Administrative Information

Acquisition Information

Mining is a portion of the Business Ephemera Series of the Warshaw Collection of Business Americana, Accession AC0060 purchased from Isadore Warshaw in 1967. Warshaw continued to accumulate similar material until his death, which was donated in 1971 by his widow, Augusta. For a period after acquisition, related materials from other sources (of mixed provenance) were added to the collection so there may be content produced or published after Warshaw's death in 1969. This practice has since ceased.

Processing Information

In 2016, with funding provided by the Smithsonian Institution's Collections Care and Preservation Fund, the Archives Center at the National Museum of American History implemented the use of minimal level processing standards to increase information about and facilitate access to more of our collections. A large portion of stored material from the original acquisition received minimal level processing, which resulted in additions to this Subject category. This effort included basic arrangement and replacement of non-archival housing for long-term stability, but staples and other fasteners have not all been removed. Revisions to the encoded finding aid were made to reflect the added content in context to the previously processed material.

Minimal level processing and enhancement of the machine-readable finding aid completed by Nicole Blechynden, September 2017.

Scope and Contents

This subject category-Mining consists of material related to the mining industry from the nineteenth and twentieth centuries. The documents span the period circa 1836-1980, but the majority of the materials date from circa 1870-1915. The overwhelming majority of this collection of material relates to mining businesses and related industries in North America, and particularly in the states and territories of the American Southwest (California, Nevada, Arizona, Colorado, and New Mexico). The collection consists of company correspondence, reports, and other matter; trade literature; investment prospectuses (for individual companies, for brokerage firms specializing in the mining industry, and for particular resources and locations, i.e., Canadian uranium or Coloradoan gold); brochures advertising mining, milling, and smelting equipment, or promoting chemical processing techniques for mined materials; tool catalogs; stock certificates; blank forms for professional association membership; subscription blanks for professional journals; articles of incorporation, legislative charters, and other official papers; journal, magazine, and newspaper articles related to mining activity; photographs, stereographs, postcards, and business cards; and one map. Topics covered by the collection include prospecting; financial outlook and economics of the mining industry; working conditions in mines; the nature of mining activity; technological advances in tunneling, drilling, pumping, and refining techniques and equipment; business culture of the late 19th and early 20th centuries; and the social life of mining people. Mined resources covered by the documents in the collection include gold, silver, copper, lead, nickel, uranium, cobalt, zinc, coal, and various forms of stone, sand, and gravel.

Subseries 1: Mining Companies, 1846-1980; undated

Mining Companies consists of materials related to mining companies. It is the largest series in the Mining collection and the majority of the materials date from circa 1870-1915. Most of the companies represented operated in North America; there are a few companies included which operated in other parts of the world. The documents are primarily promotional material intended to attract investment: brochures, prospectuses, annual reports, and forms for stock subscription. Also included, for some companies, are business correspondence, blank stock certificates, business cards, press releases. Mined resources covered by the documents in the series include gold, silver, copper, lead, nickel, uranium, cobalt, zinc, coal, and various forms of stone, sand, and gravel. The material is arranged in alphabetical order by company name.

Subseries 2: Mining Equipment and Processing Companies, 1852-1964; undated

Mining Equipment and Processing Companies contains material from companies and individuals engaged in the production and development of equipment for mining, as well as techniques for processing the extracted material. The majority of the materials date from circa 1880-1905. Most of the companies represented are American. The material is, as in series one, largely of a promotional nature: advertising brochures, fliers, and handouts for specific types of machinery or equipment; reports on new chemical processing techniques. There are also selected pieces of correspondence related to equipment orders, as well as tool catalogs and blank order forms. The material is arranged in alphabetical order by company name.
