Administrative Information

Acquisition Information

Hats is a portion of the Business Ephemera Series of the Warshaw Collection of Business Americana, Accession AC0060 purchased from Isadore Warshaw in 1967. Warshaw continued to accumulate similar material until his death, which was donated in 1971 by his widow, Augusta. For a period after acquisition, related materials from other sources (of mixed provenance) were added to the collection so there may be content produced or published after Warshaw's death in 1969. This practice has since ceased.

Processing Information

In 2016, with funding provided by the Smithsonian Institution's Collections Care and Preservation Fund, the Archives Center at the National Museum of American History implemented the use of minimal level processing standards to increase information about and facilitate access to more of our collections. A large portion of stored material from the original acquisition received minimal level processing, which resulted in additions to this Subject category. This effort included basic arrangement and replacement of non-archival housing for long-term stability, but staples and other fasteners have not all been removed. Revisions to the encoded finding aid were made to reflect the added content in context to the previously processed material.

Minimal level processing and enhancement of the machine-readable finding aid completed by Nicole Blechynden, September 2017.

Scope and Contents

This subject category- Hats consists primarily of receipts, bills of sale, business cards, and advertisements relating to hats. There are also many images of hats, two bound books pertaining to a hatter, several catalogs, and copies of a hatter's in-store magazine, patents, and a number of import/export documents relating to hats, as well as legal documents and correspondence.

Business records and marketing material include receipts and bills of sale from hatters and hat shops, as well as business cards and advertisements pertaining to same. Other products sold by these establishments include gloves, cloaks, and hat-related items (veils, ribbon, etc.) These materials are primarily from the Northeast United States, with several from other areas in the U.S., and a few from England, France, and Canada. These materials indicate that these businesses were often family owned and operated, and also that many of the smaller shops were owned and operated by women. These materials also reflect the changing ownerships/partnerships in many of the businesses. The material in this series is arranged in alphabetical order by business name. Present also are import/export documents pertaining to hat-making materials and hats.

There are a number of illustrations of hats from the publication *The Delineator* and several images of hats from miscellaneous sources. There are patents associated with hat-making, miscellaneous correspondence relating to hat-making and legal documents relating to same, generally regarding the dissolution of business partnerships or the taking-over of businesses. There are also publications related to hats and information and membership cards from hat-related labor associations and organizations. There is also some miscellaneous information related to bandboxes and hatpins, and one chart indicating

the appropriate hat to be worn with different outfits throughout the day. The later material in this series is arranged by type of material.
