Albany Billiard Ball Company Records, 1894-1944, bulk 1914-1944

The records of the Albany Billiard Ball Company consist chiefly of account books detailing its finances. The cash journals detail the quantity and cost of goods sold to various firms and individuals. Costs and fees for shipping and handling are also noted. The journals of income and disbursements provide a more detailed record of administrative and production costs of the company as well as income derived from sales. Principle expenditures include labor, raw materials, maintenance of equipment and facilities, and taxes.

### Processing Information

Collection processed by William R. Massa, Jr. and Robert Harding, November 1979.

## Biographical / Historical

The Albany Billiard Ball Company is possibly the earliest successful plastics firm and certainly one of the oldest plastics companies in the world. The business was started in 1868 on Albany's South End. The company was renamed in September, 1977 the Albany-Hyatt Billiard Ball Company. John Wesley Hyatt was one of the company's founders and the American inventor of celluloid. Celluloid, besides being the base of photographic film, was a substitute for ivory, long the prime substance in billiard ball manufacture. The Hyatt "composition" ball, with a celluloid base, dominated the sport until the 1960s.
