Smithsonian Institution Archives, Record Unit 271, Smithsonian Institution, Office of Environmental Sciences, Ecology Program Records

Historical Note

The history of the Ecology Program of the Office of Environmental Sciences can be traced to July 1, 1965, when the Smithsonian Office of Ecology (SOE) was created to assist in expanding the research opportunities of Smithsonian scientists and to aid in the coordination of ecological activities with other government agencies. From its creation until 1966, the SOE was an administrative unit of the National Museum of Natural History. In 1966, administrative responsibility for the SOE was transferred to the Assistant Secretary for Science. The Smithsonian's environmental sciences programs were reorganized under the Office of Environmental Sciences (OES) in 1970. At that time, the SOE became the Ecology Program of the newly created OES. In 1973, OES was merged with the Office of International Activities to form the Office of International and Environmental Programs (OIEP). The Ecology Program came under the administrative control of OIEP. The Ecology Program was abolished in 1974.

Administrators of the Ecology Program of OES and its predecessor the SOE included Helmut K. Buechner, assistant director for ecology, 1965-1966, head, 1966-1968 (he also served as senior scientist, 1968-1971); Irvin Eugene Wallen, acting head, 1969; and Dale W. Jenkins, director, 1970-1973. Other staff included Lee Merriam Talbot, research biologist, 1965-1966, field representative, Ecology and Conservation, 1966-1967, deputy head and international field representative, 1968, resident ecologist, 1969-1971, and deputy director, 1972-1973; and Francis Raymond Fosberg, special assistant for tropical biology, 1965-1966.

Programs and bureaus under the administration of the Ecology Program of OES and its predecessor the SOE included the Chesapeake Bay Center for Field Biology (after 1970 the Chesapeake Bay Center for Environmental Studies), 1965-1969; the Center for Natural Areas, 1972-1974; and the Peace Corps Environmental Program, 1972-1974.

Descriptive Entry

This record unit consists of files documenting the operation of the Smithsonian Office of Ecology (SOE), 1965-1970, and its successor, the Ecology Program of the Office of Environmental Sciences (OES), 1970-1973. The records were created primarily by administrators Buechner, 1965-1968; Wallen, 1969; and Jenkins, 1970-1973. They include organizational files, 1965-1973; administrative records, 1965-1973, including material concerning the development of the Chesapeake Bay Center for Field Biology (after 1970, the Chesapeake Bay Center for Environmental Studies) and the Smithsonian-Peace Corps Environmental Program; project files, 1965-1973, including records documenting projects conducted as part of the International Program in Ecology; and files of Lee Merriam Talbot, 1965-1971.

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

- Coastal ecology
- Environmental sciences
- Research

Types of Materials:

Series 3: PROJECT FILES, 1965-1973. ARRANGED ALPHABETICALLY.

Note: This series consists of correspondence, proposals, reports, photographs, maps, and related materials documenting projects conducted and funded by the Ecology Program of the Office of Environmental Sciences (prior to 1970, the Smithsonian Office of Ecology). Included are records of projects conducted as part of the International Program in Ecology and files of research jointly funded by the Ecology Program and the Air Force Office of Scientific Research. The records are arranged alphabetically by project, host country, or principal investigator of the project.
