## Descriptive Entry

This accession consists of the records of Ian G. Macintyre, Curator Emeritus, who specializes in carbonate sedimentology with a multidisciplinary interest in post-glacial history of coral reefs, submarine lithification, skeletal mineralogy of reef organisms, bioerosion, and Holocene sea-level history in the western Atlantic and eastern Pacific. The records primarily document Macintyre's curatorial activities in the Department of Paleobiology at the National Museum of Natural History in regard to field work, professional societies, research publications, speeches, and when he served as Chairman of the Department of Paleobiology (1982-1987) and as coordinating editor of "Atoll Research Bulletin." Earlier records date from when Macintyre was a research scientist at the Duke University Marine Laboratory (1967-1970), as well as during the years he attended McGill University where he earned a doctorate degree in 1967.

Materials include correspondence, memoranda, and notes; meeting agendas and minutes; proposals; agreements; information about conferences, committees, symposiums, and workshops; reports; articles and newspaper clippings; research publications; book reviews; speech papers and presentation material; survey information; Scanning Electron Microscope (SEM) photomicrographs and negatives; field notebooks and data; photographs, slides, and negatives; drawings; maps; brochures; audiotapes; and supporting documentation. Some materials are in electronic format.

## Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

Committees  
Congresses and conventions  
Coral reefs and islands  
Museum curators  
Natural history museums  
Paleobiology  
Paleohydrology \$y Holocene  
Professional associations  
Publications  
Reef organisms  
Scanning electron microscopes  
Sedimentology  
Speeches, addresses, etc.

Types of Materials:

Audiotapes  
Black-and-white negatives  
Black-and-white photographs  
Black-and-white transparencies  
Brochures  
Clippings  
Color negatives  
Color photographs  
Color transparencies  
Compact discs  
Drawings  
Electronic records  
Field notes  
Floppy disks  
Manuscripts
