Administrative Information

Acquisition Information

Laundry Machinery and Accessories is a portion of the Business Ephemera Series of the Warshaw Collection of Business Americana, Accession AC0060 purchased from Isadore Warshaw in 1967. Warshaw continued to accumulate similar material until his death, which was donated in 1971 by his widow, Augusta. For a period after acquisition, related materials from other sources (of mixed provenance) were added to the collection so there may be content produced or published after Warshaw's death in 1969. This practice has since ceased.

Processing Information

In 2016, with funding provided by the Smithsonian Institution's Collections Care and Preservation Fund, the Archives Center at the National Museum of American History implemented the use of minimal level processing standards to increase information about and facilitate access to more of our collections. A large portion of stored material from the original acquisition received minimal level processing, which resulted in additions to this Subject category. This effort included basic arrangement and replacement of non-archival housing for long-term stability, but staples and other fasteners have not all been removed. Revisions to the encoded finding aid were made to reflect the added content in context to the previously processed material.

Minimal level processing and enhancement of the machine-readable finding aid completed by Nicole Blechynden, September 2017.

Recto: Chinese figure with long queue is shown dancing while holding an iron. Text at right: "Melican man muchee smart Dennis / Kinrey no goodee / Mrs. Potts' muchee / goodee China / man can iron / two shirtee all / same one shirtee / make two dollar all / same one dollar." Verso: text with illustration advertising Mrs. Potts' Cold Handle Sad Iron, with list of advantages. In lower right: "For sale by / Hoitt, Rugg & Co., / No. 53 Oliver Street, Boston." In this cartoon illustration, the product is shown as advantageous to the Chinese laundry, whereas other new products of the same period, such as celluloid collars, were advertised as ways of putting Chinese laundries out of business. Nevertheless, this illustration uses a stereotypical image.
