Collection Overview

Repository:	National Anthropological Archives
Title:	Richard L. Hay papers
Date:	1953-2005
Identifier:	NAA.2008-09
Creator:	Hay, Richard L. (Richard LeRoy), 1926- Leakey, L. S. B. (Louis Seymour Bazett), 1903-1972 Leakey, Mary D. (Mary Douglas), 1913-1996
Extent:	15.97 Linear feet ((13 document boxes, 3 flat boxes, 8 card file boxes, and 1 oversized box) plus 1 CD-RW and 1 map folder)
Language:	English .
Summary:	Richard LeRoy Hay was a geologist, known for his contributions to sedimentary petrography and archaeological geology. This collection contains field notebooks, maps, photographs, data, and documentation of geological specimens he collected, primarily in Africa, but also in the United States, Europe, and Asia. He was known for his work with Mary Leakey, in which he provided the geological framework for Olduvai Gorge and Laetoli in Tanzania.

Administrative Information

Provenance

These papers were donated to the National Anthropological Archives in January 2009 by Richard L. Hay's widow, Lynn Hay.

Related Materials

Hay's collections of thin sections and geological specimens from Olduvai Gorge, Laetoli, Oldoinyo Lengai, and Kerimasi volcano are held by the Smithsonian Institution's Human Origins Program.

For other materials at the National Anthropological Archives relating to Olduvai and Laetoli, please see the Louise Marie Robbins papers.

Processing Information

The papers of Richard L. Hay were received partially organized. Most of the collection was packed and sent from Hay's home in Tucson after his death. A small portion of Hay's Olduvai photos, reprints of his publications, and X-ray diffraction data were sent to the archives later by his colleague Marie Jackson. The processing archivist kept existing groupings and arrangement and organized the collection into eight series. Original folder titles were retained with titles assigned by the archivist placed within square brackets. Oversized materials were separated and replaced with notes indicating original and new locations.

Biographical Note

Richard LeRoy Hay was a geologist, known for his contributions to sedimentary petrography and archaeological geology. He worked closely with Mary Leakey for more than thirty years and provided the geological framework for Olduvai Gorge and Laetoli in Tanzania.

Hay was born on April 29, 1926 in Goshen, Indiana. He attended Ursinus College briefly (1944-45) before transferring to Northwestern University, where he received his B.S. (1946) and M.S. (1948) in geology. In 1952, he earned his Ph.D. in geology from Princeton University and served in the U.S. Army Corps of Engineers (1952-54).

After leaving the army, Hay worked as a geologist for the U.S. Geological Survey (1954-1955) and in 1955 began his academic career at Louisiana State University, Baton Rouge (1955-57). In 1957 he accepted a position at University of California, Berkeley and remained there until his retirement in 1983. From 1983 to 1997, Hay was Ralph E. Grim Professor of Geology at University of Illinois, Urbana Champaign, and later had an appointment as adjunct professor at the University of Arizona, Tucson (1998-2006).

Hay made his first trip to Olduvai Gorge in 1962 and continued to research and publish numerous articles on Olduvai for the next four decades. His most significant publication was his monograph, *Geology of the Olduvai Gorge* (1976), in which he provided a detailed study of the geologic history of Olduvai, placing hominid remains and other archaeological findings at the site in a paleogeographic context. Also significant was his geological analysis of tuff at Laetoli bearing early hominid footprints; he coauthored with Mary Leakey "Pliocene Footprints in the Laetoli Beds at Laetoli, Northern Tanzania" (1979) and "The Fossil Footprints of Laetoli" (1982).

In addition to Olduvai Gorge and Laetoli, Hay conducted geological fieldwork at Oldoinyo Lengai, Ngorongoro caldera, and Kerimasi volcano in Tanzania, as well as Rusinga Island, Lake Magadi, Amboseli, and Mount Suswa in Kenya. He also worked at several sites in the United States, including the John Day region of Oregon, the Green River formation in Wyoming, Amargosa Desert in Nevada, and Searles Lake in California. Additionally, he worked in west-central Wisconsin where he discovered the replacement of uppermost Precambrian and Cambrian-Ordovician rocks by low-temperature potassium-feldspar.

During his lifetime, Hay received many honors for his accomplishments in geology. He was a Fellow of the Geological Society of America, American Association for the Advancement of Science, and California Academy of Sciences. He was awarded the Geological Society of America's Kirk Bryan Award in 1978 and the Rip Rapp Archeological Geology Award in 2000. In 2001, he received the Leakey Foundation's Leakey Prize, awarded for intellectual achievement in the field of human evolution. Posthumously, a memorial was held for Hay at the GSA annual meeting in 2007.

Hay died at the age of 79 on February 10, 2006.

Scope and Contents

This collection comprises the professional papers of Richard LeRoy Hay. Among his papers are his correspondence with Mary D. and Louis S. B. Leakey and his research at Olduvai Gorge and Laetoli, consisting of his field notebooks, maps, photographs, data, and documentation of geological specimens he collected. Also in the collection is his research at other sites in East Africa, including Kerimasi and Oldoinyo Lengai in Tanzania and Rusinga Island in Kenya. To a lesser extent (although still a significant amount) in the collection is the documentation of Hay's research in the United States. Present are field notebooks and photographs from his research in Amargosa, Nevada which served as a geologic analog for Olduvai. Also in the collection are field notebooks spanning from 1958 to 2004 containing his notes on his research in Oregon, Hawaii, Wyoming, California, New Mexico, Colorado, Arizona, Wisconsin, and other regions in the country. Mixed in are notes from his research in other countries including Pakistan, Scotland, and France. The collection includes his field notebooks from his service in the U.S. Army Corps of Engineers, during which he spent some time in Japan. There are no notes from his work as a geologist for the U.S. Geological Survey.

Please note that the contents of the collection and the language and terminology used reflect the context and culture of the time of its creation. As an historical document, its contents may be at odds with contemporary views and terminology and considered offensive today. The information within this collection does not reflect the views of the Smithsonian Institution or National Anthropological Archives, but is available in its original form to facilitate research.

Arrangement

This collection is organized into 8 series: (1) Correspondence with Louis and Mary Leakey, 1961-1970, 1988-1996; (2) East Africa Research, 1958-2005; (3) Non-East Africa Research, 1953-2004; (4) Sample Descriptions, 1956-2001; (5) Specimen Sample Lists, 1959-1998; (6) Publications, 1959-2004; (7) Photographs, 1957-1972, 1989-2001; (8) Fieldwork Tools, undated

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

Archaeological geology
Geology

Places:

Laetoli Site (Tanzania)
Olduvai Gorge (Tanzania)

Series 2: East Africa Research, 1958-2005

3.57 Linear feet (plus 1 map folder)

Scope and Contents: Hay's fieldwork in Olduvai Gorge and Laetoli in Tanzania and other sites in East Africa spanned from 1962 to 2002. This series contains field journals, diagrams of stratigraphic sections, notes, data, photographs, and maps relating to his research in East Africa, which also included Oldoinyo Lengai, Ngorongoro caldera, and Kerimasi volcano in Tanzania as well as Rusinga Island, Lake Magadi, Amboseli, and Mount Suswa in Kenya. Absent from the collection are notes for his fieldwork in 1984, 1986-1988, 1990-1993, 1996, and 1997. Additional materials in this series are a curriculum vitae that he submitted for a grant to fund Olduvai research and reprints on Olduvai that he collected or were sent to him by the authors.

Please see Series 4. Sample Descriptions for descriptions of geological specimens collected from Olduvai and Laetoli. See also Series 1. Correspondence, Series 5. Specimen Sample List, Series 6. Publications, and Series 7. Photographs for more materials relating to Olduvai and his other research in East Africa. Series 3. Non-East Africa Research may also be of interest as it contains Hay's Amargosa research, which served as an analog to Olduvai Gorge.

Arrangement: This series is arranged in 7 sub-series: (2.1) Field notebooks, 1962-2002; (2.2) Stratigraphic Sections, 1962-1982; (2.3) Olduvai, 1958-2005; (2.4) Laetoli, 1973-1982; (2.5) Rusinga, 1985-1987; (2.6) Oldoinyo Lengai (carbonatites), 1958-1998; (2.7) Maps, 1961-1964

Series 3: Non-East Africa Research, 1953-2004

0.83 Linear feet

Scope and Contents: This series mostly contains field notebooks from Hay's research in the United States, with some notes mixed in from his research in other countries including Pakistan, Scotland, and France. At the beginning of the series are field notebooks and photographs from his Amargosa research, which served as an analog to Olduvai Gorge. The notebooks in the rest of the series cover his research in Oregon, Hawaii, Wyoming, California, New Mexico, Colorado, Arizona, Wisconsin, and other regions in the country. Also in the collection are his 1953 to 1954 field notes while stationed in Japan as a member of the U.S. Army Corps of Engineers. Only select sites covered in each notebook are listed below.

A few of the field notebooks in Series 2. East Africa Research contain some notes from Hay's research outside of East Africa. Please also see Series 7. Photographs.

Arrangement: After the first 6 folders, the series is arranged chronologically.

Series 7: Photographs, 1957-1972, 1989-2001

5.09 Linear feet

Scope and Contents: This series is mostly comprised of photos of rock samples and aerial and site photos of Olduvai, Laetoli, and surrounding areas. Folders with alphanumerical titles in boxes 21 through 23 refer to site numbers in that region and contain aerial photos. Also in this series are photos of Panamint Springs, a crater in Panama, and unidentified rock samples.

More photos can be found in Series 2. East Africa Research and Series 3. Non-East Africa Research.

Box 20	Misc. Photos, undated Notes: Panamint Springs, Panama Crater, and unidentified rock samples
Box 25	[Scrapbook photos], 1962-1969, undated Notes: Field photos of East Africa, Sicily, and Syracuse; also Life magazine article on Richard Leakey, "On safari with a man called ostrich."
