Biographical / Historical

The Krainik Ballooning Collection was amassed by Clifford and Michele Krainik, experts in 19th and early 20th century historical photographs, negatives, and ephemera. This collection of 19th and 20th century ballooning memorabilia contains 112 stereoscopic photographs; 107 photographs; 84 postcards, trade cards, valentines, and similar items; 80 prints; and 23 miscellaneous items.

Scope and Contents

The Krainik Ballooning Collection contains 112 stereoscopic photographs; 107 photographs; 84 postcards, trade cards, valentines, and similar items; 80 prints; and 23 miscellaneous items all pertaining to 19th and 20th century ballooning. Highlights of the stereoscopic photographs include: views of T.S.C. Lowe's balloons during the Civil War; views of the Nadar and Godard balloons; balloons during the Boer War, Russo-Japanese War, and WWI; and views of the airships *Ganymede*, *Great Western*, *Phantom Balloons*, *Buffalo*, *Madame Carlotta*, and *The Aerial*. The photographic portion of the collection features Matthew Brady's views of Lowe's balloons during the Civil War; views of the balloon *Madam Carlotta* before and during flights; smoke and gas balloon inflation and flights; and portraits of T.S.C. Lowe and other pioneers of ballooning.

The collection also contains lithographic cards printed in Germany, whimsical advertising trade cards incorporating popular ballooning motifs and events, and 19th century woodcut illustrations from various periodicals concerning all aspects of ballooning. Other items include a small broadside for the *Grand Balloon Ascension of CARLOTTA* and a contract for smoke balloon ascensions. A few non-archival items, such as medals for Lowe's balloon, *City of New York*, and Giffard's giant captive balloon, 1878, were accessioned with this collection and subsequently transferred to curatorial collections.

Note: The digital images in this finding aid were repurposed from scans made by an outside contractor for a commercial product and may show irregular cropping and orientation in addition to color variations resulting from damage to and deterioration of the original objects.

Arrangement

This collection has been arranged, first, in chronological order based on the Krainik inventory number that was assigned by the donor (K#), and then by size.
