## Collection Overview

<b>Repository:</b>	National Air and Space Museum Archives
<b>Title:</b>	Bruce McCandless II Papers
<b>Date:</b>	1954-2012
<b>Identifier:</b>	NASM.2023.0036
<b>Extent:</b>	29.28 Cubic feet (75 boxes)
<b>Language:</b>	English , German , French , Japanese , Russian .
<b>Summary:</b>	<p>Bruce McCandless II (1937--2017) was a naval aviator, astronaut, and engineer who was the first human to conduct a spacewalk without a safety tether linked to a spacecraft. The youngest of 19 astronauts selected in 1966, he served as the voice of Mission Control during the Apollo 11 mission in 1969, talking with Neil Armstrong and Buzz Aldrin during their historic walk on the Moon. He helped develop an early maneuvering unit tested on Skylab in 1973-74 and then on the design and testing of the shuttle-era Manned Maneuvering Unit (MMU). McCandless also had a keen interest in creating tools for extravehicular activity, including a patented connection system that eased tool transport and use in space called the "McTether," which became a standard tool on Shuttle missions. Altogether McCandless logged 5,000 hours in jet aircraft and 312 hours in space. This collection consists of approximately 30 cubic ft of papers, including reports, presentations, notes, office files, photographs and video/film created or collected by Bruce McCandless II. The papers show McCandless' myriad contributions to spaceflight and space science at both NASA and Lockheed Martin Space Systems, focusing on his contributions to the MMU and inputs to the development of hardware and procedures for the Hubble Space Telescope and the Solar Maximum Repair Mission.</p>
<b>Digital Content:</b>	<p><a href="#">Image(s): Astronaut Bruce McCandless II performing the first untethered Extravehicular Activity (EVA) using the Manned Maneuvering Unit (MMU) on February 7, 1984, NASM.2023.0036</a></p>

## Biographical / Historical

Bruce McCandless II, astronaut, engineer and inventor, instantly became an icon of human ingenuity on February 7, 1984, when he was photographed free floating in the inky blackness of space, hundreds of feet from the Space Shuttle *Challenger*, using the Manned Maneuvering Unit (MMU), a machine he spent almost twenty years developing during his career at the National Aeronautics and Space Administration (NASA). He was born in Boston, Massachusetts, on June 8, 1937, to Rear Admiral Bruce and Sue McCandless. From a young age, he was interested in science, winning first place in a competition sponsored by the American Chemical Society as a teenager. Upon graduating from Woodrow Wilson High School in Long Beach, California, he enlisted in the Navy, just as his father and grandfather had done previously, both of whom were Medal of Honor recipients. In June of 1958, McCandless earned a Bachelor of Science degree, graduating second in his class from the Naval Academy in Annapolis, Maryland.

After flight training in Pensacola, Florida, and Kingsville, Texas, McCandless got his Navy wings in March of 1960 after six successful solo landings aboard the USS *Antietam*. While enrolled in additional aviation courses in Memphis, Tennessee, he met Bernice Doyle. A few months later, they married and moved to Key West, Florida, where he received further instruction in the Douglas F4D-1 Skyray. He was assigned first to Fighter Squadron 101, the *Grim Reapers*, and, later, to Fighter Squadron 102, the *Diamondbacks*, until February 1964. He saw duty aboard the USS *Forrestal* (CVA-59) and, during the Cuban Missile Crisis, the USS *Enterprise* (CVA(N)-65). He then served as an instrument flight instructor at the Naval Air Station in Oceana, Virginia. McCandless then reported for duty at the Naval Reserve Officers Training Corps Unit at Stanford University where he earned a Master of Science in Electrical Engineering in 1965 and immediately began pursuing his PhD in plasma physics. On April 4, 1966, McCandless left Stanford after finishing all his coursework but without completing a dissertation because, at age 28, he had been selected as the youngest member of NASA's Astronaut Group 5.

Two months later, the McCandless' and their two young children, Bruce III and Tracy, arrived in Houston, Texas. Any hope he had of finishing his dissertation while being an astronaut was quickly dashed by the relentless schedule. Classroom training in subjects such as orbital mechanics, geology, space medicine and navigation were conducted three days a week. The remaining days were reserved for field trips to the Grand Canyon in Arizona, the Kīlauea Iki Crater in Hawaii, the Pinacate Peaks of Mexico, and the volcanoes and ice fields of Iceland, to gain hands-on geology experience. The astronaut trainees also went to Panama and Nevada for survival training. The intensive schedule lasted until September of 1967.

In October 1966, the new recruits received their first technical assignments. McCandless was assigned to the Experiments Branch. In February of 1967, the Experiments Branch became part of the Apollo Application Program (AAP). Around this time, McCandless tested the Astronaut Maneuvering Unit (AMU, also sometimes referred to as the M-509 Unit) in a simulator. Developed by the United States Air Force, the AMU was a rocket pack worn over the pressure suit. First used with less-than-ideal results by Eugene Cernan during the Gemini IX-A mission, NASA continued to seek ways to enable astronauts to move efficiently and safely in both the near-vacuum of space and inside increasingly spacious spacecraft. McCandless, NASA's Charles E. "Ed" Whitsett, Jr. and Walter W. "Bill" Bollendonk from Martin Marietta worked on improving this "jet pack" technology for almost two decades. The next iteration was the Automatically Stabilized Maneuvering Unit (ASMU), which proved to be a distinct improvement and was used during Skylab 3 and 4. The trio eventually won The Collier Trophy in 1984 for the final version, the Manned Maneuvering Unit (MMU).

In 1969, McCandless served as Capsule Communicator (CAPCOM) for the Apollo 10 and 11 missions. His is the voice you hear saying, "Roger, Tranquility. We copy you on the ground. You got a bunch of guys about to turn blue. We're breathing again. Thanks a lot," in response to Armstrong's announcement that the *Eagle* had indeed landed on the lunar surface. Subsequent years saw him perform the same role for Apollo 14 (1971) and Skylab 3 and 4 (both in 1973). Additionally, he, along with Russell "Rusty" Schweickart and Story Musgrave, served as the backup crew for Skylab 2.

In 1978, McCandless was assigned to define and evaluate all the astronaut crew operational aspects of the Large Space Telescope, which included on-orbit maintenance. This required him to make countless drives in the Neutral Buoyancy Simulator (NBS) at Marshall Space Flight Center and the Neutral Buoyancy Laboratory (NBL) at Johnson Space Center. The giant pools simulated the microgravity environment of space and allowed him and others to practice repair and servicing techniques in orbit on a mock-up of the telescope, which was eventually renamed the Hubble Space Telescope. By the time Hubble deployed twelve years later, his work ensured that each of the five scientific instruments attached to it were either fully replaceable or serviceable by astronauts during spacewalks. Only the main wiring harness and the primary and secondary mirrors were not designed to be fixed while in space, which would become significant in subsequent years.

In 1979, NASA began testing the newly renamed Manned Maneuvering Unit. Manufactured by Martin Marietta, it snugly fit over an astronaut's pressure suit like a backpack and featured 24 propulsion nozzles fueled by two aluminum nitrogen gas tanks wrapped in Kevlar. The wearer controlled movement with small handles on the armrests that required minimal hand gestures to operate. It was specially constructed to operate in the extreme temperature fluctuations of space. Initially, the MMU was slated for use on the first Shuttle mission to allow the astronauts to inspect and repair any damaged thermal tiles. Due to the brevity of the mission, the crew opted not to use it during their two days in orbit. The following year, McCandless was detailed to the Astronaut Office On-Orbit Branch. In addition to his work on the MMU and servicing Hubble, he also oversees developments on the Inertial Upper Stage (IUS), an uncrewed booster rocket used to lift payloads to a higher orbit in space.

On February 3, 1984, McCandless, together with Commander Vance Brand, Pilot Robert L. "Hoot" Gibson, and Mission Specialists Robert L. Stewart and Ronald E. McNair, launched aboard the *Challenger* on the 11th shuttle mission, STS-41-B. Four days later, McCandless became the first human to ever fly untethered in space, using an MMU. The jet-powered backpack allowed him to travel 4.8 miles a second and venture over 100 yards away from the orbiter. The spacewalk lasted approximately 6 hours. Two months later, the crew of STS-41-C successfully retrieved, repaired, and redeployed the Solar Maximum Mission Satellite while donning MMUs. McCandless was instrumental in the development of the plan to fix the satellite's altitude-control system and white-light coronagraph/polarimeter while still in orbit, thanks to the Trunnion Pin Attachment Device (TPAD). This was the first time a satellite

repair was performed in space. The year concluded with McCandless being awarded patent number 4,483,639 for a connection system that simplified and eased the ways in which astronauts could transport and use tools in space without additional connectors. Called the "McTether," it worked easily with spacesuit-gloved hands and became a part of the standard tool kit on Shuttle missions.

McCandless made his final trip into space with STS-31 on April 24, 1990. Also on board the *Discovery* were Commander Loren Shriver, Pilot Charles Bolden, Jr., and Mission Specialists Steven Hawley and Kathryn Sullivan. The Hubble Space Telescope was deployed into a low-Earth orbit, forever changing how we see the universe. The telescope weighs over 24,000 lbs. and was the largest payload to date. This was documented by an IMAX Cargo Bay Camera (ICBC) and a hand-held IMAX camera. This footage was used in the IMAX films "Destiny in Space" (1994) and "Hubble 3D" (2010).

On August 31, 1990, Bruce retired from both the Navy and NASA. The very next day, he was on a plane to Munich, Germany, as a consultant for the Space Telescope Science Institute (STScI). He and eighteen other experts gathered to determine why the images from Hubble were blurry. The problem was determined to be the primary mirror, which was thought to be unreparable while in space. The Hubble Space Telescope Strategy Panel formulated a plan to fix the primary mirror's spherical aberration (which was later done successfully during 1993's STS-61 mission). In November of 1990, he accepted a position at Martin Marietta Astronautics Group (in 1995, they merged with the Lockheed Corporation to form Lockheed Martin). During his fifteen years there, he was the Chief Scientist in Advanced Launch Systems. He worked on the Orbital Space Plane, the Space Launch Initiative, the Space Transportation Architecture Study, the Orbiter Electric Auxiliary Power Unit, the Jupiter Icy Moons Orbiter (JIMO) and the Crew Exploration Vehicle (CEV). He retired from Lockheed on March 31, 2005, but was retained on a consulting basis.

Bruce McCandless II passed away in Los Angeles, California, on December 21, 2017, at the age of 80.

#### **Bruce McCandless II: Awards and Honors**

1953	Southern California Chemistry Prize
1974	Exceptional Service Medal, NASA
1974	Victor A. Prather Award, American Astronautical Society
1974	American Expeditionary Service Medal
1974, April 18	National Defense Service Medal
1984	Victor A. Prather Award, American Astronautical Society
1984, March 13	Jackson, Mississippi, honorary citizen
1984, September 24	American Society of Cinematographers, honorary member
1985, January 30	Superior Service Medal, Department of Defense
1985, May 10	Collier Trophy, the National Aeronautic Association
1985, October 4	The National Air and Space Museum Trophy
1985, October 8	Exceptional Engineering Achievement Award, NASA
1986	Spirit of St. Louis Medal, American Society of Mechanical Engineers
1987	Haley Space Flight Award
1988	Legion of Merit
1990	Space Flight Medal, NASA
1991	Exceptional Service Medal, NASA
2003, March 27	Three Certificates of Merit, Lockheed Martin's Intellectual Property Review Board

2005

U.S. Astronaut Hall of Fame induction

2012

Distinguished Graduate Award Medal, the United States Naval Academy.

---

## Scope and Contents

This collection consists of approximately 30 cubic feet of papers, including reports, presentations, notes, office files, photographs and video/film collected by Bruce McCandless II. The papers show McCandless' myriad contributions to spaceflight (with 312 hours in space and the first person to make an untethered spacewalk), and space science at both NASA and Lockheed Martin Space Systems, focusing on his contributions to the Manned Maneuvering Unit (MMU) and inputs to the development of hardware and procedures for the Hubble Space Telescope and the Solar Maximum Repair Mission. Many of the documents are hand annotated.

---

## Arrangement

This collection is composed of ten series:

**Series 1: Personal Material**

**Series 2: Naval Career**

**Series 3: Education**

**Series 4: National Aeronautics and Space Administration (NASA)**

*Subseries 4.1 STS-41-B*

*Subseries 4.2: STS-31*

*Subseries 4.3: Manned Maneuvering Unit (MMU)*

*Subseries 4.4: Hubble Space Telescope*

*Subseries 4.5: Miscellaneous*

**Series 5: Post-NASA Career**

*Subseries 5.1: Space Telescope Science Institute (STScI)*

*Subseries 5.2: Martin Marietta/Lockheed Martin*

*Subseries 5.3: Speeches, Presentations and Appearances*

**Series 6: Awards and Publicity**

**Series 7: Miscellaneous**

**Series 8: Photographs, Slides and Negatives**

**Series 9: Oversize Materials**

**Series 10: Audiovisual Material**

---

## General

Below is a list of acronyms that most frequently appear frequently in McCandless' papers.

ACS - Advanced Camera for Surveys

AIAA - American Institute of Aeronautics and Astronautics

AMRV - Astronaut Maneuvering Research Vehicle  
AMU - Astronaut Maneuvering Unit/M-509  
ASMU - Automatically Stabilized Maneuvering Unit  
CAPCOM - Capsule Communication  
CCA - Communications Carrier Assembly  
CCCD - Crew Compartment Configuration Drawing  
CEV - Crew Exploration Vehicle  
CFP - Conceptual Flight Profile  
CIL - Critical Items List  
CIR - Cargo Integration Review  
DSO - Detailed Supplementary Objectives  
DTO - Development Test Objective  
EAPU - Electric Auxillary Power Unit  
EMU - Extravehicular Mobility Unit  
EVA - Extravehicular Activity  
EVCS - Extravehicular Communications System  
FAA - Federal Aviation Administration  
FIAB - Flight Integration Assessment Baseline  
FMEA - Failure Modes Effects Analysis  
FOC - Faint Object Camera  
FOP - Flight Operations Panel  
FRD - Flight Requirements Document  
FSS - Flight Support System/Structures  
GAPC - Gas Autonomous Payload Controller  
GEIA - Global Emissions Initiative  
GFE - Government Furnished Equipment  
HHMU - Hand-Held Maneuvering Unit  
HRSDM - Hubble Robotic Servicing Deorbit Missions  
HRVDM - Hubble Robotic Vehicle Deorbit Module  
ICBC - IMAX Cargo Bay Camera  
IMSS - In-Flight Medical Support System  
IRN - Interface Revision Notice  
IUS - Inertial Upper Stage  
JIMO - Jupiter Icy Moons Orbiter  
JSC - Johnson Space Center  
JWST - James Webb Space Telescope  
LDRI - Laser Dynamic Range Imager

LIDAR - Light Detection and Ranging  
LIDS - Low Impact Docking Station  
LON - Launch on Need  
MDF - Manipulator Development Facility  
MFR - Manipulator Foot Restraint  
MLI - Multilayer Insulation  
MMS - Multimission Modular Spacecraft  
MMU - Manned Maneuvering Unit  
MOMS - Modular Optoelectronic Multispectral Scanner  
MSFC - Marshall Space Flight Center  
MXER - Momentum Exchange/Electrodynamic Reboost  
M&R - Maintenance and Repair or Refurbishment  
NBS - Neutral Buoyancy Simulator  
NSTS - National Space Transportation System  
OFP - Operational Flight Profile  
OOSS - On-Orbit Servicer System/Study  
ORI - Orbital Replacement Instrument  
ORU - Orbital Replacement Unit  
ORUC - Orbital Replaceable Unit Carrier  
OWG - Operations Working Group  
OWS - Skylab Orbital Workshop  
PDR - Preliminary Design Review  
PFR - Portable Foot Restraint  
PIP - Payload Integration Plan  
POWG - Payload Operations Working Group  
PRM - Primary Deployment Mechanism  
PROMS - Programmable Read Only Memory  
PRT - Platinum Resistor Thermometer  
PRT - Power Ratchet Tool  
PSIA - Pounds per Square Inch Absolute  
RNS - Relative Navigation System  
SADA - Solar Array Drive Arm  
SAMS - Space Assembly, Maintenance and Servicing  
SCAN - Selected Current Aerospace Notices  
SCM - Soft Capture Mechanism  
SDM - Secondary Deployment Mechanism  
SM-4 - Servicing Mission Four

SMM - Solar Maximum Mission  
SPAS - Shuttle Pallet Satellites  
SRBTVC - Solid Rocket Booster Thrust Vector Control  
SSEOP - Space Shuttle Earth Observations Project  
SSME - Space Shuttle Main Engine  
STIS - Space Telescope Imaging Spectrograph  
STS - Space Transportation System  
TAODS - Tethered Augmented Orbiter Deorbit System  
TPAD - Trunnion Pin Attachment Device  
TRDS - Tracking and Data Relay Satellite  
TSS - Tethered Satellite System  
USIA - United States Information Agency  
VGS - Video Guidance Sensor  
WETF - Weightless Environmental Training Facility  
WF/PC - Wide Field Planetary Camera  
WIF - Water Immersion Facilities

---

## Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

### Subjects:

- Apollo Project
- Astronautics
- Hubble (Large) Space Telescope
- Manned space flight
- Military records -- 20th century -- United States
- Naval aviation
- Skylab Program
- Space Shuttle Program (U.S.)

### Types of Materials:

- Black-and-white photographs
- Color photographs
- Conferences
- Correspondence
- Reports

---

#### Subseries 4.5: Miscellaneous, 1958-1999 and undated

Arrangement: This subseries begins with three pivotal documents in Bruce McCandless II's life: the newspaper article announcing NASA's search for new astronauts, paperwork from his NASA interviews and, finally, his selection letter from Director of Flight Crew Operations, Donald K. "Deke" Slayton. The remainder of this subseries is arranged alphabetically.

Box 30, Folder 9 Newspaper posting about NASA's astronaut search, 1965

Box 30, Folder 10 NASA interviews, 1965-1966

Box 30, Folder 11 NASA selection letter from Donald K. "Deke" Slayton, March 31, 1966

Box 30, Folder 12 "10.2 PSIA Cabin Certification," 1987

Box 30, Folder 13 29th Annual Goddard Memorial Dinner Program, 1986

Box 30, Folder 14 "A General Solution to the Hidden-Line Problem" by David Hedgley, March 1982

Box 30, Folder 15 "Actions to Implement the Recommendations of the Presidential Commission on the Space Shuttle Challenger Accident," July 14, 1986

Box 30, Folder 16 Advanced EVA System Design Requirements Study, Mid-Term Briefing, June 25, 1985

Box 30, Folder 17 America's Spaceport: Kennedy Space Center booklet, undated

Box 31, Folder 1 "Analysis of Plume Impingement Effects During Orbiter Satellite Rendezvous," September 11, 1975

Box 31, Folder 2 "Analysis of Potential Alternatives to Reduce NASA's Cost of Human Access to Space," September 30, 1998

Box 31, Folder 3 Apogee, volume 2, number 6, November 1974

Box 31, Folder 4 Apollo 11 20th Anniversary Ceremony, July 1989

Box 31, Folder 5 "Apollo 11 Lunar Surface Exploration Map Data Package, Apollo Landing Site 2, Edition 1," June 1969

Box 31, Folder 6 Apollo 17 launch vehicle permit and information, 1972

Box 31, Folder 7 Apollo Survival Training in Iceland and Washington, July-August, 1967

Box 31, Folder 8 Appearance/presentation critique, 1984

Box 31, Folder 9	Application for Johnson Space Center (JSC) Management Development Program, 1976
Box 31, Folder 10	"Applications Study of Electroadhesive Devices, NASA CR-1211," October 1968
Box 31, Folder 11	"Articles Authorized to be Carried in Manned Space Flight Missions," August 31, 1972
Box 31, Folder 12	Astronaut biographies, revised September 1972
Box 31, Folder 13	Astronaut flight statistics
Box 31, Folder 14	Astronaut geology field trip, June 8-11, 1970
Box 32, Folder 1	Astronaut Office Biweekly Activity Reports, 1988
Box 32, Folder 2	Astronaut Office Biweekly Activity Reports, 1989
Box 32, Folder 3	Astronaut Office Biweekly Activity Reports, 1990
Box 32, Folder 4	Astronaut Science Colloquium on Robotics, March 1, 1988
Box 32, Folder 5	Astronaut Standard Operating Procedures and financial disclosures
Box 32, Folder 6	Astronauts' Guide to Oceanographic Phenomena, JSC 22963, August 1988
Box 32, Folder 7	"Automation and Robotics," White Paper, 1984
Box 32, Folder 8	Bends/decompression sickness data and protocols, 1985
Box 32, Folder 9	Biographical sheet
Box 32, Folder 10	Catalog of Apollo Lunar Surface Geological Sampling Tools and Containers, March 1989
Box 32, Folder 11	Challenger/STS-51-L memorial program and notes, January 31, 1986
Box 33, Folder 1	Change documents
Box 33, Folder 2	Code of conduct memos and handbook, 1970-1978
Box 33, Folder 3	"Committee on Review of NASA's Bioastronautics Critical Path Roadmap (BCPR)," June 2004 (1 of 2)
Box 33, Folder 4	"Committee on Review of NASA's Bioastronautics Critical Path Roadmap (BCPR)," June 2004 (2 of 2)

Box 33, Folder 5	"Communications Carrier Assembly (CCA) Project," June 1984
Box 33, Folder 6	"Conceptual Study on an Orbital Inspection of the Thermal Protection System (TPS) on the External Tank," February 1981
Box 33, Folder 7	"Crew and Equipment Rescue System," November 7, 1986
Box 33, Folder 8	"Crew Size Report," May 2004
Box 33, Folder 9	"Crew Survival Systems for Space Shuttle Orbiter," July 5, 1999
Box 33, Folder 10	"Cryogenic Fluid Management Experiment," undated
Box 33, Folder 11	Custody of NASA items slips
Box 34, Folder 1	"Design Criteria for EVA Electrical Connectors," January 27, 1989
Box 34, Folder 2	"Design for On-Orbit Spacecraft Servicing," draft, February 1990
Box 34, Folder 3	Discovery's Mission to Earth, October 19, 1988
Box 34, Folder 4	"Electric Auxiliary Power Unit (EAPU)," 2000
Box 34, Folder 5	"Electric Charge on Apollo Command and Service Module in Lunar Environment," April 1967
Box 34, Folder 6	Electronic cuff checklist
Box 34, Folder 7	"EVA Development," ILC Dover Space Systems, 1988
Box 34, Folder 8	"EVA Feasibility Assessment," October 8, 1990
Box 34, Folder 9	EVA Flight Rules Review
Box 34, Folder 10	EVA notebook, August 3, 1982 - May 31, 1983
Box 35, Folder 1	"EVA Gloves: Final Report," April 1990
Box 35, Folder 2	EVA Orbit Flight Techniques Panel meetings, 1983
Box 35, Folder 3	"EVA Strike Force Proposal," undated

## Series 5: Post-NASA Career

### Subseries 5.1: Space Telescope Science Institute (STScI), 1990-2005 and undated

Box 59, Folder 4	"Corrections for Individual Instruments," October 1990
Box 59, Folder 5	"Hubble 2004" and newsletter, 2005
Box 59, Folder 6	Hubble Robotic Servicing and De-Orbit Mission Preliminary Design Review (HRSDMPDR), day 1, March 21, 2005 (1 of 2)
Box 60, Folder 1	Hubble Robotic Servicing and De-Orbit Mission Preliminary Design Review (HRSDMPDR), day 1, March 21, 2005 (2 of 2)
Box 60, Folder 2	Hubble Robotic Servicing and De-Orbit Mission Preliminary Design Review (HRSDMPDR), day 2, March 22, 2005 (1 of 2)
Box 60, Folder 3	Hubble Robotic Servicing and De-Orbit Mission Preliminary Design Review (HRSDMPDR), day 2, March 22, 2005 (2 of 2)
Box 60, Folder 4	Hubble Robotic Servicing and De-Orbit Mission Preliminary Design Review (HRSDMPDR), day 3, March 23, 2005 (1 of 2)
Box 60, Folder 5	Hubble Robotic Servicing and De-Orbit Mission Preliminary Design Review (HRSDMPDR), day 3, March 23, 2005 (2 of 2)
Box 61, Folder 1	Hubble Robotic Servicing and De-Orbit Mission Preliminary Design Review (HRSDMPDR), day 4, March 24, 2005
Box 61, Folder 2	Hubble Space Telescope correction notes
Box 61, Folder 3	"Hubble Space Telescope EVA Scenarios for STScI," August 31, 1990
Box 61, Folder 4	"Hubble Space Telescope First Servicing Mission Contingency Return," March 8, 1990
Box 61, Folder 5	"Hubble Space Telescope/Ground System, Software, Hardware Interfaces and Verification Program," March 8, 1993
Box 61, Folder 6	Hubble Space Telescope photos and newsletters, 1996
Box 61, Folder 7	Hubble Space Telescope repair documents, March 8, 1993
Box 61, Folder 8	"Hubble Space Telescope Servicing Mission Number 4," undated
Box 61, Folder 9	Hubble Space Telescope Strategy Panel Meetings, 1990 (1 of 5)

Box 61, Folder 10	Hubble Space Telescope Strategy Panel Meetings, 1990 (2 of 5)
Box 62, Folder 1	Hubble Space Telescope Strategy Panel Meetings, 1990 (3 of 5)
Box 62, Folder 2	Hubble Space Telescope Strategy Panel Meetings, 1990 (4 of 5)
Box 62, Folder 3	Hubble Space Telescope Strategy Panel Meetings, 1990 (5 of 5)
Box 62, Folder 4	Hubble Space Telescope Strategy Panel Presentation to STScI Director, October 1990
Box 62, Folder 5	"Q&A for the HST Robotic Servicing and De-Orbit Mission (HRSDM)," February 15, 2005
Box 62, Folder 6	Space Telescope Science Institute employment contract and expenses, 1990
Box 62, Folder 7	Space Telescope Science Institute news releases, 1990-1991
Box 62, Folder 8	"Stars and Star Clusters," April 1988
Box 62, Folder 9	Wide-Field/Planetary Camera II presentation, March 3, 1993

### Subseries 5.2: Martin Marietta/Lockheed Martin, 1984-2004 and undated

General: In 1995, Martin Marietta and the Lockheed Corporation merged to form Lockheed Martin.

Box 63, Folder 1	Atomic Oxygen Beam Facility presentation, November 9, 1987
Box 63, Folder 2	"Commercial Titan-2 Flight Failure Investigation Report," April 1990
Box 63, Folder 3	Development of an Atomic Oxygen Simulator presentation and correspondence, 1993
Box 63, Folder 4	"Extravehicular Mobility Unit Subcritical Liquid Oxygen Storage and Supply System," 1992
Box 63, Folder 5	"Geostationary Servicing Capability," 1991
Box 63, Folder 6	"HST Aperture Stop-Down Design Concept Study," July 18, 1990
Box 63, Folder 7	HSTE 2000: Human Space Transportation and Exploration Workshop, February 28-March 1, 2000
Box 63, Folder 8	"Human-Rating Requirements for Future Launch Systems, Preliminary Results," undated
Box 63, Folder 9	Idea reports, 1996

Box 63, Folder 10	Lockheed Martin memos
Box 63, Folder 11	Lockheed Martin newsletters
Box 63, Folder 12	Martin Marietta correspondence
Box 63, Folder 13	Martin Marietta memos
Box 64, Folder 1	Martin Marietta newsletters
Box 64, Folder 2	Martin Marietta org charts, 1985
Box 64, Folder 3	Marubeni Corporation partnership documents, 1993
Box 64, Folder 4	"MXER Tether Technology Study," September 2004
Box 64, Folder 5	"Quality Function Deployment," undated
Box 64, Folder 6	Recruitment letter, July 24, 1990
Box 64, Folder 7	"Rendezvous Philosophy for the Commercially-Operated Venture Star Reusable Launch Vehicle (RLV)," May 1998
Box 64, Folder 8	"Requirements for Future Launch Systems," undated
Box 64, Folder 9	Space Operations Simulator Laboratory, September 1986
Box 64, Folder 10	Space Station, Martin Marietta, May 1984
Box 64, Folder 11	"The Business of Servicing in Geosynchronous Orbit," January 30, 1997
Box 64, Folder 12	"The MMU's Future," February 22, 1991
Box 64, Folder 13	Venture Star discussions, February 5-6, 1998

---

### Subseries 5.3: Speeches, Presentations and Appearances, 1974-2005

Box 64, Folder 14	3rd Annual Mexican-American Friendship Week appearance, October 3, 1975
Box 64, Folder 15	6th Planetary Congress, Association of Space Explorers, Groningen, Netherlands, July 2-5, 1990
Box 64, Folder 16	14th Annual Dining Out of the Apollo Squadron appearance, Mayaguez, Puerto Rico, February 19, 1983
Box 64, Folder 17	27th Annual Goddard Memorial Dinner program, March 16, 1984

Box 64, Folder 18	30th anniversary of Yuri Gagarin's flight, Moscow, USSR, April 12, 1991
Box 64, Folder 19	136th Annual Convention of the Wisconsin Newspaper Association, June 7-9, 1990
Box 64, Folder 20	American Astronautical Society conferences, 1986-1988
Box 64, Folder 21	Astronaut cruise appearance, September 1996
Box 64, Folder 22	American Astronomical Society Banquet, 1990
Box 65, Folder 1	Belgium, Germany and England trip, April 1984
Box 65, Folder 2	Commission of the USS McCandless speech, March 20, 1971
Box 65, Folder 3	Denver Area Council Award Breakfast speech, March 6, 1990
Box 65, Folder 4	France trip, June 29-July 6, 1986
Box 65, Folder 5	"Future Prospects in Space" presentation, September 22, 1988
Box 65, Folder 6	Grand Rendez-Vous appearance, Paris, France, October 1987 (1 of 2)
Box 65, Folder 7	Grand Rendez-Vous appearance, Paris, France, October 1987 (2 of 2)
Box 65, Folder 8	HST presentation to HST-JWST Transition Plan review Panel, July 31, 2003
Box 65, Folder 9	HST remarks to the National Research Council, August 24, 2004
Box 65, Folder 10	Hubble film appearance, September 1996
Box 65, Folder 11	Hubble remarks at the White Sands Star Party, September 11, 2004
Box 65, Folder 12	Inaugural Aeroflot flight from Washington, DC, to Moscow, USSR, April 11, 1974
Box 65, Folder 13	Inventor Recognition Breakfast program, Denver, Colorado, February 10, 2005
Box 65, Folder 14	Invitations
Box 65, Folder 15	ISU (International Space University) Space Explorers Panel appearance, Strasbourg, France, August 25-27, 1989
Box 65, Folder 16	Itinerary for appearance at AIAA Honors, October 1988
Box 66, Folder 1	Long Beach, California appearances, October 10-14, 1984
Box 66, Folder 2	MMU 20th anniversary presentation, February 7, 2004

Box 66, Folder 3	"Momentum Exchange/Electrodynamic Reboost (MXER) Tether Technology Study" presentation, May 17-18, 2004
Box 66, Folder 4	Moorhead State University's Honor's Program, Moorhead, Minnesota, February 16, 1989
Box 66, Folder 5	National Audubon Society appearance, Many, Louisiana, June 2, 1984
Box 66, Folder 6	National Renewable Energy Laboratory presentation, 1993
Box 66, Folder 7	North American Lighting Corporation Case presentation, November 25, 1986
Box 66, Folder 8	Ronald McNair Memorial Part dedication and speech, August 16, 1986
Box 66, Folder 9	San Jose State University appearance, September 22, 1988
Box 66, Folder 10	Satellite Services Workshop IV presentation, June 21-23, 1989
Box 66, Folder 11	Satellite Viewing presentation, September 1996
Box 66, Folder 12	Seattle, Washington, trip to Boeing Headquarters, December 16, 1980
Box 66, Folder 13	Space Explorers Panel itinerary, Strasbourg, France, August 1989
Box 66, Folder 14	Space Technology and Applications International Forum presentations, February 11, 2004
Box 66, Folder 15	Space Telescope Strategy Panel meeting, Garehing, Germany, September 1990
Box 66, Folder 16	Spain, Greece and Turkey trip, October 1982
Box 66, Folder 17	St. Louis, Missouri itinerary, July 1983
Box 66, Folder 18	"The 1990's: A New Decade for Astronomy" program and speech, January 10, 1990
Box 66, Folder 19	"The Future of Space," draft, September 23, 1990
Box 67, Folder 1	Toulouse, France trip, July 1989
Box 67, Folder 2	USIA trip to Nigeria, Zimbabwe, Tanzania, Saudi Arabia, Spain, France, India, England, Kenya, and South Africa, May 4-26, 1984
Box 67, Folder 3	World of Inventions appearance, Paris, France, December 1984

## Series 6: Awards and Publicity, 1982-2012 and undated

Arrangement: In this series, awards are listed first and publicity items are listed last. They are arranged alphabetically within those categories.

Box 67, Folder 4	American Institute of Aeronautics and Astronautics nomination, 1986
Box 67, Folder 5	Astronaut Hall of Fame induction, 2005
Box 67, Folder 6	Certificates of Merit, Lockheed Martin's Intellectual Property Review Board, March 27, 2003
Box 67, Folder 7	Department of Defense Superior Service Medal, January 30, 1985
Box 67, Folder 8	Distinguished Graduate Award program and nomination packet, 2012
Box 67, Folder 9	Honorary Membership to the American Society of Cinematographers, September 24, 1984
Box 67, Folder 10	Houston Post/Astrodome Amateur Photo Contest winning entry, 1975
Box 67, Folder 11	Letters of commendation
Box 67, Folder 12	Lockheed Martin Astronautics Award, 1998
Box 67, Folder 13	NASA's Exceptional Engineering Achievement Award, October 8, 1985
Box 67, Folder 14	The Collier Award program and photograph, 1985
Box 67, Folder 15	The Planetary Society's Certificate of Appreciation
Box 67, Folder 16	U. S. Naval Academy Alumni Astronaut Recognition, October 7, 1992
Box 67, Folder 17	U. S. Naval Institute Silver Certificate, 1980
Box 67, Folder 18	Aerospace America, May 1985
Box 67, Folder 19	Aviation Space, Spring 1984
Box 67, Folder 20	Aviation Week and Space Technology, January 18, 1982
Box 68, Folder 1	Aviation Week and Space Technology, February 20, 1984
Box 68, Folder 2	Aviation Week and Space Technology, February 27, 1984
Box 68, Folder 3	Aviation Week and Space Technology, March 12, 1984

Box 68, Folder 4	Aviation Week and Space Technology, September 30, 1985
Box 68, Folder 5	Brew Your Own, October 1995
Box 68, Folder 6	Commercial Space, Fall 1985
Box 68, Folder 7	Discover, September 1983
Box 68, Folder 8	Discover, April 1984
Box 68, Folder 9	FWP (Federal Women's Program) Network, July 1984
Box 68, Folder 10	Mainstream Mississippi, Spring 1984
Box 68, Folder 11	Martin Marietta Educational Service, February 7, 1984
Box 68, Folder 12	Marin Marietta News, May 17, 1985
Box 68, Folder 13	Military Times, September 1984
Box 68, Folder 14	Mississippi, May/June 1984
Box 68, Folder 15	Miscellaneous articles about McCandless
Box 68, Folder 16	Miscellaneous cartoons about McCandless
Box 68, Folder 17	Miscellaneous foreign publications featuring McCandless (1 of 3)
Box 69, Folder 1	Miscellaneous foreign publications featuring McCandless (2 of 3)
Box 69, Folder 2	Miscellaneous foreign publications featuring McCandless (3 of 3)
Box 69, Folder 3	NASA Activities, volume 15, number 3, March 1984
Box 69, Folder 4	Naval Aviation, January/February 1985
Box 69, Folder 5	Optometric Management, April 1984
Box 69, Folder 6	Parade Magazine, January 6, 1985
Box 69, Folder 7	Rocky Mountain Summit, volume 2, number 9, October 1988
Box 69, Folder 8	Space is the Place, 1986
Box 69, Folder 9	Space Markets, May 1985
Box 69, Folder 10	Space News Roundup, February 24, 1984

Box 69, Folder 11	Space Tracks Bulletin, March 1988
Box 69, Folder 12	The Collier Award Program, 1985
Box 69, Folder 13	Time, February 13, 1984
Box 69, Folder 14	Time, February 20, 1984
Box 69, Folder 15	United Technologies Today, May 1984
Box 69, Folder 16	Upstate Magazine, June 23, 1985

[Return to Table of Contents](#)

## Series 8: Miscellaneous, 1960-2008 and undated

Box 69, Folder 17	American Astronautical Society newsletter, 1985
Box 69, Folder 18	American Institute of Aeronautics and Astronautics (AIAA) meetings
Box 70, Folder 1	Association of Space Explorers
Box 70, Folder 2	Astronaut Information: American and Soviet, 1975
Box 70, Folder 3	AVCO Lycoming O-360 Operator's Manual, February 1969
Box 70, Folder 4	Blind Mice correspondence and notebook, 1981-1984
Box 70, Folder 5	Booklet about the Russian Space Program in Russian, 1981
Box 70, Folder 6	Brochures and letter about Lake Aircraft, mid-1970's
Box 70, Folder 7	Communication and Manned Space Flight, Master's thesis by Alan D. Kelly, February 1988
Box 70, Folder 8	Computing information and notes
Box 70, Folder 9	European Space Agency
Box 70, Folder 10	Federal Fish and Wildlife permit, January 1, 1979
Box 70, Folder 11	Forward to Your Future in Space, 1986
Box 70, Folder 12	Global War Game '88, Naval War College, July 11-29, 1988
Box 71, Folder 1	Global War Game '89, Naval War College, July 10-28, 1989
Box 71, Folder 2	Hand-written notes (1 of 2)
Box 71, Folder 3	Hand-written notes (2 of 2)
Box 71, Folder 4	Houston Audubon Society newsletter and index cards, 1984
Box 71, Folder 5	Index cards, 1983
Box 71, Folder 6	Index cards, undated (1 of 4)
Box 71, Folder 7	Index cards, undated (2 of 4)
Box 71, Folder 8	Index cards, undated (3 of 4)

Box 71, Folder 9	Index cards, undated (4 of 4)
Box 71, Folder 10	International Reference Guide to Space Launch Systems, AIAA, 1991
Box 72, Folder 1	Japanese notebook and handout
Box 72, Folder 2	Journey into Space by Dave Shayler, 2008
Box 72, Folder 3	Lake LA-4-200 flight manual and information, 1960-1975
Box 72, Folder 4	"Legal Aspects of Military Peaceful Uses of Space" by Walter D. Reed
Box 72, Folder 5	Marmara Scientific and Industrial Research Institute, Turkey
Box 72, Folder 6	Report of Discussions with the Ukrainian Academy of Sciences, May 1993
Box 72, Folder 7	"Space Flight Operations Privatization" by United States Alliance, 1996
Box 72, Folder 8	"The Global Positioning System and Its Application in Spacecraft Navigation," Rockwell International, March 1979
Box 72, Folder 9	The Soviet Year in Space, 1988
Box 72, Folder 10	The Space Explorer Newsletters
Box 72, Folder 11	The Wright Memorial Lecture Program, December 13, 1984
Box 72, Folder 12	The Energia Blasts Off, 1990
Box 72, Folder 13	Underwater resort facility outline, 1971 and 1974
Box 72, Folder 14	"Your Future in Space" proposal, outline and forward, 1986

## Series 7: Photographs, Negatives and Slides, 1958-1999 and undated

Arrangement: In this series, the photos are listed first, then 35mm slides, finally, negatives. They are arranged alphabetically within those categories.

Box 73, Folder 1	Assembly of the Large Space Antenna in MSFC's Neutral Buoyancy Simulator (NBS), September 6, 1978
Box 73, Folder 2	Astronaut testing MMU prototype, 1970
Box 73, Folder 3	Astronaut testing the M-509, 1971
Box 73, Folder 4	Astronauts working in the NBS, undated
Box 73, Folder 5	At work, 1985
Box 73, Folder 6	BTG 9 Class I-59, Sherman Field, Naval Air Station, Pensacola, Florida, June 11, 1959
Box 73, Folder 7	Burian on launch pad, undated
Box 73, Folder 8	Extravehicular Communications System (EVCS) flight unit, January 18, 1979
Box 73, Folder 9	Faint Object Camera (FOC) and components, October 18, 1990
Box 73, Folder 10	Family at the commissioning of the USS McCandless, March 18, 1972
Box 73, Folder 11	Family Christmas card, early 1970's
Box 73, Folder 12	Family home in Mountain View, California, mid-1970's
Box 73, Folder 13	Formal NASA portraits
Box 73, Folder 14	Graduation from the University of Houston, Clear Lake, Texas, 1987
Box 73, Folder 15	Headshot from Martin Marietta Astronautics, early 1990's
Box 73, Folder 16	ID badge photos, undated
Box 73, Folder 17	Landsat D, undated
Box 73, Folder 18	Lockheed Martin employees at the Orbital Space Plane Demonstration Center, undated
Box 73, Folder 19	Military astronauts, 1983
Box 73, Folder 20	Miscellaneous photos without McCandless

Box 73, Folder 21	MMU, 1979 and 1980
Box 73, Folder 22	MMU Chamber, 1981
Box 73, Folder 23	MMU EVA, February 1984
Box 73, Folder 24	MMU Flight Support Structures (FSS) thermal vacuum test, 1983
Box 73, Folder 25	MMU testing, 1981
Box 73, Folder 26	MMU testing, December 1, 1983
Box 73, Folder 27	MMU testing, January 31, 1980
Box 73, Folder 28	MMU testing, undated
Box 73, Folder 29	MMU testing in the Water Immersion Facilities (WIF) at Johnson Space Center (JSC), Texas, February 2, 1979
Box 73, Folder 30	MMU testing with George Nelson at MSFC's NBS, 1980
Box 74, Folder 1	Navy headshots, 1958, 1960, 1963, 1966
Box 74, Folder 2	On board the USS Enterprise (CVA(N)-65), February 12, 1963
Box 74, Folder 3	Power Ratchet Tool (PRT) and Essex Wrench Evaluation, March 14, 1984
Box 74, Folder 4	Receiving a certificate of recognition for the Tool Tethering System at NASA, undated
Box 74, Folder 5	Skylab 2 back-up crew: McCandless, Russell "Rusty" Schweickart and Story Musgrave, 1973
Box 74, Folder 6	Space Telescope simulation in the NBS, May 1985
Box 74, Folder 7	Story Musgrave performing an EVA during STS-6, April 1983
Box 74, Folder 8	STS-31 crew, 1990
Box 74, Folder 9	STS-41-B crew, 1984
Box 74, Folder 10	STS-41-B launch, February 3, 1984
Box 74, Folder 11	Trip to Lusaka, Zambia, for the United States Information Agency (USIA), May 1984
Box 74, Folder 12	Undated McCandless photos

Box 74, Folder 13	United States Naval Academy cadets, circa 1958
Box 74, Folder 14	Various tools, undated
Box 74, Folder 15	Visit to British Aerospace, December 1988
Box 74, Folder 16	With Admiral Robert L. J. Long, Ken Mattingly, Robert Crippen and Joe Kerwin, date unknown
Box 74, Folder 17	With an unidentified group of people, 1999
Box 74, Folder 18	With Gary Payton at H.I.S. Conference in League City, Texas, 1997
Box 74, Folder 19	With Kathryn Sullivan and Ronald McNair, undated
Box 74, Folder 20	With Kathryn Sullivan in the NBS, May 6, 1988
Box 74, Folder 21	With Richard L. Jaworski, aeronaut, July 1974
Box 74, Folder 22	With Richard Truly, U.S. Secretary of the Navy J. William Middendorf II, Joseph Kerwin and John Young, date unknown
Box 74, Folder 23	With Ronald McNair, Vance Brand, Robert Stewart and John Tower, March 22, 1984
Box 74, Folder 24	Woodrow Wilson High School appearance, Long Beach, California, April 27, 1984
Box 74, Folder 25	Miscellaneous 34mm slides, undated
Box 74, Folder 26	MMU/M-509 slides, 1972 and undated
Box 74, Folder 27	Skylab/MMU/M-509 slides, 1972 and undated
Box 74, Folder 28	Miscellaneous 33mm color negatives and transparencies, undated
Box 74, Folder 29	Skylab 33mm negatives, May 4th, 1973

[Return to Table of Contents](#)

## Series 9: Oversize Materials, 1974-1985 and undated

Box 75, Folder 1	Exploring the Universe with the Hubble Space Telescope, NASA NP-126, undated
Box 75, Folder 2	Honorary Citizen of Jackson, Mississippi certificate, March 13, 1984
Box 75, Folder 3	Hubble Space Telescope, A Cosmic Time Machine, Lockheed Martin, undated
Box 75, Folder 4	Life, December 1985
Box 75, Folder 5	Photograph of Admiral James Holloway, Rear Admiral Grover Yowell, Robert Crippen, Ken Mattingly, Joseph Kerwin and McCandless, September 19, 1977
Box 75, Folder 6	Photograph of McCandless testing the MMU by Flip and Debra Streuber Schulke, 1983
Box 75, Folder 7	Photograph of McCandless testing the MMU underwater by Flip and Debra Streuber Schulke, 1984
Box 75, Folder 8	Photograph of painting of McCandless in space by Ed Hegenveld, undated
Box 75, Folder 9	Photograph of Rear Admiral William Ramsey, Robert Gibson, David Walker and McCandless. Autographed by Ramsey. Undated.
Box 75, Folder 10	Skylab Honor Awards Ceremony program, April 18, 1974
Box 75, Folder 11	"The Artist and the Space Shuttle" exhibition brochure, undated
