Collection Overview

Repository:	Smithsonian Institution Archives, Washington, D.C., osiaref@si.edu
Title:	Website Records
Identifier:	Accession 16-267
Date:	2009-2016
Extent:	
Creator::	Smithsonian Environmental Research Center
Language:	Language of Materials: English

Administrative Information

Preferred Citation

Smithsonian Institution Archives, Accession 16-267, Smithsonian Environmental Research Center, Website Records

Descriptive Entry

This accession consists of two websites and two blogs maintained by the Smithsonian Environmental Research Center (SERC).

The primary SERC website, crawled on October 22, 2015, includes information about SERC's mission, facilities, research, and school and public programs. It also includes press releases. The Marine Invasions Research Lab section of the website was crawled separately on the same date. The Halloween-themed homepage of the SERC website was also crawled on October 30, 2015.

The "Shorelines: Life and Science at the Smithsonian Environmental Research Center" blog, crawled on October 22, 2015, details the discoveries of SERC's environmental scientists, the weird creatures they have encountered, and the strange but true science of the coasts. The first post to the blog was in October 2009.

The "Ecosystems on the Edge" website, crawled on October 22, 2015, provides information about ecosystems that are literally and figuratively on the edge as well as information on how to protect them. Due to technical issues, video content was not captured as part of this accession.

The "Estuary Chesapeake" blog, crawled on March 3, 2016, is an exchange between teachers, parents, SERC staff, and students related to field trips for the Estuary Chesapeake program. The program allows students to study estuarine ecology on the Rhode River and connect environmental issues of the watershed to human impacts. Although on a blog platform, it is organized more like a traditional website than a blog. It has been inactive since late 2014.

Materials are in electronic format.

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

- Biotic communities
- Blogs
- Environmental sciences
- Estuarine ecology
- Public relations
- Research
- Science -- Study and teaching
- Web sites

Types of Materials:

- Electronic records

Names:

- Marine Invasions Research Lab

Preferred Titles:

- Ecosystems on the Edge (Website)*
- Estuary Chesapeake (Blog)*
- Shorelines: Life and Science at the Smithsonian Environmental Research Center (Blog)*
