Biographical Note

Ayres was an inventor who worked independently and for a number of companies. Among his varied research interests were radar, stereo photography, and aircraft navigation systems. In the 1950s-1960s he developed gill-type underwater breathing equipment.

Scope and Contents

Collection deals primarily with Ayres' artificial gill underwater breathing equipment project. Includes correspondence (1956-1971), personal papers, three boxes of research notes, documentation of the success of the invention, and subsequent patents and patent litigation; also publicity for the artificial gill, items from Ayres' other projects, and related periodicals, brochures, articles, etc.

Arrangement

Divided into eight series.

Series 1: Correspondence, 1956-1971

Series 2: Personal Papers

Series 3: Research Notes On Artificial Gills

Series 4: Documentation of Success of Gill

Series 5: Patents and Patent Litigation

Series 6: Publicity For Gill
