Biographical / Historical

The United State Capitol dome is situated above the United States Capitol building in Washington, D.C. The Capitol dome was designed by Thomas Ustick Walter (1804-1887), the fourth Architect of the Capitol. Walter was responsible for adding the north (Senate) and south (House) wings and the central dome of the Capitol from 1854 to 1866. The original dome, built in 1824, was made of wood. It was considered a fire hazard and was not big enough to complement the Capitol building's growing size.[1]

Scope and Contents

The collection is comprised of 146 salt print photographic copies of original drawings of the United States Capitol dome. Salt print paper was the first and most common photo paper between 1839 and 1860. The prints document both structural and decorative details of the dome. The prints are arranged in chronological order.

Arrangement

This collection is arranged into one series.

Series 1, United States Capitol Dome Drawings, 1855-1862
