Collection Overview

Repository: Archives Center, National Museum of American History
Title: Computer World Smithsonian Awards
Date: 1989-2000
Identifier: NMAH.AC.0425
Creator: Smithsonian Institution
Computerworld Magazine.
Extent: 145 Cubic feet (341 document boxes)
Language: English.
Summary: Collection documents an awards program established in 1989 as a partnership between Computerworld Magazine and the Smithsonian Institution. The Computer World Smithsonian Awards (CWSA) brought together the Chairmen of Chief Executive Officers of the world’s foremost information technology companies with the world’s leading universities, libraries and research institutions to document a revolution in progress—the global information technology revolution. The program identified men, women, organizations and institutions leading the technology revolution and asked them to contribute case studies. Collection consists of case studies which include questionnaires, essays, oral histories, conference proceedings, publications, video tapes, photographs, slides, software, and product samples about each project.

Administrative Information

Acquisition Information
Division of the History of Technology

Provenance
Transferred to the Archives Center from the Division of Information, Technology and Society (now Division of Medicine and Science), May 11, 1992.

Related Materials
The Division Information, Technology and Society (now Division of Medicine and Science) holds significant artifacts included with the nomination packets.

Processing Information
Processed by NMAH Staff.
Preferred Citation

The Computer World Smithsonian Awards, Archives Center, National Museum of American History

Restrictions

Collection is open for research but is stored off-site and special arrangements must be made to work with it. Contact the Archives Center for information at archivescenter@si.edu or 202-633-3270.

Conditions Governing Use

Copyright held by donor and/or heirs. Collection items available for reproduction, but the Archives Center makes no guarantees concerning copyright restrictions. Reproduction permission from Archives Center: fees for commercial use.

Accruals

Each year, a new case studies were added to the collection, with each year's worth of material being designated as a separate series. Since 2001, when the Smithsonian decided to end its affiliation with the CWSA program, no further case studies or artifacts have been collected.

Biographical / Historical

Established in 1989 as a partnership between Computerworld Magazine and the Smithsonian Institution, the Computer World Smithsonian Awards (CWSA) Program brought together the Chairmen or Chief Executive Officers of the world's foremost information technology companies with the world's leading universities, libraries and research institutions to document a revolution in progress: the global information technology revolution.

The awards program was dedicated to identifying the men and women, organizations and institutions, that were leading this revolution and to recording the impact of their achievements on society. The first awards were presented in 1991 during a ceremony at NMAH. According to that year's press release, the CWSA awards were created to "recognize heroes of technological innovation, to demystify public perceptions of technology and to clearly identify the benefits technology brings to the lives of the general public."

Over the course of each year, members of the Chairmen's Committee would identify those organizations whose use of information technology had been especially noteworthy for the originality of its conception, the breadth of its vision, and the significance of its benefit to society. Those organizations were asked to contribute a case study regarding their project to the CWSA collection, which was to be housed at the Smithsonian's NMAH. Nominated projects were sorted into ten categories and winners were selected by a panel of distinguished representatives in each specialty. The first year's categories were: business and related services; education and academia; environment, education and agriculture; finance, insurance and real estate; government and non-profit organizations; manufacturing; media, arts and entertainment; medicine and health care; and transportation. The categories changed slightly over the years as the process was refined.

In 2001, the Smithsonian decided to sever its affiliation with the CWSA program. The program continued under the sole auspices of Computerworld magazine, without any Smithsonian connection. New case studies now "become part of the broader, worldwide collection, archived on the world wide web and also presented, in a variety of formats, to archives, museums, universities and libraries in each of the more than 40 countries on six continents represented by the award winners," according to their website (http://www.cwheroes.org/home.asp).
Scope and Contents

An important part of the award process was that nominees actively created the permanent record of their work, for inclusion in the permanent CWSA archives at the Smithsonian. Strict guidelines were set up to ensure that a complete record was created. Each nomination had to be in the form of a packet of primary source materials about the project. Nominees were instructed on the types of materials to include and were required to answer a standard questionnaire and write an essay about the significance of the project. As a result, each case study includes a wealth of information about the project, including oral histories, conference proceedings, publications, video tapes, photographs and slides, software, examples of the product generated, and other records, as well as the standardized information required by the program. The collection is arranged into thirteen series chronologically.

Arrangement

Collection is arranged into thirteen series.

- Series 1, General
- Series 2, 1989
- Series 3, 1990
- Series 4, 1991
- Series 5, 1992
- Series 6, 1993
- Series 7, 1994
- Series 8, 1995
- Series 9, 1996
- Series 10, 1997
- Series 11, 1998
- Series 12, 1999
- Series 13, 2000

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

- Computers

Types of Materials:

- Essays
- Interviews -- 1980-2000
- Questionnaires
- Software
- Videotapes -- 1980-1990
- Videotapes -- 1990-2000

Names:

- National Museum of American History (U.S.), Division of Computers, Information and Society
