## Collection Overview

<b>Repository:</b>	National Anthropological Archives
<b>Title:</b>	Frank H. H. Roberts Jr. photographs in MS 4851
<b>Identifier:</b>	NAA.PhotoLot.4851
<b>Date:</b>	1921-1941
<b>Extent:</b>	ca 3100 Photographs (Prints: 8 boxes; Nitrate negatives: 15 boxes, 1 MS folder; Acetate negatives: 8 boxes; Glass negatives: 2 boxes plus sink-mats; Lantern slides: 4 trays)
<b>Creator:</b>	Roberts, Frank H. H. (Frank Harold Hanna), 1897-1966
<b>Language:</b>	English .
<b>Summary:</b>	This material forms the photographic component of MS 4851, the Frank H.H. Roberts, Jr. papers. The bulk of the photographs document Pueblo and Basketmaker period sites excavated by Roberts, particularly in Colorado, Arizona, and New Mexico, and Paleo-Indian sites including Lindenmeier in Colorado and San Jon in New Mexico. In addition there are photographs of the Shiloh Mound site in Tennessee. Other sites studied by Roberts around the United States are represented to a smaller degree. There is also a small series that relates to sites outside the United States. The collection includes images of human remains.

## Administrative Information

### Acquisition Information

Roberts deposited his papers and photographs with the Bureau of American Ethnology archives in 1964, prior to his retirement from the BAE.

### Provenance

Some prints in the Lindenmeier series had been loaned to Edwin Wilmsen and were subsequently absorbed into the collection *Frank H.H. Roberts, Jr., and Edwin N. Wilmsen's Papers Concerning the Lindenmeier Site, Larimer County, Colorado* in the archives; these prints were reunited with Photo Lot 4851. The Shiloh Mound series also had prints separated and formed into Photo Lot 137; these prints were reunited with Photo Lot 4851 and Photo Lot 137 dissolved.

### Related Materials

Other collections and manuscripts in the NAA that include material by Roberts, document Robert's work, or pertain to subjects in this collection can be found in the Records of the Bureau of Ethnology, the BAE Numbered Manuscripts, the Records of the Department of Anthropology, and the papers of John P. Harrington, Esther S. Goldfrank, Neil M. Judd, Herbert

W. Krieger, Donald J. Lehmer, Frank M. Setzler, and William Duncan Strong. The Human Studies Film Archives (HSFA) holds a number of Roberts' films.

The anthropology collections of the National Museum of Natural History hold artifacts collected by Roberts.

## Other Finding Aids

A guide to MS 4851, the Frank H. H. Roberts Jr. papers, is available in the repository.

A container list for the negatives is available in the repository.

Item-level descriptions for the Shiloh Mound photographs are available in the collection.

## Available Formats

Roberts photographs relating to Chaco Canyon have been digitized and are available via the Chaco Research Archive website.

## Processing Information

The collection was processed by Gina Rappaport in 2009-2011. Previous processing of the photograph component of MS 4851 included imposing a basic arrangement; this was maintained to some degree but with some re-arrangement to restore some original order. To the extent possible, all negatives and prints were matched, with a single identifier given to each image in the format 4851[series.item]. Roberts' numbering of the Lindenmeier subseries was maintained. It should be noted that not all negatives have associated prints, and some prints do not have associated negatives; therefore, both the prints and the negatives may need to be consulted to view all of the images.

Collection and image descriptions provided in this finding aid were compiled using the best available sources of information. Such sources may include the creator's annotations or descriptions, collection accession files, primary and secondary source material (i.e. documents, publications, and websites), and subject matter experts. While every effort is made to provide accurate information, it is understood that errors may reveal themselves following review by other subject experts, and new information is welcome.

## Preferred Citation

## Scope and Contents

The Frank H.H. Roberts, Jr. photographs document the early years (1921-1941) of Roberts' career - first as a graduate student in archaeology and then as an archaeologist with the Bureau of American Ethnology. There are over 3100 images, the bulk of which relate to Pueblo and Basketmaker period sites excavated by Roberts, particularly in Colorado, Arizona and New Mexico and Paleo-Indian sites including the Lindenmeier site in Colorado and San Jon in New Mexico. In addition there are photographs of the Shiloh Mound site in Tennessee. Other sites studied by Roberts around the United States are represented to a smaller degree. There is also a small series that relates to sites outside the United States.

Site images show excavations, artifacts and human remains *in situ*, workers and their camps, and the general area surrounding the excavations. There is a large series showing artifacts including pottery and stone and bone tools from various sites. Many of the site and artifact photographs appear in Roberts' and others' publications. Some of the published photographs are arranged as such however most are filed in site or artifact series. Also in the collection is a small number of Roberts' personal photographs and several images of the Smithsonian Institution buildings and grounds.

The collection also contains several photographic reproductions of maps used in publication, but more cartographic material can be found in MS 4851.

The collection contains images of human remains.

---

## Arrangement

The collection is organized into the following series:

- Archaeological sites, chronological
- Archaeological sites, alphabetical
- Artifacts
- Maps
- Foreign travels and sites
- Miscellaneous
- Publications
- Lantern slides

Each photograph has a unique identifier which is a combination of the collection number, series or subseries abbreviation, and an item number. For instance, "4851SJ34" is item 34 in the subseries San Jon; 4851AF129 is item 129 in the series Artifacts.
