Kleinschmidt Teletype Records, 1915-1930, Archives Center, National Museum of American History.

Restrictions

Collection is open for research.

Conditions Governing Use

Collection items available for reproduction, but the Archives Center makes no guarantees concerning copyright restrictions. Other intellectual property rights may apply. Archives Center cost-recovery and use fees may apply when requesting reproductions.

Biographical / Historical

The Kleinschmidt Teletype was invented by Edward E. Kleinschmidt, a German-American inventor and businessman. He invented a high-speed stock ticker, an automatic fishing reel, a railroad signaling device, and a high-speed teletype that "revolutionized the communications industry." The Kleinschmidt Teletype was considered a breakthrough in world communication, replacing Morse code transmission and reception with typewriters and printers. Kleinschmidt, Howard Krum, and Sterling Morton jointly obtained a patent for this technology in December 1928. Teletype Corporation was sold to the American Telephone and Telegraph Company for \$30 million in 1930.

Scope and Contents

The collection consists of correspondence kept by Charles B. Goodspeed, a major stockholder in Kleinschmidt Electric Company. It relates to internal workings of the company and the telegraphic typewriter it developed, as well as the merger with Morkrum and the purchase of the company by AT&T. Many of the letters are from Sterling Morton, president of the Teletype Corporation.

Arrangement

The collection is arranged into three series.

Series 1: Correspondence, 1915-1930

Series 2: Financial Statements, 1929

Series 3: Newspaper Clippings, 1915-1930

Names and Subject Terms
