## Biographical / Historical

Charles W. Trigg (1898-1989) was born in Baltimore, Maryland. he graduated from the Baltimore Polytechnic Institute(1914); B.S., Chemical Engineering, University of Pittsburgh (1917); and a M.A., University of Southern California (1931). He was an Industrial Research Fellow at Mellon Institute, Pittsburgh, 1916-1920,

doing original research on processes for producing instant coffee. In 1920, he joined King Coffee Products Corporation, Detroit, as chief chemist. He later served in various college teaching positions; dean of instruction and lecturer, University of Southern California (1950-1963). During World War II, Trigg served as Lt. Cmdr., USNR. He published numerous articles in trade journals, was granted five patents related to coffee processing and was book review editor of the *Journal of Recreational Mathematics*. Trigg was considered one of the foremost recreational mathematicians of the twentieth century.

## Scope and Contents

Most material in this collection was generated by Trigg early in his career as an industrial research fellow at Mellon Institute, Pittsburgh, 1916-1920. It includes laboratory notebooks; formal weekly reports (typewritten) on his investigations; correspondence with his industrial sponsors; a few personal letters and some correspondence relating to his interest in coffee processing; his patents and correspondence relating to them; clippings and reprints of technical articles on tea and coffee processing and culture, 1883-1963; U.S. patents relating to these subjects, 1834-1921; foreign patents--British, French and German--1855-1918. Pamphlets contain technical articles on coffee and related subjects, including U.S. Department of Agriculture and Canadian government publications. Trigg's personal file of more than 5000 4" x 6" cards (mainly hand-written, arranged chronologically) reflect his extensive reading of technical literature; they contain bibliographical data and Trigg's brief abstractions.

## Container Listing

### Series 1: C.W. Trigg Work at Mellon Institute, 1916 - 1920

Scope and Contents: Triggs laboratory notebooks document his work as a Mellon Institute fellow. The notebooks are bound, paginated, dated and in some instances witnessed with signatures. They contain detailed descriptions, calculations, sketches, testing data, and bibliographic and patent data related to his work on coffee technology, especially soluble coffee. Trigg studied the difference in coffees, examining aromas, roasting conditions, flavor, and the removal process of caffeine from coffee
