Collection Overview

Repository:	Smithsonian Institution Archives, Washington, D.C., osiaref@si.edu
Title:	Records
Identifier:	Record Unit 7432
Date:	1967-1988
Extent:	26 cu. ft. (26 record storage boxes)
Creator::	Museum Computer Network
Language:	English

Administrative Information

Preferred Citation

Smithsonian Institution Archives, Record Unit 7432, Museum Computer Network, Records

Historical Note

The Museum Computer Network promotes the use of computer technology by museums. It was established in 1967 by a consortium of New York City museums. In its early years it focused on the development of an object-cataloging database system called Griphos. This system was designed to enable creation of a union catalog of museum objects. In 1972 the consortium was incorporated into the nonprofit Museum Computer Network (MCN) headed by David Vance. Until 1978 MCN functioned as a Griphos users group, but by that year Griphos had become obsolete and MCN opened itself up to users of other computer systems. In 1985 Ron Kley became president and acting executive director until 1988 when Deirdre Stam became executive director.

Descriptive Entry

This collection contains the administrative files kept primarily by the executive directors. The records concern the daily operations of a nonprofit professional organization including preparation of the journal *Spectra*, planning for annual conferences and workshops, correspondence, grant proposals, annual reports, member surveys, and publications concerning computerization.

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

Computer science
Museum information networks
Museums -- Collection management

Types of Materials:

Audiotapes
Manuscripts

Names:

Kley, Ron
Stam, Deirdre Corcoran
Vance, David, 1926-

Preferred Titles:

Griphos (computer database system)
Spectra (Serial)
