Descriptive Entry

This accession consists of the Museum Collections Records subdomain of the National Museum of Natural History website as it existed on November 26, 2010. The primary purpose of this subdomain is to allow the public to search collections maintained by the Department of Anthropology, the Department of Botany, the Department of Entomology, the Department of Invertebrate Zoology, the Department of Mineral Sciences, the Department of Paleobiology, and the Department of Vertebrate Zoology, including the Division of Fishes, the Division of Amphibians and Reptiles, the Division of Birds, and the Division of Mammals. Searches query the museum's central collections management system. Materials include the introductory and explanatory pages as well as the search screens, but does not include the underlying data.
