The Train Collection is particularly strong in archival materials on the following topics: the search for the source of the Nile and the progress of other exploring expeditions in Africa; the collecting of specimens of African animals, plants, and ethnological materials for zoos and museums (including a significant body of correspondence and photographs from the Smithsonian African Expedition in 1909-1910, led by President Theodore Roosevelt); and the growth of the African wildlife conservation movement. Besides Roosevelt, the major persons represented in the Collection include the journalist and explorer Henry Morton Stanley and members of his Emin Pasha Relief Expedition (Thomas Heazle Parke, Robert H. Nelson, James S. Jameson, John Rose Troup, William Bonny, William G. Stairs, Edmund Barttelot, and Arthur J. M. Jephson); the medical missionary Dr. David Livingstone and his father-in-law Robert Moffat; taxidermist Carl Akeley; zoologist Edmund Heller; hunter Frederick Courtenay Selous; artist and adventure writer A. ### Series 1: Artifacts, 1841, 1999, undated

#### 4 Items

**Scope and Contents:** The series includes three dimensional materials relating to European and American exploration and travel in Africa. Some items relate to well-known figures like David Livingstone (1813-1873) or are artifacts likely collected during safari.

#### Item A001

[Hollis and Sons. Ten-bore half stocked percussion shot and ball gun, made for the African trade, with the stock extended and native repairs with shrunken leather, and native brass wire, circa 1860](#)

1 Item (Artifacts (object genre); 50 in. (length))

**Notes:** This gun returned to England with the body of David Livingstone alongside other possessions as used by him during his last journey of exploration in Africa. After the death of David Livingstone his native attendants, led by Chuma and Susi, preserved the body by drying it in salt before attempting to carry it to Mozambique. On the way to the coast they met Lieutenant V.L. Cameron who relieved them of Livingstone's geographical instruments but not all his possessions. Cameron in his book *Across Africa* mentions this on page 123. This gun was originally accompanied by a letter, of which a photograph survives, signed by a Mr. W. Carswell which read, "53 Charing Cross, London, May 1910. I certify that this native repaired long gun of Hollis and Son[s]) was brought back with the personal effects and body of David Livingstone the great explorer and missionary, after his tragic death at Chitambo to the S.E. of Lake Bangwelo on the 1st May 1873 by his faithful bearers Joseph Wainwright, Susi and Chumah, and was given to me by the family as a token of affection. William Carswell."

A001 is the accession number in the Russell E. Train inventory list of the Joseph F. Cullman 3rd Library of Natural History.

Notes: The finished drawing appeared in A breath from the Veldt, depicting two Africans squatting on the ground beside a recumbent figure, with another study of the same two figures and a subsidiary study of zebras or antelopes. Sir John Millais drew the final version of "The last trek" for the frontispiece of his son's book A breath from the Veldt,

1895. Upon publication it was acclaimed by The Daily telegraph as "perhaps the most beautiful illustration connected with South African art." Another preliminary study appears in J.G.Millais' biography of his father, Vol. II, page299. Millais contemplated a full oil painting of the subject just before he died. As his son recounted (Vol. II, page 333): "As I write, the last morning he spent in his beloved studio comes back vividly to my mind. I had long wanted him to paint 'The last trek', a drawing of which he had kindly supplied as frontispiece to my book A breath from the Veldt and Mr. Briton Riviere had also urged him to do so; and now pointing to a large white canvas which stood on one of the easels he whispered, 'Well, Johnnie, you see I have got the canvas at last, and I am really, going to begin 'The last trek' today.' .... An hour later he felt so extremely unwell that he retired to his own room downstairs, closing the studio door behind him for the last time. He had commenced, though he knew it not, 'The last trek.'"

Charcoal on brown artist's board. Inscribed "To my son John, J. E. Millais, July 5 '95" in the lower right hand corner. Dimensions of the two items: 1. 15. 75 x 12. 75 in. (art), 23. 5 x 21. 25 in. (frame). 2. 11. 5 x 15. 25 in. (art), 23. 5 x 21. 25 in. (frame).

Item Art044

Scenes in hot latitudes and travels in search of the Wishi Washi to its junction with the Puddi Muddi, undated

33 Items (Drawings (visual works); Works of art; 21.5 x 19.75 in.)

Notes: A series of 33 satirical watercolor and gouache drawings and caricatures illustrating Dr. Livingstone's travels and explorations in Africa, his rescue by H.M. Stanley, etc. The drawings cover the period from about 1867 onwards when Livingstone was, amongst other things, trying to discover the source of the Nile. Livingstone is referred to as "The Doctor" and his two close assistants as "Mumbo" and "Jumbo". He discovers and ascends rivers, crosses mountains, encounters crocodiles, presents the hindquarters of an elephant to a native king's wife, dances at a party given in his honor, enters a cave full of "antediluvian" bones, intervenes in a battle between two tribes with his pistol and umbrella, etc. Mumbo falls into a blazing crater and Jumbo is eaten by lions. There are several allusions to the complacency of the Royal Geographical Society. It is a matter of debate whether these drawings are of British or American origin. The title is written on the American flag which is being hoisted by H.M. Stanley and two natives. Livingstone stands on the right. Another drawing depicts H.M. Stanley, who was sent by the New York Herald to find Livingstone, coming to the "Doctor's" rescue seated on the back of an eagle and waving the American flag. On the other hand, one drawing depicts a native king's wives wearing handkerchiefs decorated with portraits of English race-horses such as "Hermit", "Bluegown" and "Gladiator." See, however, a half-page illustration "Steam boat" built for Dr. Livingstone's exploration of the Zambesi River, Illustrated London News, 27 February 1858.

Paintings and drawings; in case. Each drawing is mounted on grey paper, and apart from the title, has a typewritten caption below, some with MS alterations. The drawings measure 14 x 8 in. and are bound in one volume, folio, cloth, with the title in gold on upper cover, apparently unpublished, a most amusing and possibly unique series of illustrations.

The journals, written in a rather chatty style, describe daily activities and extensive travel details including: accommodations, methods of travel by land and sea, distances covered, social interactions, animals seen and shot, weather, and his personal impressions of countries, governments, political situations, and similar topics. Cockburn includes detailed lists of items that he brought on his trips, as well as information on ships, hotels, native vocabularies, and species of game in various geographic regions.

Journals are handwritten in ink on lined paper and include pasted and loose inserts of ephemera (including printed maps and government forms completed by hand, for hunting licenses etc.), correspondence, postcards, black and white photographs, sketches, and hand-drawn maps.

Notes: "While mention of the various stories has been made in many of my previous books, apparently I did not tell them full enough, for I have been asked on many occasions to relate them again, and in this book I have tried to go into fuller detail ..."--Foreword.

Author's original corrected typescript. In paper wrappers. Possibly unpublished. The work is divided into 12 chapters, 7 of which refer to Africa. It is accompanied by a criticism by R. H. Ambrose, signed but undated, in which he concludes: " It is my opinion that if the work were revised, cut by about 5,000 words it might be acceptable as a 'Book for Boys. '"

[Dugmore, A. Radclyffe \(Arthur Radclyffe\), 1870-1955. Autobiography, circa 1929](#)  
1 Volume (Manuscripts (document genre); 9.5 x 14.5 x 1.5 in. (box))

Notes: This appears to be the original draft for Dugmore's autobiography, entitled *Autobiography of a wanderer*, and published in 1930. It covers the whole of the author's life and includes reminiscences of Roosevelt in Africa.

Author's holograph manuscript, with a few pages of typescript. The manuscript starts at page 49 and ends at page 215, but is accompanied by several pages of revised (or earlier) drafts.

Item M043

1 Item (Manuscripts (document genre); 9 x 12. x 1.25 in. (box))

Notes: Ambrose in his accompanying criticism states "On reading the commencing pages of the manuscript I felt that here, indeed, was good material. The first 10 pages are excellent, well phrased and promising a book of quite exceptional merit. Thereafter, however, I grew more and more disappointed as the book proceeded, for although some of the situations are very well thought out and the author's knowledge of the terrain is never in doubt, the improbability of the whole set-up renders the story incredible and I fear not attractive to the modern reader."

Author's corrected typescript, with manuscript revisions and manuscript map. In wrappers. Possibly unpublished.

Author's original mixed manuscript and typescript, with manuscript revisions. Possibly unpublished.

1 Item (Manuscripts (document genre); 9.25 x 11 x 1.25 in. (box))

Notes: "I feel constrained, as I sit before a blazing turf fire in my favorite Eire and think on the past, with all the hazards, dangers and hair-breadth escapes which have come my way, to set on paper some of the adventures and exploits which, willy nilly, as a photographer of wild game, a kindly fate has decreed that I should experience - and yet escape with a whole hide! "--Foreword.

Illustrated by the author. Author's revised typescript. In paper boards. Possibly unpublished. Accompanied by a typed criticism by R. H. Ambrose of, probably, an earlier draft, as Dugmore has acted on some of Ambrose's points, including dedicating the work to his wife, and adding Ambrose's name as a collaborator. Five of the 12 chapters are devoted to experiences in Kenya.

Dugmore, A. Radclyffe (Arthur Radclyffe), 1870-1955. Typescript of *Martin Colby and Quills. A story of Canada and of a man who was brutalized by his experience in the War, circa 1920*

1 Item (Manuscripts (document genre); 8.75 x 13 x 1.75 in. (box))

Notes: This novel is based on Dugmore's experiences in Canada and partially in the First World War. It is accompanied by a brief criticism by R.H. Ambrose who writes: "This is a story which, shorn of all reference to the 1914/18 War (which cancels out the first 42 pages), possesses both beauty and drama. If the phraseology is at times unversed and at others crude, it nevertheless reveals that picturesque imagination which is the birthright of the writer of fiction. Scenes ring

true and characters live; moreover, combined, as the story is, with interesting and informative matter about the habits and activities of that wonderful creature the beaver, the whole presents a very lively and pleasing book." Dugmore's re-write appears to have acted on Ambrose's advice, as follows: "It is emphasized that all reference to the War should be excluded, and here, no doubt, the Author, in his so obviously fertile imagination, can provide a new background for his commencing chapters. I think it would be preferable to introduce the dog earlier in the script and to re-title the story 'Quills'."

Author's revised typescript, with manuscript alterations. In wrappers. Accompanied by re-write in Dugmore's hand consisting of 100 pages (folio).

Item M049

Notes: An unpublished account of King Theodore based on the work of Ferdinand Gregorovius.

[Dugmore, A. Radclyffe \(Arthur Radclyffe\), 1870-1955. Typescript of Shifting tides: a tale not of the war but of the years which followed, circa 1925](#)

1 Item (Manuscripts (document genre); 9 x 11.25 x 2 in. (box))

Notes: A draft of a novel about the war-time romance and marriage of a British soldier with artistic talent. This novel was previously entitled "His Friend Peter" and it is under this title that the accompanying criticism by R.H. Ambrose deals with the work. "This is a remarkably good attempt at fiction. Indeed, I am of the opinion that the author has a definite flair for work of this kind. The construction of the story is good, the unraveling of the 'plot' very well achieved and the reader's attention held to the end, all good features. Unfortunately much of the work is now out of date and although quite an amount of the script could be retained (subject to revision of unnecessarily prolonged scenes), the story would have to be brought up to date before submission to publishers. This would entail modernizing and re-writing at least 50% of the manuscript. I hope the author will undertake this, for there is undoubted talent in the script."

Author's original corrected typescript, with manuscript revisions.

## Notes:

Two autograph letters written by Livingstone during his stay in England. Livingstone's letter to John Kirk ([4] pages on 1 sheet), written at Newstead Abbey, 28 February 1865, discusses Kirk's draft paper on dye-stuff (probably "On a new dye-wood of the genus *Cudranea*, from tropical Africa," which was published in the *Journal of the Linnean Society: Botany*, volume 9 (1867), pages 229-230), and also makes reference to the Tories in Parliament and the debate over the Zanzibar territory. Persons mentioned in the letter to Kirk include Dr. Watson; Mr. Murray; Pine; Lord Stanley; Mr. Hall; Burton; and the Sultan of Zanzibar. Livingstone's letter to Arthur Mills ([4] pages on 1 sheet), written from 8 Dover Street, Piccadilly, 12 May 1865, mentions the prospect of being examined by the Committee (probably the Select Committee on West African Settlements?), against Burton's assertions, and re-confirms Livingstone's convictions on the value of having missions and missionaries in Africa, including Sierra Leone and Luanda.

Item M153

Stanley, Dorothy, Lady, -1926. Autograph letters signed to a close friend "Mary", from various places, 1879 - 1894

7 Items (Correspondence; 4.5 x 7 in.)

Notes:

Discussing her work as an artist (the first two letters contain charming ink sketches), commenting on London society, her immediate friends and acquaintances, including the explorers' circle and her travels around Great Britain. A revealing archive commencing before she had met Henry M. Stanley and continuing until after their marriage. The first two letters are dated 17 July 1879, 8 pages and 30 July 1879, 10 pages. Both are addressed in very familiar terms to an unidentified addressee. They clearly illustrate Dolly's standing in society as both a hostess and a talented amateur painter. The third letter, 17 August 1886, is a report of the cruise she and her mother, together with fifty other guests including Stanley, undertook around the Isles of Scotland in July. This was on a ship owned by William Mckinnon. Although the biographies indicate that Stanley was courting Dolly at this stage and made his first proposal after the cruise, she makes no mention of him in this close-written four page letter to her intimate correspondent. Perhaps she was in the process of turning down the proposal and thus eliminated him from the report. The fourth letter, dated 29 July 1887, is another account of travels around the north country and Scotland. It includes the details of a "Naval Review Cruise" in the company of several celebrities. "The most interesting were Sir John Kirk who was governor of Zanzibar, Mr. George Mackenzie, one of Mr. Mackinnon's best men ... Sir Francis de Winton the friend and co-worker of Stanley ... I may here mention, in parenthesis, that no credit is given to the report of Stanley's death, the source is absolutely untrustworthy ..." Dolly goes on to mention Horace Waller, David Livingstone and Gordon, in the course of describing the Review. Of the final three letters, the two before her marriage deal with much news of common relations and acquaintances. The third contains a detailed account of the society wedding of Margot Tennant and H.H. Asquith (later Prime Minister). A "tour de force" which shows her capability for detailed observation of people and faces, while emphasizing the prejudices of her upbringing.

Item M154

The Yawl will take me to the mouths of rivers but the Gig must be taken up to the haunts of slavers... a peculiar feature of this gig is that she must have three bulkheads . . . so that if a hippopotamous attacks her & smashes her bows the boat will not sink."); and, thirdly, "Wanted from John [altered to James) Messenger Boat Builder. Teddington near London 1 boat built in sections. . .", of which Messenger has a model (" This boat must be shipped after me to Zanzibar as I only need her for Exploration of lakes in Inner Africa. L. Clifford Smith expressing admiration for Stanley's courage and congratulating him on having sourced the Congo; an account of remittance supplied from the Daily telegraph (1 folded sheet of tissue paper); a handwritten letter from Charles Blandy to Stanley dated from Madeira 19 October 1877 (1 page on 1 folded sheet); and a handwritten copy of the text of a telegram sent to Stanley dated London, 16 October 1877, from John Merry Le Sage of the Daily telegraph. Also included are 7 sepia-toned photographs of Stanley landing at Kabinda, his expeditionary force, and local African people with a letter of explanation dated December 1877 and signed by J.R. Phillips, the brother of the Manchester photographer, R.C. Phillips, who apparently took the photographs. Stanley's letters to Levy-Lawson asks for money to pay his men's wages and transport for them to return home, and comments on the unpopular nature of his "style of exploring", also noting several attacks made on him in the press and mentioning the death of a friend.

Edward Levy-Lawson was the son of Joseph Moses Levy (proprietor of the Sunday times newspaper) and was the editor of the Daily telegraph. In 1875 he added "Lawson" to his surname. In 1892 Levy-Lawson was created a baronet, and in 1919 he was created Viscount Burnham. He was also a member of Parliament. M155d is the accession number in the Russell E. Notes:

Apparently Stanley's response to an award received by him. Describes his expedition to find Livingstone, acknowledges his debt to previous explorers Burton and Speke, states that the country he explored was now open to traders to reap "the rich harvest of ivory which avail them in the far interior," and gives some of his impressions of Livingstone.

The Worshipful Company of Turners is a livery company of the City of London, incorporated under royal charter in 1604, and known for its charitable work. In 1872 H. M. Stanley was granted honorary membership in the Company "for his enterprise in discovering the great traveller, Livingstone, in Central Africa." M157 is the accession number in the Russell E. disappointed that Pond is not coming to London, and mentions his lecture to New York's "elite" in November 1890 and his introduction by Depew. He concludes: "Well, the long struggle between Boer and Briton is now rapidly coming to a close. Our success, though pretty thorough considering, is not of that kind that makes us boastful. Had a multitude of things been otherwise than as they were, or as they should have been, Kruger would long ere this have repented of his temerity in challenging England- but let us be grateful for the small mercy that in the end we see prospect for South Africa making amends for the past and becoming on the eve of the 20th Century, a land to regard with hope..."

Pond, James B. (James Burton), 1838-1903. Draft memorandum of the Henry Morton Stanley tour, 1890 - 1891

1 Item (Manuscripts (document genre); 6 x 9 x 2 in.)

Notes: Contains Pond's account of the lecture tour undertaken by Stanley in the United States after his return from the Emin Pasha expedition. Loaded with anecdotes as well as the financial details and full "goings-on" of the tour (conversations, disagreements, etc.), Pond's notebook describes in great depth the typical important late nineteenth century lecture tour and its organization. The notebook starts with Pond's recollection of how he met Stanley while touring in England in 1886 with Henry Ward Beecher. Mr. G. W. Appleton asked if Pond wanted Stanley to lecture in America. Stanley had done it before, but it was a failure, and Pond was a bit reluctant. Pond discussed the possibilities with Beecher, who responded "You get Stanley if you can. He is one of the greatest men in the world. I have been reading his Through the dark continent. It is a great book. He is doing great work for civilization and the reading world knows about him." Pond goes on to describe his first visit with Stanley, and when asked if he would consider doing another lecture tour in America, Stanley "replied by asking if people ever went to lectures in America." What a dismal failure that first tour must have been! Pond's persuasiveness and charm obviously won over Stanley, who quickly consented to the tour. The rest of the manuscript describes in detail the resulting tour. Stanley and Appleton were apparently eventually involved in a lawsuit over the lecture tour.

Manuscript notebook. Signed by the author in various places and on the manuscript. M185 is the accession number in the Russell E. Train inventory list of the Joseph F. Cullman 3rd Library of Natural History.

## Series 11: Russell E. Train personal papers, 1956-2004

### 6 Items

**Scope and Contents:** The Russell E. Train personal papers that reside with the Train Africana collection primarily document Train's interest in Africa and the development of his collection. Materials cover 1959 to 2004. Train selected and sent portions of the personal papers after the majority of the collection was acquired by the Joseph F. Cullman 3rd Library. These materials often include a personal note from Train, addressed to the Special collections librarian, explaining why the material was to be added to the collection.

The papers have been organized into four groupings: African Safari journals; papers relating to Train's relationships, activities relating to Africa, and his work with the World Wildlife Federation; papers related to Train safaris (1956, 1958, and 1961); as well as papers and correspondence detailing collection development and the creation of the catalog.
