Biographical / Historical

David M. Brown was a U.S. Navy officer, flight surgeon, naval aviator, and Space Shuttle astronaut. Born in Arlington, Virginia, on April 16, 1956, Brown earned a B.S. in biology from the College of William and Mary in 1978 and a doctorate in medicine from Eastern Virginia Medical School in 1982. During his years in college, he performed in the Circus Kingdom as an unicyclist, stilt walker, and acrobat. Upon completing an internship at the Medical University of South Carolina, Brown joined the Navy and finished his flight surgeon training in 1984. After a stint as director of medical services at the Navy Branch Hospital in Adak, Alaska, he was then assigned to Carrier Airwing Fifteen which deployed aboard the USS *Carl Vinson* in the western section of the Pacific Ocean. In 1988, Brown was selected for pilot training, the only flight surgeon chosen for this program in over ten years. Two years later, he was designated a naval aviator and ranked first in his class. Subsequently, Brown was sent for training and carrier qualification in the Grumman A-6E *Intruder*. In 1991, he was attached to the Naval Strike Warfare Center in Fallon, Nevada, where he served as a Strike Leader Attack Training Syllabus Instructor and a Contingency Cell Planning Officer. The following year, he was sent to serve aboard the USS *Independence*, flying the A-6E with squadron VA-115. In 1995, he reported to the U.S. Naval Test Pilot School as their flight surgeon. By this time, Brown was qualified in a variety of military aircraft, including the McDonnell Douglas F-18 *Hornet* and the Northrop T-38 *Talon*. All told, Brown accumulated over 2,700 hours with 1,700 in high performance military aircraft.

For a long time, Brown harbored a strong desire to become an astronaut. During the mid 1990s, he applied for admission into the National Aeronautics and Space Administration's (NASA) astronaut corps. In April 1996, Brown was selected as an astronaut candidate by the space agency and reported to the Johnson Space Center (JSC) in Houston, Texas, later that year. By 1998, he completed his training and evaluation, and was qualified for flight assignment as a mission specialist. Initially, Brown was given the task of supporting payload development for the International Space Station (ISS), followed by an assignment on the astronaut support team responsible for Space Shuttle cockpit setup, crew strap-in, and landing recovery. Eventually, he was assigned a flight aboard Space Shuttle *Columbia* for the STS-107 mission. *Columbia* was launched from the Kennedy Space center (KSC) on January 16, 2003. This 16-day flight was dedicated to scientific research while in Earth orbit. On February 1, after the successful in-space mission and only minutes from its scheduled landing at the Kennedy Space Center (KSC), Cape Canaveral, Florida, the orbiter suffered structural failure upon reentry into the atmosphere and disintegrated over Texas and Louisiana. Brown, as well as the other six members of the STS-107 crew, was killed in the accident. Brown logged 15 days, 22 hours and 20 minutes of space flight experience.

The following chronology covers key events in Brown's life, as well as in the realm of space exploration history. Events involving Brown are shown in normal type while those of the latter are shown in **bold type**.

Scope and Contents

The David M. Brown Papers reflect Brown's career as a U.S. Navy flight surgeon, naval aviator, and NASA astronaut. Represented in some of the collection's correspondence, memoranda, and other materials is his early interest in becoming an astronaut, his applying to NASA, and his selection by the space agency as an astronaut candidate. Most of this collection consists of materials related to his professional work. A large part of this series is composed of technical manuals, handbooks and checklists. Also included in this grouping are official U.S. Navy/NASA documents, correspondence, memoranda, drafts, worksheets, reports, handouts, briefings, notes, photographs, invitations, programs, pamphlets, books, booklets, guidebooks, magazines, journals, and miscellaneous materials. The rest of the collection contains a small amount of personal materials. This includes personal documents from Brown (birth certificate, passports, etc.), correspondence, day planners, yearbooks, photographs, and miscellaneous materials. The collection also includes 160 mini DV (SD) tapes that Brown shot of the astronaut crew training for STS-107 *Columbia*.

Arrangement

The Brown Papers are organized into two broad series. First, is the material pertaining to Brown's personal life. This includes personal documents, correspondence, day planners, yearbooks and photographs. The second series contains papers revolving around Brown's professional life. This includes official U.S. Navy/NASA documents, correspondence, memoranda, notes, drafts, reports, handouts, briefings, a variety of manuals, checklists, handbooks, procedures and instructions, notebooks, photographs, invitations, programs, pamphlets, books, guidebooks, magazines, journals, and miscellaneous materials. Brown's papers are arranged both chronologically and alphabetically. Official and personal documents, correspondence, memoranda, notes, drafts, worksheets, photographs, invitations, programs, pamphlets, magazines, journals, day planners, yearbooks and miscellaneous materials are organized by the former method. Reports, handouts, briefings, manuals, handbooks, checklists, procedures, instructions, books, booklets, and guidebooks are arranged alphabetically by title. The reader will note that the parts of this finding aid containing manuals, handbooks, checklists, procedures, and instructions are further organized into the following groupings: NASA only, corporation/contractor only, jointly-issued NASA and corporation/contractor, and miscellaneous.

The reader should note that this group of material also contains a collection of films pertaining to Brown's life and career as an astronaut. A National Air and Space Museum (NASM) Archives staff person can assist you regarding access to these films.

SERIES I -- Personal Papers:

- Personal Documents
- Correspondence
- Day Planners
- Yearbooks
- Photographs
- Miscellaneous Materials

SERIES II -- Professional Papers:

- Official U.S. Navy/NASA Documents
- Correspondence
- Memoranda
- Notes, Drafts, and Worksheets
- Reports, Handouts, and Briefings
- Manuals, Handbooks, Checklists, Procedures, and Instructions
- Notebooks and Workbooks
- Photographs
- Invitations, Programs, and Pamphlets
- Books
- Booklets and Guidebooks
- Magazines and Journals
- Newsletters
- News Clippings
- Miscellaneous Materials
- Oversized Materials

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

- Astronautics
- Color photography
- Space Shuttle Program (U.S.)
- Space Shuttles, Columbia (OV-102)
- Space flight

Types of Materials:

- Calendars
- Commercial correspondence
- Mini-DV
- Reports
- Technical manuals -- 20th century

Videotapes, 1987-2005

Scope and Contents: This series consists of videotapes made by David M. Brown as a record of the training received by the crew of Shuttle Mission STS-107; Brown planned to create a postflight documentary on the mission. Additionally, there are three videotapes of Brown's time aboard the USS Carl Vinson (CVN-70), and one tape of his work for the University of Alaska Fairbanks. The series includes several videos made after Brown's death on February 1, 2003 on the Space Shuttle Columbia disaster.

Processing Information: Video descriptions are taken from the Archives Division motion picture database.

DA 00024: Astronaut Diaries, 2005

Notes: Dave Brown on February 1, 2003 was a first-time astronaut aboard the space shuttle Columbia (STS-107). Dave was also an aspiring filmmaker who shot hundreds of hours of the training process leading up to what would become Columbia's final mission. He captured the weeks and months of training that began well before the Columbia shuttle moved to the launch pad. In scenes usually veiled from the public, ASTRONAUT DIARIES reveals the bonds that form among these seven disparate individuals who very soon would become cohesive members of a team of historic explorers. Interviews and comments from the crew of STS-107.

Marabella Productions.
