Descriptive Entry

The Science Media Group (SMG) was founded by Dr. Matthew H. Schneps and Dr. Philip Michael Sadler as an experimental project to explore novel applications of video in the service of science education. In operation at the Smithsonian Astrophysical Observatory and the Harvard College Observatory from 1989 to 2013, this accession consists of videotapes and motion picture film of edited programs, camera masters, and supporting materials. The programs focus on classroom teaching and reflect the best practices drawn from research in science teaching and learning. Programs include interviews and on-camera presentations by leaders in the science education reform movement; extensive interviews with students, science and mathematics content experts, and K-12 and information science educators.

Productions, events, and units documented include: "Habitable Planet: A Systems Approach to Environmental Science"; "EarthScope - Volcano Island"; "Crossroads Conference: The Future of Human Life in the Universe"; "Virtual Leaning Magnet"; "Astronomy News Service"; "Initiative for Innovative Computing - Astronomy Medicine"; "Center for Tropical Forest Science"; "Harvard-Smithsonian Center for Astrophysics - Public Nights"; "Ecosystems on the Edge"; Smithsonian Innovations/Arts and Industries Building; "Institute for Theory and Computation"; Giant Magellan Telescope; National Air and Space Museum; Office of the Chief Information Officer; Encyclopedia of Life; "SHOUT! Partners in Learning"; "Vanished - Smithsonian Center for Museum and Education Studies - Conrad Labandeira"; "Chandra X-ray Observatory"; "NASA Forum on the Structure and Evolution of the Universe"; Sub Millimeter Array;

"Black Holes: Space Warps and Time Twists"; "Science in Focus: Energy"; "Looking at Learning...Again"; "Shedding Light on Science"; and "Essential Science for Teachers". SMG partnered with Annenberg/CPB for many years on productions.

Materials include videotapes, transcripts, teacher guides, and images. Materials are in electronic format.

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

- Lectures and lecturing
- Mathematics teachers
- Science -- Study and teaching
- Science teachers
- Scientists
- Students

Types of Materials:

- Brochures
- Compact discs
- Digital versatile discs
- Electronic records
- Videotapes

Names:

- Annenberg/CPB
- Sadler, Philip Michael
- Schneps, Matthew H.
- Smithsonian Astrophysical Observatory

Preferred Titles:

- A Private Universe (Video recording)*
- Case Studies in Science Education (Video recording)*
- Chemistry: Challenges and Solutions (Video recording)*
- Cosmic Questions (Video recording)*
- Essential Science for Teachers (Video recording)*
- Eye on the Sky (Video recording)*
- Factors Influencing College Science Success (Video recording)*
- Habitable Planet: A Systems Approach to Environmental Science (Video recording)*
- Lighthouse of the Skies (Video recording)*
- Looking at Learning...Again (Video recording)*
- Mind, Brain, and Education (Video recording)*
- NASA Forum on the Structure and Evolution of the Universe (Video recording)*
- Physics for the 21st Century (Video recording)*
- Principles for Principals (Video recording)*
- Private Universe Project in Math Workshops (Video recording)*
- Science and Engineering in the Lives of Students (Video recording)*
- Science in Focus: Energy (Video recording)*

Science in Focus: Energy (Video recording)
Shedding Light on Science (Video recording)
Smithsonian Job Talks (Video recording)
Technical Difficulties (Video recording)
The Next Move, Assessment in Math and Science (Video recording)
Understandings of Consequence Project (Video recording)
Welcome to the Smithsonian (Video recording)
Youth Astronomy Apprenticeship (Video recording)
