Language:	English

Administrative Information

Preferred Citation

Smithsonian Institution Archives, Accession 08-098, Smithsonian Tropical Research Institute, Biodiversity Dynamics of Forest Fragments Project, Program Records

Descriptive Entry

This accession consists of records that document the administration, research, outreach, and programs of the Biodiversity Dynamics of Forest Fragments Project, a bi-national collaborative research project between the Smithsonian Institution and the Instituto Nacional de Pesquisas da Amazonia (National Institute for Research in the Amazon) in Brazil to determine the ecological consequences of habitat destruction and fragmentation in the Amazon and to transfer this information to the different sectors of society as a way of fostering conservation and the rational use of forest resources. Materials include correspondence, memoranda, agreements, articles, clippings, planning documents, annual reports, images, pamphlets, maps, architectural drawings, background information, and related materials. Some materials are in electronic format.

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

- Biodiversity
- Biotic communities
- Conservation biology
- Forest ecology
- Forests and forestry
- Research

Types of Materials:

Architectural drawings
Clippings
Color negatives
Color photographs
Color transparencies
Electronic records
Floppy disks
Manuscripts
Maps
Pamphlets
