Biographical / Historical

The Helio H-370 Propjet Courier was a turboprop powered aircraft developed by Helio in the late 1960s. The H-370 consisted of a standard Courier airframe fitted with a 317 h.p. Allison Model 250 Turboshift engine. Only one H-370 was built (A/C No. N6309V) before the project was abandoned due to various problems that were found during flight testing at Helio's Bedford, Massachusetts facility.

Scope and Contents

This collection consists of one regular 8 mm Kodachrome IIA camera original film containing footage of the Helio H-370 Propjet Courier (A/C No. N6309V). The film shows the aircraft being rolled out of the hangar, on the ground, and in flight. Views include the exposed engine; the engine starting; taxi and takeoff; and air to air side views. The collection includes approximately 50 feet of film total.

Arrangement

Collection is in original order.

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

Helio H-370 Propjet Courier
Parachuting

Types of Materials:

Motion pictures (visual works)
