Alexander Wetmore Papers

Historical Note

(Frank) Alexander Wetmore (1886-1978), ornithologist, avian paleontologist, and science administrator, was the sixth Secretary of the Smithsonian Institution, serving from 1945 to 1952. He was born in North Freedom, Wisconsin, the son of Nelson Franklin and Emma Amelia (Woodworth) Wetmore. He developed an early interest in birds and at the age of eight made his first field journal entry - an observation on the pelican recorded on a family vacation to Florida in 1894. His first published paper, "My Experience with a Red-headed Woodpecker," appeared in *Bird-Lore* in 1900. By the time he entered the University of Kansas in 1905, Wetmore had made extensive natural history collections around his Wisconsin home and in Independence, Kansas.

Shortly after his arrival in Lawrence, Kansas, Wetmore received his first museum job as Assistant at the University Museum under Charles D. Bunker. His undergraduate career was interrupted on several occasions as he took jobs in Arizona, California, and Colorado to finance his education. He also used these opportunities to study and collect the native avifauna. Wetmore received the Bachelor of Arts degree from the University of Kansas in 1912. Wetmore continued his education in Washington, D. C., receiving the Master of Science degree in 1916 and the Doctor of Philosophy degree in 1920 - both from George Washington University. He would later receive honorary doctorates from the University of Wisconsin, George Washington University, Centre College, and Ripon College.

Wetmore's career in the federal government began in 1910 when he was appointed an Agent for the Biological Survey, a bureau of the United States Department of Agriculture. During the summers of 1910-1911 he assisted on field investigations in Wyoming and Alaska. He traveled to Puerto Rico in late 1911 and spent nearly a year surveying the bird life of that and adjacent islands. In 1913, Wetmore was promoted to Assistant Biologist with the Biological Survey, and he moved to Washington to begin work in the program on the food habits of North American birds. His career with the Biological Survey was highlighted by constant field investigations which took him to most of the United States, as well as Canada, Mexico, and South America. Among his more important investigations were a study of the causes of waterfowl mortality around the Great Salt Lake, Utah, 1914-1916; a survey of North American

birds that migrated to the southern part of South America, 1920-1921; and the leadership of the Tanager Exploring Expedition to the islands of the mid-Pacific, 1923. Wetmore was promoted to the rank of Biologist with the Survey in 1924.

As his professional status grew, Wetmore received offers of curatorial and research positions from several of the leading museums in America. Perhaps the most interesting came in 1920 when the American Museum of Natural History asked him to join the Roy Chapman Andrews Asiatic Expedition and take charge of the zoological collections. Wetmore declined this and several other offers. Finally, in November 1924, he accepted appointment as Superintendent of the National Zoological Park (NZP). He remained at the NZP until March 1925 when he was appointed Assistant Secretary of the Smithsonian in charge of the United States National Museum (USNM). Wetmore held this position for nearly twenty years, when, in 1945, he was elected the sixth Secretary of the Smithsonian. He retired in 1952 and became a Research Associate of the Institution where he continued his research on recent and fossil birds.

Wetmore's administration of the USNM and Smithsonian during the era of the Great Depression and World War II faced many constraints. However, he managed to continue the Institution's basic research aims, while instituting improvements in its administrative operations and exhibits program. Among his most important accomplishments was a move toward professional management of the Institution by hiring specialists such as John E. Graf and John L. Keddy to assist with federal budgetary procedures and other administrative matters. He also steered the Smithsonian toward a period of exhibit modernization which was realized after his retirement. Two new bureaus were added to the Smithsonian during Wetmore's tenure as Secretary - the National Air Museum (now the National Air and Space Museum) and the Canal Zone Biological Area (now the Smithsonian Tropical Research Institute).

Despite his administrative responsibilities at the Smithsonian, Wetmore continued an active research program in the field and the laboratory. He conducted several collecting expeditions to the American tropics between 1927 and 1940. When the outbreak of World War II restricted travel outside the country, he undertook a study of the birds of Shenandoah National Park in nearby Virginia. In the mid-1940s, Wetmore began a research program that would occupy his energies for the remainder of his life. Between 1946 and 1966 he took annual trips to Panama - making an exhaustive survey of the birds of the isthmus. This work culminated in the publication of his magnum opus, *The Birds of the Republic of Panama*. Three volumes of the work appeared during his life. The final volume was completed by his Smithsonian colleagues and published posthumously.

Wetmore was widely recognized as the dean of American ornithologists, and he worked extensively in the field of avian paleontology and as a systematic specialist. His bibliography contained over seven hundred entries; including 150 papers and monographs on fossil birds. He described 189 species and subspecies of birds new to science. Wetmore made enormous natural history collections, which were eventually donated to the Smithsonian. Included were 26,058 bird and mammal skins from North America, South America, Central America, and the Caribbean area; 4,363 skeletal and anatomical specimens; and 201 clutches of birds eggs. Fifty-six new genera, species, and subspecies of birds (both recent and fossil), mammals, amphibians, insects, mollusks, and plants were named in his honor - an assemblage which Wetmore called his "private zoo." Also named in his honor was the "Wetmore Glacier" in the Antarctic and the "Alexander Wetmore Bridge," a canopy bridge in the Bayano River Basin in Panama.

Wetmore was a member of countless professional organizations, scientific committees, conservation groups, and social clubs. He served many of the groups in elected or appointed capacities. He was a member of the American Ornithologists' Union (AOU) for seventy years and served as President from 1926 to 1929. For many years he was Chairman of the AOU Committee on Classification and Nomenclature and was instrumental in the publication of the fifth edition of the *Check-list of North American Birds*. Wetmore also had a long-term association with the National Geographic Society, serving as a Trustee, 1933-1976, and as Vice-Chairman of the Committee on Research and Exploration. He also authored several popular publications on birds for the Society.

Wetmore served as President of the Washington Academy of Sciences, 1927; the Washington Biologists' Field Club, 1928-1931; the Biological Society of Washington, 1929-1931; the Cosmos Club, 1938; the Explorers Club, 1944-1946; and the X International Ornithological Congress held at Uppsala, Sweden, 1950. He was Home Secretary of the National Academy of Sciences, 1951-1955, and a Trustee (or Director) of the Textile Museum of Washington, 1928-1952; the George Washington University, 1945-1962; and the Gorgas Memorial Institute for Tropical and Preventive Medicine, 1949-1976.

During his career at the Smithsonian, Wetmore was named to several national and international scientific committees. He was Secretary-General of the Eighth American Scientific Congress, 1940; United States Representative to the Inter-American Commission of Experts on Nature Protection and Wildlife Preservation, 1940; Vice-Chairman of the National Advisory Committee on Aeronautics, 1945-1952; and Chairman of the Interdepartmental Committee on Research and Development, 1946.

His contributions to science resulted in many honors and awards. He was the recipient of the Otto Herman Medal of the Hungarian Ornithological Society, 1931; the Hubbard Medal of the National Geographic Society, 1957; the Brewster Medal, 1959, and the Elliott Coues Award, 1972, of the American Ornithologists' Union; the Explorers Club Medal, 1962; the Bartsch Award of the Audubon Naturalist Society, 1964; and the Arthur Allen Award of the Cornell Laboratory of Ornithology, 1970. Wetmore married Fay Holloway in 1912, and a daughter, Margaret Fenwick, was born in 1916. After a long illness, his wife died in 1953. That same year he married Annie Beatrice Thielen. Wetmore died at his home in Glen Echo, Maryland, on December 7, 1978.

For more detailed biographical information on Wetmore, see Paul H. Oehser, "In Memoriam: Alexander Wetmore," *The Auk*, July 1980, vol. 97, no. 3, pp. 608-615; S. Dillon Ripley and James A. Steed, "Alexander Wetmore, June 18, 1886-December 7, 1978," *National Academy of Sciences, Biographical Memoirs*, vol. 56, pp. 597-626, 1987; and John Sherwood, "His Field Notebook Was Started in 1894; It Is Not Yet Complete," *The Washington Star*, Thursday, 13 January 1977. A discussion of his contributions to paleornithology is found in Storrs L. Olson's "Alexander Wetmore and the Study of Fossil Birds" in "Collected Papers in Avian Paleontology Honoring the 90th Birthday of Alexander Wetmore," Storrs L. Olson, editor, *Smithsonian Contributions to Paleobiology*, 1976, no. 27, pp. xi-xvi.

Introduction

The papers of Alexander Wetmore were received in the Smithsonian Archives in several different accessions between 1978 and 1987.

The Archives would like to thank Mrs. Beatrice T. Wetmore for her help in transferring her husband's papers to the Archives. We also appreciate the assistance of the staff of the Division of Birds, National Museum of Natural History. The authors thank Susan Glenn and Pamela Henson for their thorough review of the manuscript.

Descriptive Entry

The papers of Alexander Wetmore provide comprehensive documentation of his professional career and personal life. The collection is especially valuable in illustrating his research career in systematic ornithology and avian paleontology; his many collecting trips and field expeditions; his involvement in professional organizations, scientific societies, and social groups; his education and the development of his interest in ornithology; his administrative career at the United States National Museum (USNM) and the Smithsonian Institution; his family history; and personal matters. Less well represented in the collection is material concerning his brief tenure as Superintendent of the National Zoological Park, 1924-1925. Interested researchers should consult Smithsonian Archives Record Unit 74, National Zoological Park, Records, 1887-1965, and undated.

Wetmore was a prolific correspondent and nearly a third of this collection is made up of letters written and received between 1901 and 1977. The correspondence documents most aspects of his career and is particularly valuable in illustrating his research on recent and fossil birds. Wetmore exchanged letters with many of the prominent ornithologists and avian paleontologists of his day, and the correspondence is an important source of information on the history of both disciplines during the twentieth century. It is also helpful in documenting USNM and Smithsonian history from the mid-1920s to the early 1950s. Especially valuable are letters exchanged with USNM curators which concern field work, research programs, and exhibits. Wetmore corresponded with many foreign specialists, and several letters from British and European ornithologists contain descriptions of World War II and its effects on society and science. Also included are countless letters written by Wetmore giving information and advice to amateur ornithologists, bird watchers, and youngsters interested in birds.

A large file of correspondence, reports, fiscal records, publications, and related materials documents Wetmore's constant involvement in professional activities and national and international scientific affairs. His seventy-year membership in the American Ornithologists' Union is thoroughly illustrated. Included are files concerning Wetmore's work with the AOU Committee on Classification and Nomenclature, and his role in the preparation of the fifth edition of the Check-list of North American Birds. Also included are files concerning Wetmore's work as a delegate and President of meetings of the International Ornithological Congress. Records concerning his work as Secretary-General of the Eighth American Scientific Congress, and as United States Representative to the Inter-American Committee of Experts on Nature Protection and Wildlife Preservation provide documentation of initial inter-American cooperation on conservation issues. Also found are substantial records documenting his associations with the National Geographic Society; the Gorgas Memorial Institute for Tropical and Preventive Medicine; the Washington Biologists' Field Club; the Cosmos Club; and the Explorers Club. Contained in a separate series are records dealing with his work as Chairman of the National Academy of Sciences Daniel Giraud Elliot Award Committee.

Wetmore's work as a field ornithologist and scientific expedition member is documented from his first recorded observation of a Florida pelican in 1894 through his last collecting trip to Panama in 1966. The majority of records concerning his field work are found in three series. The first documents Wetmore's work prior to his appointment to the U. S. Biological Survey in 1910 and includes field notes, migration records, and lists made during his boyhood in Wisconsin; similar materials compiled during his college days in Lawrence, Kansas, and on trips to the western United States; and catalogues of his ornithological and natural history collections. The second series consists of correspondence, field notes, diaries, reports, expense records, and related materials documenting field work carried out for the U. S. Biological Survey and the Smithsonian Institution (with the exception of trips to Panama). Also included are records created during trips to professional meetings, trips to study museum specimens, and other official travel. The third series contains records concerning his field trips to Panama, 1944, 1946-1966. Also included is a file of permits used during his field investigations, as well as expense accounts from his official travel.

Photographic documentation of Wetmore's life and career is a major strength of the collection. Included are voluminous photographs, albums, lantern slides, 35mm color slides, motion pictures, and negatives

documenting his field work and other official travel. Also included are portraits of Wetmore; photographs of Wetmore with family, friends, and colleagues; photographs from his boyhood; photographs of Smithsonian events, scientific meetings, and social gatherings; and photographs of professional colleagues.

The papers contain a file of collected materials documenting Wetmore's personal life and family history. The file includes correspondence with his immediate family and other relatives; various biographical information; genealogical data on his family; school and college records; papers and drawings from his early work on birds; congratulatory correspondence and letters of introduction and recommendation; transcripts of an oral history interview; and personnel records from his service in the federal government. Of special interest is Wetmore's "private zoo" - a card catalogue of species and subspecies named in his honor. A series of daily diaries and appointment books helps to illustrate his day-to-day activities.

Wetmore's twenty-eight-year administrative career at the USNM and Smithsonian is partially documented in the collection. Most of the records consist of routine correspondence inquiring about employment at the USNM. Also included are various files concerning Smithsonian activities, offices, and administrative matters.

The remainder of the collection primarily consists of materials relating to his research in ornithology and avian paleontology. Included is a large group of unpublished manuscripts, speeches, and radio talks prepared by Wetmore. Also included are numerous letters; specimen lists; notes; published manuscripts; field records; and publications relating to his research. Of special interest are original journals, lists, and correspondence from field work in Haiti by William Louis Abbott, 1916-1928, and Watson M. Perrygo, 1928-1929. The collection also contains a sample of original illustrations used in his publications on fossil birds; and manuscripts, proofs, drawings, and other materials from his magnum opus, *The Birds of the Republic of Panama*.

Also included in the collection are diplomas, certificates, and awards received by Wetmore, and typescript copies of correspondence between John Xantus and Spencer F. Baird.

Additional records documenting Wetmore's professional career can be found in the Smithsonian Archives. Researchers interested in Wetmore's career as Assistant Secretary in charge of the USNM and Secretary of the Smithsonian should consult Smithsonian Archives record units 192 and 46. Field reports written during several investigations he conducted for the U. S. Biological Survey can be found in record unit 7176, United States Fish and Wildlife Service, Field Reports, 1860-1961. Records dealing with Wetmore's work on the fifth edition of the AOU Check-list of North American Birds are a part of record unit 7050, American Ornithologists' Union Collection, 1883-1977. An oral history interview (record unit 9504) conducted by the Archives in 1974 provides insight to all aspects of Wetmore's career. Record unit 9516, the Watson M. Perrygo oral history interviews, include many reflections on Wetmore by his long-time field companion.

A voluminous collection of Wetmore's field catalogues, field notes, lists, and other specimen-related records are housed in the Division of Birds, National Museum of Natural History.

Container Listing

Series 1: General Correspondence, 1901-1977, and undated, with Related Materials from 1879.

This series consists of incoming and outgoing correspondence documenting the professional career of Alexander Wetmore. He maintained a voluminous correspondence with domestic and foreign ornithologists and avian paleontologists concerning research projects, nomenclatural questions, and various professional issues.

Other correspondents include staff and officials of the Bureau of Biological Survey, United States National Museum (USNM), and Smithsonian Institution; staff and officials of museums, universities, and research foundations; officers and members of professional organizations; editors of scientific journals and popular publications; bird watchers and amateur ornithologists; and personal acquaintances.

The correspondence documents all aspects of Wetmore's professional life. In addition to providing a wealth of information on his research on recent and fossil birds, it is especially strong in illustrating field work and scientific expeditions; the development of his career as a professional ornithologist, museum director, and science administrator; his participation in professional organizations; and the preparation of scientific papers and popular works. The correspondence is also a valuable source of information on the history of the Bureau of Biological Survey, 1910-1924, and the USNM/Smithsonian, 1925-1952.

Occasional photographs, manuscripts, and field notes are found in the correspondence. This material is noted in the folder list.

Arranged Alphabetically

Box 1

Folder 1 Aa-Ak, general

Folder 2 Abbot, Charles G., 1927-1929, 1931, 1936, 1938, 1940, 1967, 1969-1970, 1972-1973, and undated. Includes a poem by Paul E. Garber commemorating Abbot's 95th birthday, May 1967.

Folder 3 Abbott, William Louis, 1924, 1927-1939, 1949, and undated. Includes several letters containing descriptions of Wetmore's field work. Correspondence post-dating Abbott's death in 1936 is with Gertrude Abbott and Cora M. Arrants.

Folder 4 Achorn, John Warren, 1921-1926, and undated. Includes an obituary of Achorn.

Series 3: Smithsonian Institution and United States National Museum Files, 1924-1976 and undated.

This series provides partial documentation of Alexander Wetmore's work as administrative head of the United States National Museum (USNM), 1925-1944, and the Smithsonian Institution, 1945-1952. Also included are records created by Wetmore after his retirement in 1952 that relate to Smithsonian bureaus and offices.

Most of the records consist of routine correspondence inquiring about employment at the USNM. Of particular importance are files concerning a proposed National Museum of History, 1926-1932; records concerning the selection of Wetmore's successor as Secretary, 1951-1952; and correspondence relating to the USNM Nomenclatural Discussion Group, 1946-1949.

Series 4: Biographical and Personal Files, 1897-1979 and undated, with related materials from 1848.

This series consists of collected materials primarily documenting the personal life and family history of Alexander Wetmore. Included is correspondence with his immediate family and other relatives; genealogical information on the Wetmore and Woodworth families; biographical data on Wetmore; records documenting his education from grade school through college; papers and drawings from Wetmore's initial work on birds, including a manuscript of his first published paper "My Experience with a Young Red-Headed Woodpecker"; congratulatory correspondence; letters of introduction and recommendation written by Wetmore; records concerning invitations and awards; and a transcript of an oral history interview of Wetmore conducted by the Smithsonian Archives. Of special interest is Wetmore's "Private Zoo" - a card catalogue of species named in his honor.

Also included is a smaller amount of material concerning Wetmore's professional career which consists mostly of personnel notifications from the Bureau of Biological Survey and the Smithsonian. Of particular importance is a memorandum from Wetmore to Charles D. Walcott (13 March 1925) containing his thoughts on the future of the USNM. This memorandum was the basis for Wetmore's selection as Assistant Secretary.

Series 9: Panama Field Work Files, 1944-1966.

This series contains records documenting Alexander Wetmore's field work in Panama in 1944 and from 1946 to 1966. Wetmore made a detailed and exhaustive survey of Panama's birds, covering the entire isthmus with his explorations. The culmination of this extensive work was the publication of *The Birds of the Republic of Panama*.

The records include correspondence, field reports, itineraries, photographs and photographic data, expense records, permits, notes, newsclippings, reference materials, and memorabilia. The correspondence, which is mostly with Smithsonian officials and staff, not only documents Wetmore's work, but also provides useful information on day-to-day activities at the Institution during the late 1940s and early 1950s. Letters written by John Enos Graf are of particular importance.

Researchers should also see series 13 for photographs relating to Wetmore's field explorations in Panama.

Arranged Chronologically

Box 153

Folder 1 Panama, 1944. To inspect the experimental work of the Chemical Warfare Service, United States Army, on San Jose Island and make natural history collections for the USNM. Assisted by Joseph P. E. Morrison. Correspondence, expense records, permits, and vaccination certificates. Correspondents include Morrison, John Enos Graf, Harry W. Dorsey, Louise M. Pearson, and Frank M. Setzler.

Folder 2 _____. Reference materials, addresses of contacts, passport photographs, newsclippings, and memorabilia.

Folder 3 Panama, 1946. To visit the Canal Zone Biological Area, inspect the San Jose Project of 1944, and collect bird specimens in Darien. Assisted by Watson M. Perrygo. Correspondence, photographs and photographic notes, expense records, travel notes, reference materials, and memorabilia. Correspondents include John Enos Graf and Louise M. Pearson.

Folder 4 Panama, 1947. To visit the Canal Zone Biological Area, inspect the San Jose Project of 1944, and collect bird specimens in Darien. Assisted by Watson M. Perrygo. Correspondence, expense records, travel notes, newsclippings, and film notes. Correspondents include John Enos Graf. Of special interest is a letter from Wetmore to H. R. Harmon (12 June 1947) which contains a report on the expedition.

Folder 5 Panama, 1948. To visit the Canal Zone Biological Area and to collect bird specimens in Herrera and Los Santos. Assisted by Watson M. Perrygo. Correspondence, newsclippings, expense records, film notes, travel notes, and memorabilia. Correspondents include John Enos Graf, Louise M. Pearson, and James Zetek. Of special interest is a letter from Wetmore to Willis H. Hale (6 May 1948) which contains a report on the expedition.

Folder 6 Panama, 1949. To visit the Canal Zone Biological Area and to collect bird specimens in Chepo and other parts of Panama. Assisted by Watson M. Perrygo. Correspondence, reference materials, expense records, travel notes, and film notes. Correspondents include John Enos Graf, Louise M. Pearson, James Zetek, Ratibor Hartmann, Matthew Williams and Marion Illg Stirling, and Karl P. Curtis. Of special interest is correspondence with the Stirlings concerning their archaeological field work in Panama, and a letter from Wetmore to Willis H. Hale (8 June 1949) which contains a report on the expedition.

Folder 7 Panama, 1950. To visit the Canal Zone Biological Area and to collect bird specimens in Chimán and along Rio Maje in Darien. Assisted by Watson M. Perrygo. Correspondence, reference materials, expense records, travel notes, film notes, and memorabilia. Correspondents include John Enos Graf, Louise M. Pearson, Herbert C. Clark, Karl P. Curtis, Charles Lewis Gazin, and Ratibor Hartmann.

Box 154

Folder 1 Panama, 1951. To visit the Canal Zone Biological Area and to collect bird specimens in Cerro Campana and other points in Panama. Assisted by Watson M. Perrygo. Correspondence, permits, newspaper clippings, expense records, travel notes, itinerary, film notes, and memorabilia. Correspondents include John Enos Graf, Ratibor Hartmann, John L. Keddy, Louise M. Pearson, Matthew Williams and Marion Illg Stirling, and James Zetek. Of special interest is correspondence from the Stirlings documenting archaeological field work in Panama.

Folder 2 Panama, 1952. To visit the Canal Zone Biological Area and collect bird specimens along the Rio Indio and on Taboga Island. Correspondence, expense records, newspaper clippings, reference materials, travel notes, film notes, itinerary, and memorabilia. Correspondents include John Enos Graf, Louise M. Pearson, Eugene Eisenmann, Matthew Williams and Marion Illg Stirling, and James Zetek.

Folder 3 Panama, 1953. To visit the Canal Zone Biological Area and the Museo Nacional and collect bird specimens in Sona, Veraguas. Assisted by Watson M. Perrygo. Correspondence, permits, photographs and photographic notes, expense records, itinerary, and memorabilia. Correspondents include John Enos Graf, Louise M. Pearson, Matthew Williams and Marion Illg Stirling, Margaret Wetmore Harlan, James Zetek, Eugene Eisenmann, and Karl P. Curtis.

Folder 4 Panama, 1954. To visit the Canal Zone Biological Area and collect bird specimens in Chiriquí. Assisted by Beatrice Thielen Wetmore. The Netherlands Antilles and Venezuela were also visited. Correspondence, newspaper clippings, reference materials, permits, itinerary, film notes, travel notes, expense records, field report, and memorabilia. Correspondents include John Enos Graf, Watson M. Perrygo, James Zetek, and Adela Gomez.

Folder 5 Panama, 1955. To visit the Canal Zone Biological Area and the Gorgas Memorial Laboratory, and to collect bird specimens in the Canal Zone and Chiriqui. Assisted by Beatrice Thielen Wetmore. Correspondence, permits, newsclippings, film notes, travel notes, expense records, and memorabilia. Correspondents include John Enos Graf, A. Remington Kellogg, and James Zetek.

Folder 6 Panama, 1956. To visit the Canal Zone Biological Area, and collect bird specimens in the Canal Zone and on Isla Coiba. Correspondence, film notes, travel notes, newsclippings, expense records, and memorabilia. Correspondents include John Enos Graf, A. Remington Kellogg, James Zetek, and Margaret Wetmore Harlan.

Folder 7 Panama, 1957. To visit the Canal Zone Biological Area, the Museo Nacional, and the Gorgas Memorial Laboratory; and to collect bird specimens in the Tonosi Valley, Los Santos, San Blas Islands, and the Azuero Peninsula. Assisted by Beatrice Thielen Wetmore. Correspondence, newsclippings, reference materials, travel notes, film notes, expense records, and memorabilia. Correspondents include John Enos Graf, Herbert Friedmann, Herbert Girton Deignan, Henry Allen Moe, and Margaret Harlan Wetmore.

Box 155

Folder 1 Panama, 1958. To visit the Canal Zone Biological Area and to collect bird specimens in the Canal Zone, Bocas del Toro, Cocolé, La Jagua, and on Isla Escudo de Veraguas. Assisted by Beatrice Thielen Wetmore. Correspondence, reference materials, expense records, travel notes, photographs and photographic records, field report, and memorabilia. Correspondents include Herbert Friedmann and Louise M. Pearson.

Folder 2 Panama, 1959. To visit the Canal Zone Biological Area, and collect bird specimens in the Canal Zone and Darien. Assisted by Beatrice Thielen Wetmore. Correspondence, expense records, newsclippings, travel notes, film notes, field report, and memorabilia. Correspondents include Herbert Friedmann and Charles O. Handley, Jr. Of special interest are Handley's letters documenting his field work in Panama.

Folder 3 Panama, 1960. To visit the Canal Zone Biological Area and collect bird specimens in the Canal Zone and on various Pacific islands. Assisted by Beatrice Thielen Wetmore. Correspondence, newsclippings, expense records, film notes, travel notes, and memorabilia. Correspondents include Carl Milton Johnson and Pedro Galindo.

Folder 4 Panama, 1961. To visit the Canal Zone Biological Area and collect bird specimens in the Canal Zone and Darien. Assisted by Beatrice Thielen Wetmore. Correspondence, newsclippings, expense records, travel notes, film notes, and memorabilia. Correspondents include Adela Gomez and Richard H. Stewart.

Folder 5 Panama, 1962. To visit the Canal Zone Biological Area, and collect bird specimens in the Canal Zone and the Bay of Panama. Assisted by Beatrice Thielen Wetmore. Correspondence, permits, newsclippings, itinerary, expense records, travel notes, photographs and photographic records, and memorabilia. Correspondents include Richard H. Stewart.

Folder 6 Panama, 1963. To visit the Canal Zone Biological Area, and collect birds in the Canal Zone, Cocle, Darien, the San Blas Islands, and the islands off the coast of Chiriqui. Assisted by Beatrice Thielen Wetmore. Correspondence, permits, travel notes, film notes, field report, and memorabilia. Correspondents include Harvey R. Bullis, Jr.

Folder 7 Panama, 1964. To visit the Canal Zone Biological Area and Gorgas Memorial Laboratory, and collect bird specimens in El Real and on Cerro Mali. Correspondence, newsclippings, permits, maps, film notes, travel notes, expense records, and memorabilia. Correspondents include Pedro Galindo, Charles O. Handley, Jr., and Beatrice Thielen Wetmore.

Folder 8 Panama, 1965. To visit the Canal Zone Biological Area and the Gorgas Memorial Laboratory, and to collect bird specimens on Isla Cebaco and other points in Panama. Assisted by Beatrice Thielen Wetmore. Correspondence, newsclippings, photographs and photographic data, travel notes, and memorabilia. Correspondents include Beatrice Thielen Wetmore.

Series 13: Photographic Materials, 1901-1974 and undated, with Related Materials from 1868.

This series provides extensive photographic documentation of all aspects of Wetmore's professional career. Included are voluminous photographs taken by Wetmore on field trips and scientific expeditions; photographs documenting his attendance at scientific meetings, official functions, and social gatherings; photographs from his boyhood in North Freedom, Wisconsin; photographs of events in which he participated during his Smithsonian career; portraits of Wetmore; photographs of Wetmore with family, friends, and colleagues; and photographs of professional colleagues collected by Wetmore.

Many of the photographs are found in albums maintained by Wetmore from 1901 to 1969. The albums are organized in two categories - "field work and travel" and "miscellaneous." Albums in the first category contain photographs of Wetmore in the field, expedition colleagues, field operations, and native people, fauna, flora, and physiography of regions visited. Also included are photographs taken by Wetmore at meetings of the International Ornithological Congress in Europe. The "miscellaneous" albums are more personal in nature, but also depict field work and travel, especially to attend meetings of the American Ornithologists' Union. They also provide many photographs of annual outings of the Washington Biologists' Field Club.

Other photographic media represented in the series include lantern slides, 35mm color slides, motion pictures (including a National Geographic Society film on Barro Colorado Island), and negatives.

Series 14: National Academy of Science, Daniel Giraud Elliot Fund Award Committee, Chairman's Files, 1929-1963.

This series documents Alexander Wetmore's service as Chairman of the National Academy of Sciences' Daniel Giraud Elliot Fund Award Committee from 1947 to 1963. The records primarily consist of correspondence with committee members concerning the nomination and selection of candidates for the award. Also included are files created by Wetmore's predecessor, William King Gregory.

Arranged Chronologically

Box 238

Folders 1-3 Elliot Fund Award Committee. Files of William King Gregory as
Chairman, 1929-1947.

Folders 4-5 _____ . Files of Alexander Wetmore as
Chairman, 1947-1952.

Box 239

Folders 1-6 Elliot Fund Award Committee. Files of Alexander Wetmore as
Chairman, 1953-1963. Of special interest is a copy of Arthur Cleveland
Bent's acceptance speech on receiving the award. The speech contains
information concerning Bent's "Life Histories of North American Birds."
