oriental Institute at the University of Chicago through the 1960s, conducting her final Near Eastern fieldwork in 1968 and 1970 at Girikihacian, a Halfian village in Turkey, as part of the Joint Prehistoric Project, Istanbul-Chicago, under the direction of Braidwood and Halet Çambel of the University of Istanbul.

Watson had already begun the transition to New World archaeology at this point. In 1963 she became the director of the Cave Research Foundation Archeological Project. She conducted extensive fieldwork in Salts Cave as well as other caves in Mammoth Cave National Park and at shell mounds on the nearby Green River over the course of the next forty years. She fully transitioned to work in the United States because it was becoming increasingly difficult to work in southwestern Asia. Despite the shift in the location of her work, Watson maintained her interest in the development of agricultural cultivation, adding the study of prehistoric mining. Her work in the caves of the Mammoth-Flint Ridge Cave system and in the Shell Mound Archaeological Project resulted in the discovery that prehistoric Eastern Woodlands peoples had begun cultivating plants before the methods made their way into the southwestern United States from Mexico.

Watson also did a small amount of research in the Southwest, codirecting the Cibola Archaeological Research Project (1972-1974), which focused on a pueblo site connected to the Zuni Nation, studying pottery production. This work has been continued by Arizona State University under the name Cibola Prehistory Project.

The final region in which Watson did fieldwork was China. Her work there was as a consultant to the Xiaolangdi Dam Salvage Archaeology Project at Bancun village between 1991 and 1994. Her expertise in flotation techniques was valuable there as China did not, at the time, have a tradition of excavating the remains of flora and fauna (Peavy, 1). Watson taught briefly at Los Angeles State College, the University of Southern California, the University of California – Los Angeles, and the University of Michigan. Her husband began teaching at Washington University in 1964, but the University did not have an anthropology program until 1968; she began teaching there in 1969. Both she and Red remained at Washington University until 2004.

Watson has supported increasing the role of women in the field of archaeology and chaired the American Anthropological Society's Committee to Study the Academic Employment of Women in Anthropology from 1983 to 1994. She has also advocated for the expansion of the field in other ways, working to enroll Native American students and to include foreign students in the program at Washington University and fostering ties with international programs (P JW reconstructs the past, 3). Watson has received recognition for her work from numerous professional organizations including Washington University in St. Louis, the Society for American Archaeology, the American Anthropological Association, the Archaeological Institute of America, the Southeastern Archaeological Conference, the American Association for the Advancement of Science, the National Academy of Sciences, the National Speleological Society, the American Academy of Arts and Sciences, the Public Broadcasting System, the American Philosophical Society, *Discover* magazine, the Academy of Science of St. Louis, and the Karst Waters Institute.

2009	Granted an Honorary Doctorate of Humane Letters by Washington University, St. Louis
2010	Awarded the Lifetime Achievement Award by the Society for American Archaeology

Scope and Contents

This collection consists of the professional papers of archaeologist Patty Jo Watson. The collection is comprised of articles, correspondence, fieldnotes, illustrations, grant applications, and manuscripts documenting Watson's ethnographic research in Iran in three Kurdish villages, as well as her archaeological work in Iraq, Turkey, and Mammoth Cave National Park in Kentucky. There is little information included regarding her work in the Cibola Archaeological Research Project, as these materials are housed at Arizona State University. Also included are her graduate student notes and papers from the University of Chicago and her teaching materials from Washington University in St. Louis. The materials related to her education, teaching, writings, and professional organizations are incomplete as some of these materials are housed at Washington University in St. Louis. Of particular interest are letters which she wrote to her then fiancé Red Watson during her first field season (1954-1955) at Banahilk in Iraq, which contain observations on the people of the region as well as the work she conducted there; her logbooks, which contain an account of her work in the southeastern United States; and the "Patty Jo Watson doll" given to Watson by students at Flinders University in Australia when she gave a lecture there.

Sensitivity Statement

Please note that the contents of the collection and the language and terminology used reflect the context and culture of the time of its creation. As an historical document, its contents may be at odds with contemporary views and terminology and considered offensive today. The information within this collection does not reflect the views of the Smithsonian Institution or National Anthropological Archives but is available in its original form to facilitate research.

Arrangement

This collection is arranged in 3 series: (1) Research, 1954-2002; (2) Professional Activities, 1955-2010; and (3) Education, 1948-1963.

Series 1: Research, 1954-2002

10.52 Linear feet (13 document boxes, 1 shoebox, part of a 2nd shoebox, part of an oversize box, 1 rolled map, 2 map folders, and part of a 3rd map folder.)

Arrangement: This series is arranged in three subseries: (1) China, 1985-2002; (2) The Near East, 1954-1999; and (3) The United States, circa 1956-2004.

Scope and Contents: This series includes materials related to Watson's field work and research in the Near East, The United States, and China. Although her field work was primarily archaeological in nature, she also performed an ethnoarchaeological study in Iran. The series includes correspondence, log books (Watson's term for her field journals), drafts of papers and articles, notes, maps, illustrations, and photographs. Of particular interest are Watson's letters to her then fiancé Red Watson during her first field season (1954-1955) at Banahilk in Iraq and her log books.

Subseries 1.1: China, 1985-2002

Arrangement: This subseries is arranged alphabetically.

Scope and Contents: Although Watson did not perform any excavations in China, she had ties to the excavation of Bancun village in Henan province. She served as an advisor for the excavation, providing blueprints for a flotation device and expertise on how to use it as well as other American archaeological methods. American ties to Chinese archaeology and participation in the excavation came about through the efforts of the Committee on Chinese Archaeology of the National Academy of Science's Committee on Scholarly Communication with China, which was chaired by Robert L. Thorp (a fellow professor at Washington University). Watson made numerous professional visits to China in the 1990s. This subseries includes correspondence, log books (Watson's term for her field journals), materials relating to the Committee on Chinese Archaeology, and photographs.

Subseries 1.2: The Near East, 1954-1999

Arrangement: This subseries is arranged alphabetically by region.

Scope and Contents: Watson worked in the Near East from 1954 to 1970. The majority of her work there was archaeological in nature, but she also conducted some ethnoarchaeological work. Her fieldwork in Iraq at Banahilk was under the direction of Robert Braidwood of the Oriental Institute at the University of Chicago and her work in Turkey at Girikihaciyan was under both Braidwood and Halet Çambel of the University of Istanbul. Her ethnological work in Iran was intended to create a body of data from which to form hypotheses in her archaeological work. This subseries includes correspondence, drafts of papers and articles, notes on recovered artifacts, maps, illustrations, and photographs. Of particular interest in this subseries are the letters written by Watson to her then fiancé Red Watson during her first field season (1954-1955) at Banahilk in Iraq; the letters contain detailed observations on both the people of the region and the work she conducted there.

Cyprus, 1979

Box 3, Folder 1	Forms (recording pass. models), 1979 Notes: Includes forms and photographs from the Akhera Site in Cyprus.
-----------------	---

Iran, 1956-1980

Notes: Watson's work in western Iran was ethnographic, involving a study of one Laki and two Kurdish villages between October 1959 and June 1960. Her purpose in performing the study was ethnoarchaeological: she wanted to record the subsistence and technological methods used in the communities and find correlations between material culture and behavior as well as architecture and settlement patterns in order to provide a collection of data from which archaeologists studying prehistoric peoples living in similar geographic and cultural contexts could formulate hypotheses. She did not use the names of the communities in her work, instead renaming them Hasanabad, Shirdasht, and Ain Ali. Watson published her work in Iran in Patty Jo Watson, *Archaeological Ethnology in Western Iran*, Viking Fund Publications in Anthropology 57 (Tucson: University of Arizona Press, 1979). This section includes correspondence, tables and diagrams, manuscript drafts, illustrations, and maps.

Ethnoarchaeology, circa 1956-1980

- Box 3, Folder 7-9;
Box 34, Folder 1;
Map-folder 3, Folder 3 Dianne Fischer's original illustrations for monograph: archaeological ethnography in western Iran, 1977
3 Folders
Notes: Includes correspondence and illustrations for Patty Jo Watson, *Archaeological Ethnography in Western Iran*, Viking Fund Publications in Anthropology 57 (Tucson: University of Arizona Press, 1979). The figure and page numbers associated with the illustrations in the folder do not match with those in the published work.

The drawings included in these folders were originally housed in plastic sleeves, some of which had notations on them in pencil. The drawings were photocopied in the sleeves onto acid free paper. In some cases, the notes were not legible in these photocopies, so the sleeves were photocopied on their own with a blank sheet of paper to help clarify the notes. The originals and photocopies are grouped in a folded sheet of acid free paper. Two notes were still illegible in the second photocopy and so the plastic sleeves have been retained in a separate folder (marked [3 of 3]). A note indicating this was made on the paper sleeves surrounding the figures in question.
- Box 3, Folder 10 Frank Hole – Iran, nomads, 1975-1976
Notes: Includes papers by Frank Hole.
- Box 3, Folder 11;
Box 34, Folder 2 Hasanabad – Gail Noppe, circa 1975

	Notes:	Includes drawings of a loom and related tools and diagrams of building interiors.
Box 3, Folder 12		Hasanabad – Mewli's fields and kinship diagrams, undated
Box 3, Folder 13		Hasanabad – miscellaneous, 1973-1979
	Notes:	Includes correspondence and papers.
Box 3, Folder 14; Map-folder 1, Folder 1		Hasanabad – tables and miscellaneous manuscript bits; village map, 1959-1960, 1979, undated
	Notes:	Includes figure captions, a table of contents and bibliography, acknowledgements, transliteration systems, charts with information on the inhabitants of Hasanabad, and a Hasanabad village plan.
Box 3, Folder 15		Hasanabad rejections, 1968-1973
	Notes:	Includes correspondence concerning Patty Jo Watson, <i>Archaeological Ethnography in Western Iran</i> , Viking Fund Publications in Anthropology 57 (Tucson: University of Arizona Press, 1979).
Box 3, Folder 16; Box 34, Folder 3		Hasanabad, etc. – sketches and diagrams (Andreas Harlle), circa 1975
	Notes:	Includes drawings of architectural features and artifacts.
Box 34, Folder 4		Iranian monograph – illustrations – drafts – Andrea's sketches, circa 1977-1979
	Notes:	Includes ink drawings with penciled in notations related to Patty Jo Watson, <i>Archaeological Ethnography in Western Iran</i> , Viking Fund Publications in Anthropology 57 (Tucson: University of Arizona Press, 1979).
Box 4, Folder 1		Iranian village ethnography – correspondence about drafting, room counts, etc.; details on individual living rooms, 1960, 1974-1975
	Notes:	Includes correspondence and plans of houses and field divisions.
Box 4, Folder 2-3		Iranian village ethnography – early manuscript and notes, 1959-1970 2 Folders
	Notes:	Includes ethnographic notes, village maps, crop yields, household descriptions, and drafts of "Archeological Ethnography in Iran" and "Aliabad Report" by Watson.
Box 4, Folder 4		Iranian village ethnography tables (old and new names), 1959-1969
	Notes:	Includes charts with names and other information about the inhabitants of Hasanabad, Mangalat, and Faraman.
Box 4, Folder 5-6		Iranian village manuscript – early draft, 1963

2 Folders

Notes: Includes a draft of "Flocks and Fields: a sedentary Laki community and a transhumant Kurdish community in western Iran" which Watson submitted to Braidwood.

Box 4, Folder 7

"Mud walls and black tents", circa 1961

Notes: Includes a manuscript concerning ethnographic work performed by Watson in Iran in the communities of Aliabat and Mangalat. The sections appear to be out of order and some sections may be missing. The date was arrived at based on blank quizzes which were reversed and interspersed between sections.

Iraq, 1954-1989, undated

Notes: The Oriental Institute's Iraq-Jarmo Project (1948-1959) was headed by Robert J. Braidwood and focused on excavations at Jarmo, with soundings taken at other locations, including Banahilk and M'lefaat, and was brought to a close as a result of the political unrest in Iraq following the 14 July Revolution in 1958. The main goal of the project was to discover evidence of prehistoric food production. Watson headed the soundings at Banahilk in her first field season (she had previously only worked in the field during her field school at the University of Arizona) in 1954-1955. The goal of the soundings at Banahilk was to define a Halafian assemblage; Watson's notes and illustrations of the pottery excavated at the site are included in the collection. Although portions of the findings from the excavation had been published previously, the full findings were published in Linda and Robert Braidwood, Bruce Hose, Charles A. Reed, and Patty Jo Watson, eds., *Prehistoric Archaeology Along the Zagros Flanks* (Chicago: Oriental Institute of the University of Chicago, 1983). This section includes correspondence and drafts related to this publication as well as notes on pottery excavated at Banahilk and other correspondence. Of particular interest are the letters written by Watson to her then fiancé Red Watson during her first field season at Banahilk, which include detailed observations on the people of the region as well as the work being conducted.

Turkey, 1968-1998

Notes: The excavations at Girikihaciyan undertaken by the Joint Prehistoric Project, Istanbul-Chicago, in 1968-1970 were headed by Watson under the direction of Halet Çambel of the University of Istanbul and Robert J. Braidwood of the University of Chicago. Girikihaciyan is a Halafian village; work there was intended to gain a greater understanding of the Halafian culture of 5000-4500 BC. One of the main focuses of the expedition was to study food production methods, which included agricultural and pastoral methods and may also have included the use of draft animals in farming. In pursuit of this, Watson used flotation to isolate botanical remains. Watson and her student, Steven LeBlanc, published their findings in Patty Jo Watson and Steven A. LeBlanc, *Girikihaciyan: A Halafian Site in Southeastern Turkey*, Institute of Archaeology Monograph 33 (Los Angeles: University of California, 1990). This section includes correspondence, tables and charts, maps, slides, and drafts of papers and articles.

Subseries 1.3: The United States, circa 1956-2004

Arrangement: This subseries is arranged alphabetically by region.

Scope and Contents: The majority of the archaeological work performed by Watson in the United States took place in or around Kentucky, but she also conducted some work in the Southwest. All of this work focused on prehistoric Native American peoples and much of it reflects Watson's interest in food production. This subseries includes correspondence, papers and articles, log books, and maps. Of particular interest are Watson's log books, which served as a journal during her field work.

The Southeast, 1962-2004

Notes: Much of the work Watson did in the Southeast was cave archaeology. The materials in this section are divided, as much as possible, by location, but there is a great deal of overlap between Watson's work in Mammoth Cave, Salts Cave, the Shell Midden Archaeological Project, and Jaguar Cave. This section includes correspondence, materials related to grants, papers and articles, and Watson's logbooks, which served as a journal during her fieldwork.

Botany and agriculture, 1972-1995

Notes: These materials include papers which concern work done in areas of the United States where Watson did not work, but which relate to the paleoethnobotanical work she was doing in Kentucky.

Box 8, Folder 8	Midwest paper – with October 1987 revisions, 1987-1988 Notes:	Includes correspondence and a proof of a paper titled "Prehistoric Gardening and Agriculture in the Midwest and Midsouth" which Watson contributed to a conference titled Interpretations of Culture Change in the Eastern Woodlands During the Late Woodland Period.
-----------------	--	---

Box 8, Folder 9	National Endowment for the Humanities proposal, 1976-1978 Notes: Includes materials related to a National Endowment for the Humanities proposal titled "Early Horticulturists of West Central Kentucky."
Box 8, Folder 10	[Newsom, Lee – "history and geographic distribution of cucurbita pepo"], 1992 Notes: Includes correspondence and a paper on Pleistocene-Holocene transition gourds in Florida.
Box 8, Folder 11	[Paleoethnobotanical correspondence and papers], 1972-1977 Notes: Includes correspondence, charts, and papers about prehistoric plants in the Eastern and Midwestern United States – Richard Yarnell is the primary correspondent and author of the majority of the papers.
Box 8, Folder 12	[Petersen, James – "mid-holocene evidence of cucurbita"], 1995 Notes: Includes correspondence and a paper on mid-Holocene gourds in Maine.
Box 8, Folder 13	Phillips spring site – W. Missouri, 1978-1979 Notes: Includes correspondence and reports regarding work done at Phillips Spring, Missouri, by Marvin Kay.
Box 9, Folder 1	Cloudsplitter symposium – Society for American Anthropology 1980, 1978-1980 Notes: Includes correspondence and one paper related to the Cloudsplitter symposium and two National Science Foundation grant applications for work at the Cloudsplitter Rock Shelter.
Box 9, Folder 2; Box 34, Folder 13; Map-folder 3, Folder 5	Jaguar cave – backup for Voligny's map, 1977-1983 Notes: Includes maps of Wolf River Cave and Jaguar Cave, corrections, and correspondence.
Box 9, Folder 3	Kentucky geological survey lists, 1976 Notes: Includes correspondence ordering maps of Kentucky. Log books, 1969-2003 Notes: Some of the pages in these books had small post-it note tabs on them. The post-it notes were photocopied onto acid free paper and left interleaved within the books at the location where the post-it note was originally located.

	Mammoth Cave National Park, 1962-2004 Notes:	Mammoth Cave National Park in Kentucky includes the longest cave system in the world, spanning over 400 miles. The majority of the work Watson conducted in the park was in Salts Cave, but she also worked in Mammoth Cave, Lee Cave, and Bluff Cave. Her work in these caves was designed to understand how prehistoric people used the caves and to discover information about the diet of those people and their food production methods (agricultural cultivation was just beginning in the region) using paleofecal and botanical remains. Watson published her findings

from Salts Cave in Patty Jo Watson, *The Prehistory of Salts Cave, Kentucky* (Springfield: Illinois State Museum, 1969) and her findings from her further research in the other caves of the Park in Patty Jo Watson, ed., *Archeology of the Mammoth Cave Area* (New York: Academic Press, 1974). This section includes correspondence, maps, papers and articles, grant proposals and reports, surveys, and materials related to the publication of *Archeology of the Mammoth Cave Area*.

	Salts Cave, 1962-1980, 1990 Notes: Watson's work in Salts Cave began when she became the director of the Cave Research Foundation Archeological Project in 1963. Salts Cave lies within Mammoth Cave National Park in the Flint Ridge Cave system which was, at the time, considered to be a separate system from the Mammoth Cave system (though a passage linking the two has since been discovered). The initial goals of the project were to date the materials discovered in Salts Cave and to determine how deeply into the cave prehistoric peoples had explored, but as work progressed, the project grew to encompass archaeobotanical study of the paleofecal and plant remains discovered. Watson published her findings in Patty Jo Watson, <i>The Prehistory of Salts Cave, Kentucky</i> (Springfield: Illinois State Museum, 1969) and Patty Jo Watson, ed., <i>Archeology of the Mammoth Cave Area</i> (New York: Academic Press, 1974). This section includes papers

	Shell Mound Archaeological Project, 1970-1978 Notes: The Shell Mound Archaeological Project (1971-2005) was co-directed by Watson and William H. Marquardt (a student of Watson's). Fieldwork began in 1972 on shell mounds on the Middle Green River approximately forty miles from Mammoth Cave and Salts Cave. Watson and Marquardt were looking for botanical samples to further develop the evidence of plant cultivation discovered in Salts Cave. The first mound they studied was the Carlston Annis mound, which had been excavated by the Works Progress Administration in the 1930s. They made extensive use of flotation to isolate botanical remains. Watson and Marquardt published their findings in William H. Marquardt and Patty Jo Watson, eds., <i>Archaeology of the Middle Green River Region, Kentucky</i> (Gainesville: Institute of Archaeology and Paleoenvironmental Studies, University of Florida, 2005). This section includes materials related to grant proposals and finances.

Financials, 1970-1978

Box 13, Folder 14	National Science Foundation, 1977-1978 Notes: Includes materials related to a National Science Foundation proposal titled "Natural and Cultural Processes in the Formation of an Archaic Shell Midden on the Green River, Kentucky."
	The Southwest, circa 1956-circa 1958, 1971-1988 Notes: Watson did her field school with the University of Arizona at Point of Pines, but did not return to the southwest until 1972, when she worked on the Cibola Archaeological Research Project (CARP), which she codirected with Steven LeBlanc and Charles Redman. The focus of this project was the survey and excavation of a pueblo site in the El Morro Valley of New Mexico. The research, faunal specimens, and ceramic artifacts from this project are held by Arizona State University, and many materials related to the project can be found in the Digital Archaeological Record . This collection contains two papers related to the southwest, but not to CARP, and slides and a drawing from the Cibola fieldwork.
Box 13, Folder 15	[Kleindienst,] Max – MA paper on 1954-55 Gallina excavations, circa 1956 Notes: Maxine Kleindienst was a fellow student of Watson's at the University of Chicago.
