Collection Overview

Repository:	Archives Center, National Museum of American History
Title:	Melvin Kranzberg Papers
Date:	1934 - 1988
Identifier:	NMAH.AC.0266
Creator:	Kranzberg, Melvin, Dr., 1917-1995
Extent:	140 Cubic feet (433 boxes)
Language:	English .
Summary:	Personal papers of Dr. Kranzberg from his undergraduate years at Amherst College through his professional career. Collection documents his involvement with development of the new field of history of technology and his role as principal founder of the Society for the History of Technology (SHOT); work as consultant and advisor to domestic and international agencies, colleges, and universities; personal affiliations, lectureships, publications; and teaching and administrative activities for more than 40 years as a college professor.

Administrative Information

Acquisition Information

Collection donated by Georgia Institute of Technology, through Dr. Melvin Kranzberg, August 24, 1988.

Processing Information

Collection processed by Robert Harding, 1985

Preferred Citation

Melvin Kranzberg Papers, 1934-1988, Archives Center, National Museum of American History.

Restrictions

Collection is open for research but is stored off-site and special arrangements must be made to work with it. Contact the Archives Center for information at archivescenter@si.edu or 202-633-3270.

Conditions Governing Use

Collection items available for reproduction, but the Archives Center makes no guarantees concerning copyright restrictions. Other intellectual property rights may apply. Archives Center cost-recovery and use fees may apply when requesting reproductions.

Historical

Kranzberg's Six Laws

As reported in the July 1986 Issue of *Technology and Culture*, Volume 27, Number 3, pages 544-561, Kranzberg's Six Laws are listed as follows in the SHOT Presidential Address.

"These are not laws in the sense of commandments but rather a series of truisms deriving from a longtime immersion in the study of the development of technology and its interactions with sociocultural change." 1.. Technology is neither good nor bad; nor is it neutral.(p.545); 2. Invention is the mother of necessity, (p.548) 3. Technology comes in packages, big and small, (p. 549); 4. Although technology might be a prime element in many public issues, nontechnical factors take precedence in technology-policy decisions, (p. 550); 5. All history is relevant, but the history of technology is the most relevant, (p. 553); 6. Technology is a very human activity—and so is the history of technology, (p. 557); 7."But if ours is truly a man-made world, I claim that mankind can re-make it. And in that remaking process, the history of technology can play a very important role in enabling us to meet the challenges besetting mankind now and in the future."

Biographical

Melvin Kranzberg (born St. Louis, Mo.) received his A.B. from Amherst College (1938), and his M.A. (1939) and Ph.D. (1942) in modern European history from Harvard University. When World War II commenced, Dr. Kranzberg went, with an Amherst professor, Charles W. Cole, to work at the Office of Price Administration in Washington, D. C. At that same time, he enlisted in the Signal Corps Reserve. Since he was regarded as "educable," he was sent for electronics training at Catholic University, and then to Johns Hopkins for a three-year course in electrical engineering that was crammed into sixteen weeks. Instead of receiving a commission, he was sent to Philco Radio Laboratories in Philadelphia for another three-month crash course, this one in radar.

By the end of his course of study, however, the Signal Corps no longer needed officers and he was put in the infantry. After basic training, he was assigned to the Army's Specialized Training Program. His language skills enabled him to engage in an intensive three-month study of Turkish. Since invasion of Turkey was not likely, he then entered a language program in German. This led to appointment in Military Intelligence, where he was charged with interrogating German POWs, often on the front lines. That assignment lasted from about September 1944 through the Battle of the Bulge, until the German surrender. He received three Battle Stars, a Combat Infantry Badge, and a Bronze Star. He was awarded honorary doctorates of letters (Litt. D.) by New Jersey Institute of Technology and Northern Michigan University, doctorates of engineering (D. Eng.) by Worcester Polytechnic Institute and Colorado School of Mines, and doctorates of humane letters (L.H.D.) by Denison University and Amherst College.

Dr. Kranzberg's major professional contribution has been the establishment of a new field of history: the history of technology. He was the principal founder of the Society for the History of Technology (SHOT), founding editor (1959-81) of its quarterly journal, *Technology and Culture*, and served as SHOT Secretary (1959-74) and President (1983-84). A cofounder of ICOHTEC (International Committee for the History of Technology, a Scientific Section of the International Union for the History Science [UNESCO], he served as its vice-president from its inception in 1968. When he retired from that post at ICOHTEC'S 17th International Symposium (Hamburg, 1989), he was elected honorary president for life. In 1979-1980 Dr. Kranzberg was national president of Sigma Xi, The Scientific Research Society (120,000 active members in 500 chapters and clubs). Over the years, he has been a Sigma Xi National Lecturer and has served on various committees of the honorary organization. He was Chairman (1966, 1979) of Section L (History and Philosophy of Science) of the American Association for the Advancement of Science (AAAS), and Chairman (1978-81) of the AAAS Committee on Science Engineering, and Public Policy. From 1977-1980, he chaired the Advisory Committees of the Policy Research and Analysis (PRA) and Science Resources Studies (SRS) Divisions of the National Science Foundation (NSF). An original member (1964) of the National Aeronautics and Space Administration's History Advisory Committee (Chairman, 1966-71, 1984-87), he also served on NASA's National Advisory Council (1984-87). In 1989, Dr. Kranzberg was elected to the newly founded Board of the National

Association for Science, Technology, and Society (NASTS), an "umbrella organization for educators, scientists, engineers, public policy analysts, public interest groups, media, and individuals interested in the impact of scientific and technological development on society." At its 1992 Annual Technological Literacy Conference, Kranzberg was honored by being the initial recipient of a NASTS Honorary Lifetime Membership.

Other activities include: Vice-President, AAAS (1966); Chairman (1957-58), Humanistic-Social Division, American Society for Engineering Education (ASEEO); Vice-President (1959), Society for French Historical Studies; Trustee (1979-), Charles Babbage Foundation; and Chairman (1972-73), U.S. National Committee of the International Union of the History and Philosophy of Science. He has served on the Technology Assessment Panel of the National Academy of Sciences and the NAS Committee on the Survey of Materials Science and Engineering, The National Research Council's Committee on the Education and Utilization of the Engineer, and various advisory committees of the National Academy of Engineering.

Kranzberg has been a member of the Editorial Advisory Boards of the following journals: *Engineering Education*; *Science, Technology & Human Values*; *Knowledge in Society*; *History and Technology*; and *Research in Philosophy and Technology*; and the "Inside Technology" book series of the MIT Press. In 1980, he coordinated the Course-by-Newspaper on "Energy and the Way We Live" with 400 newspapers and was awarded a \$10,000 prize by the Academy for Educational Development. He was a TV commentator on the PBS "Connections" series and lectured throughout the world, including USIA tours to India, Southeast Asia, and Africa. He has written or edited: *The Siege of Paris, 1870-1871* (1950; reprinted 1970); *1848: A Turning Point?* (1959, 14 printings); the two-volume

Technology in Western Civilization (1967; Japanese, 1976; Spanish, 1980); *Technology and Culture: an Anthology* (1972; Arabic, 1976; Spanish 1980); *By the Sweat of Thy Brow: Work in the Western World* (1975 [an alternate selection of the Fortune Book Club]; Italian, 1976); *Technological Innovation: A Critical Review of Current Knowledge* (1978); *Energy and the Way We Live* (1980); *Ethics in an Age of Pervasive Technology* (1980); *Bridge to the Future: A Centennial Celebration of the Brooklyn Bridge* (1984); *Technological Education/Technological Style* (1986); and *Innovation at the Crossroads Between Science and Technology* (1989). He is also the author of over 150 articles in encyclopedias, learned journals, and scholarly collections on topics in European history, engineering education, history of technology, science-technology policy, and science-technology-society interactions.

Dr. Kranzberg taught at Harvard, Stevens Institute of Technology, Amherst College, and Case Western Reserve University, where he established the first graduate program in the history of technology at an American university. From 1972 to 1988, he was Callaway Professor of the History of Technology at Georgia Institute of Technology (Georgia Tech). He is a member of the honorary societies Phi Beta Kappa, Sigma Xi, Epsilon Pi Tau, and Phi Kappa Phi. His awards include: Leonardo da Vinci Medal, Society for the History of Technology (1968); Apollo Achievement Award, NASA (1969); Special Research Day Citation, Case Western Reserve University (1970); Special Recognition Award, American Industrial Arts Association (1978); and the Roe Medal, American Society of Mechanical Engineers (1980). Dr. Kranzberg was one of 100 Americans presented the State of Israel's Jabotinsky Centennial Medal (1980) for eminence in the sciences and letters, and was elected (1985) an Honorary Foreign Member of the Czechoslovak Society for the History of Science and Technology, Czechoslovak Academy of Sciences. In 1991, the Liberal Education Division of the American Society for Engineering Education presented him its Olmsted Award for "outstanding contributions to engineering education by bringing the humanities and technology together for the mutual benefit of both." In November 1991, the Society for Social Studies of Science (SSSS) and the Institute for Scientific Information (ISI) presented him the Bernal Award for "outstanding contributions to the social studies of science." At its 1994 meeting in Zaragoza, Spain, the prestigious International Academy of the History of Science elected Dr. Kranzberg to its membership.

The January-September 1976 issue (Vol. 12, Nos. 1-3) of *Lex et Scientia* (The International Journal of Law and Science) was devoted to Kranzberg's 1975 Mellon Lectures at Lehigh University, and the French Centre de Recherche sur la Culture Technique dedicated its June 1983 (No. 10) issue of *Culture Technique* to him. In 1985 The Society for the History of Technology and the MIT Press co-published John M. Staudenmaier's, *Technology's Storytellers: Reweaving the Human Fabric* as a "tribute" to him, and Lehigh University Press published (1989) Stephen H. Cutcliffe and Robert C. Post's, *In Context: History and the History of Technology — Essays in Honor of Melvin Kranzberg* containing articles by major historians of technology. When Dr. Kranzberg became emeritus in June 1988, the Georgia Tech Foundation established the Melvin Kranzberg Professorship in the History of

Technology. The first occupant of this chair was Dr. Bruce Sinclair, former head of the Institute for the History and Philosophy of Science and Technology at the University of Toronto and a former student of Dr. Kranzberg. Dr. Melvin Kranzberg married Louise Lester Clark.

Scope and Contents

This collection consists of 140 cubic feet of material divided into nine series and housed in 359 document boxes. Several subseries remain organized in the original order as they were received. There has been no attempt by the archivist to rearrange them. Some folders did not have folder titles. The archivist has provided titles in those instances, and these folder titles have been put in brackets [] in the Container List. Melvin Kranzberg's personal activities from 1934 through 1968 are arranged chronologically in Series 4: PERSONAL ACTIVITIES, including his early education. Series 8: TEACHING AND ADMINISTRATION is divided into two subseries and is comprised of teaching and administrative files compiled by Dr. Kranzberg during his forty years as a college professor.

Series 2: Correspondence between Kranzberg and numerous colleagues in the U.S. and abroad, 1949-1988. He was actively involved with technically oriented societies, U.S. government agencies, and SHOT. Since he also wrote a textbook and several encyclopedia articles, subjects range from business to academic to personal.

Kranzberg's role as a consultant and advisor is located in Series 1: CONSULTATION AND ADVISEMENT. This series is further divided into nine alphabetically arranged subseries. Kranzberg's many professional affiliations are arranged in Series 5: PROFESSIONAL AFFILIATIONS. This series is comprised of eight alphabetically arranged subseries. Series 2: CORRESPONDENCE is also arranged alphabetically and contains much of Dr. Kranzberg's correspondence during the years 1949 to 1988. He was actively involved with a number of technically oriented societies, United States government agencies, and the Society for the History of Technology. Since he also wrote a textbook and several encyclopedia articles, the subjects represented range from business to academic to personal.

Series 7: RESEARCH SUBJECT FILES is arranged alphabetically and documents nearly forty years of research by Kranzberg on hundreds of diverse topics. The results of some of this research is available in Series 6: PUBLICATIONS, which is divided into eleven subseries and contains manuscripts, research, correspondence, outlines, and reprints of various Kranzberg essays and books. In addition, much of Kranzberg's research results were delivered in a verbal format. Series 3: LECTURESHIPS is divided into three subseries, and not only details lectures and speeches delivered by Melvin Kranzberg, but also those given by his colleagues, and those delivered at the National Endowment for the Humanities Summer Seminars for Professional Journalists, which he organized. Series 9: SPECIAL PROJECTS consists of materials relative to a number of projects of varying importance and duration, such as engineering and human values and ethics in an age of pervasive technology.

Arrangement

Collection is divided into nine series.

Series 1: Consultation and advisement, 1958-1987

Series 2: Correspondence, 1949-1988

Series 3: Lectureships and speeches, 1951-1988

Series 4: Biographical, 1934-1963

Series 5: Professional affiliations, 1961-1988

Series 6: Publications, 1942-1968

Series 7: Research subject files, 1940-1978

Series 8: Teaching and administration, 1947-1988

Series 9: Special projects, 1951-1980

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

Educators -- 1930-1990
Technology -- History -- 1930-1990
Technology -- Societies, etc. -- 1930-1990

Types of Materials:

Business records -- 20th century
Correspondence -- 1940-1990
Personal papers -- 20th century
Professional papers -- 20th century

Names:

Society for the History of Technology

Container Listing

Series 1: Consultation and Advise ment, 1958-1987

Scope and Contents: This series is divided into nine alphabetically arranged subseries that document Melvin Kranzberg's role as a consultant and advisor. As an internationally acclaimed historian with a broad range of interests and expertise, Kranzberg is often asked to advise various government committees and projects such as the National Research Council and the National Science Foundation as well as private institutions such as the Charles Babbage Institute and Hebrew University. These records not only show the scope of Kranzberg's knowledge but also the way this knowledge is developed through interaction with other professionals.

Subseries 1.1: Carter Library, 1974-1982

Scope and Contents: This subseries includes correspondence, memoranda, and newspaper and periodical clippings detailing Melvin Kranzberg's involvement in locating and developing the Jimmy Carter Presidential Library. Although President Carter announced that the library would be located in Georgia, he did not decide on the specific location. The Atlanta Academic Consortium and the Site Search folders cover the site debate and the competition that resulted between several colleges and universities. The Presidential Libraries and Museum folders include periodical clippings, brochures, and pamphlets from 1974 to 1977 concerning several other presidential libraries that might serve as a model for the Carter Library. In addition to correspondence and memoranda from 1976 to 1982, the remaining folders include correspondence concerning the Carter presidential campaign. Kranzberg helped organize a committee of scientists and engineers who supported President Carter, hoping that this interest and support would influence President Carter to chose the Georgia Institute of Technology as the site for his presidential library.

Box 1, Folder 1	Atlanta Academic Consortium for the Jimmy Carter Presidential Library, June 28, 1977 Meeting [January-October, 1977]
Box 1, Folder 1-2	Task Force Nominations,, 1982
Box 1, Folder 3	Carter Campaign, 1976-1977
Box 1, Folder 4-5	Carter Campaign Science Policy Task Force, 1976

Box 3, Folder 7	Library Program Supporters, 1977-1978
Box 3, Folder 8	Outside Supporters, 1977
Box 3, Folder 9	Distinguished Professor: Inaugural Lecture at Emory, September 15, 1982

Subseries 2.2: American Association for the Advancement of Science-Committee on Science Engineering & Public Policy, 1978-1982

Scope and Contents: This subseries includes information about the committee, which was charged to aid in examining questions of public policy affecting the advancement and utilization of scientific knowledge and to stimulate the study of such questions. It is composed of academicians, government officials, and representatives from the private sector, and represents a means whereby the scientific-technical community can interact with the public and with decision-makers.

COSEPP subcommittees are as follows: Academic Program and Policy Analysis (APPA), Federal R&D Budget, International Topics, Public-Private Sector Relationships in R&D, Science and Security, and State and Local Government.

Dr. Kranzberg served as Chairman of COESPP and APPA and prepared a paper for the AAAS Annual Meeting, Detroit, May 27, 1983 (the last material in this file) entitled "Social Responses To Advances In Manufacturing Technology: Some Historical Perspectives."

Annual Reports, Meetings, Symposiums, and related correspondence are included and arranged chronologically. Most of the information relates to COSEPP and APPA.

Box 4, Folder 1	MAS SPP, February 1978
Box 4, Folder 2	Science & Public Policy Mtg, March 31, 1978

Subseries 1.3: National Academy of Sciences, 1971-1979

Scope and Contents: Committee on the Survey of Materials Science and Engineering (COSMAT) contains correspondence, drafts, comments, and lists of members of COSMAT for the period Jan. 1971-November 9, 1978, in three boxes and twenty five folders, and is arranged chronologically.

In December 1970, the president of the National Academy of Sciences appointed COSMAT to prepare a summary report embracing both science and engineering in its coverage, centering on the relationship between the structure and properties of materials as a basis for their design, preparation, and utilization by all people. The report was prepared under the aegis of the Academy's Committee on Science and Public Policy (COSPUP). Materials science and engineering is not a single discipline. The composition of the committee included about half from nonacademic institutions, one economist, one historian of technology, and one geologist—none were specialists in materials research.

Division of Behavioral Science consists of 1 folder containing the program "Science and The Problems of Society" and eight papers given at the Annual Meeting May 19-20, 1972.

Innovation, 1978-1979 includes drafts that examine U.S. Government policies and practices that affect innovation as instructed by the National Research Council Committee on Technology. Although three investigations were begun, only two monographs are in this sub-subdivision. Each of these documents is stamped "Privileged."

Subseries 1.4: HASA Historical Advisory Committee, 1961-1987

Scope and Contents: In 1964 Kranzberg became a charter member of the NASA Historical Advisory Committee. He was appointed Chairman from 1966-68 and again in 1984. This subseries not only contains the report that created and defined the objectives of this committee, but it also follows its work from

1964-1987 The purpose of the HAG is to review and survey the NASA Historical Program and to advise the Administrator in order to ensure "effective historical relationships between NASA ... [and others] concerned with the history of space exploration and its impact."

In 1984, Kranzberg was also appointed to the NASA Advisory Council. Included are minutes, correspondence, and reports from the Council, 1984-87. The role of the Advisory Council is to synthesize the work of various NASA committees and to develop policy when this role "transcends the responsibilities of any one committee."

The remaining folders in this subseries detail specific NASA operations such as lunar initiatives, moon stations, summer workshops, intercity transportation, and research.

Subseries 1.5: National Endowment for the Humanities (Web), 1972-1983

Scope and Contents: General Files, 1972-1980 includes one box with five folders documenting the development of a newspaper series "Courses by Newspaper" and a TV Series "Connections" during the period of 1979-1981.

A grant from the National Endowment for the Humanities to "Courses by Newspaper," University Extension, University of California, San Diego, was used to develop Technology and Change (1979), a book edited by John G. Burke and Marshall C. Eakin.

Courses by Newspapers" (CBN) started September 9, 1979, and concurrently the BBC/Time-Life Television Series on PBS began September 30, 1979, narrated by James Burke. James Burke also wrote an accompanying book, Connections.

This subseries also includes drafts of Kranzberg's article "Assessing and Directing Technology," for "Courses By Newspaper," copies of lectures, letters from readers, WQED episodes, clippings (1972-78), and "Educational Packets."

Seminars and Proposals FNEH1, 1978-1983. The National Endowment sponsored seminars in 1978, 1979, and 1980 at Georgia Tech on the general subject of technology and democratic ideals. Requests for additional sponsorship for additional years are included in the box of seven folders related to this subject.

The month-long summer seminar of 1978 for journalists (members of professions outside the field of teaching) was "Machine-Made America: Technology and Democratic Ideals." The dominant theme was the interrelationship between technology and American history. Participants represented a diversity of experience, age, background, and were from all sections of the country. Included in the folders are application statements by participants, seminar evaluations, and performance reports.

The 1979 seminar concentrated on the historical relationship between technology and society in exploring answers to two main questions: To what extent has technology really served to democratize society? And how has society recently moved to democratize society? Facilities at Georgia Tech (including the nuclear reactor) and the General Motors Assembly Plant, Doraville, Ga., were visited.

The 1980 seminar examined the role that technology has played throughout American history, the extent to which technological innovations have helped to democratize American, and topics related to energy.

Correspondence and proposals for additional seminars are in the last three folders. Newspaper clippings, pamphlets, and brochures are in many of the files.

Subseries 1.6: National Science Foundation (NSF), 1958-1987

Scope and Contents: Advisory Plan of Division of Policy Research & Analysis (PRA), 1958-1985 is a division of the National Science Foundation (NSF). Material of this division is contained in five boxes and fifty-one folders in the sequence as received. Kranzberg's PRA records range from 1959 to 1981, and include correspondence related to specific topics, PRA plans, reports, and publications, along with "Country Papers for the NAS Symposium," 1976, mixed with material on technological innovation.

NSF's role in science policy is derived from legislative mandates which direct the NSF to provide analytic support to other agencies as well as to the President's Science Advisor and to assist and to coordinate with the Office of Technology Assessment of the U.S. Congress. Cost-effectiveness and fairness and equity are important considerations in the assessment of policy options.

Policy Research and Analysis (PRA) consists of four study groups and a Special Projects activity. The four study groups are Technology Assessment and Risk Analysis; Innovative Processes and Their Management; Socioeconomic Effects of Science and Technology; and Environment, Energy, and Resources. 6B; Innovation (The Flow of Scientific and Technical Information (STI) in the Innovation Process), 1961-1987 is contained in two boxes with twenty-two folders. This project was commissioned by the National Science Foundation R & D Assessment Program through the Georgia Institute of Technology ". . .to determine and critically assess the present knowledge and understanding of the innovation process." The material consists of correspondence, drafts, and reports by various academic institutions during the period 1973-1987.

Technology Assessment, 1978 is contained in five folders, and consists of verbatim records of everything spoken at two NSF Ad Hoc Advisory Task Force meetings on Technology Assessment. The Chairman was a political economist and the eight panel members had varied backgrounds such as physicist, history professor, industrial engineer, and economist.

The first meeting was held August 6, 1978, and the second was held on August 7, 1978. After the first meeting the consensus was that technology assessment could be considered a subfield of the broader field of policy analysis. The aspect of risk was discussed at length.

Ethical and Human Value Implications of Science and Technology (EHVIST), 1973-1975 consists of five folders, the first containing Important Notice #48 of the NFS dated Feb. 20, 1973, which is directed to presidents of universities and colleges and directors of nonprofit organizations. Proposals may be submitted to either the NEH or to the NSF. Such proposals will have as their primary object the illumination of areas of current concern about ethical or human values, or which have a strong collateral potential for making a scholarly contribution in such areas. Four folders have proposals and the sixth folder contains correspondence and reviewer guidelines for EHVIST proposals.

Subseries 1.7: U.S. House of Representatives and the National Academy of Science on Technology of Science, 1967-1977

Scope and Contents: This subseries contains alphabetically arranged material reflecting Kranzberg's consulting and advising activities dealing with technology assessment from 1967 to 1977. From 1967-69, Kranzberg served as an appointed member to the Technology Assessment Panel of the National Academy of Sciences. As a result of his appointment to this special government committee and his continued interest in Technology Assessment, he also appeared before Congressional subcommittees as a policy advisor.

Besides one box of general information on technology assessment (1968-1969), this subseries also includes agenda, reports, memoranda, correspondence, and publications outlining the activities of the NAS Technology Assessment Panel and several folders dealing with the House Subcommittee on Science, Research, and Development and its 1967 Seminar on Technology Assessment. Also included are copies of Kranzberg's 1977 speech delivered to the Subcommittee on Science, Research, and Technology.

While most of this subseries deals with Kranzberg's consultations to governmental institutions like the National Academy of Science, the U.S. House of Representatives and the U.S. Army, there is also limited information documenting Kranzberg's consulting work with private institutions (Cornell University, for example).

Subseries 1.8: U.S. Bicentennial Committee, 1972-1978

Scope and Contents: The United States of America's celebration of the Bicentennial was developed by the "American Revolution Bicentennial Administration" (AREA) along with state organizations such as the "Georgia Committee for the National Bicentennial Celebration" (GCNBC), and within states by various groups or committees like the "Georgia Tech Bicentennial Committee" (GTBC).

GTBC 1972-1978 material includes Committee membership listing of faculty and student members, Committee reports, forms and requests for funds from federal, state, and Georgia Tech sources.

Smithsonian Bicentennial Advisory Committee, 1973-1974 contains information on the Bicentennial Project on American Science and Technology, Advisory Committee of the National Museum of History and Technology, sponsored by the National Science Foundation, and administered by the Smithsonian Institution.

Subseries 1.9: U.S. Department of Commerce, Domestic Policy Review, 1978-1979

Scope and Contents: This subseries includes reports of the Advisory Subcommittees (of the Advisory Committee on Industrial Innovation) on Economic and Trade Policy; Environmental, Health and Safety Regulations; Patent and Information Policy; and Regulation of Industry Structure and Competition are included along with draft reports on aspects of Innovation (such as Industrial Innovation and Small Innovative Business).

Final drafts of review essays on the Draft Report submitted by the Academic Advisory Subcommittee on Economic and Trade Policy (ASEP) on Industrial Innovation are part of the material.

Subseries 1.10: United Nations Economic and Social Council (UNESCO Committee for a History of the Scientific and Cultural Development of Mankind), 1961-1965

Scope and Contents: United Nations Economic and Social Council (UNESCO Committee for a History of the Scientific and Cultural Development of Mankind) was constituted in 1952 under the auspices of UNESCO. The task of the Commission was the preparation of a history of the scientific and cultural development of mankind. Work on this history began in 1952.

Historians of international repute were selected to write six volumes. In 1953 the Commission published a quarterly trilingual periodical, the Journal of World History. After 1957, preliminary texts were available and scholars in every member state of UNESCO were asked to read manuscripts and make suggestions for revision. The administrative work was delegated to a Secretariat with headquarters in Paris. A list of members of the Commission, author-editors, and the editorial secretary of the Journal of World History is in Folder 2.

Dr. Melvin Kranzberg's 1963 contract with the Commission was to rewrite or make suggestions of Part II, Chapters I to VIII of Volume V. Letters relating to this contract and the contract are included along with his comments and related footnotes, and Volume V, Part II, Technical Developments, Chapters VII and VIII, 1959, by Charles Moraze. 15

Series 2: Correspondence, 1949-1988

Scope and Contents: This series is arranged alphabetically and contains much of Dr. Kranzberg's correspondence during the years 1949 to 1988. The bulk of it is work-related, although there are some personal letters. Dr. Kranzberg generated a tremendous amount of correspondence on many different topics. He was active in a number of academic societies, aside from SHOT. In fact, he was instrumental in arranging conferences for some of these organizations. This task required correspondence, and Kranzberg seems to have kept most of it. Organizations Kranzberg was involved with over the years include: the American Association for the Advancement of Science; the American Institute of Chemical Engineers; the American Society for Engineering Education; the International Congress on the History of Science; and the Society for the History of Technology. Kranzberg was also involved with other organizations in different ways. He was everything from a regular member to a keynote speaker, and there is correspondence detailing his participation in all these roles.

Kranzberg's correspondence contains much more than letters to academic societies. He was respected as an expert in his field, and was hired as a consultant many times. Kranzberg also wrote a textbook and several encyclopedia articles, and there is information on these aspects of his life. Finally, the bulk of correspondence is between Kranzberg and various individuals. The subjects represented range from business to academic to personal. Kranzberg seems to have saved most of his letters and the result is a thorough record of this period of his life.

Series 3: Lectureships and Speeches, 1951-1988

Subseries 3.1: Lectures and Seminars, 1951-1986

Scope and Contents: This subseries documents many of the speeches given by Melvin Kranzberg at various conferences and seminars between 1952 and 1986. It contains correspondence, meeting summaries, conference bulletins, drafts of speeches, transcripts and notecards, expense reports, press releases and lecture material. These speeches, arranged chronologically, cover a myriad of topics such as "Napoleon III's Liberalization of the Second Empire (1953)," "Israel and U.S. Foreign Policy (1957)," "The French Dilemma (1958)," and "The International Transfer of Industrial Technology (1986)."

Box 223, Folder 1	Western Europe Today, after 1945
Box 223, Folder 2	Franklin County Teachers' Association: "Why Western Europe Fears America"("How Popular Is The U.S. In Western Europe"), October 1951
Box 223, Folder 3	Napoleon III's "Liberalization of the 2nd Empire," AHA (American Historical Association) Speech, 1953
Box 223, Folder 4	American Council of Education Meeting, 1954
Box 223, Folder 5	Summer Institute on the History of Science, 1956-1957
Box 223, Folder 6	Speech to Hillel: Israel & U.S. Foreign Policy, 1957
Box 223, Folder 7	French Dilemma Speech, 1958

Box 223, Folder 10	The History of Technology, Voice of America (VOA) (25 - 27 min), June, 1962
Box 223, Folder 11	History of Science for Non-Scientists, 1962
Box 223, Folder 12	Engineering Foundation Research Conferences, Andover, NH, August 5-9, 1963
Box 223, Folder 13	AAES [American Association of Engineering Societies] Talk, 1983
Box 223, Folder 14	NAE [National Academy of Engineering] Speech, 1984
Box 223, Folder 15	Dresden Correspondence: ICOHTEC [International Committee on the History of Technology] Symposium, 1986
Box 223, Folder 16	[Conference on Modernization and Technological Innovation], 1986

Subseries 3.2: Speeches, 1951-1988

Scope and Contents: This subseries contains records of Dr. Kranzberg's participation in seminars, with copies of formal speeches and notes for informal talks. In many cases several drafts of major speeches are available. For a few, handwritten notes or drafts are included. Relevant news items, journal articles and correspondence are filed with the speech. Box 4 contains several speeches Dr. Kranzberg endeavored to keep updated for further use.

[Return to Table of Contents](#)

Series 4: Personal Activities (Biographical), 1934-1968

Subseries 4.1: Early Education, 1934-1948

Scope and Contents: This subseries centers around Kranzberg's undergraduate education at Amherst College in Massachusetts (1934-38). These files contain notes, exams, quizzes, and assignments from his early education and suggest some of the influences he must have drawn from later, as an educator himself. This fact is made poignantly clear when one compares the similar contents and style of Kranzberg's student file on History I with the file he compiled on this course when teaching it a decade later. (See series 10).

Box 238, Folder 1 History I, 1934-1935

Box 238, Folder 2 Philosophy, 1935-1936

Box 238, Folder 3 Political Science, 1936-1937

Box 238, Folder 4 Fine Arts I, 1937-1938

Box 238, Folder 5 History 5 (World War I) and History 14 (Near East 1937-1938)

Box 239, Folder 1 Moseley Religion Prize Essay "Helvitius and Holbach", 1938

Box 239, Folder 2 The Genesis of the Civil Constitution of the Clergy, 1939

Box 239, Folder 3 History 22A Paper "William of Nogaret", 1939

Box 239, Folder 4 Old History Exams, 1939-1942

Box 239, Folder 5 While Paris Burns, 1948

4.2: Other, 1950-1968

Notes: This subseries contains two folders of personal correspondence, 1952-60, which contain inquiries from friends seeking employment. Many letters congratulate Kranzberg for a good speech, a well-written paper, or some other academic success. Still others are a miscellaneous gathering of personal letters from colleagues, informational letters, thank-you notes, and invitations.

One folder contains personal documents like the fire insurance policy on his wife's fur coat. Another folder contains publicity items detailing Kranzberg's achievements in the field of history. Included are press releases on Kranzberg publications, clippings on his appointments to various organizations such as Sigma XI and the NASA Advisory Board, and schedules and programs from groups he addressed. Most of the information in this series shows the daily activities that helped Kranzberg develop into an educator and historian.

Box 240, Folder 1	Jobs, 1950-1952
Box 240, Folder 2-3	Correspondence, 1950-1960
Box 240, Folder 4	Personal, 1952
Box 240, Folder 5	Personal Publicity, 1959-1968
Box 433	Interview with Mel Kranzberg, 1988-08-29 1 Cassette tape Notes: Interview conducted by Robert Post in Washington, DC.

Series 5: Professional Affiliations, 1974-1980

Subseries 5.1: American Association for the Advancement of Science (AAAS), 1974-1980

Scope and Contents: This subseries contains general Files contains AAAS fellow nominations (1979-80), the AAAS manual of procedures and minutes from Section L (The History and Philosophy of Science). Although Kranzberg was Chairman of Section L in 1966 as well as 1979, this subseries contains only the correspondence, agenda, reports, and publications from 1979-1980.

Box 241, Folder 1A	General Files, 1979-1980
Box 241, Folder 1	Fellow Nominations, 1979-1980

Subseries 5.2: International Cooperation on History of Technology Committee (ICOHTEC), 1961-1988

Scope and Contents: This subseries includes information about the basic objective of the AAAS: to increase the public understanding of science. Ethical problems and conflicts generated by scientific and technological developments as they affect both the scientific community and the larger society is a dominant theme.

Included are correspondence, agendas, lists of participants, evaluations of speakers and their topics, and some related paper and reference material of meetings, workshops, and conferences.

Subseries 5.3: SIGMA XI, 1970-1988

Scope and Contents: This subseries contains minutes, correspondence, committee reports, and meeting programs that profile Melvin Kranzberg's involvement with Sigma Xi, a scientific research society, from 1970 to 1988. Kranzberg was on the Board of Directors from 1971-77, the President from 1979-80, and on various committees throughout. The first box includes administrative records from the National Headquarters office detailing new member installations, new chapters of Sigma Xi, the need for a Sigma Xi International, and reports from the Committee on Awards. Boxes two through six contain minutes, reports, and schedules from annual national meetings and and board of director meetings from 1971 to 1984. Boxes seven through nine detail Kranzberg's committee work dealing with archives, executive board, long-range planning, membership, nominations, and resolutions.

In addition to administrative files, this subseries includes records of conferences and lectures given or attended by Kranzberg and his peers. Included are copies of lectures and Sigma Xi lecture tour schedules from 1972 to 1978. While Sigma Xi distributed many of its findings at lectures and conferences, correspondence and articles located in box twelve show that it also encouraged its members to seek publication in periodicals such as *American Scientist* and *Science and Society*.

The remaining two boxes include folders on officer searches, Sigma Xi general files (constitutional amendments, manuals of procedure, and Sigma Xi history) and various memoranda, reports, and minutes from meetings of preparation for Sigma Xi's Centennial in 1986. This Centennial observance included a special commemorative meeting, lecture tour, *American Scientist* theme issue, and the compilation of a history of Sigma Xi.

5.4: Miscellaneous Organizations, 1954-1961

Notes:

This subseries contains materials related to Kranzberg's professional affiliations that have minimal representation in his papers. This subseries includes records collected during Kranzberg's Chairmanship of the American Association for Engineering (ASEE), Education Humanistic-Social Division, 1956-1958. It also contains one folder on "The History of Science Society," 1956-1961, and one on "The Society for French Historical Studies," 1958-1959.

Series 6: Publications, 1942-1986

Subseries 6.1: "By The Sweat of Thy Brow.", 1972-1986

Scope and Contents: This subseries consists primarily of several stages of the draft manuscript for this book. The book was coauthored by Melvin Kranzberg and Joseph Gies, and was published by G.P. Putnam's Sons in 1975. The working title had been "Men, Women and Work in the Western World." The papers also include correspondence, partial records of royalties, reviews, galley proofs and the publisher's agreement with the authors. The several drafts of the manuscript are filed chronologically from the original outline to the edited copy returned by the publisher.

Subseries 6.2: The Development of Western Civilization (unpublished), 1953-1968

Scope and Contents: This subseries consists of thirteen boxes of administrative and planning records as well as draft manuscripts of this two-volume textbook. Kranzberg began the project in 1953 and was joined in 1955 by D. Harvey Buchannan and Dirk Jellema. Although the three authors signed an authors' agreement and publishing contract with Macmillan Publishing Company in 1955, in 1968 Macmillan decided not to publish the book, citing severe structural and stylistic deficiencies. Although the work was not published, Macmillan did commend the authors for their "excellent" incorporation of science and technology into the history of the Western World.

Administration and Planning, 1953-1968 contains two boxes of chronologically arranged information on the administrative and planning aspects of the book. Included are early drafts of the project, tables of contents, illustrations, maps, correspondence between the authors, Macmillan contracts, and the notice of contract termination.

Draft Manuscripts, 1953-1968 consists of eleven boxes of the textbook manuscript as it appeared in different stages of writing and editing. These are arranged by chapter.

Box 283, Folder 1-2	Administration and Planning Draft Manuscripts Pre-Macmillan Contract: Greek Civilization, circa 1953
Box 283, Folder 3-4	The Nineteenth Century, circa 1953
Box 283, Folder 5-6	Textbook Correspondence and Memoranda 1953-1956
Box 284, Folder 1	Macmillan Correspondence, 1953-1967
Box 284, Folder 2	Macmillan: Contract and Author's Agreement, 1955 & 1965
Box 284, Folder 3	Jellema Dirk: Correspondence, 1955-1967
Box 284, Folder 4	[Miscellaneous Newsclippings], 1957-1967
Box 284, Folder 5	Organization and Table of Contents, 1961-1963
Box 284, Folder 6	Illustrations, 1966
Box 284, Folder 7	[Macmillan: Contract Termination], 1968
Box 284, Folder 8-36	Maps: Ch. 3-7; 9-10; 12-24; 27-28; 34; 36; 38-43, undated

Subseries 6.4: American Scientist Centennial History SIGMA XI, 1985-1986

Scope and Contents:	This subseries contains the manuscripts, sometimes in several drafts, of papers published in the September-October 1986 issue of the American Scientist. This issue celebrated the one-hundredth anniversary of Sigma Xi, a scientific society. Melvin Kranzberg was guest editor for this edition of the journal, working with Michelle Press and the regular staff of American Scientist. Many of the papers were given orally on April 16, 1986 at the Sigma Xi Centennial celebration at Cornell University, where Sigma Xi was founded. They were later edited by Mr. Kranzberg for publication. The material is filed alphabetically by author, together with correspondence relating to it.

Subseries 6.5: Technology and Culture Anthology, 1969-1984

Scope and Contents: This subseries contains correspondence between the authors of essays originally published in *Technology and Culture*, the quarterly journal of the Society for the History of Technology for which Mr. Kranzberg was editor-in-chief. Among the authors are Lewis Mumford, Aldous Huxley, Peter Drucker, and Robert Heilbroner. The anthology was a project undertaken by Mr. Kranzberg and William C. Davenport of the Harvey Mudd College, Claremont, California. It was published by Shocken Publishers, in September 1972 under a contract with the New American Library. In addition to correspondence, there are a few book reviews, and partial royalty records.

Box 299, Folder 1	Correspondence Melvin Kranzberg - William Davenport, December 4, 1969 - December 15 1970

Box 300, Folder 6	Part V, undated

Subseries 6.6: Technology in Western Civilization, January 25. 1963-March 11. 1980

Scope and Contents: This subseries consists of twelve boxes of papers relating to the planning, editing and publication of this two-volume textbook that was published by the Oxford University Press in 1967. The book was designed as a textbook for a one-year course offered by the United States Institute of the Armed Forces and also for freshman or sophomore level courses at universities throughout the country. Authors distinguished in various aspects of the history of technology were requested to prepare specific chapters which then were edited by Melvin Kranzberg and Carroll W. Pursell, Jr. Paul J. Grogan and Donald F. Kaiser were executive editors.

Box number one and several folders in box number two contain materials and correspondence chronologically arranged, that relate to the planning of the project, the initial correspondence with authors, correspondence among editors and correspondence with the Oxford University Press.

Correspondence with authors and between editors relating to specific chapters has been filed with the text manuscript of each chapter along with different versions of the chapter as it went through the several stages of writing and editing. In a few instances where an editor's statement about an author is very critical, the letter is not in chronological order but in the front of the folder. These are flagged in the container list by an "R" after the folder heading.

There are six boxes containing manuscript in various stages and correspondence relating to each of the 45 chapters in volume I and four boxes of manuscript and correspondence relating to the 45 chapters in Volume II. Occasionally there are differences between the table of contents in the book and the container list. For example, in volume I chapter 33, "Domestic Life and Habits" became "Effects of Technology on Domestic Life, 1830-1880" in the publication and chapter 34 became chapter 35 and vice versa.

Box number twelve contains materials relating to the translation into Japanese of chapters 43 and 45.

Box 301, Folder 1	United States Armed Forces Institute (USAFI) proposal for course on the impact of technology, 1963-1964
Box 301, Folder 2	Background conferences and correspondence

Subseries 6.9: Other Publications: Science Technology Society. Ethics and Human Values, 1961-1979

Scope and Contents: This subseries contains drafts, manuscripts, and publications defining the elements of science, technology, society, ethics and human values. Wide-ranging topics include habitat, human reproduction, bioethics, DNA, genetic engineering, medicine, experiments and research with humans, chemicals as a regulated industry, moral responsibility, public conceptions of science, and recommendations of the Commission on Government Procurement. Photocopies of reference material are in several folders.

Subseries 6.10: Publishing Houses Correspondence, 1942-1978

Scope and Contents: This subseries consists of letters concerning mainly the Pergamon Press. The other two publishing houses are the Barrons Educational Series, Inc. (the agreement with Professor Melvin Kranzberg and Dr. John Barden), and the Rockefeller University Press (a letter with reference to a paper by Dr. Kranzberg titled "Historical Perspectives in Energy").

Two manuscripts by Dr. Kranzberg submitted for publication in the early 1940s are included, along with one entitled "A History of Vacuum Tubes," by Gerald F. J. Tyne. "Guide to Authors" and "Recommendations to Authors" by Pergamon Press are in folder 19.

Series 7: Research Subject Files, 1940-1978

Scope and Contents: This series is arranged alphabetically and contains documents detailing nearly forty years of research by Kranzberg on hundreds of diverse topics. This series contains lecture transcripts, drafts, papers, newsclippings, book reviews, brochures, encyclopedia entries, newsletters, notes, outlines, pamphlets, reports, television transcripts and other published materials. Included are folders on various countries and continents, eras (such as "The End of Imperialism," or "Evolution of Modern Russia"), philosophies ("Judaism and Democracy," "Technology the Civilizer"), and attitudes toward science, history, religion, technology, philosophy, and politics. Many of these research subjects reappear in Melvin Kranzberg's writings and lectures.

Series 8: Teaching and Administration, 1947-1988

Scope and Contents: This series is comprised of teaching and administrative files compiled by Melvin Kranzberg during his forty years as a college professor. He began as a student teacher for the History Department of Amherst College in 1941. After a four-year hiatus from teaching, Kranzberg became an instructor and a tutor for Harvard University's Division of History, Government, and Economics (1946) and then an instructor for the Department of Humanities of Stevens Institute of Technology (1946-47). In 1947, he returned to Amherst as an assistant professor of History. Between 1952 and 1958 he taught at Case Institute of Technology, first as an assistant professor with the Department of Social Studies, then later as an associate professor with the Department of History. When Case Institute merged with Western Reserve University in 1958, Kranzberg became a full professor for the History Department of the newly formed Case Western Reserve University. In 1972, he became the Callaway Professor of the History of Technology at Georgia Institute of Technology, where he remained until his retirement in 1988. This series illustrates Kranzberg's colorful but pragmatic approach to teaching.

Subseries 8.1: General Teaching Files, 1947-1981

Scope and Contents: This subseries includes teaching materials, learning aids, exams, quizzes, notes, correspondence, daily assignments, and administrative papers from 1937-70. This subseries is arranged alphabetically by college or university and then by class or committee.

Subseries 8.2: Georgia Tech Files, 1963-1988

Scope and Contents: This subseries includes a wide range of Kranzberg's activities as a faculty member in addition to his routine teaching duties. Such activities included contacts with individual students and participation in various Institute programs, such as fund raising, faculty committees, public relations, and recruitment of new faculty members. Kranzberg often participated as a public speaker in Institute functions and represented the Institute on inter collegiate committees. Consequently there is a large volume of correspondence relating to these activities as well as speech drafts and agendas of prospective meetings.

Series 9: Special Projects, 1951-1959; 1971-1980

Scope and Contents: This series consists of materials related to a number of projects of varying importance and duration. Several relate to curriculum development in the area of engineering and human values, several are research grant proposals that never got beyond the proposal stage. Box 5 and much of Box 6 contain papers relating to a Symposium on Ethics in an Age of Pervasive Technology held in Haifa and Jerusalem December 21-25, 1974. Mr. Kranzberg took an active part in these meetings and later arranged for the resultant publication.

Series 10: Kranzberg Final Papers, 1944-1995

Scope and Contents: This subseries includes material transferred to NMAH after Mr. Kranzberg's death in late 1995. It consists partly of correspondence 1969-1995, meeting reports and references to earlier projects; but also, in the most recent years, numerous notes and clippings from newspapers and other publications relating to Mr. Kranzberg's personal interests in the general area of applied science and technology.

Box 360	Correspondence, 1966-1995
Box 361	Correspondence draft papers, 1969-1994
