Biographical / Historical

The National Aeronautics and Space Administration (NASA) was established by Congress in July 1958 to manage the aeronautics and space activities sponsored by the United States outside of Department of Defense activities. NASA worked in five main programs to reach the objectives set in the National Aeronautics and Space Act of 1958: space science and applications, manned space flight, launch vehicle development, tracking and data acquisition, and advanced research and technology.

Scope and Contents

This collection contains documents published by NASA covering a variety of topics including NASA missions, both manned and unmanned, data applications, project proposals, and 'spin-off' benefits.

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

- Astronautics
- Manned space flight
- Periodicals
- Space flight
- Space sciences
- Works of art

Types of Materials:

- Photographs
- Publications

Names:

- United States. National Aeronautics and Space Administration
