Biographical / Historical

Sally Fox began growing brown cotton in 1982 and experimented with crossbreeding it. By 1985, some of Fox's plants growing from cross-pollinated seeds produced green cotton as well as brown. These naturally colored cottons were brought to the marketplace in 1989, when Fox established her company, Natural Cotton Colours, Inc., in Arizona. FoxFibre is the registered trademark of her naturally colored cotton. Fox developed several different types and colors of cotton--pink, yellow, lavender, brown, green, and red. Crossbreeding two types, reddish-brown Coyote and traditional white Pima produces the bronze brown Buffalo FoxFibre. The six varieties of FoxFibre include three browns: Coyote (reddish), Buffalo (mocha), and New Brown; and three greens: Green FoxFibre, Palo Verde (sage), and New Green. FoxFibre is naturally colored, so there is need to bleach or dye the fabric. The Coyote and Buffalo FoxFibre are naturally flame resistant. FoxFibre is environmentally friendly because it is grown organically, without the use of chemical pesticides.

Scope and Contents

This collection contains 5 1/2 hours of footage documenting Sally Fox, an inventor of a commercially spinnable naturally colored cotton. This video was created on November 14, 1997.

Arrangement

The collection is divided into four series.

Series 1: Original Videos, 1997

Series 2: Master Videos, 1997

Series 3: Reference Videos, 1997

Series 4: Photographs, 1997
