Historical Note

Charles D. Walcott (1850-1927) was born in New York Mills, New York, and attended the Utica public schools and Utica Academy, but never graduated. He demonstrated an early interest in natural history by collecting birds' eggs and minerals; and, while employed as a farm hand, he began collecting trilobites. These he later sold to Louis Agassiz at Harvard's Museum of Comparative Zoology. Walcott began his professional scientific career in November 1876 when he was appointed as an assistant to James Hall, New York's state geologist. On July 21, 1879, Walcott joined the United States Geological Survey (USGS) as an assistant geologist. Shortly after arriving in Washington, D. C., he was sent to southwestern Utah to make stratigraphic sections. His later field work with the Survey included expeditions to the Appalachians, New England, New York, eastern Canada, and several Middle Atlantic states, as well as other parts of southwestern and western United States. From 1882 to 1893 he worked with the Survey's invertebrate Paleozoic paleontological collections, and in 1893 he was appointed Geologist in charge of Geology and Paleontology. He also served as an honorary curator of invertebrate Paleozoic fossils at the United States National Museum (USNM) from 1892 to 1907, and as Acting Assistant Secretary of the Smithsonian Institution in charge of the USNM from 1897 to 1898. His fieldwork from this period resulted in several major publications, including *The Paleontology of the Eureka District* (1884), a study of fossils in Nevada; *The Fauna of the Olenellus Zone* (1888) concerning early North American Cambrian fossils; *Correlation Papers on the Cambrian* (1890); and *Fossil Medusae* (1898). In 1894 Walcott was appointed Director of the USGS. Serving until 1907, he greatly expanded the functions of the agency and was successful in increasing federal appropriations. In 1891 Congress had given the President the authority to establish public forests, but it was not until 1897 that the administration of the forest reserves was placed under the USGS. Walcott was instrumental in having legislation passed to enforce the preservation of forest reserves and to add additional land to the reserve program. His predecessor at the USGS initiated an arid land reclamation program in 1888 which Walcott continued as part of his forest reserve program. In 1902 he established the Hydrographic Branch to administer the program; but four years later the Branch, since renamed the Reclamation Service, became a separate federal agency. He also created the Division of Mineral Resources to experiment with coal combustion. In 1907 it was renamed the Bureau of Mines. At

the request of President Theodore Roosevelt in 1903, Walcott served as chairman of a committee to study the scientific work being conducted by the federal government.

Walcott was appointed Secretary of the Smithsonian Institution on January 31, 1907, and resigned from the USGS in April 1907. His administration at the Smithsonian was marked by numerous accomplishments, including the completion of the National Museum Building (now the National Museum of Natural History) in 1911. He was also successful in convincing Detroit industrialist Charles Lang Freer to donate his extensive Oriental art collection and money for a building during his lifetime rather than after Freer's death, as was originally intended. Walcott also set up the National Gallery of Art (predecessor to the National Museum of American Art) as a separate administrative entity in 1920. To administer Frederick G. Cottrell's gift of patent rights to his electrical precipitator, the Research Corporation was formed in 1912, with revenue from this patent, as well as future ones, to be used to advance scientific research at the Smithsonian and other educational institutions. Walcott served on the Corporation's Board of Directors for several years. To further increase the Smithsonian's endowment, Walcott was planning a major fundraising effort; but this was not pursued following his death on February 9, 1927. In 1922, he and his wife established a fund in their names at the Smithsonian to support paleontological research.

Despite his many administrative responsibilities as Secretary, Walcott was able to find time to continue his research and collecting of fossils from the Cambrian and Ordovician periods, with primary focus on the Canadian Rockies. In 1909 he located Cambrian fossils near Burgess Pass above Field, British Columbia. The following season he discovered the Burgess shale fauna, which proved to be his greatest paleontological discovery. Most of this research was published in various volumes of the *Smithsonian Miscellaneous Collections* from 1908-1931. His one major publication during this period was *Cambrian Brachiopoda*, published in 1912. Walcott continued to return to the Canadian Rockies for most seasons through 1925, when he made his last field expedition. As one of the foremost scientific figures in Washington, Walcott helped to establish several organizations with international renown and restructure existing national organizations. In 1902, Walcott, along with several other prominent individuals, met with Andrew Carnegie to establish the Carnegie Institution of Washington as a center for advanced research and training in the sciences. Walcott served the Institution in several administrative capacities. He was also instrumental in convincing Carnegie that the Institution should have laboratories built for scientists rather than use his gift solely for research grants.

Elected to the National Academy of Sciences in 1896, Walcott played a role in having the Academy become more actively involved in national science policy by serving in many official capacities. In addition to serving on innumerable committees, he held the offices of treasurer, vice president, president, and council member. He was also appointed to two presidential committees--Timber Utilization and Outdoor Recreation--in 1924 and was reappointed to both in 1926. He was the Academy's first recipient of the Mary Clark Thompson Medal. Following his death, his wife established the Charles Doolittle Walcott Fund for achievements in Cambrian research.

In 1916 the Academy, at the request of President Woodrow Wilson, created the National Research Council within the Academy to assist the federal government in the interest of national preparedness. Walcott, as one who met with Wilson, became actively involved in the organization of the Council by sitting on many of its committees, including one which planned for the present headquarters of the Council and the Academy. Walcott contributed significantly to the development of American aviation. He pressed for the establishment of the National Advisory Committee for Aviation, which was a predecessor of the National Aeronautics and Space Administration. He was instrumental in establishing air mail service, organizing the Committee on Aerial Photographic Surveying and Mapping, and writing the Air Commerce Act of 1926. Besides his scientific activities, Walcott lent his influence to other groups, such as the George Washington Memorial Association. That group attempted to create a memorial to Washington by forming an institution to promote science, literature, and the arts, just as Washington had proposed should be done.

Walcott was married three times - to Lura Ann Rust (d. 1876), to Helena Breese Stevens (d. 1911), and to Mary Morris Vaux (d. 1940). By his second wife he had four children: Charles Doolittle, Sidney Stevens,

Helen Breese, and Benjamin Stuart. Charles died while a student at Yale, and Benjamin was killed in action in France while flying for the Lafayette Flying Corps. In 1914 Walcott married Mary Morris Vaux, who, while accompanying him on his field trips, studied and painted North American wildflowers. Her work was published in five volumes by the Smithsonian in 1925.

Although Walcott never received an academic degree, he was the recipient of numerous honorary degrees from colleges and universities in the United States and Europe. His colleagues recognized his contribution to paleontology by awarding him the Bigsby and Wollaston Medals from the Geological Society of London; the Gaudry Medal of the Geological Society of France; and the Hayden Medal from the Academy of Natural Sciences of Philadelphia. He also served as a founder and president, 1899-1910, of the Washington Academy of Sciences; president of the Cosmos Club, 1898; president, 1915-1917, of the Washington Branch of the Archeological Institute of America; and president, 1925-1927, of the American Philosophical Society.

1886 Published "Classification of the Cambrian System in North America"
Cambrian field work in northern New York and western Vermont

1887 Cambrian field work in New York, western Massachusetts, and southwestern Vermont

1888 Married Helena Breese Stevens; Attended International Geological Congress in London; Placed in charge of all invertebrate paleontology at USGS; Published *The Fauna of the Olenellus Zone* which discusses Cambrian fossils in North America; Field work in Wales and on Canadian-Vermont border

May 17, 1889 Son Charles Doolittle born

1889 Cambrian field work in North Carolina, Tennessee, Mohawk Valley of New York, Vermont, and Quebec

1890 Published *Correlation Papers on the Cambrian*; Cambrian strata field work in New York and Vermont and Ordovician strata field work in Colorado Springs, Colorado

1891 Field work in New York, Colorado, and Appalachians from Virginia to Alabama

October 2, 1892 Son Sidney Stevens born

1892 Placed in charge of all paleontological work at USGS; Field work in southern Pennsylvania and western Maryland

1892-1907 Honorary curator of invertebrate Paleozoic fossils at United States National Museum (USNM)

January 1, 1893 Appointed Geologist in charge of Geology and Paleontology, USGS

1893 Vice President, Section E (Geology and Geography), American Association for the Advancement of Science; Examined Lower Paleozoic rocks in New Jersey, Pennsylvania, and Tennessee; Prepared paleontological exhibition for Chicago's Columbian Exposition

August 20, 1894 Daughter Helen Breese born

1894 Placed in charge of all paleontological collections at USNM; Appointed Director, USGS; Field work in central Colorado and White Mountain Range in California and Nevada

1895 Cambrian field work in Montana, Idaho, and Massachusetts

July 8, 1896 Son Benjamin Stuart born

1896 Joined National Academy of Sciences (NAS); Field work in eastern California and western Nevada and Franklin Mountains near El Paso, Texas

January 27, 1897 Appointed Acting Secretary in Charge of the USNM

1897 Conducted examination of forest reserves and national parks in Black Hills, Big Horn Mountains, and Inyo Mountains

June 30, 1898 Resigned as Acting Assistant Secretary in Charge of the USNM

1898 Field work in Lexington, Virginia; Teton Forest Reserve, Wyoming; Belt Mountains near Helena, Montana; and Idaho; President of the Cosmos Club, Washington, D.C.; Published *Fossil Medusae* (USGS Monograph 30)

1899 Field work in Newfoundland, New Brunswick, and Quebec; One of the founders of the Washington Academy of Sciences

1899-1911 President of the Washington Academy of Sciences

1900 Field work in Montana and Rhode Island

1901 Field work in Pennsylvania

January 4, 1902 One of the founders of the Carnegie Institution of Washington (CIW) and Secretary of the Board of Incorporators

1902 Member of the Advisory Committee on Geology and Advisory Committee on Geophysics of CIW

1902-1905 Secretary of Board of Trustees and of Executive Committee of CIW

1902-1922 Member, Executive Committee of Board of Trustees of CTW

1902-1923 Member of Council of NAS

1902-1927 Member, Board of Trustees, CIW

1903 Head of Board of Scientific Surveys, CIW; Field work in Uinta Mountains, Utah; House Range of western Utah; Snake River Range of eastern Nevada; Chairman of committee to study scientific work conducted by federal government

1904-1913 Honorary Curator, Department of Mineral Technology, USNM

1905 Field work in Montana's Rocky Mountains and Cambrian fossils of Utah's House Range

January 31, 1907 Appointed Secretary of the Smithsonian Institution

April 1907 Resigned as Director of the USGS

1907 Field work at Mount Stephen, Castle Mountains, Lake Louise, and Mount Bosworth in British Columbia

1907-1917 Vice President of NAS

1908 Field work in Montana, British Columbia, and Alberta

1909 Found Cambrian fossils near Burgess Pass above Field, British Columbia

1910 Found Burgess shale fauna

June 20, 1911 National Museum Building (now the National Museum of Natural History) completed

July 11, 1911 Wife Helena died in train accident in Bridgeport, Connecticut

1911 Field work in British Columbia

1912 Field work in Alberta and British Columbia; Published *Cambrian Brachiopoda* (USGS Monograph 51)

April 7, 1913 Son Charles Doolittle died

1913 Burgess shale work in Robson Park district, British Columbia, and in Jasper Park, Alberta

<i>June 30, 1914</i>	Married Mary Morris Vaux
<i>1914</i>	Field work in Glacier, British Columbia, and White Sulphur Springs and Deep Creek Canyon, Montana
<i>1914-1927</i>	Vice Chairman, Board of Trustees, CIW
<i>1915</i>	Living algae field work in Yellowstone National Park and West Gallatin River; fossil field work in Arizona 1915-1917; President, Washington Branch of the Archeological Institute of America
<i>1915-1919</i>	Chairman, Executive Committee of National Advisory Committee for Aeronautics
<i>June 30, 1916</i>	Elected member of National Research Council (NRC)

1924	Field work in Alberta and British Columbia
1924-1925	Member, Committee on Exhibits (jointly with NAS and NRC)
1925	Field work in Alberta; Life Member, American Association for the Advancement of Science
1925-1927	President, American Philosophical Society
1926	Helped draft Air Commerce Act of 1926
1926-1927	Board of Trustees, National Parks Association
February 9, 1927	Died in Washington, D.C.

Introduction

The Charles D. Walcott Collection Papers (Record Unit 7004) were given to the Smithsonian by his wife, Mary Vaux Walcott, with certain more recent additions.

The Archives would like to thank Dr. Ellis L. Yochelson, United States Geological Survey, and Frederick J. Collier, Department of Paleobiology, National Museum of Natural History, for their assistance in transferring items from the Walcott family and the Department for inclusion in this collection.

Descriptive Entry

The Charles D. Walcott Collection documents his personal, professional, and official life as well as activities of his family. Included are papers from his scientific and educational activities at the local and national levels, his career as a paleontologist, his administrative career with the United States Geological Survey (USGS) and to a lesser extent with the Smithsonian, and material on one of his sons' participation in World War I. Some of the collection postdates Walcott's life, including condolences to his family, an unpublished biography, correspondence between the biographer and Mrs. Walcott, and paleontological field notes by some of his colleagues.

For records relating to Walcott's family there are diaries; photographs; and correspondence with his children, his last two wives, and other family members. There is a considerable amount of material consisting of correspondence, photographs, memorabilia, publications, and official documents from the French and German governments concerning Benjamin Stuart Walcott's involvement with the Lafayette Flying Corps in France during World War I and efforts to establish a memorial in France for the Corps. Other personal records include legal documents; personal financial records; and family correspondence concerning financial investments in power companies, the prolonged illness and death of his son Charles, the death of his wife, Helena, and his daughter's travels through Europe.

Walcott's professional life is divided between his service with the USGS and the Smithsonian. Documenting his USGS years are photographs; speeches; scrapbooks; reports and correspondence from his work on forest reserves, the investigation of scientific work conducted by the federal government, and land reclamation; and annual reports. Walcott's Smithsonian career is documented primarily by correspondence written while serving as honorary curator of paleontology and Acting Assistant Secretary in charge of the United States National Museum. One scrapbook includes extensive correspondence from scientists, government officials, and friends upon the occasion of Walcott's appointment as Secretary of the Smithsonian. For a more complete record of Walcott's association with the Smithsonian, the records of the Office of the Secretary (Record Units 45 and 46), records of the Assistant Secretary, Acting (Record Unit 56), and two special series relating to the budget (Record Unit 49) and to the Research Corporation (Record Unit 51) should be consulted.

For Walcott's career as a paleontologist, there is documentation in his field notes; publications of his as well as those of others in related areas; manuscripts; diaries; and photographs, including panoramic views of the Rockies in Alberta, British Columbia, and Montana. In addition, there are paleontological field notes by Ray T. Bassler, Charles Elmer Resser, and Edward Oscar Ulrich.

Walcott's role in promoting and developing national science policy is partially covered in the records relating to his involvement in the National Academy of Sciences, National Research Council, Washington Academy of Sciences, and the Carnegie Institution of Washington. Included are legal documents, correspondence, committee minutes, reports, proceedings, financial statements, membership lists, and related materials. Additional material on the Washington Academy of Sciences can be found in Record Unit 7099. Records documenting Walcott's involvement in the administration and development of the other organizations exist at those institutions. His affiliation with the George Washington Memorial Association is documented with correspondence, trustees' minutes, histories of the Association, and drawings and plans for a building. For other national developments there is correspondence covering Walcott's participation on the National Advisory Committee for Aeronautics.

Other types of materials in this collection include certificates, diplomas, awards, and occasionally correspondence concerning his election to honorary and professional societies and the receipt of honorary degrees, and scrapbooks and diaries which touch on events throughout his life.

Container Listing

Series 1: PERSONAL CORRESPONDENCE, 1873-1928 AND UNDATED.

This series consists of correspondence with scientists and financial and governmental advisers. Correspondence concerns Walcott's appointment as Director of the United States Geological Survey and his simultaneous position as Assistant Secretary in charge of the United States National Museum; the Franz Boas controversy, 1919-1920, relating to Boas' article, "Scientists as Spies" (see especially Nicholas Murray Butler, A. Mitchell Palmer, and William Barclay Parsons); Walcott's personal financial investments with utility companies (see especially Lucien Lucius Nunn, P. J. Nunn, J. R. Nutt, Telluride Association, and Telluride Power Company); his participation on several committees relating to the development of aeronautics (see especially Newton D. Baker and J. F. Victory); the development of a national irrigation program and the construction of reservoirs in the western United States (see especially Cyrus C. Babb, Morris Bien, C. B. Booth, Edward Henry Harriman, George H. Maxwell, Elwood Mead, and Frederick Haynes Newell); the reorganization of governmental scientific work (see especially Francis T. Bowles, Washington Lee Capps, William Crozier, and Theodore Roosevelt); and the centralization of national health bureaus into one federal department (see especially Irving Fisher and Theodore Roosevelt).

Box 1

Folder 1 A, 1881-1927. Correspondents include Cleveland Abbe, Charles G. Abbot, Alexander Agassiz, Frederick H. Allen, Joseph S. Ames, Aviation Commission of the State of New York, and Paul P. Ashworth.

Folder 2 B, 1874-1925. Correspondents include C. Babb, Spencer F. Baird, Newton D. Baker, Charles Barrois, Walcott D. Bartlett, Alexander Graham Bell, Albert Smith Bickmore, Morris Bien, W. L. Biersach, Cornelius L. Bliss, C. B. Boothe, Francis T. Bowles, Lim Bradley, John Casper Branner, Reginald Walter Brock, Paul Brockett, L. White Bushey, and Nicholas Murray Butler.

Folder 3 C, 1892-1926 and undated. Correspondents include Washington Lee Capps, R. C. Carpenter, Thomas Chrowder Chamberlin, Russell Hurlburt Chittenden, The Chronicles of America Picture Corporation, William Bullock Clark, John Mason Clarke, Calvin Collidge, Frederick Vernon Coville, and William Crozier.

Folder 4 D, 1881-1927. Correspondents include James Dwight Dana, William M. Davis, J. William Dawson, David T. Day, George Parmly Day, Melvil Dewey, and Thomas E. Dougherty.

Folder 5 E, 1882-1923. Correspondents include Clarence R. Edwards, Charles W. Eliot, and Samuel Franklin Emmons.

Folder 6 F, 1888-1923. Correspondents include Herman Leroy Fairchild, J. Walter Fewkes, Irving Fisher, Frank P. Flint, Fabian Franklin, Persifor Frazer, Francis F. Frothingham, and Melville Weston Fuller.

Folder 7 G, 1886-1925. Correspondents include Henry Gannett, Helen Garfield, James Rudolph Garfield, George Washington Memorial Association, Grove Karl Gilbert, Daniel Coit Gilman, Robert H. Goddard, Henry S. Graves, and Gilbert Hovey Grosvenor.

Folder 8 Ha-Hi, 1884-1927. Correspondents include Arthur Twining Hadley, George E. Hale, William Ten Eyck Hardenbrook, Warren Gamaliel Harding, William Rainey Harper, Edward Henry Harriman, Mary W. Harriman, Jess B. Hawley, Oliver Perry Hay, Charles Willard Hayes, Frank Healy, Dwight B. Heard, John Grier Hibben, and F. A. Hitchcock.

Box 2

Folder 1 Ho-Hy, 1879-1928 and undated. Correspondents include Joseph Austin Holmes, William Henry Holmes, Elon Huntington Hooker, Herbert Hoover, William Temple Hornaday, Anna C. Horsey, Edmund Otis Hovey, Ales Hrdlicka, Gardiner Greene Hubbard, F. von Huene, Archer M. Huntington, and Alpheus Hyatt.

Folder 2 I, 1908-1911, 1922. Correspondents include Joseph Paxson Iddings and John D. Isaacs.

Folder 3 J, 1888-1927. Correspondents include Herman Jennings, Albert M. Johnson, and David Starr Jordan.

Series 10: UNITED STATES GEOLOGICAL SURVEY CORRESPONDENCE, REPORTS, AND RELATED MATERIALS, 1879-1898, 1903-1904, 1909, 1916, AND UNDATED.

This series consists of incoming correspondence, 1894-1898 and 1903-1904, and outgoing correspondence, 1880-1893, documenting part of Walcott's service with the United States Geological Survey (USGS). Correspondence for the earlier years concerns forest reserve surveys and requests for USGS publications, particularly from legislators writing for their constituents. Other correspondence documents Walcott's role as chairman of a committee to investigate scientific work conducted by the federal government. Included in the bound letterpress books of outgoing correspondence are monthly and annual reports on the study of forest reserves, the study of scientific work conducted by the federal government, irrigation studies, and miscellaneous reports.

The George Washington Memorial Association (GWMA) was incorporated in 1898 by a group of women to establish in Washington, D. C., a national university as envisioned by George Washington in his farewell address in 1799. In 1899, the Washington Academy of Sciences, with a similar idea, approached the GWMA to work on this common goal. Both organizations agreed that Washington, D. C., needed an organization that would utilize scientific and other resources of the federal government for research and would provide graduate training not available in other academic institutions. The Washington Memorial Association, as chartered in 1901, was a private foundation independent of federal support to meet these two goals. Walcott, as Director of the United States Geological Survey and President of the Academy, was one of the incorporators and was elected to the Board of Trustees on May 27, 1901, and President of the Board on June 2, 1901. The Secretary of the Smithsonian was a member of the Advisory Board. Various attempts to raise funds for the building were unsuccessful, including the proposed erection of a building for the George Washington University in 1904 and a proposed new cultural center under the administration of the Smithsonian Board of Regents as authorized in a bill signed by President Wilson in 1913. For the latter, the cornerstone was laid in 1921 for the George Washington Victory Memorial Building on the present site of the National Gallery of Art but the building was never constructed. These records include minutes of several meetings between the GWMA and the Washington Academy of Sciences in 1901; histories of the GWMA program for an architectural competition as well as architectural sketches and drawings; correspondence, particularly with Susan Whitney Dimock, President of the GWMA; a copy of the 1913 bill authorizing the construction of the Victory Memorial Building; and organizational records including by-laws, charter, and preamble.

Series 19: PUBLICATIONS, 1875-1928 AND UNDATED.

This series consists of a bibliography of Walcott's writings; some of his published works; and publications of interest to him by other scientists. Unless otherwise noted, the publications are written by Walcott. See also Series 11 for manuscript drafts.

Box 86

Folder 1 Bibliography of C. D. Walcott.

Folder 2 "Notes on *Ceraurus pleurexanthemus* Green," 1875.

Folder 3 "Preliminary Notice of the Discovery of the Remains of the Natatory and Branchial Appendages of Trilobites," 1877.

Folder 4 "Description of New Species of Fossils from the Calciferous Formation," 1879.

Folder 5 "Notes on Some Sections of Trilobites from the Trenton Limestone;" "Note on the Eggs of the Trilobite;" and "Descriptions of New Species of Fossils from the Chazy and Trenton Limestones," 1879.

Folder 6 "The Utica Slate and Related Formations" and "Fossils of the Utica Slate and Metamorphoses of *Triarthrus Becki*," 1879.

Folder 7 "The Permian and other Paleozoic Groups of the Kanab Valley, Arizona," 1880.

Folder 8 "On the Nature of *Cyathophycus*," 1881.

Folder 9 "The Trilobite: New and Old Evidence Relating to Its Organization," 1881.

Folder 10 "Description of a New Genus of the Order Eurypterida from the Utica Slate," 1882.

Folder 11 "The Cambrian System in the United States and Canada," (incomplete), 1883.

Folder 12 "Descriptions of New Species of Fossils From the Trenton Group of New York," 1883.

Folder 13 "Appendages of the Trilobite," 1884.

Folder 14 "Note on Paleozoic Rocks of Central Texas," 1884.

Folder 15 "Note on some Paleozoic Pteropods," 1885.

Folder 16 "Paleontologic Notes; List of Species from the Saint John Group and New Genus *Linnarssoni*," 1885.

Folder 17 "Paleozoic Notes; New Genus of Cambrian Trilobites, *Mesonacis*," 1885.

Folder 18 "Cambrian Age of the Roofing Slates of Granville, Washington Co., New York," 1886.

Folder 19 "Classification of the Cambrian System of North America," 1886.

Folder 20 "Second Contribution to the Studies on the Cambrian Faunas of North America," 1886.

Folder 21 "Fauna of the 'Upper Taconic' of Emmons in Washington County, N. Y.," 1887.

Folder 22 "Note on the Genus Archeocyathus of Billings," 1887.

Folder 23 "Section of Lower Silurian (Ordovician) and Cambrian Strata in Central New York, As Shown By a Deep Well Near Utica," 1887.

Folder 24 "The Taconic System," 1887.

Folder 25 "Cambrian Fossils from Mount Stephens, Northwest Territory of Canada," 1888.

Folder 26 "Description of New Genera and Species of Fossils From The Middle Cambrian," 1888.

Folder 27 "Discovery of Fossils in the Lower Taconic of Emmons," 1887.

Folder 28 "A Fossil Lingula Preserving the Cast of the Peduncle," 1888.

Folder 29 "The Taconic System of Emmons, and the Use of the Name Taconic in Geologic Nomenclature," 1888.

Folder 30 "Descriptive Notes of New Genera and Species from the lower Cambrian or Olenellus Zone of North America," 1889.

Folder 31 "Stratigraphic Position of the Olenellus Fauna in North America and Europe," 1889.

Folder 32 "Study of a Line of Displacement in the Grand Canon of the Colorado in Northern Arizona," 1889.

Folder 33 "Description of a New Genera and Species of Inarticulate Brachiopod from the Trenton Limestone," 1890.

Folder 34 "The Fauna of the Lower Cambrian or Olenellus Zone," 1890.

Folder 35 "The Value of the Term 'Hudson River Group' in Geologic Nomenclature," 1890.

Folder 36 "Correlation Papers: Cambrian," 1891.

Folder 37 "Discussion on the Geological Structure of the Selkirk Range," 1891.

Box 87

Folder 1 "Notes on the Cambrian Rocks of Pennsylvania and Maryland From the Susquehanna to the Potomac," 1892.

Folder 2 "Notes on the Cambrian Rocks of Virginia and the Southern Appalachians," 1892.

Folder 3 "Preliminary Notes on the Discovery of a Vertebrate Fauna in Silurian (Ordovician) Strata," 1892.

Folder 4 "Geologic Time, As Indicated by the Sedimentary Rocks of North America," 1893.

Folder 5 "The Natural Bridge of Virginia" and "The Geologist at Blue Mountain, Maryland," 1893.

Folder 6 "Note on Some Appendages of the Trilobites," 1894.

Folder 7 "Notes on the Cambrian Rocks of Pennsylvania, from the Susquehanna to the Delaware," 1894.

Folder 8 "On the Occurrence of Olenellus in the Green Pond Mountain Series of Northern New Jersey, with a Note on the Conglomerates," 1894.

Folder 9 "Algonkian Rocks of Grand Canyon, Colorado," 1895.

Folder 10 "The Appalachian Type of Folding in the White Mountain Range of Inyo County, California," 1895.

Folder 11 "Lower Cambrian Rocks in Eastern California," 1895.

Folder 12 "Pre-Cambrian Igneous Rocks of the Ankar Terrane, Grand Canyon of the Colorado, Arizona," 1895.

Folder 13 "Sixteenth Annual Report of the Director of the United States Geological Survey, 1894-1895," 1895.

Folder 14 "The United States Geological Survey," 1895.
