Collection Overview

Repository:	National Air and Space Museum Archives
Title:	National Air and Space Museum Technical Reference Files: Equipment
Date:	Ongoing
Identifier:	NASM.XXXX.1183.M
Creator:	National Air and Space Museum. Archives Division.
Extent:	54 Cubic feet
Language:	Undetermined .

Administrative Information

Restrictions

The majority of the Archives Department's public reference requests can be answered using material in these files, which may be accessed through the Reading Room at the Steven F. Udvar-Hazy Center in Chantilly, Virginia. More specific information can be requested by contacting the [Archives Research Request](#) .

Scope and Contents

The [Technical Reference Files](#) comprise an artificial collection that currently contains 1,900 cubic feet of aviation and space related materials, organized in 22 subject series. File materials include photographs, press releases, clippings, correspondence, reports, and brochures, on individuals, organizations, events, and objects.

NASM-9A08940: Catalogue, Rood [standard back cover], circa 1913

[Image\(s\): NASM-9A08940, Catalogue, Rood \[standard back cover\]](#)

Notes: Catalogue, 52 pages, issued circa 1913 by Rood (France) detailing their clothing products designed for use by aviators, motorcyclists, and motorists; includes prices in French francs. Back cover illustration features aviator dressed in Rood flight clothing and helmet saluting a monoplane in flight overhead.

NASM-9A08967: Catalogue, Rood [alternate back cover], circa 1913

[Image\(s\): NASM-9A08967, Catalogue, Rood \[alternate back cover\]](#)

Notes: Catalogue, 52 pages, issued circa 1913 by Rood (France) detailing their clothing products designed for use by aviators, motorcyclists, and motorists; includes prices in French francs. Alternate back cover illustration depicts one-half left rear view of stylized French monoplane in flight over mountains; the pilot is wearing a Rood helmet. A comical vulture is seen in flight at left foreground. The left wing of the aircraft is applied as a separate three-dimensional piece; it is likely that there was originally a similar piece (now missing) for the left horizontal stabilizer (tail).
