| Repository: | Smithsonian Institution Archives, Washington, D.C., osiaref@si.edu |
| Title: | Curatorial Correspondence and Memoranda |
| Identifier: | Accession 18-241 |
| Date: | 1966-1968 |
| Extent: | 1.02 cu. ft. (1 16x20 box) (3 oversize folders) |
| Creator:: | National Museum of Natural History. Department of Paleobiology |
| Language: | English |

Administrative Information

Oversize

This collection contains oversize material.

Preferred Citation

Smithsonian Institution Archives, Accession 18-241, National Museum of Natural History.
Department of Paleobiology, Curatorial Correspondence and Memoranda

Descriptive Entry

This accession consists of the records of Ian G. Macintyre, Curator Emeritus, who specializes in carbonate sedimentology with a multidisciplinary interest in post-glacial history of coral reefs, submarine lithification, skeletal mineralogy of reef organisms, bioerosion, and Holocene sea-level history in the western Atlantic and eastern Pacific. The records document Macintyre's participation in rock-dredging and bottom-sampling work near the shelf break of the Atlantic continental margin off the southeastern United States, between Cape Hatteras, North Carolina, and Fort Lauderdale, Florida. The work was performed aboard the research vessel *Eastward* of the Duke University Marine Laboratory, where Macintyre was a research scientist before coming to the Smithsonian Institution. Materials include dredge data printouts and drawings.

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

Continental shelf -- United States
Dredging
Oceanography -- Research

Types of Materials:

Drawings
Manuscripts

Names:

Duke University Marine Laboratory
Eastward (Ship)
Macintyre, Ian G.

Geographic Names:

Atlantic Ocean
Fort Lauderdale (Fla.)
Hatteras, Cape (N.C.)
