MS 2205 Copies of Alexander von Humboldt collection of Mexican pictographic manuscripts, National Anthropological Archives, Smithsonian Institution

Restrictions

The collection is open for research.

Access to the collection requires an appointment.

Conditions Governing Use

Contact the repository for terms of use.

Biographical Note

Alexander von Humboldt was a Prussian naturalist and geographer who traveled extensively in Central and South America. The records and studies he made during his travels helped establish physical geography and geophysics as disciplines. His writings such as *Voyage de Humboldt et Bonpland* and *Kosmos* also contributed to make him one of the foremost scholars of the 19th century.

Scope and Contents

The collection consists of 18 drawings and 2 photostats. The drawings are copies of fragments of Aztec manuscripts collected by Alexander von Humboldt and donated to the Royal Library of Berlin (now the Berlin State Library or Staatsbibliothek zu Berlin) in 1806. The drawings were made by Wilhem von den Steinen from the originals in the Royal Library. They were commissioned by Eduard Seler and the Bureau of American Ethnology to illustrate Seler's article "Mexican Picture Writings of Alexander von Humboldt" in the *Bureau of American Ethnology Bulletin*, 28, (1904).

Please note that the contents of the collection and the language and terminology used reflect the context and culture of the time of its creation. As an historical document, its contents may be at odds with contemporary views and terminology and considered offensive today. The information within this collection does not reflect the views of the Smithsonian Institution or National Anthropological Archives, but is available in its original form to facilitate research.
