Collection Overview

Repository:	Archives Center, National Museum of American History
Title:	Warshaw Collection of Business Americana Subject Categories: Petroleum
Date:	1838-1981
Identifier:	NMAH.AC.0060.S01.01.Petroleum
Creator:	Warshaw, Isadore, 1900-1969
Extent:	4.38 Cubic feet (consisting of 9.5 boxes, 4 oversize folders, 1 map case folder.)
Language:	Collection is primarily in English, though contains French, German, and Japanese language material.
Summary:	A New York bookseller, Warshaw assembled this collection over nearly fifty years. The <i>Warshaw Collection of Business Americana: Petroleum</i> forms part of the Warshaw Collection of Business Americana, Subseries 1.1: Subject Categories. The Subject Categories subseries is divided into 470 subject categories based on those created by Mr. Warshaw. These subject categories include topical subjects, types or forms of material, people, organizations, historical events, and other categories. An overview to the entire Warshaw collection is available here: Warshaw Collection of Business Americana

Administrative Information

Acquisition Information

Petroleum is a portion of the Business Ephemera Series of the Warshaw Collection of Business Americana, Accession AC0060 purchased from Isadore Warshaw in 1967. Warshaw continued to accumulate similar material until his death, which was donated in 1971 by his widow, Augusta. For a period after acquisition, related materials from other sources (of mixed provenance) were added to the collection so there may be content produced or published after Warshaw's death in 1969. This practice has since ceased.

Processing Information

In 2016, with funding provided by the Smithsonian Institution's Collections Care and Preservation Fund, the Archives Center at the National Museum of American History implemented the use of minimal level processing standards to increase information about and facilitate access to more of our collections.

For this subject, minimal processing included arrangement to the folder level, based on prior processing and preservation action, with retention of the pre-existing arrangement when possible, if applicable. Otherwise, an order was imposed by the Processing Archivist. Some materials were consolidated to eliminate excess bulk but items within folders were not arranged further. The guide may or may not include a more refined lists of folder contents. Non-archival housing was replaced for long-term stability, but staples and other fasteners have not all been removed.

Minimal level processing and machine-readable finding aid completed by Kendra Jae, 2017 March.

Scope and Contents

The subject category Petroleum relates to the manufacturing, refining, and sales of petroleum and other oil-based products including use in motors, spindles machinery, cylinders and by painters

Within these materials there exists producer and supplier overlap with other fuel, oil, and lubricant product lines such as linseed, rosin, whale, and refined vegetable oils. See also subject categories Automobile Industry, Aviation, Coal, Engines, Gas, Oils and Lubricants, plus other related topics, as applicable.

Petroleum includes business records, serial publications, guides and histories of specific companies, patents, images, realia, as well as widely-varied subject records. Business records also include import and export documentation and records of patents. Oversize material included with the series comprises of additional serial publications and business records.

Material related to specific subject areas provide overviews of several subjects pertaining to the petroleum industry. This includes the general history of the petroleum industry, chemistry and science related aspects of oil recovery and production, and literature about aspects of the petroleum trade intended for tradesmen. Materials extend to gas and electric companies, the automobile, aviation, and maritime industries, as well as addressing issues within the oil recovery trade such as procedures, storage equipment, and balancing safety and cost considerations.

No particular depth is present for any singular subtopic though Petroleum offers a breadth of general information about various aspects of the petroleum and its related industries.

Arrangement

Petroleum is arranged in three series.
