Descriptive Entry

This accession consists of audiovisual elements created during the production of films associated with the exhibition "Exploring Marine Ecosystems." The exhibition, located in the National Museum of Natural History (NMNH), Life in the Sea Hall, included reproductions of two ecosystems, the Maine coast and a tropical coral reef. In 1992, a long and a short version of a film were produced for the exhibition. In 1995, a new film was produced. The films were produced by Karen Loveland and featured Walter H. Adey, Curator/Research Scientist, NMNH, Department of Botany, and the NMNH, Marine Systems Laboratory. Materials include original footage, narration, music, final mix, masters, and protection masters.
