Biographical / Historical

Edwin Gray Rust (1869-1925) was born in Leesburg, Virginia and attended Lehigh University, graduating in 1894 with a degree in mechanical engineering. During the Spanish American War he served as an assistant engineer with the rank of junior lieutenant and during World War Two, he served in the production department of the Emergency Fleet Corporation (EFC). EFC was established by the United States Shipping Board, in 1917 to acquire, maintain, and operate merchant ships to meet national defense, foreign and domestic commerce during World War I. As an engineer, Rust specialized in boilers, inventing the Rust water tube boiler (US 710,340) and later founded the Rust Boiler Company.

Scope and Contents

Papers, comprised mostly of business correspondence (typescript, handwritten, and letter press books), from Edwin Rust's career as an engineer, specializing in boilers and steam engines. Also included are agreements, receipts, telegrams, blueprints, sketches, job cost records, rate of wages (Antrim Iron Company), daily labor reports (Elk Rapid Iron Company) and publications such as *Iron Age*.

Some letters relate to various engineering companies Rust was associated with, including the Rust Boiler Company of Pittsburgh, Pennsylvania; the Colorado Fuel and Iron Company of Pueblo, Colorado; The Elk Rapids Iron Company, Michigan; the Rust-Helander Engineering Company of Pittsburgh, Pennsylvania; the Rust Engineering Company, Birmingham, Alabama. Rust's brother Henry is one of the correspondents. Some of the personal correspondence relates to Rust's membership in various clubs such as the Duquense Club and Antelope Park Club. Photographs of Edwin G. Rust and boilers and boiler equipment are also included in the papers.
