Collection Overview

Repository:	Archives Center, National Museum of American History
Title:	Pullman Palace Car Company Collection
Date:	1867-1982 (bulk 1900-1930)
Identifier:	NMAH.AC.0181
Creator:	Pullman Palace Car Co. (Creator) Pullman, George M., 1831-1897
Extent:	8 Cubic feet (11 boxes)
Language:	Collection is in English. Some materials in French, German, and Spanish.
Summary:	Records of the Pullman Company, manufacturers and operators of railroad sleeping cars. Pullman also manufactured hospital and dining cars at its Chicago facilities. Dating from 1867 to 1982 (bulk 1900-1930s), the collection includes background materials, correspondence, financial, personnel and operating records, drawings and photographs.

Administrative Information

Acquisition Information

Collection materials were donated by Arthur D. Dubin in 1980 and on January 30, 1986. Additional materials were donated by Lorraine Douglass, Kiara S. Winans and Kristin Peterson on April 3, 2012.

Provenance

Collections AC0158 and AC0181 were transferred to the Archives Center from the Division of Transportation (now known as the Division of Work and Industry) in 1980 and 1986.

Collection AC0158, Mr. and Mrs. Arthur D. Dubin Pullman Palace Car Company Car Construction and Registration Books, 1875-1911, was integrated into collection AC0181.

Related Materials

Materials in the Archives Center

Pullman Palace Car Company Photographs (NMAH.AC.1175), contains photographs of Pullman cars: freight, passenger, private and street railway/rapid transit cars. The bulk of the collection contains approximately 13,500 original glass plate negatives, film negatives, and copy prints.

Industry on Parade (NMAH.AC.0507) contains Reel #99, Servicing Sleepers, 1952. The Pullman Coach Company, Chicago, Illinois.

Materials In Other Organizations

Art Institute of Chicago

Bombardier Corporation

California State Railroad Museum
Chicago Historical Society
Arthur Dubin Collection at Lakeforest College
Illinois Railway Museum
Newberry Library, Pullman Company Archives

The Pullman Company archives consists of 2,500 cubic feet of records from the Pullman Company and Pullman heirs. The collection is comprised of business archives of the Pullman Palace Car Company from 1867 and include records of the entire firm up to the 1924 split into operating (sleeping car operation, service, and repair) and manufacturing companies. From 1924 to 1981 the records chronicle the activities of the operating company only.

Processing Information

Processed by Barbara Kemp and Robert S. Harding, March 1986; revised by Alison Oswald, archivist, January, 2011.

Illustrations Accompanying the Report of the Engineer-in-chief, H.C. Mais, on Observations on Railways Made During His Tour in 1883 contains some moldy pages which were separated for scanning. These pages include: the index, pages 1-7; page 58; and pages 98-111.

Preferred Citation

Pullman Palace Car Company Collection, 1867-1982, Archives Center, National Museum of American History

Restrictions

The collection is open for research use.

Conditions Governing Use

Collection items available for reproduction, but the Archives Center makes no guarantees concerning copyright restrictions. Other intellectual property rights may apply. Archives Center cost-recovery and use fees may apply when requesting reproductions.

Accruals

A photograph album and *Illustrations Accompanying the Report of the Engineer-in-chief, H.C. Mais, on Observations on Railways Made During His Tour in 1883* (.066 cubic feet) was added on May 25, 2012.

Biographical / Historical

George M. Pullman (1831-1897) developed the railroad passenger sleeping car service into a major 19th century industry. He created the Pullman Palace Car Company in 1867. George Pullman was succeeded as president of the company by Robert Todd Lincoln, President Abraham Lincoln's son, who served until 1911. In 1900, after buying competing companies, the firm was reorganized as the Pullman Company.

The idea for specially designed sleeping cars came to Pullman while traveling from Buffalo to Westfield, New York in 1854. He altered existing railroad cars in September, 1858, for service on the Chicago and Alton Railroad. The first sleeping car built to Pullman's specifications was the "pioneer," which carried part of the Lincoln funeral party from Chicago to Springfield, Illinois in 1865. In 1867 "hotel cars" were introduced. These sleeping cars, equipped with kitchen and dining facilities, eliminating the need for trains to stop at stations for passengers to buy food. In 1868, Pullman built the "Delmonica," devoted to restaurant purposes. The Pullman firm also built streetcars and trolleys.

In 1880 George Pullman built the town of Pullman, just south of the city of Chicago along the Illinois Central Railroad line, as the site for his manufacturing plant. Intended as a model manufacturing town, it had 12,000 residents in 1893. It suffered from the usual company town problems and was annexed to Chicago in 1889. In the wake of the depression of 1893 Pullman reduced wages for its workers by 25% or more. The American Railway Union, lead by Eugene V. Debs, sought to bring wage issues to arbitration but Pullman refused. In June, 1894 some 4,000 employees struck the company gaining support from thousands of railroad workers who refused to handle trains with Pullman cars. President Grover Cleveland sent federal troops to Chicago in July and after a period of sporadic violence the strike was over by the end of the summer.

In later years the Pullman company introduced several innovations. It built lighter, articulated cars of alloy steel beginning in 1936. The following year, it introduced the roomette car with eighteen enclosed private rooms. In 1956 Pullman introduced the dome sleeper car with an upper deck observation level. The United States anti-trust suit against Pullman Manufacturing and Operating Company resulted in a 1944 decision requiring a separation of car building and car operation activities. Pullman sold its sleeping car service, transferring its operating unit to a group of fifty-nine railway firms in 1947.

George Pullman introduced two notable practices. First, rather than operating railroads, his firm leased sleeping cars to the railroads and provided the complete services on them, including supplying porters, conductors, dining staff, and food and linens. Second, Pullman named each of his sleeping and dining cars rather than assigning them numbers. This was intended to enhance the company's image by creating a personality for the car. Different categories of names signified different categories of cars and geographical names also helped to promote travel to the areas in which they operated.

Arthur Detmers Dubin assembled these Pullman Company materials. Dubin was born in 1923 in Chicago, Illinois. He began his architectural education at the University of Michigan in 1941 but was interrupted by World War II, and he served with distinction in the United States Army until 1946. After completing his studies in 1949, Dubin joined his father's and uncle's architectural firm, Dubin and Dubin, as a second-generation architect. The leadership of the firm soon passed to Arthur and his brother, Martin David, and in 1965 they were joined by John Black and in 1966 by John Moutoussamy. Arthur's life-long interest in trains and transportation and their implications for architecture is evident in transit stations commissions and service on transportation-related advisory boards (Dubin was a member of the Illinois Railroad Commission), as well as in his writings and personal collections. Dubin was an avid train enthusiast and collector.

Scope and Contents

The collection consists of materials from 1867-1982 (bulk 1900-1930s), and includes background materials, correspondence, financial records, operating records, personnel records, drawings, and photographs. Of note is the documentation of hospital cars and instructions for porters. The collection is not a complete record of the Pullman Palace Car Company's activities.

Series 1, Historical Background, 1867-1982, contains newspaper clippings and articles about the Pullman Palace Car Company and George Pullman. Also included is a 318-page typescript titled *The History of the Sleeping Car* 1923, by Charles S. Sweet; documentation on how Pullman cars were named; and other histories of the Pullman Company including its hospital cars and maquetry design.

Series 2, Correspondence, 1912-1960, consists primarily of documentation about the sale of cars and equipment by Pullman Palace Car Company to specific railroad companies. The correspondence details the cost per car and in some instances, leasing costs, operating costs, and other relevant statistical and financial information about the transactions. There is some consolidated data on cars sold to the railroads as well as summary data on the type of car sold, name of car, selling price, purchasers, and the date the sale was approved. The correspondence is organized chronologically within Pullman Company correspondence wrappers which were used to maintain the correspondence in a uniform manner and in consecutive date order.

Correspondence about hospital cars contains information on the rental of Pullman cars to the United States government as well as letters discussing specifications for building hospital unit cars for the United States Army. There is one folder of miscellaneous correspondence with individuals seeking copies of photographs from the company and/or offering their historical writings about the company.

Series 3, Financial Records, 1875-1930, consists primarily of details of cost documentation created by the Pullman Company's Manufacturing Department. The cost sheets are arranged chronologically and represent an itemized financial breakdown of costs by material, labor, extra equipment, sundries, and recapitulation for a variety of Pullman cars. The cover sheet for work orders notes the lot number, plan number, type of Pullman car (e.g. baggage, parlor, private) being manufactured or serviced/repaired, to whom the order belongs, and associated dates. For example, one private, steel car for Mr. D. J. Reid or general service parlor car for Southern Railway.

Series 4, Operating Records, 1875-1972, consists of records used by the company for daily operations, particularly instructions for porters as well as repair logbooks, volumes detailing car building completion, published supplements noting specific changes to cars, correspondence, reports, newspaper clippings, and lists of cars built by Pullman and cars withdrawn from service. Also included is the *Illustrations Accompanying the Report of the Engineer-in-chief, H.C. Mais, on Observations on Railways Made During His Tour in 1883*. Henry Coathupe Mais (1827-1916) was an English born civil engineer who spent most of his career in Australia. Mais toured railways and other works in Europe and America. His lengthy report with many detailed illustrations was printed in 1884 as a parliamentary paper. Some report pages were moldy and have been separated. These pages include: the index, pages 1-7; page 58; and pages 98-111.

The reports found in the "general file" include *Sleeping, Parlor and Lounge Equipment* (1945) and *Pullman Passenger Survey A Continuing Study--Part II*, (1955). The latter report by McFarland, Aveyard and Company studied attitudes and opinions of Pullman passengers. There is a typescript of a presentation made by George W. Bohannon of the Pullman Company to the American Association of Passenger Traffic Officers (1964).

The records documenting the completion of cars are bound volumes arranged chronologically. The volumes detail lot number, plan numbers, date of order, type of car, account name, date of delivery, destination route, estimate price, cost price, and contract price. In some instances, new information was glued or taped into the volume. The repair books capture the date, name of car, yard, name of porter, and date shipped.

Series 5, Personnel Records, 1873-1979, includes a payroll list for the General Ticket Department, 1876; instructions for passengers with cholera, 1873; reward notices for an 1878 robbery; instructional manuals for Pullman porters; photographs of Pullman Company employees working, and general correspondence, 1896-1979; anecdotes about Pullman porters; an obituary for George Arthur Kelly, an executive vice president for the Pullman Company; articles and newspaper clippings about porters and conductors, particularly the Society for the Prevention of Calling Pullman Car Porters "George." Started in 1916, the Society for the Prevention of Calling Pullman Car Porters "George" was founded by George W. Dulany, Jr., an Iowa lumber merchant. Dulany organized the society for fun after hearing passengers call every porter George. The society became a hobby and there were no meetings, dues, or activities associated with his work. Dulany's campaign was solely to have passengers use a porter's correct name or simply call them "porter."

Series 6, Drawings, 1907-1939 and undated, contains bound volumes arranged chronologically of records of tracings of drawings for Pullman cars. The volumes detail the negative number, date, type of car, job number, and remarks.

Series 7, Photographs, 1932-1950s and undated, consists primarily of black-and-white copy prints (8" x 10") documenting employees, especially porters, passengers, and hospital cars. Many of the hospital cars depict both

the exterior and interior, but none with patients. The passenger photographs are almost exclusively interior images of persons dining, sleeping, playing cards, and in general seating areas. The Southern Pacific dining car photographs are original prints and bear the Pullman Car Company embossed stamp and unique number. This range of photographs is (Pullman photograph #32867 to #32873) and the images depict exterior and interior views of the dining cars. There is one album of ninety-nine photographs taken by Ricardo Villalba (active 1860-1880) in Peru. The album was made for W.W. Evans, Esquire in 1875. The images depict landscapes, bridges, train tracks, railroad cars, railroad engines, and buildings, such as the Pano Cathedral.

Arrangement

The collection is divided into seven series:

Series 1, Historical Background, 1867-1982

Series 2, Correspondence, 1912-1960

Series 3, Financial Records, 1875-1930

Series 4, Operating Records, 1875-1972

Series 5, Personnel Records, 1873-1979

Series 6, Drawings, 1907-1939 and undated

Series 7, Photographs, 1932-1950s and undated

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

- Dining cars
- Hospital cars
- Hotel car
- Labor relations
- Railroads -- Dining-car service
- Roomette car
- Sleeping car
- Strikes and lockouts

Types of Materials:

- Correspondence -- 1930-1960
- Drawings
- Photographs -- Black-and-white photoprints -- Silver gelatin -- 1930-1940

Names:

- Lincoln, Robert Todd

Container Listing

Series 1: Historical Background Materials, 1867 - 1982

Box 1, Folder 1; Articles, 1867-1969
