## Administrative Information

### Acquisition Information

Stocks and Bonds is a portion of the Business Ephemera Series of the Warshaw Collection of Business Americana, Accession AC0060 purchased from Isadore Warshaw in 1967. Warshaw continued to accumulate similar material until his death, which was donated in 1971 by his widow, Augusta. For a period after acquisition, related materials from other sources (of mixed provenance) were added to the collection so there may be content produced or published after Warshaw's death in 1969. This practice has since ceased.

## Processing Information

In 2016, with funding provided by the Smithsonian Institution's Collections Care and Preservation Fund, the Archives Center at the National Museum of American History implemented the use of minimal level processing standards to increase information about and facilitate access to more of our collections.

For this subject, minimal processing included arrangement to the folder level, based on prior processing and preservation action, with retention of the pre-existing arrangement when possible, if applicable. Otherwise, an order was imposed by the Processing Archivist. Some materials were consolidated to eliminate excess bulk but items within folders were not arranged further. The guide may or may not include a more refined list of folder contents. Nonarchival housing was replaced for long-term stability, but staples and other fasteners have not all been removed.

Minimal level processing and machine-readable finding aid completed by Kendra Jae, 2017 February.

## Scope and Contents

Stocks and Bonds contains business records and advertisements generated by stock brokers, bankers, and traders who regularly deal with the US stock market.

Materials include a sampling of blank stock certificates, estimated stock quotes for traders, as well as guides to banking companies and artistic depictions of notable bankers and stock brokers. Additional material includes publications intending to educate others about the stock market, trading, and effective investments.

No extensive runs or complete records exist for any single company, however, Turner, Manuel and Company as well as the New York Stock Market are significantly represented or discussed. No particular depth is present for any singular subtopic though some publications may provide general and historical overviews of how stock market information was passed along both within and without the industry.
