Summary: The Computer Oral History Collection (1969-1973, 1977), was a cooperative project of the American Federation of Information Processing Societies (AFIPS) and the Smithsonian Institution. This project began in 1967 with the main objective to collect, document, house, and make available for research source material surrounding the development of the computer.

Administrative Information

Acquisition Information

The Computer Oral History Collection was a cooperative project of the American Federation of Information Processing Societies (AFIPS) and the Smithsonian Institution. This project began in 1967 and was concluded in 1973. This collection was transferred to the Archives Center in approximately 1986 from the Division of Information, Technology & Society, formerly known as the Division of Electricity.

Related Materials

The Archives Center contains several "computer" related collections:

- American National Standards Institute, 1969-1979
- Association for Computing Machinery Collection, 1958-1978 (Washington, D.C., Chapter)

- N.W. Ayer Advertising Agency Records, 1889-1972
- Paul Armer Collection, 1949-1970
- Robert G. Chamberlain Numerical Control Collection, 1954-1984
- J. Childs Numerical Control Collection, 1952-1970
- Computer Standards Collection, 1958-1978
- Computer World Smithsonian Awards Collection, 1989-2001
- Data Processing Digest Collection, 1955-1974
- Max Holland Machine Tool Industry Collection, circa 1941-1990
- Grace Murray Hopper Collection, 1944-1965
- Information Age Exhibition Records, 1979-1990
- Institute for Advanced Study Computer Project Records, 1950-1957
- Instrument Society of America Collection, 1911-1969
- Odex I Walking Robot Collection, 1973-1986
- Jacob Rabinow Papers, 1910-1917; 1947-1990
- Terry M. Sachs Collection, 1965-1969
- Scientists and Inventors Portrait File, circa 1950-1980
- Share Numerical Analysis Project Records, 1964-1970
- SHARE Records, circa 1954-1984
- Cliff Shaw papers, circa 1954-1985
- Society for the History of Technology (SHOT) Records, 1956-1992
- Warshaw Collection of Business Americana, circa 1754-1965
- Whirlwind I Computer Collection, 1945-1959
- B.H. Worsley Collection, 1946-1959

Within the National Museum of American History there are other related collections that may be found in the Division of Medicine and Science. These collections contain both artifacts and documents. Artifacts include: digital computing machines, automatic digital computers and electronic calculators, logic devices, card and tape processors, slide rules, integrators and integraphs, harmonic analyzers and synthesizers, differential analyzers, other analog computing devices, space measurement and representation, time measurement, and combination space and time measurement. Documentation includes the Electronic Computers History Collection and the Mathematical Devices History Collection. Photographs and video materials can also be found. The Smithsonian Institution Archives contains administrative documentation regarding the Computer History Project.

Other Finding Aids

Interview Abstracts

For a brief overview of the interview contents and for biographical information on the interviewees, researchers should consult the interview abstracts. Not all interviews have abstracts.

Processing Information

Processed by Alison L. Oswald, archivist, March 1996; Revised by Alison Oswald, August 1999; May 2010.

Charlie Bachman and William Olle kindly reviewed and edited the Conference on Data System Languages (CODASYL) Meeting transcript.

Preferred Citation

Computer Oral History Collection, Archives Center, National Museum of American History, Smithsonian Institution

Restrictions

Collection is open for research but original audio tapes and videotapes are stored off-site. Reference copies do not exist for all of the audiovisual materials. Contact the Archives Center for information at archivescenter@si.edu or 202-633-3270.

Conditions Governing Use

Collection items available for reproduction, but the Archives Center makes no guarantees concerning copyright restrictions. Other intellectual property rights may apply. Archives Center cost-recovery and use fees may apply when requesting reproductions.

Accruals

Approximately .15 cubic feet of material was added to the collection in January 2016. The material consists of notes, clippings, articles, resumes, and other biographical documentation about interviewees.

Biographical / Historical

The Computer Oral History Collection (1969-1973, 1977), was a cooperative project of the American Federation of Information Processing Societies (AFIPS) and the Smithsonian Institution. This project began in 1967 with the main objective to collect, document, house, and make available for research source material surrounding the development of the computer. The project collected taped oral interviews with individuals who figured prominently in developing or advancing the computer field and supplemental written documentation--working papers, reports, drawings, and photographs. The AFIPS provided the "seed" money to support the project and to aid the Smithsonian with its expenditures. Interviews were conducted by I.B. Cohen, A. Dettinger, Bonnie Kaplan, Elizabeth Luebbert, William Luebbert, Robina Mapstone, Richard Mertz, Uta Merzbach, and Henry Tropp. In some instances, the audio tapes and/or transcripts are not "formal" interviews, but rather moderated panel discussions/meetings, or lectures delivered by interviewees.

Scope and Contents

This collection consists of approximately 43.5 cubic feet of material documenting the development of the computer.

Scope and Contents

ABC: Atanasoff-Berry Computer
ACE: Automatic Computing Engine
ACM: Association for Computing Machinery
ALGOL: ALGOLrithmic Language
ALWAC: Axel Wenner-Gren Automatic Computer
ARPA: Advanced Research Projects Agency

BACAIC: Boeing Airplane Company Algebraic Interpretative Computing System
BARK: Binar Automatisk Relä Kalkylator
BINAC: Binary Automatic Computer
BIZMAC: Business Machine
BMEW: Ballistic Missile Early Warning (System)

Arrangement

The collection is divided into six series.

- Series 1: Transcripts, 1967-1973, 1977
 - Series 2: Supplemental Documentation, 1922-1974
 - Series 3: Patents, 1940-1973
 - Series 4: John Vincent Atanasoff's Materials, 1927-1968
 - Series 5: Audio Tapes, 1967-1974, 1977
 - Series 6: Video Tapes, 1968-1972
-

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

Computers
Engineers
Mathematicians
Mathematics
Physicists
Scientists

Types of Materials:

Audiotapes
Interviews -- 1950-2000
Oral history
Sound recordings -- Compact disks
Transcripts
Videotapes

Names:

National Museum of American History (U.S.). Division of Computers, Information and Society

Container Listing

Series 1: Transcripts, 1967-1977, 1969-1973

Subseries 1.1: Combined Index to Transcripts, 1986

Box 1 (Series 1), Folder 1

Scope and Contents: The combined index to the oral histories is only a partial index to the entire collection of interviews conducted. Researchers should note that there are several interviews not included in this index. It is arranged alphabetically by last name of the interviewee and provides the date and length of the interview.

Subseries 1.2: Research Transcripts, 1967-1977, 1969-1973

Scope and Contents: This series consists of approximately 4 cubic feet and reflects all of the individuals, organizations, lectures, and/or meetings interviewed for this project and the date of the interview if known. Although the bulk dates indicate 1969-1973, there is one interview from 1955 and one from as late as 1977. In some instances there is no transcript of the interview and this is noted in the container list with a parenthetical (NT). Transcriptions were made by different individuals over a long period of time. Interviewees were afforded the opportunity to make edits, which were incorporated into the final transcripts. Additionally, the abbreviation of undated has been used to indicate "no date." The interviews are arranged alphabetically by the last name of the interviewee. Where there is more than one interview with the same person on different dates, a separate entry has been made. A cross-reference of "see" has also been used to link interviews where there was more than one participant and to indicate the principal name under which the interview filed. Abstracts of the interviews contain the name of the interviewee(s) and interviewer, as well as the date on which the interviews occurred, if known.

Series 2: Supplemental Documentation, 1922-1974

Subseries 2.1: Robina Mapstone Files, 1946-1974

Scope and Contents: This series is arranged alphabetically and contains approximately 7.5 cubic feet of supplemental research materials collected by Robina Mapstone, Research Associate of the Computer History Project. This series contains articles, correspondence (photocopies), memoranda, biographical sketch material, selected bibliographies on various aspects of the computer field, professional literature related to and authored by specific interviewees, specifications on selected computers, and product literature. Mapstone built in cross references (see and see also) in the files to facilitate locating information. These files should be used in conjunction with Subseries B: Richard Mertz Files and Subseries C: Henry Tropp Files which also contain additional biographical materials. It should be noted that not all interviewees are represented, but may have material collected in their name under an organization such as RAND Corporation. In some instances, the histories contain a listing or index of materials received. This listing was compiled by Mapstone to facilitate research. Substantial numbers of photographs exist in the William Gunning files (RAND, REAC Operating Console, JOHNNIAC, Zephyr, Selectron, Multiplier Quotient Register, and the RAND Building itself to name a few); Air Force supply problems and ALWAC III photographs can be found in the Vincent Neisius files; and transparencies of North American are with the Jack Strong materials. Some photographs are also scattered throughout reports.

Subseries 2.2: Richard Mertz Files, 1942-1971

Scope and Contents: This series represents materials collected by Richard Mertz during the course of his research and then subsequently given to the Computer Oral History Project. The materials consist of one cubic foot of biographical materials (curriculum vitae, obituaries, biographical sketches), relating to oral interviews, printed documentation, correspondence, papers, reports, and notes. The arrangement is alphabetical (Appendix A through Appendix C.) Each appendix includes an itemized listing of what it contains and this listing can be found in box 1, folder 1 of this series. These materials should also be used in conjunction with Subseries A: Robina Mapstone Files, 1946-1974 and Subseries C: Henry Tropp Files, 1922-1973.

Box 49, Folder 1	Index, 1971
Box 49, Folder 2	Appendix A, Part 1, Biographic Files (Missing)

Box 51	Index Card File-Tape Status Transcription Status

Subseries 2.3: Henry Tropp Files, 1942-1971

Scope and Contents: Collected by Tropp and referred to as the "H" Files, these materials consist of approximately 6 cubic feet and span the years 1922 to 1973. Arranged alphabetically, these materials include articles authored by interviewees, bibliographies, product literature, and reports. Interviewees associated with a particular file are noted parenthetically.

Series 3: Patents, 1940-1973

Scope and Contents: These files were presumably maintained by Henry Tropp for the purposes of research and in preparation of conducting oral history interviews. Arranged alphabetically by last name of the interviewee, this series is approximately 1 cubic foot. Provided is the name of the inventor, the name and/or type of invention, patent number, and date the patent was issued. In cases where there is more than one inventor, "et al." has been used and the patent listed under the primary patentee. Patents for individuals not associated with the oral history project are also listed.

Series 4: John Vincent Atanasoff's Materials, 1927-1968

Scope and Contents: These materials were assembled by John V. Atanasoff--a subject of this oral history collection--and subsequently given to Uta Merzbach via Mrs. Atsiknoudas in 1972. Spanning the years 1927 to 1968, these materials consist of approximately one cubic foot. Atanasoff assembled these materials in response to the litigation of the Sperry-Rand Corporation vs. Honeywell and Sperry-Rand vs. CDC/Control Data Corporation, which began in 1967 regarding the rights to the patent for the Electronic Numerical Integrator and Automatic Computer (ENIAC). Primarily photocopies, these materials document the process by which Atanasoff and his colleague, Cliff Berry, created the first automatic electronic digital computer. J. Presper Eckert and John Mauchly claimed to have invented it first. These files are arranged according to an outline--Index A to Index C-- developed by Atanasoff. Researchers should consult this guide to the documents. Some documents in this series bear numbers. This indicates that the document was introduced into the U.S. District Court case of Atanasoff in 1968 involving the Honeywell Inc. vs. Sperry-Rand Corp. and Illinois Scientific Developments Inc. Copies of Atanasoff's depositions, volumes 1-9, are also available.

Series 5: Audio Tapes, 1967-1974, 1977

Scope and Contents: This series is divided into two subseries--subseries 5.1: Reference copies and subseries 5.2: Originals. The reference copies consist of approximately 10 cubic feet and the originals approximately 4 cubic feet. The majority of the audio tapes are on 5" reels. When not in a 5" format, interviews are on 7" reels or cassettes.
