Collection Overview

Repository:	Archives Center, National Museum of American History
Title:	Sterling Drug, Inc. Records
Date:	1867-1993
Identifier:	NMAH.AC.0772
Creator:	Sterling Drug, Inc. (Creator) Winthrop Chemical Company Bayer Company
Source:	History Factory (Chantilly, Virginia) (Donor)
Extent:	120 Cubic feet (261 boxes, 16 map-folders)
Language:	Some materials in Arabic, Bengali (Bangla), Chinese, Dutch, French, German, Greek, Hungarian, Japanese, Norwegian, Polish, Portuguese, Romanian, Russian, Spanish, Swedish, Turkish, and Yiddish.
Digital Content:	Image(s): Sterling Drug, Inc. Records

Administrative Information

Immediate Source of Acquisition

Collection donated to the Archives Center by the History Factory through Bruce Weindruch (President and CEO), in 2001.

Provenance

In 1991 Sterling Drug retained the History Factory, a for-profit, private company that appraises, processes, manages, stores, and moves archival collections. History Factory processed and provided reference access to the collection until Sterling Drug's divestiture in 1995. The History Factory contacted the companies (Bayer Corporation, Sanofi Pharmaceuticals, Inc., Nycomed, Inc., Bristol Myers Squibb Company, and SmithKline Beecham) about their ownership of materials within the Sterling Drug, Inc. Collection and received disposition rights. The History Factory donated the archival collection to the Archives Center in 2001 and related artifacts to the Division of Science, Medicine and Society.

Restrictions on Access

Collection is open for research but is stored off-site and special arrangements must be made to work with it. Contact the Archives Center for information at archivescenter@si.edu or 202-633-3270.

Terms Governing Use and Reproduction

Collection items available for reproduction, but the Archives Center makes no guarantees concerning copyright restrictions. Other intellectual property rights may apply. Archives Center cost-recovery and use fees may apply when requesting reproductions.

Historical

Sterling Drug was founded in Wheeling, West Virginia in 1901 by two childhood friends, William E. Weiss and Albert H. Diebold, to manufacture and sell a pain-relieving preparation called "Neuralgine." The company's original name was Neuralgyline. Within a few years, Weiss and Diebold realized that expansion required more product lines and that this would be best obtained by acquisition. This policy continued throughout the life of the organization. At least 130 companies were acquired directly or indirectly between 1902 and 1986. In 1913, Weiss and Diebold established intangible assets (trademarks, patents, and copyrights) and tangible assets (offices and plants). By 1914, the company set-up proprietary agencies for overseas trading. Weiss and Diebold changed the name of the company in 1917 from Neuralgyline, which was difficult to say, to Sterling Products.

Sterling Products benefited from World War I. Because supplies of drugs from Germany were cutoff by the Allied blockade, they established the Winthrop Company to manufacture the active ingredients. After the war, Sterling acquired the American Bayer Company in December 1918. They established a separate subsidiary, the Bayer Company, to market Bayer Aspirin. During the 1930s, Winthrop made Sterling a leader in the pharmaceutical field with such renowned products as Luminal, the original phenobarbital; Salvarsan and Neo-Salvarsan, the first effective drugs in the treatment of syphilis; Prontosil, the first of the sulfa drugs; and Atabrine, the synthetic antimalarial that replaced quinine during World War II. The company expanded overseas in 1938, and eventually operated about seventy plants in about forty countries. Sterling was especially profitable in Latin America. By 1942, the use of Sterling Products as a name was confusing and could not be licensed to conduct business in some states. Therefore, the company namechanged to Sterling Drug, Inc.

In 1988, in order to avoid a hostile takeover by Hoffmann-LaRoche, Sterling became a division of Eastman Kodak and remained one until 1994 when Kodak disposed of its health-related businesses. This left Sterling broken up with Sanofi purchasing Sterling's ethical business; Nycomed of Norway purchasing the diagnostic imaging; and SmithKline Beecham purchasing the worldwide over-the counter pharmaceutical business.

Source

Collins, Joseph C. and John R. Gwilt. "The Life Cycle of Sterling Drug, Inc." *Bulletin for the History of Chemistry*, Volume 25, Number 1, 2000.

Scope and Contents

The collection contains domestic and foreign advertising for both pharmaceutical and consumer health care products; sales and marketing materials for pharmaceuticals aimed at physicians, such as brochures, package inserts, reports, catalogs, price lists, manuals; the company's business and administrative papers, including annual reports, news releases, clippings, newsletters and publications, financial and corporate files, histories, and photographs.

Arrangement

The collection is divided into four series. In most instances, original folder titles were retained. In circumstances where there was no folder title, the processing archivist created one derived from the nature of the materials. The contents of some folders were combined.

Series 1: Products, 1946-1948

Series 2: Advertising, 1902-1984

Series 3: Sales and Marketing, 1881-1979

Series 4: Corporate, 1896-1993

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

- Analgesics
- Anesthesia
- Antibiotics
- Barbiturates
- Medicine
- Pharmaceutical industry
- advertising

Types of Materials:

- Advertisements -- 20th century
- Brochures
- Business records -- 20th century
- Catalogs
- Clippings
- Financial records
- Manuals
- Newsletters -- 20th century
- Photographs -- 20th century
- Press releases
- Price lists

Names:

- Eastman Kodak Co.

History Factory (Chantilly, Virginia)

Container Listing

Series 1: Products, 1946-1948

Scope and Contents: This series consists of packaging, labels, photographs, and negatives for products produced by or for Sterling Drug Inc. Many of the companies represented in this series were acquired by Sterling Drug, Inc.

The pharmaceuticals represented include analgesic, bronchial and decongestant, astrigent, hypnotic and anesthetic products. Also included are vitamin compounds, anti-bacterial products, disease treatment products, women's medicines, veterinary products, pain relivers, dental needs, cold medicines, bulk chemicals, food additives, paint and waterproofing products and household products.

The materials are arranged alphabetically by product.

Subseries 1.1: Pharmaceutical Products, 1946-1948

Scope and Contents: When the United States entered World I, the Alien Property Custodian seized the U.S. properties of many enemy aliens. Among these properties were the shares of the Bayer Company that were owned by Germans, who had sought to establish a business in the American market. After the 1918 Armistice, the government offered the Bayer stocks for sale at public auction to the highest American bidder. For \$5,310,000, Sterling acquired a large plant near Albany, New York, a relatively little known product called Aspirin, and a number of pharmaceuticals. A separate Sterling subsidiary, also called The Bayer Company, was formed to market Aspirin. The success of Aspirin increased rapidly as people became aware of its therapeutic properties.

Series 2: Advertising, 1902-1984

Scope and Contents: This series consists of foreign and domestic advertising for both pharmaceutical and consumer health care products. Products with the largest representation include: Bayer, California Syrup of the Figs, Fletcher's Castoria, and Phillips Milk of Magnesia. The advertisements are from general publications and trade journals for the drug and medical industry.

California Syrup of the Figs was a children's laxative and the advertisements focus on the mother and child. Fletcher's Castoria contains some of the oldest advertisements, dating from 1896. The most popular Fletcher's Castoria slogan was "Children Cry for Fletcher's Castoria" which was used in advertisements from 1890 to the 1920s. Some original artwork for these advertisements can be found [here](#).

Subseries 2.1: Foreign Advertisements, 1903-1983

Series 3: Sales and Marketing, 1881-1979

Subseries 3.1: Physician Sales Materials (product information)

Scope and Contents: This subseries consists of marketing materials for pharmaceuticals and over-the-counter products, such as brochures, flyers, packaging inserts and reports. The brochures describe the use, properties and recommended dosages of the pharmaceuticals. Because the materials were intended for physicians, most are written using detailed medical terminology. There are examples of colorful and visually interesting brochures featuring people and reproductions of famous paintings. The materials are arranged alphabetically by product name. If the materials are in a language other than English, it is noted parenthetically.

The Bayer Company of Leverkusen, Germany, produced most of the brochures that date from the 1930s. It marketed its products to all European, South American, and Asian countries. Any brochures in English produced by Bayer Leverkusen were marketing German Bayer products in England.
